

# Heat and Mass Transfer

Suranaree University of Technology

31051000576260

Kurt C. Rolle

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1-1	The Importance of Heat and Mass Transfer	1
1-2	Dimensions and Units in Heat and Mass Transfer	7
1-3	The Concepts of Heat and Mass Transfer	8
1-4	The Modes of Heat Transfer	21
1-5	The Modes of Mass Transfer	27
1-6	Mathematical Preliminaries	28
1-7	Engineering Analysis of Heat and Mass Transfer	31
1-8	Summary	31
	Discussion Questions	32
	Practice Problems	33
	References	35
<b>2</b>	<b>Steady State Conduction Heat Transfer</b>	<b>36</b>
2-1	Fourier's Law and Thermal Conductivity	36
2-2	The General Problem of Conduction Heat Transfer	43
2-3	Steady State One-Dimensional Heat Transfer	46
2-4	Steady State Two-Dimensional Heat Transfer	64
2-5	Shape Factor Methods	76
2-6	Numerical Methods of Analysis	84
2-7	Applications of Steady State Heat Transfer	101
2-8	Summary	122
	Discussion Questions	125
	Practice Problems	126
	References	136
<b>3</b>	<b>Transient Conduction Heat Transfer</b>	<b>137</b>
3-1	General Problems in Transient Conduction	137
3-2	Lumped Heat Capacity Systems	140
3-3	One-Dimensional Transient Heat Transfer	145
3-4	Two-Dimensional Transient Heat Transfer	163
3-5	Applications to Solids	171
3-6	Numerical Methods of Analysis	185

## Contents

3-7	Graphical Methods of Analysis	190
3-8	Summary	193
	Discussion Questions	197
	Practice Problems	198
	References	204

## 4

### **Forced Convection Heat Transfer** **205**

4-1	The General Problems of Convection Heat Transfer	205
4-2	Concepts of Fluid Flow and Dimensional Analysis	208
4-3	The Boundary Layer Concept	228
4-4	Convection Heat Transfer at a Flat Plate	241
4-5	Convection Heat Transfer Around Objects	253
4-6	Convection Heat Transfer in Closed Channels	263
4-7	Applications of Convection Heat Transfer	279
4-8	Summary	290
	Discussion Questions	294
	Practice Problems	295
	References	299

## 5

### **Free Convection Heat Transfer** **300**

5-1	The General Concepts of Free Convection	300
5-2	Analysis of Free Convection Along Vertical Surfaces	303
5-3	Free Convection Along Horizontal and Inclined Surfaces	309
5-4	Free Convection Along Horizontal and Vertical Cylinders	313
5-5	Free Convection in Enclosed Spaces	320
5-6	Combined Free and Forced Convection Heat Transfer	323
5-7	Approximate Equations for Free Convection of Air	325
5-8	Summary	326
	Discussion Questions	328
	Practice Problems	328
	References	331

## 6

### **The Nature of Radiation Heat Transfer** **333**

6-1	Electromagnetic Radiation	333
6-2	Black Body Radiation	341
6-3	Gray Body Mechanisms	345
6-4	Geometry of Radiation	350
6-5	Applications of Radiation	364
6-6	Summary	372
	Discussion Questions	374
	Practice Problems	374
	References	380

<b>7</b>	<b>Analysis of Radiation Heat Transfer</b>	<b>381</b>
7-1	Radiosity	381
7-2	Analysis of Two-Surface Radiation Heat Transfer	384
7-3	Analysis of Three-Surface Radiation Heat Transfer	391
7-4	Gas Radiation	398
7-5	Applications of Radiation Heat Transfer	403
7-6	Summary	408
	Discussion Questions	409
	Practice Problems	410
	References	413
<b>8</b>	<b>Mass Transfer</b>	<b>414</b>
8-1	The Mechanisms of Mass Transfer	414
8-2	Analysis of Mixtures	415
8-3	Diffusion Mass Transfer	420
8-4	Convection Mass Transfer	430
8-5	Transient Diffusion	437
8-6	Absorption and Adsorption	441
8-7	Permeability	447
8-8	Summary	456
	Discussion Questions	457
	Practice Problems	458
	References	460
<b>9</b>	<b>Heat Exchangers</b>	<b>461</b>
9-1	General Concepts of Heat Exchangers	461
9-2	Parameters in Heat Exchangers	466
9-3	LMTD Method of Analysis	469
9-4	Effectiveness-NTU Method of Analysis	479
9-5	Compact Heat Exchangers	486
9-6	Summary	492
	Discussion Questions	493
	Practice Problems	493
	References	495
<b>10</b>	<b>Phase Change Heat Transfer</b>	<b>496</b>
10-1	The Mechanisms of Phase Change Heat Transfer	496
10-2	Analysis of Boiling Heat Transfer	499
10-3	Condensing Heat Transfer	513
10-4	Simplified Relationships for Boiling and Condensing Heat Transfer	524
10-5	Empirical Methods and Analysis of Melting and Freezing	527

## Contents

10-6	Applications of Phase Change Heat Transfer	532
10-7	Summary	541
	Discussion Questions	544
	Practice Problems	544
	References	546

## Appendices

A	Mathematical Information	A-1
A-1	Vector Operations	A-1
A-2	Matrix Operations	A-2
A-3	Trigonometric Relationships	A-4
A-4	Table of Integrals	A-4
A-5	Hyperbolic Functions	A-5
A-6	Some Power Series	A-7
A-7	Harmonic Functions	A-8
A-8	Fourier Series	A-10
A-9	Error Function	A-11
A-10	Bessel Functions	A-12
A-11	Roots of Some Transcendental Equations and Associated Coefficients for Transient Conduction in Infinite Plates, Infinite Cylinders, and Spheres	A-16
A-12	Lennard-Jones Intermolecular Force Parameters and Mass Diffusion Function	A-18
B-1	Conversion Factors and Property Tables	B-1
B-2	Thermal Properties of Selected Nonmetallic Solids	B-2
B-3	Thermal Properties of Selected Liquids at Atmospheric Pressure	B-4
B-4	Thermal Properties of Selected Gases at Atmospheric Pressure	B-5
B-5	Approximate Values for Emissivities of Surfaces	B-6
B-6	Thermal Properties of Steam	B-7
B-7	Electrical Resistance of Copper Wire	B-9
B-8	Constants and Coefficients for the Thermal Conductivity Equation	B-9
B-9	Surface Tension for Some Selected Materials at Atmospheric Pressure and Interfacing with Air	B-10
C	Charts	C-1

## Answers to Selected Problems

ANS-1
