# CONTENTS

Preface	vii
Contributors	ix
1 Protein Engineering in Basic and Applied Biotechnology: A Review <i>Lilia Alberghina and Marina Lotti</i>	1
2 Enhanced Recovery and Folding of Recombinant Proteins Using Fusion Protein Strategies <i>Sophia Hober and Mathias Uhlén</i>	23
3 Protein Engineering for Affinity Purification: The <i>Strep</i> -tag <i>Thomas G.M. Schmidt and Arne Skerra</i>	41
4 <i>Candida rugosa</i> Lipases: From Molecular Evolution Analysis to the Design of a Synthetic Gene <i>Marina Lotti and Lilia Alberghina</i>	63
5 Structure-Function Studies on Cutinase, a Small Lipolytic Enzyme with a Water Accessible Active Site <i>Sonia Longhi, Anne Nicolas, Christian Jelsch and Christian Cambillau</i>	75
6 Lipases from <i>Rhizopus</i> Species: Genetics, Structure and Applications <i>Uwe T. Bornscheuer, Jürgen Pleiss, Claudia Schmidt-Dannert and Rolf D. Schmid</i>	115
7 Solvent Engineering Modulates Stereoselectivity of Microbial Lipases <i>Enrico Cernia, Cleofe Palocci and Simonetta Soro</i>	135
8 Stabilization of Industrial Enzymes by Protein Engineering <i>Guido Grandi, Imma Margarit, Francesco Frigerio, Renzo Nogarotto, Giovanna Carpani, Renata Grifantini and Giuliano Galli</i>	147
9 Design of Biotechnologically Applicable Yeast Carboxypeptidase Y Mutants with Increased Preference for Charged P <sub>1</sub> Residues <i>Kjeld Olesen and Klaus Breddam</i>	159
10 Engineering $\beta$ -Glycoside Hydrolases <i>R.A.J. Warren</i>	169
11 Engineering Specificity and Stability in Glucoamylase from <i>Aspergillus niger</i> <i>Torben P. Frandsen, Henri-Pierre Fierobe and Birte Svensson</i>	189
12 Pectin Modifying Enzymes and Designer Pectins <i>Olga Mayans, John Jenkins, Drummond Smith, Kathryn Worboys and Richard Pickersgill</i>	207

13	Engineering Proteins for the Degradation of Recalcitrant Compounds <i>Dick B. Janssen, Jiří Damborsky, Rick Rink and Geja H. Krooshof</i>	227
14	Protein Engineering for Biosensors <i>Masuo Aizawa, Yasuko Yanagida, Tetsuya Haruyama and Eiry Kobatake</i>	245
15	Protein Engineering in Vaccine Development <i>Guido Grandi, Maria Grazia Pizza, Enzo Scarlato and Rino Rappuoli</i>	267
16	Exploring Molecular Recognition by Combinatorial and Rational Approaches <i>Anna Tramontano and Franco Felici</i>	277
17	Production and Potential Applications of Recombinant Gastric Lipases in Biotechnology <i>Stéphane Canaan, Liliane Dupuis, Mireille Rivière, Anne Belaïch, Robert Verger, Jean L. Romette and Catherine Wicker-Planquart</i>	293
18	Inhibition of Ras-Dependent Signal Transduction for Therapeutic Purposes: Protein Engineering of a Ras-Specific Guanine Nucleotide Exchange Factor <i>Marco Vanoni, Paola Bossù, Riccardo Bertini and Lilia Alberghina</i>	309
19	Expression and Use of Tagged Cell Surface Receptors for Drug Discovery <i>Kerry J. Koller, Emily Tate, Ann M. Davis, Lesley Farrington and Erik A. Whitehorn</i>	323
20	Estrogen Receptor as a Target for New Drug Discovery <i>Caroline E. Connor and Donald P. McDonnell</i>	339
21	Molecular Bioscreening in Oncology <i>Giulio Draetta and Michael Boisclair</i>	355
