PART ONE Introduction	1
1 Spatial Models and GIS	3
Michael Wegener	
1.1 Introduction	3
1.2 Spatial models	5
1.3 Application fields	6
1.4 Spatial models and GIS	8
1.5 First experience	11
1.6 Structure of the book	15
References	18
2 GIS-based Spatial Modelling: A Step Forwards or a Step Backwards?	21
A. Stewart Fotheringham	
2.1 Introduction	21
2.2 A step backwards?	22
2.3 A step forwards?	23
2.4 GIS and localised regression models: the development of geographically weighted regression	24
2.5 GIS and location/allocation modelling	26
2.6 GIS and point pattern analysis	27

2.7 Summary	28
References	29
PART TWO Representations of Space	31
3 Spatial Interaction Models and the Role of Geographic Information Systems	33
Manfred M. Fischer	
3.1 Introduction	33
3.2 The model toolbox of the SIM system	35
3.3 Calibrating spatial interaction models in the SIM system	37
3.4 Interfacing SIM and GIS: possibilities and problems	39
3.5 Conclusions and outlook	41
References	42
4 Freedom from the Tyranny of Zones: Towards New GIS-based Spatial Models	45
Klaus Spiekermann and Michael Wegener	
4.1 Introduction	45
4.2 Linking microsimulation and GIS	46
4.3 Spatial disaggregation of zonal data	47
4.4 GIS-based microsimulation: two examples	51
4.5 Conclusions	58
References	60
5 Using GIS to Improve Urban Activity and Forecasting Models: Three Examples	63
John D. Landis and Ming Zhang	
5.1 Introduction	63
5.2 Spatial processes	64
5.3 Spatial measurements	65
5.4 Example One: Using GIS to improve the richness and accuracy of regression models	67
5.5 Example Two: Using GIS to model local land-use changes	69
5.6 Example Three: Modeling land-use futures with the CUF model	73
5.7 Conclusions	80
References	81
6 Spatial Models of Soil Erosion and GIS	83
John P. Wilson and Mark S. Lorang	
6.1 Introduction	83
6.2 Traditional applications of the USLE and RUSLE models	84
6.3 Implementing soil erosion models with GIS	89
6.4 Conclusions	102
References	103

7 Three-dimensional Mesoscale Atmospheric Modelling and GIS	109
Lars Bernard and Ulrich Streit	
7.1 Introduction	109
7.2 GIS and mesoscale atmospheric modelling	110
7.3 The three-dimensional boundary layer model SKIMO-3	111
7.4 Coupling of GIS and boundary layer models	114
References	117
 PART THREE Representations of Space/Time	 119
8 GIS and the Fractal Formalisation of Urban Patterns: Towards a New Paradigm for Spatial Analysis?	121
Pierre Frankhauser	
8.1 Introduction	121
8.2 The fractal geometry and its application to urban patterns	122
8.3 Fractal investigations of settlement patterns	130
8.4 Some perspectives on future research	139
References	141
 9 Dynamic Microsimulation	 143
Einar Holm, Urban Lindgren and Gunnar Malmberg	
9.1 Introduction	143
9.2 The microsimulation approach	144
9.3 Time-geographic simulation models	151
9.4 Microsimulation and GIS	160
9.5 Conclusion	163
References	163
 10 Multi-reactive Agents Paradigm for Spatial Modelling	 167
Nils Ferrand	
10.1 Introduction	167
10.2 Spatial models and GIS: the current paradigm and a proposal	167
10.3 A new paradigm: multi-reactive agents systems	171
10.4 Applications	178
10.5 Conclusions and perspectives	182
References	182
 11 Simulation Modelling of Location Choices in Urban Systems	 185
Geoffrey G. Roy, Folke Snickars and Galina Zaitseva	
11.1 Introduction	185
11.2 Theoretical modelling of location choice in urban systems	187
11.3 Basic modelling principles and assumptions	190
11.4 Experimenting with the models	193
11.5 Analysis of the simulation results	196
11.6 Concluding observations and remarks	200
References	201

12 Modelling the Dynamics of Spatial Systems within a GIS: Problems and Perspectives	203
Helène Mathian, Boguslaw Mikula and Lena Sanders	
12.1 Introduction	203
12.2 The different forms of spatial change and database management	206
12.3 Interactive dynamic exploration	207
12.4 Calibrating a dynamic model	212
12.5 Computing dynamic spatial indicators	215
12.6 An example of an integrated tool: the time geographic simulation system	217
References	220
13 Applying GIS Technology in Operational Urban Models	223
Poulcos Prastacos and Manolis Diamandakis	
13.1 Introduction	223
13.2 Land-use models	224
13.3 Implementing GIS methodologies in POLIS	226
13.4 Can GIS lead to improved urban models?	228
13.5 Designing a database for Athens suitable for implementing urban models	232
13.6 Conclusions	233
References	233
14 A Statistical Model to Analyse Spatio-temporal Data	235
Geir Aamodt	
14.1 Introduction	235
14.2 Smoothing splines	237
14.3 The spatio-temporal model	238
14.4 Application	240
14.5 The spatio-temporal model and GIS	241
14.6 Conclusions	242
References	244
15 Dynamic Modelling and Landscape Patterns – A GIS Synthesis	245
Thomas Gumbricht	
15.1 Introduction	245
15.2 A conceptual model of landscape organisation	245
15.3 Modelling in GIS	247
15.4 Landscape morphology and data structures in GIS	248
15.5 Cartographic modelling	249
15.6 Representation of dynamics in GIS	251
15.7 Discussion and conclusion	253
References	253

PART FOUR	Conclusions	259
16	New Spatial Models: Achievements and Challenges	261
	Michael Wegener and A. Stewart Fotheringham	
16.1	Introduction	261
16.2	Conclusions from the specialist meeting	261
16.3	Conclusions by the contributors	263
16.4	Conclusions by the editors	268
