Contents

Preface	ix
Chapter 1: What is CIM?	
1.1 Overview	1
1.2 What Is Manufacturing?	1
1.2.1 Developments in Manufacturing Technology	2
1.2.2 Present World Situation	3
1.2.3 Advanced Manufacturing Technologies	5
1.2.4 Definitions of CIM	6
1.3 Brief History of CIM	6
1.4 CIM Models and Concluding Remarks	9
1.5 References	10
Chapter 2: Integration of Interconnected Networks	
2.1 Overview	12
2.2 Components of CIM and Available AMTs	12
2.2.1 Integration of Subsystems	13
2.2.1.1 Office Automation	14
2.2.1.2 Computer Aided Design	14
2.2.1.3 Computer Numerical Control	15
2.2.1.4 Computer Aided Manufacturing	15
2.2.1.5 Computer Aided Quality Control	16
2.2.1.6 Automatic Storage and Retrieval Systems	16
2.2.1.7 Group Technology	17
2.2.1.8 Computer Aided Process Planning	17
2.2.1.9 Cellular Manufacturing	18
2.2.1.10 Robots	18
2.2.1.11 Flexible Manufacturing System	19
2.3 The Need for Integration	20
2.4 Information Architecture and Planning a CIM System	22
2.5 Communication Networks and Protocols for CIM	23
2.6 Enterprise Modelling	24
2.7 Functional Inter-Relationship Identification	25
2.8 Measurement of Synergy	28
2.9 Concluding Remarks	31
2.10 References	31

Chapter 3: Developments in Justification of CIM

3.1 Overview	32
3.2 Engineering Economic Tools and Indices	33
3.2.1 Payback Method	33
3.2.1.1 Simple Payback	33
3.2.1.2 Discounted Payback	34
3.2.2 Discounted Cash Flow	35
3.2.2.1 Internal rate of return	36
3.2.2.2 Net present value method	36
3.3 Existing approaches for AMT/CIM justification	37
3.3.1 Economic Justification Approaches	38
3.3.2 Analytic Justification Approaches	39
3.3.2.1 Value analysis	39
3.3.2.2 Mathematical analysis	39
3.3.2.3 Risk analysis	39
3.3.3 Strategic Justification Approaches	40
3.3.4 Multicriteria Methods	40
3.3.4.1 Weighted scoring technique.	41
3.3.4.2 Analytic hierarchy process	42
3.4 Shortcomings of the Traditional Decision-Making Techniques	45
3.4.1 Dilemma in Making Manufacturing Decisions	47
3.5 An Insight to Avoid Shortcomings	48
3.6 Value measurement techniques	49
3.6.1 Cost-Value Technique	50
3.7 Concluding Remarks	51
3.8 References	51

Chapter 4: Integrated Approach to CIM Justification and Optimisation

4.1 Overview	53
4.2 Incorporating Strategic Focus into CIM Justification	53
4.3 The Methodology	55
4.3.1 Stage 1: Strategic Decision Profile	57
4.3.2 Stage 2: Performance Measure Evaluation	59
4.3.2.1 Analytic hierarchy process	59
4.3.2.2 Weighted scoring method	61
4.3.3 Comparison of Performance Measures	62
4.3.4 Identifying Suitable Subsystems	63
4.3.4.1 Limitations of the database	66
4.3.5 Equipment Selection Procedure	67
4.7 Concluding Remarks	68
4.8 References	69

Chapter 5: Assessing the Impact of Investment in CIM	
5.1 Overview	70
5.2 Cost-Impact Evaluation in Functional Units	70
5.2.1 Theory on Evaluating Cost-Impact	71
5.2.1.1 Preliminary cost-impact analysis	72
5.2.2.2 Definitive cost-impact analysis	73
5.3 Financial Analysis of the Investment	73
5.3.1 A Methodology to Estimate Financial Benefits of attributes	74
5.3.2 Learning Curve Effect	81
5.4 Application of Cost-Value Technique for Quantification of Intangibles	82
5.5 Utilisation of Cost-Value Method	83
5.6 Concluding Remarks	86
5.7 References	87
Chapter 6: CIM Optimisation	
6.1 Overview	88
6.2 Need for CIM Optimisation	88
6.3 Pitfalls of Sub-Optimisation and Islands of Automation	90
6.4 Identifying Strategic Focus for Global Optimisation	91
6.5 Mathematical Models for CIM Optimisation	91
6.5.1 Goal Programming	92
6.6 Achieving Optimum Resource Allocation	93
6.7 Concluding Remarks	96
6.8 References	96
Chapter 7: A Decision Support System for CIM Investment	
7.1 Overview	98
7.2 Need for Decision Support Systems	98
7.3 Decision Support Systems	99
7.3.1 Transaction Processing Systems	100
7.3.2 Management Information Systems	100
7.3.3 Expert Systems	100
7.3.4 Decision Support Systems	101
7.4 Background and Assumptions	101
7.5 Application of DSSCIM	102
7.5.1 Strategic Decision Profile	103
7.5.2 Evaluation of Performance Measures	106
7.5.3 Identification of Functional Inter-Relationships	108
7.5.4 Evaluation of Tentative Cost-Impact	109
7.5.5 Evaluation of Financial Measure	112
7.5.5.1 Illustrative example for value assignment	113
7.5.6 Calculation of Financial Indices	117
7.5.7 Optimisation	123
7.5.8 Results	124

7.6 Concluding Remarks	125
7.7 Reference	125
Chapter 8: Guidelines for Implementing CIM	
8.1 Overview	126
8.2 Implementation Guidelines	126
8.2.1 Implementation Stages	128
8.3 Concluding Remarks	131
Chapter 9: Conclusion	
9.1 Concluding Remarks	133
9.2 The Significance of the Approach	136
9.3 Future Developments of CIM	138
9.3.1 Developments in Research Directions	141
9.4 References	143
Appendix 1:	
A 1.1 The Computation of Consistency Ratio	144
A 1.2 Priority Weight and Consistency Calculation for Second Order Matrix	147
A 1.3 Reference	148
Appendix 2:	
A 2.1 Benefits gained by the introduction of AMTs	149
A 2.2 The knowledge-base of DSSCIM	153
Index	156
