Contents

Preface

xv

Chapter 1 Introducing the 68HC12

1

1.1 From Microprocessors to Microcontrollers

1

1.2 The 68HC12 Registers

8

1.2.1 The 68HC12 Accumulators

8

1.2.2 Index Registers, *X* and *Y*

11

1.2.3 Stack Pointer, *SP*

12

1.2.4 Program Counter, *PC*

13

1.2.5 The Condition Code Register

13

Carry (*C*)

14

Zero Flag (*Z*)

14

Negative Flag (*N*)

15

Overflow Flag (*V*)

15

Half-Carry (*H*)

15

Interrupt Mask Flag (*I*)

15

X-Interrupt Mask Flag (*X*)

15

Stop Disable Flag (*S*)

15

1.3	Writing Programs for the 68HC12	16
1.3.1	Editing and Assembling an .ASM File	16
1.3.2	Downloading and Executing the Program	18
1.4	Addressing Modes	22
1.5	Summary	24
	Exercises	24
Chapter 2	Subroutines and Stacks	29
2.1	The System Stack	29
2.2	Subroutines	31
2.3	A Data Stack	35
2.4	Making Subroutines Interactive	39
2.5	Stack Manipulation Words	40
2.6	The Return Stack	46
2.7	Summary	50
	Exercises	51
Chapter 3	68HC12 Arithmetic	53
3.1	Addition and Subtraction	53
3.1.1	Increment and Decrement Instructions	54
3.1.2	Double Numbers	55
3.1.3	Displaying Single and Double Numbers on the Screen	57
3.2	Multiplication	60
3.3	Division	63
3.3.1	16-Bit Signed Division: <i>IDIVS</i>	63
3.3.2	Extended Unsigned Division: <i>EDIV</i>	66
3.3.3	Extended Signed Division: <i>EDIVS</i>	69
3.3.4	Integer and Fractional Divide: <i>IDIV</i> and <i>FDIV</i>	71
	The Instruction <i>IDIV</i>	71
	The Instruction <i>FDIV</i> , Fractional Divide	73
	A 68HC11 Version of <i>UM/MOD</i>	74
3.4	Shift and Rotate Instructions	75
3.4.1	Logical Shift Instructions	76
	Logic Shift Left	76
	Logic Shift Right	76
3.4.2	Arithmetic Shift Instructions	77
3.4.3	Rotate Instructions	77
	Rotate Left	78
	Rotate Right	78
3.4.4	Shifting 16-Bit Words	78
3.5	Summary	79
	Exercises	82

Chapter 4	WHYP—An Extensible Language	84
4.1	A Closer Look at WHYP	84
4.2	Defining New WHYP Words	86
4.2.1	Defining New Words Interactively	86
4.2.2	<i>SEE</i> and <i>SHOW</i>	89
4.2.3	Single-Stepping through Colon Definitions	90
4.2.4	Loading WHYP Words from a File	91
4.2.5	<i>CR</i> and <i>.</i>	92
4.3	Variables	94
4.3.1	Fetch and Store	95
4.3.2	System Variables	99
4.3.3	Arrays	100
4.4	Constants	101
4.4.1	Tables	102
4.5	EEPROM	105
4.5.1	Erasing the EEPROM	106
4.5.2	Programming the EEPROM	109
4.5.3	Storing WHYP Programs in the EEPROM	110
4.6	Summary	114
	Exercises	116
Chapter 5	Branching and Looping	120
5.1	68HC12 Branch Instructions	120
5.1.1	Short Conditional Branch Instructions	121
5.1.2	Unconditional Branch and Jump Instructions	123
5.1.3	Branching Examples	123
	Branching on the Zero Flag <i>Z</i>	123
	Branching on the Negative Flag <i>N</i>	126
	Branching on the Carry and Overflow Flags, <i>C</i> and <i>V</i>	127
5.1.4	Bit-Condition Branch Instructions	127
5.1.5	Unsigned and Signed Branch Instructions	128
5.2	WHYP Branching and Looping Words	130
5.2.1	WHYP Conditional Words	131
5.2.2	WHYP Logical Words	133
5.2.3	<i>IF ... ELSE ... THEN</i>	134
5.2.4	<i>FOR ... NEXT</i> Loop	137
	A <i>FOR ... NEXT</i> Delay Loop	139
5.2.5	<i>BEGIN ... AGAIN</i>	141
5.2.6	<i>BEGIN ... UNTIL</i>	142
5.2.7	<i>BEGIN ... WHILE ... REPEAT</i>	145
	Sine and Arcsine	147
5.2.8	<i>DO ... LOOP</i>	150
	The Word <i>LEAVE</i>	151

5.3	Recursion in WHYP	153
5.4	Summary	155
	Exercises	157
Chapter 6	Interrupts	162
6.1	68HC12 Interrupts	163
6.1.1	68HC12 Nonmaskable Interrupts	163
	Reset	163
	COP (Computer Operating Properly)	163
	Unimplemented Instruction Trap	164
	Software Interrupts (SWI)	164
	Nonmaskable Interrupt Request (XIRQ)	165
6.1.2	68HC12 Maskable Interrupts	165
6.2	68HC11 Interrupts	167
6.3	Interrupt Vector Jump Tables	168
6.3.1	68HC711E9	168
6.3.2	D-Bug12	170
6.4	Writing WHYP Interrupt Service Routines	172
6.5	Real-Time Interrupts	173
6.5.1	Real-Time Interrupt on a 68HC11	176
6.6	Writing Assembly Language Interrupt Service Routines	178
6.7	Summary	181
	Exercises	181
Chapter 7	Parallel Interfacing	183
7.1	Parallel I/O Ports	183
7.1.1	The MC68HC812A4 Parallel Ports	184
7.1.2	The MC78HC912B32 Parallel Ports	186
7.1.3	The MC68HC711E9 Parallel Ports	188
	Port A	188
	Port B	188
	Port C	189
	Port D	191
	Port E	191
7.2	Using Parallel Ports	191
7.2.1	Using Parallel Port Outputs	191
7.2.2	Using Parallel Port Inputs	194
7.3	Seven-Segment Displays	195
7.3.1	Common-Anode Displays	196
7.3.2	Common-Cathode Displays—The MC14495-1	198
7.4	Keypad Interfacing	199
7.4.1	4 × 4 Hex Keypad	199
7.4.2	The 74C922 16-Key Encoder	204
7.4.3	Interfacing a 16 × 1 Hex Keypad Using a 74154 Decoder	205

15	Liquid Crystal Displays	207
16	Interrupt-Driven Traffic Lights	212
17	Summary	215
	Exercises	216
Chapter 8	The Serial Peripheral Interface (SPI)	220
8.1	Operation of the SPI	221
8.1.1	The SPI Registers	222
8.1.2	Programming the SPI in WHYP	225
8.2	Keypad Interfacing with 74165 Shift Registers	226
8.3	Four-Digit Seven-Segment Display Using a MC14499	228
8.4	The 68HC68T1 Real-Time Clock	232
8.5	Summary	236
	Exercises	237
Chapter 9	Analog-to-Digital Converter	243
9.1	Analog-to-Digital Conversion	243
9.2	The 68HC11 A/D Converter	245
9.2.1	WHYP Words for the 68HC11 A/D Converter	248
9.3	The 68HC12 A/D Converter	250
9.3.1	WHYP Words for the 68HC12 A/D Converter	254
9.4	Design of a Digital Compass	256
9.5	Summary	260
	Exercises	260
Chapter 10	Timers	264
10.1	The 68HC12 Programmable Timer	265
10.1.1	The 68HC11 Timer Registers	268
10.2	Output Compares	269
10.2.1	Pulse Train Example	271
10.2.2	Output Compares on a 68HC11	274
10.3	Input Capture	275
10.3.1	Input Captures on a 68HC11	277
10.4	Pulse Accumulator	277
10.4.1	The Pulse Accumulator on a 68HC11	280
10.5	Timing Interrupt Service Routines	280
10.6	A Circular Queue Data Structure	282
10.7	Keypad Interfacing Using Interrupts	284
10.8	Pulse Train Using Interrupts	286
10.9	Measuring the Period of a Pulse Train Using Interrupts	289
10.10	The Polaroid Ultrasonic Transducer	292
10.11	Summary	295
	Exercises	296

Chapter 11	The Serial Communication Interface (SCI)	302
11.1	Asynchronous Serial I/O	302
11.2	The 68HC12 SCI Interface	304
	The Data Register	305
	The Status Register	306
	The Control Registers	307
	The Baud Rate Control Register	309
11.2.1	Programming the SCI Port	310
11.2.2	The 68HC11 SCI Registers	312
11.3	Programming the SCI in WHYP	314
11.3.1	Communicating with a PC	316
11.3.2	Testing SCI1 with the LOOP Function	317
11.3.3	Sending Register Values to the PC	319
11.4	SCI Interface Using Interrupts	322
11.4.1	Master-Slave SCI Communications	324
11.5	Summary	326
	Exercises	327
Chapter 12	Strings and Number Conversions	331
12.1	WHYP Strings	332
12.2	ASCII Number String to Binary Conversion	333
12.3	Binary Number to ASCII String Conversion	335
12.3.1	Examples of Converting Numbers to ASCII Strings	336
12.4	The WHYP Words <i>CMOVE</i> and <i>CMOVE></i>	339
12.5	Summary	340
	Exercises	342
Chapter 13	Program Control and Data Structures	344
13.1	<i>CREATE . . . DOES></i>	344
13.2	Program Control	347
13.2.1	A Simple Jump Table	347
13.2.2	A Jump Table with WHYP Words	348
13.3	Data Structures	350
13.3.1	Arrays	351
13.3.2	Linked Lists	352
13.4	Summary	357
	Exercises	357
Chapter 14	Fuzzy Control	361
14.1	Fuzzy Sets	361
14.2	Design of a Fuzzy Controller	364
14.2.1	Fuzzification of Inputs; <i>get_inputs()</i>	365
	The 68HC12 <i>MEM</i> Instruction	366
	WHYP Words for Defining Membership Functions	368

14.2.2	Fuzzy Inference	371
14.2.3	Processing the Rules: <code>fire_rules()</code>	373
	The 68HC12 <i>REV</i> Instruction	373
	WHYP Words for Defining Fuzzy Rules	375
14.2.4	Centroid Defuzzification	376
14.2.5	Output Defuzzification: <code>find_output()</code>	379
	The 68HC12 <i>WAV</i> Instruction	379
14.2.6	A Fuzzy Control Example—Floating Ping-Pong Ball	381
14.3	Summary	385
	Exercises	386

Chapter 15 Special Topics **389**

15.1	Computer Operating Properly (<i>COP</i>)	389
15.2	Key Wakeup (68HC812A4 only)	391
15.3	Flash EEPROM (68HC912B32 only)	394
15.3.1	Erasing and Programming the Flash EEPROM	394
15.4	Pulse-Width Modulator (68HC912B32 only)	396
15.5	Summary	400
	Exercises	401

Chapter 16 WHYP12 C++ Classes **402**

16.1	A Character Queue Class	402
16.2	A UART Class	405
16.2.1	The 8250 UART	405
16.3	An S-Record Class	413
16.4	A Link List Class	416
16.5	A Dictionary Class	420
16.6	Summary	430

Chapter 17 WHYP12 C++ Main Program **430**

17.1	Compiling and Running the WHYP Host Program	430
17.1.1	The WHYP Configuration File	431
17.2	The Immediate Dictionary	434
17.3	The WHYP Main Program	439
17.3.1	Checking the COM Port	441
17.3.2	Getting Input from the Keyboard	442
17.3.3	Processing an Input Word	445
17.4	Communicating with the Target Board	448
17.4.1	The Terminal Host Function	450
17.5	Compiler Words	451
17.5.1	Branching Words	451
17.5.2	Compiling Colon Definitions	453
17.6	Processing Characters Received from the Target	454
17.7	Summary	458

xiv	Contents
Appendix A 68HC12 Instruction Set	459
Appendix B 68HC11 Instruction Set	478
Appendix C Loading WHYP on 68HC12 and 68HC11 Evaluation Boards	486
C.1 68HC12 Boards	486
C.2 68HC11 Boards	499
Appendix D WHYP12.ASM File	506
Appendix E WHYP12.HED Header File	544
Appendix F WHYP12.CFG Configuration File	547
Appendix G WHYP Glossary	549
Appendix H The WHYP Disk	561
Index	562
