Preface	xiii
1 INTRODUCTION TO BANANA, ABACÁ AND ENSET – D.R. Jones	1
The Genera <i>Musa</i> and <i>Ensete</i>	1
Banana	2
Abacá	30
Enset	31
2 FUNGAL DISEASES OF THE FOLIAGE	37
Sigatoka Leaf Spots	37
Black Leaf Streak – J. Carlier, E. Fouré, F. Gauhl, D.R. Jones	
P. Lepoivre, X. Mourichon, C. Pasberg-Gauhl and R.A. Romero	37
Sigatoka – D.R. Jones	79
Sigatoka-like Leaf Spots	92
Phaeoseptoria Leaf Spot – D.R. Jones	92
Septoria Leaf Spot – J. Carlier, X. Mourichon and D.R. Jones	93
Other Leaf Spots	97
Black Cross Leaf Spot – D.R. Jones	97
Cordana Leaf Spot – D.R. Jones	99
Deightonella Leaf Spot – D.R. Jones, E.O. Lomerio, M. Tessera	
and A.J. Quimio	102
Drechslera Leaf Spot – D.R. Jones, M. Tessera and A.J. Quimio	105
Malayan Leaf Spot – D.R. Jones	105
Pestalotiopsis Leaf Spot – D.R. Jones	107
Pyricularia Leaf Spot of Enset – M. Tessera and A.J. Quimio	108
Speckles, Freckle and Rust	108
Cladosporium Speckle – D.R. Jones	108
Leaf Speckle – D.R. Jones	112
Mycosphaerella Speckle – D.R. Jones	113
Tropical Speckle – D.R. Jones	116
Freckle – D.R. Jones	120
Rust – D.R. Jones	125

3	FUNGAL DISEASES OF THE ROOT, CORM AND PSEUDOSTEM	143
	Fusarium Wilt – <i>R.C. Ploetz and K.G. Pegg</i>	143
	Armillaria Corm Rot – <i>D.R. Jones and R.H. Stover</i>	159
	Cylindrocladium Root Rot – <i>D.R. Jones</i>	159
	Rosellinia Root and Corm Rot – <i>D.R. Jones</i>	160
	Damping-off of <i>Musa</i> Seedlings – <i>D.R. Jones and R.H. Stover</i>	160
	Deightonella Pseudostem Rot of Abacá – <i>E.O. Lomerio</i>	161
	Fungal Root Rot – <i>D.R. Jones and R.H. Stover</i>	162
	Marasmiellus Pseudostem and Root Rot – <i>D.R. Jones and E.O. Lomerio</i>	163
	Pseudostem Heart Rot – <i>D.R. Jones and E.O. Lomerio</i>	166
	Ceratocystis Corm Rot – <i>D.R. Jones</i>	167
	Sclerotium Root and Corm Rot of Enset – <i>M. Tessera and A.J. Quimio</i>	167
	Cephalosporium Inflorescence Spot of Enset – <i>M. Tessera and A.J. Quimio</i>	168
4	FUNGAL DISEASES OF BANANA FRUIT	173
	Preharvest Diseases – <i>D.R. Jones and R.H. Stover</i>	173
	Introduction	173
	Anthraxnose Fruit Rot	173
	Brown Spot	174
	Cigar-end Rot	175
	Tip-end Rot	178
	Deightonella Speckle	181
	Diamond Spot	183
	Fruit Freckle	185
	Peduncle Rot	186
	Pitting Disease	186
	Sooty Mould and Sooty Blotch	189
	Postharvest Diseases – <i>I.F. Muirhead and D.R. Jones</i>	190
	Introduction	190
	Crown Rot	191
	Anthraxnose	199
	Fungal Scald	203
	Stem-end Rot	203
	Main-stalk Rot	203
	Botryodiplodia Finger Rot	203
	Squirter	205
	Other Diseases	206
5	DISEASES CAUSED BY BACTERIA – <i>R. Thwaites, S.J. Eden-Green and R. Black</i>	213
	Vascular Wilt Diseases	213
	Moko	213
	Blood Disease	221
	Javanese Vascular Disease	223
	Bacterial Wilt of Abacá	225
	Bacterial Wilt of Enset	226
	Diseases of Fruit	227
	Bacterial Finger-tip Rot	227
	Bugtok	227
	Rots of the Corm and Pseudostem	231
	Bacterial Head Rot	231
	Bacterial Soft Rot of Rhizome and Pseudostem	234
	Pseudostem Wet Rot	235

DISEASES CAUSED BY VIRUSES	241
Bunchy Top – <i>J.E. Thomas and M.L. Iskra-Caruana</i>	241
Bract Mosaic – <i>J.E. Thomas, M.L. Iskra-Caruana, L.V. Magnaye and D.R. Jones</i>	253
Banana Mosaic – <i>B.E.L. Lockhart and D.R. Jones</i>	256
Banana Streak – <i>B.E.L. Lockhart and D.R. Jones</i>	263
Banana Mild Mosaic – <i>J.E. Thomas, B.E.L. Lockhart and M.L. Iskra-Caruana</i>	275
Banana Dieback – <i>J.d'A. Hughes and J.E. Thomas</i>	278
Abacá Mosaic – <i>J.E. Thomas and L.V. Magnaye</i>	279
Enset Streak – <i>M. Tessera and A.J. Quimio</i>	283
NEMATODE PATHOGENS	295
Burrowing Nematode – <i>J.L. Sarah</i>	295
Root-lesion Nematodes – <i>S.R. Gowen</i>	303
Spiral Nematode – <i>S.R. Gowen</i>	306
Root-knot Nematodes – <i>D. De Waele</i>	307
Other Nematodes – <i>D. De Waele, S.R. Gowen, M. Tessera and A.J. Quimio</i>	314
NON-INFECTIOUS DISORDERS OF BANANA – E. Lahav, Y. Israeli, D.R. Jones and R.H. Stover	325
Introduction	325
Plant Disorders	325
Elephantiasis	325
Heart-leaf Unfurling Disorder of Plantain	325
High Mat	326
Leaf-edge Chlorosis	326
Roxana Disease	327
Yellow Mat	328
Fruit Disorders	329
Alligator Skin	329
Dark Centre of Ripe Fruit	329
Fruit Fall or Break Neck	330
Hard Lump	330
Malformed Fingers and Hands	331
Maturity Stain	331
Mixed Ripe Fruit	332
Neer Vazhai	332
Physiological Finger Drop	332
Premature Field Ripening	333
Sinkers	333
Split Peel	334
Uneven Degreening	334
Withered Pedicels	335
Yellow Pulp	336
MINERAL DEFICIENCIES OF BANANA – E. Lahav and Y. Israeli	339
Introduction	339
Boron Deficiency	339
Calcium Deficiency	340
Copper Deficiency	341
Iron Deficiency	341

Magnesium Deficiency	341
Manganese Deficiency	343
Nitrogen Deficiency	344
Phosphorus Deficiency	344
Potassium Deficiency	345
Sulphur Deficiency	345
Zinc Deficiency	348
10 INJURIES TO BANANA CAUSED BY ADVERSE CLIMATE AND WEATHER – Y. Israeli and E. Lahav	351
Introduction	351
Seasonal Wind and Windstorm Damage	351
Low-temperature Effects	352
Chilling and Frost Damage	357
Hail Damage	360
Heat Stress	361
Radiation Damage	364
Drought Stress	365
Excess-water Stress	368
Lightning Injury	369
Under-peel Discoloration	369
11 CHEMICAL INJURY TO BANANA – E. Lahav and Y. Israeli	381
Introduction	381
Injury Caused by Agricultural Chemicals	381
Injury Caused by Fertilizers	381
Injury Caused by Pest Control Chemicals	381
Injury Caused by Herbicides	383
Injury Caused by Desuckering Agents	388
Injury Caused by Elements in Toxic Concentrations	388
Aluminium Toxicity	388
Arsenic Toxicity	388
Boron Toxicity	388
Calcium Toxicity	388
Copper Toxicity	388
Fluorine Toxicity	389
Iron Toxicity	389
Manganese Toxicity	389
Sodium and Chlorine Toxicity	391
12 GENETIC ABNORMALITIES OF BANANA – Y. Israeli and E. Lahav	395
Introduction	395
Variations in Plant Stature	396
Abnormal Foliage	397
Variations in Pseudostem Pigmentation	401
Chimeras	401
Inflorescence and Fruit Variations	402

13	QUARANTINE AND THE SAFE MOVEMENT OF MUSA GERMPLOASM – D.R. Jones and M. Diekmann	409
	Introduction	409
	Movement of Pathogens	412
	Principles of Safe Movement of <i>Musa</i> Germplasm	416
	Development of a System for the Safe Movement of <i>Musa</i> Germplasm	416
	Current Recommendations for the Safe Movement of <i>Musa</i> Germplasm	420
14	BANANA BREEDING FOR DISEASE RESISTANCE	425
	History of Banana Breeding – D.R. Jones	425
	Introduction	425
	Beginnings in the West Indies	425
	Honduras	427
	Brazil	429
	Africa	429
	Triploid Breeding	431
	Guadeloupe	432
	Biotechnological Innovations	432
	Conventional Banana Breeding in Honduras – P.R. Rowe and F.E. Rosales	435
	Introduction	435
	Basis of Early Banana Breeding	435
	The Challenges	436
	Breeding Diploid Parental Lines	436
	Breeding Tetraploids	439
	Conclusions	448
	Unconventional Banana Breeding in Taiwan – S.C. Hwang and C.Y. Tang	449
	Introduction	449
	Somaclonal Variation in <i>Musa</i>	450
	Methods for Screening Somaclonal Variants for Resistance to Fusarium Wilt	451
	Identification of Resistant Clones	453
	Changes in Fruit Quality	454
	Improvement of Resistant Clones	455
	Discussion	456
	Conclusion	457
15	GENETIC ENGINEERING OF BANANA FOR DISEASE RESISTANCE – FUTURE POSSIBILITIES	465
	Introduction – L. Sági	465
	Engineering Resistance to Diseases Caused by Viruses – L. Sági	466
	Engineering Resistance to Diseases Caused by Bacteria – L. Sági	474
	Engineering Resistance to Diseases Caused by Fungi – L. Sági	482
	Engineering Resistance to Diseases Caused by Nematodes – D. De Waele	492
	Conclusion – L. Sági	495
	Index of <i>Musa</i> and <i>Ensete</i> Species, Banana Subgroups and Clone Sets, and Banana, Abacá and Enset Cultivars	517
	General Index	523
