Preface

iii

| | | | |
|--|----------|---|-----------|
| 1 TCP/IP at a Glance | 1 | <i>(TCP/IP at a Glance, continued)</i> | |
| Introduction | 1 | Lab 1.1 Installing the TCP/IP Protocol | 21 |
| Lesson 1.1 Acronyms and Terminology | 2 | Exploratory Worksheet 1 TCP/IP Options | 27 |
| Lesson 1.2 What Is TCP/IP? | 5 | Summary | 28 |
| TCP/IP Protocol Overview | 6 | Q&A | 29 |
| A Word on Protocol Stacks and Protocols | 6 | | |
| Generic TCP/IP Features | 6 | | |
| Microsoft TCP/IP Features | 7 | | |
| Lesson 1.3 The History of the TCP/IP Protocol | 10 | 2 TCP/IP Test Utilities and Name Resolution | 33 |
| The DARPA, DOD, ARPANET, TCP/IP Connection | 10 | Introduction | 33 |
| The Relationship between TCP/IP, UNIX, and C | 12 | Lesson 2.1 Testing Your TCP/IP Configuration | 34 |
| TCP/IP—Today and Tomorrow | 13 | What Are the TCP/IP Test Utilities? General Information about the TCP/IP Utilities Provided with Windows NT | 34 |
| Lesson 1.4 RFCs and the Importance of Standards | 14 | The IPCONFIG Command | 38 |
| What Is a RFC? | 14 | IPCONFIG Switches | 40 |
| Who Defines Internet Standards? | 15 | The PING Command | 41 |
| A Quick Note on RFC Document Precedence | 15 | Lab 2.2 Using PING | 43 |
| Lesson 1.5 Installing Microsoft TCP/IP 4.0 | 17 | The ARP Command | 44 |
| Default Windows NT Networking Installation | 17 | How Does ARP Resolve Addresses? RARP | 46 |
| What Is an IP Address, Subnet Mask, and Default Gateway? | 17 | Lab 2.3 Using ARP | 47 |
| Static versus Dynamic IP Address Management | 18 | The TRACERT Utility | 48 |
| Basic Default TCP/IP Installation Using DHCP | 19 | Lab 2.4 Using TRACERT (Optional) | 50 |
| Basic TCP/IP Installation Using a Static IP Address | 19 | Lesson 2.2 The Name Resolution Game | 51 |
| Adding TCP/IP after Installation of Windows NT | 20 | The TCP/IP Name Resolution Game | 51 |
| What Gets Installed? | 20 | FQDN (Fully Qualified Domain Name) Name Resolution | 53 |
| What Other Things Can I Install? | 21 | Lab 2.5 Locating and Viewing the HOSTS and LMHOSTS Files | 56 |
| | | Summary | 58 |
| | | Q&A | 59 |

3 Digging Deeper into Microsoft TCP/IP 63

| | |
|---------------------------------------|----|
| Introduction | 63 |
| Lesson 3.1 Microsoft's | |
| Implementation of TCP/IP | 64 |
| <i>Microsoft TCP/IP Network</i> | |
| <i>Transport Overview</i> | 65 |
| <i>The Microsoft Network Model</i> | 66 |
| Lab 3.1 Testing a TCP Socket | 74 |
| Lesson 3.2 Remote Access and | |
| Microsoft TCP/IP | 74 |
| <i>What Is the Difference between</i> | |
| <i>Dial-Up Networking and RAS?</i> | 75 |
| <i>Dial-Up and RAS Protocols</i> | 75 |
| <i>Remote Network Physical</i> | |
| <i>Connection Methods</i> | 76 |
| <i>RAS and TCP/IP</i> | 76 |
| Lesson 3.3 More on TCP/IP | |
| Features | 77 |
| <i>Multi-Homed Computers</i> | |
| <i>Introduced</i> | 77 |
| <i>IP Forwarding Introduced</i> | 77 |
| <i>RIP for IP Introduced</i> | 77 |
| Lab 3.2 Locating the IP | |
| Forwarding and RIP for IP | |
| Functions | 79 |
| <i>TCP/IP Security</i> | 80 |
| Lab 3.3 Accessing and Viewing | |
| Microsoft TCP/IP Security | 82 |
| Lesson 3.4 TCP Windows and | |
| Handshaking | 83 |
| <i>What's a TCP Handshake?</i> | 83 |
| <i>What's a TCP Sliding Window?</i> | 84 |
| <i>Setting a TCP Sliding Window</i> | 84 |
| Summary | 85 |
| Q&A | 86 |

4 IP Addressing and TCP/IP Subnetting Demystified 91

| | |
|--------------|----|
| Introduction | 91 |
|--------------|----|

(IP Addressing and TCP/IP Subnetting
Demystified, continued)

| | |
|---|-----|
| Lesson 4.1 Defining IP Addresses | |
| and Subnet Masks | 92 |
| <i>IP Addresses, Subnets, and Default</i> | |
| <i>Gateways Revisited</i> | 92 |
| Lab 4.1 Binary/Decimal | |
| Conversions | 97 |
| <i>Part 1</i> | 97 |
| <i>Part 2</i> | 97 |
| Lesson 4.2 IP Address Classes | 98 |
| <i>What Is an IP Address Class?</i> | 98 |
| Lesson 4.3 Custom Subnet | |
| Masking | 106 |
| <i>Custom Subnetting at a Glance</i> | 106 |
| <i>Getting into the Meat</i> | |
| <i>of the Matter</i> | 108 |
| <i>The Three Types of Problems</i> | 111 |
| Lab 4.3 Custom Subnetting | 117 |
| Lesson 4.4 Calculating Subnet | |
| Address Ranges | 118 |
| <i>What Is a Subnet IP Range?</i> | 118 |
| <i>One More Rule . . .</i> | 118 |
| <i>How Do We Construct the Address</i> | |
| <i>Ranges?</i> | 119 |
| Lab 4.4 Calculating Host Subnet | |
| Ranges | 120 |
| Summary | 122 |
| Q&A | 123 |

5 IP Routing 127

| | |
|---------------------------------------|-----|
| Introduction | 127 |
| Lesson 5.1 Routing Overview | 128 |
| <i>Do I Need to Route My Network?</i> | 128 |
| <i>What's the Difference between</i> | |
| <i>a Default Gateway, Router,</i> | |
| <i>and Multi-Homed Computer?</i> | 128 |
| <i>So How Does a Router Work?</i> | 128 |
| <i>What Does a Route Table</i> | |
| <i>Look Like?</i> | 130 |
| Lesson 5.2 The ROUTE | |
| Command | 132 |
| <i>ROUTE Command Overview</i> | 133 |
| <i>ROUTE Command Syntax</i> | 133 |

(IP Routing, continued)

| | |
|---|-----|
| Lab 5.1 Using the ROUTE Command | 136 |
| Lesson 5.3 Determining and Configuring Routes | 137 |
| <i>First Things First</i> | 137 |
| <i>The Typical Route Table Problem</i> | 138 |
| <i>The Scenario</i> | 138 |
| Lab 5.2 Configuring Static Route Tables | 142 |
| <i>Problem Scenario 1</i> | 142 |
| <i>Problem Scenario 2</i> | 143 |
| <i>Problem Scenario 3</i> | 143 |
| Lesson 5.4 Configuring Dynamic Routing in Windows NT | 145 |
| <i>Dynamic Routing and Windows NT</i> | 145 |
| <i>How Does RIP for IP Work?</i> | 145 |
| <i>Installation of RIP for IP</i> | 146 |
| <i>Using Static and Dynamic Routers on the Same Network</i> | 149 |
| Summary | 152 |
| Q&A | 153 |

6 NetBIOS, Browsing, and WINS **157**

| | |
|--|-----|
| Introduction | 157 |
| Lesson 6.1 NetBIOS Naming | |
| Overview | 158 |
| <i>What Is NetBIOS?</i> | 158 |
| <i>NetBIOS Requirements and Registered Names</i> | 159 |
| <i>A Word on Naming Conventions</i> | 160 |
| <i>Broadcast Resolution Basics</i> | 161 |
| <i>A Quick Fix—NetBIOS Scopes</i> | 161 |
| <i>TCP/IP and NetBIOS Names?</i> | 162 |
| <i>NBT Name Management</i> | 163 |
| Lesson 6.2 Browsing and NetBIOS | 164 |
| <i>Microsoft Browsing Overview</i> | 164 |
| <i>The Browsing Process in a Nutshell</i> | 165 |
| <i>Problems Browsing across Routers?</i> | 165 |

(NetBIOS, Browsing, and WINS, continued)

| | |
|--|-----|
| Lesson 6.3 Before There Was WINS, There Was LMHOSTS | 166 |
| <i>The LMHOSTS File and Its Purpose</i> | 167 |
| <i>How Microsoft TCP/IP Uses the LMHOSTS File</i> | 167 |
| <i>Additional LMHOSTS Commands</i> | 168 |
| Lab 6.1 Creating a LMHOSTS File | 170 |
| <i>Tips on Creating and Managing LMHOSTS Files</i> | 171 |
| Lesson 6.4 The Windows Internet Naming Service (WINS) | 171 |
| <i>WINS Defined</i> | 172 |
| <i>NetBIOS for TCP/IP (NBT)</i> | 172 |
| <i>Name Resolution Modes</i> | 172 |
| <i>The NetBIOS Name Resolution Process</i> | 173 |
| <i>What about Non-WINS Clients Who Need to Access NetBIOS Computers?</i> | 174 |
| Lesson 6.5 Installing and Configuring WINS | 175 |
| <i>Installing the Service</i> | 175 |
| <i>Starting and Stopping the WINS Service</i> | 178 |
| <i>Configuring a WINS Client</i> | 180 |
| <i>Working with the WINS Manager Application</i> | 182 |
| <i>Managing Registration Parameters</i> | 184 |
| <i>Configuring Static versus Dynamic Mappings</i> | 187 |
| <i>Understanding and Configuring WINS Replication</i> | 188 |
| <i>Integrating WINS and LMHOSTS</i> | 193 |
| Lab 6.2 Installing and Configuring WINS | 193 |
| Lesson 6.6 WINS Troubleshooting and Maintenance | 194 |
| <i>General WINS and NetBIOS Troubleshooting</i> | 194 |
| <i>The NBTSTAT Utility</i> | 195 |
| <i>WINS Database Maintenance</i> | 197 |
| <i>Compressing the WINS Database</i> | 198 |
| Summary | 199 |
| Q&A | 200 |

7 The Domain Name System and Microsoft DNS Server 205

| | |
|--|-----|
| Introduction | 205 |
| Lesson 7.1 DNS Overview | 206 |
| <i>What Is DNS?</i> | 206 |
| <i>A Little DNS History</i> | 206 |
| <i>Databases and DNS</i> | 207 |
| Lesson 7.2 The Nuts-and-Bolts of DNS | 208 |
| <i>Resolvers and Name Servers</i> | 208 |
| <i>The Name Resolution Process</i> | 208 |
| Lesson 7.3 Putting More Pieces in Place | 210 |
| Lesson 7.4 DNS Name Server Types | 212 |
| <i>Variations on a Basic Theme</i> | 214 |
| <i>DNS Server Planning</i> | 214 |
| Lesson 7.5 Common DNS Files and Resource Records | 215 |
| <i>DNS Database Files</i> | 215 |
| <i>Common DNS Resource Records</i> | 216 |
| Lesson 7.6 FQDN Name Resolution Revisited | 216 |
| <i>DNS, WINS, and HOSTS Files</i> | 217 |
| <i>The Microsoft Host Name Resolution Process</i> | 217 |
| Lesson 7.7 Installing and Configuring Microsoft DNS Server | 218 |
| <i>General Installation Requirements</i> | 219 |
| <i>Installing the Microsoft DNS Server Service</i> | 220 |
| <i>Basic Configuration of Microsoft DNS Server</i> | 220 |
| <i>Adding Resource Records</i> | 228 |
| <i>IN-ADDR.ARPA and Reverse Lookup</i> | 230 |
| <i>Advanced Configuration of Microsoft DNS Server</i> | 232 |
| Lab 7.1 Installing and Configuring Microsoft DNS Server | 240 |
| <i>On the NT Server</i> | 241 |
| <i>On the Workstation</i> | 241 |

(The Domain Name System and Microsoft DNS Server, continued)

| | |
|--|-----|
| Lesson 7.8 Troubleshooting DNS and Name Resolution | 242 |
| <i>General Name Resolution Troubleshooting</i> | 242 |
| <i>The NSLOOKUP Utility</i> | 243 |
| Summary | 245 |
| Q&A | 246 |

8 Microsoft DHCP Server and DHCP Relay Agent 249

| | |
|---|-----|
| Introduction | 249 |
| Lesson 8.1 DHCP Overview | 250 |
| <i>What Is DHCP?</i> | 250 |
| <i>Why Use DHCP?</i> | 250 |
| Lesson 8.2 Installing DHCP | 253 |
| <i>Windows NT Installation Requirements</i> | 253 |
| Lab 8.1 Installing Microsoft DHCP Server | 254 |
| Lesson 8.3 Configuring Microsoft DHCP Server | 257 |
| <i>The DHCP Server Service</i> | 257 |
| <i>Opening Microsoft DHCP Server Global Options versus Local Scopes</i> | 260 |
| <i>Configuring a Local Scope</i> | 261 |
| <i>Adding Other Options to the Scope</i> | 264 |
| <i>Configuring Global Scope Options</i> | 266 |
| <i>Configuring Default Scope Values</i> | 266 |
| <i>Client Leases</i> | 266 |
| <i>DHCP and IPCONFIG</i> | 268 |
| Lab 8.2 Configuring DHCP in a Single Subnet | 269 |
| Lesson 8.4 DHCP Advanced Configuration | 269 |
| <i>Multiple Scopes</i> | 270 |
| <i>Multiple DHCP Servers and Fault Tolerance</i> | 270 |
| <i>Managing the DHCP Database</i> | 271 |

(Microsoft DHCP Server and DHCP Relay Agent, continued)

| | |
|--|-----|
| Lab 8.3 Configuring DHCP Multiple Parameters and Scopes (Optional) | 273 |
| Lesson 8.5 DHCP Relay Agent | 274 |
| <i>What Is a Relay Agent?</i> | 274 |
| <i>Why Do We Need DHCP Relay Agent?</i> | 275 |
| <i>How DHCP Relay Agent Works</i> | 275 |
| <i>Installing and Configuring DHCP Relay Agent</i> | 275 |
| Lab 8.4 Installing and Configuring DHCP Relay Agent | 280 |
| Lesson 8.6 Troubleshooting Microsoft DHCP Server Implementations | 281 |
| Summary | 283 |
| Q&A | 284 |

9 Multi-System Connectivity 289

| | |
|--|-----|
| Introduction | 289 |
| Lesson 9.1 Cross-Platform Connectivity | 290 |
| Lesson 9.2 The Nuts-and-Bolts of Cross-Platform Connectivity | 291 |
| <i>What Resources Are We Trying to Use?</i> | 291 |
| Lesson 9.3 Cross-Platform TCP/IP Utilities | 293 |
| <i>TCP/IP Printing Commands</i> | 293 |
| Lab 9.1 Configuring and Using TCP/IP Printing Services | 296 |
| <i>File Transfer, Remote Execution, and Terminal Emulation Utilities</i> | 299 |
| Lab 9.2 Using FTP | 301 |
| Lesson 9.4 Network and Local Server Management Utilities | 304 |
| <i>SNMP—The Simple Network Management Protocol</i> | 305 |
| <i>Configuring SNMP in Windows NT</i> | 307 |

(Multi-System Connectivity, continued)

| | |
|---|-----|
| Lab 9.3 Installing and Testing the SNMP Service (Optional) | 313 |
| Lesson 9.5 Performance Manager and Network Monitor | 314 |
| Lab 9.5 Capturing and Viewing Packets Using Network Monitor | 317 |
| <i>Performance Monitor</i> | 318 |
| Lesson 9.6 TCP/IP Connectivity Using BackOffice Products | 319 |
| <i>Microsoft Internet Information Server</i> | 320 |
| <i>Microsoft Proxy Server</i> | 320 |
| Summary | 321 |
| Q&A | 322 |

10 TCP/IP Troubleshooting 325

| | |
|--|-----|
| Introduction | 325 |
| Lesson 10.1 TCP/IP Troubleshooting at a Glance | 326 |
| Lesson 10.2 Generic Troubleshooting Technique | 326 |
| Lesson 10.3 TCP/IP Troubleshooting Tools | 328 |
| <i>Configuration Tools</i> | 329 |
| <i>Connectivity Tools</i> | 329 |
| <i>Name Resolution Tools</i> | 330 |
| Lesson 10.4 How to Troubleshoot TCP/IP | 331 |
| <i>Troubleshooting TCP/IP Configurations</i> | 332 |
| <i>Using IPCONFIG to Locate the Problem</i> | 333 |
| <i>Troubleshooting Connectivity Problems</i> | 334 |
| <i>Name Resolution Troubleshooting</i> | 334 |
| Lesson 10.5 Houston, We Have a Problem—Now What? | 336 |
| Summary | 338 |
| Q&A | 339 |
| Index | 343 |
