Contents

Preface xi

About the Author xiii

DIVERSITY

Chapter 1

Ecology, Environmentalism, and the First Polluters 2

- 1.1 Developing and Testing Hypotheses 2
- 1.2 Science and Society 3
- 1.3 Ecology Is Not Environmentalism 5
- 1.4 A Brief History of Earth: The First Billion Years 6
- 1.5 Trying to Create Life in a Test Tube 7
- 1.6 Oceans and Life 7
- 1.7 The Evolution of Photosynthesis 9
- 1.8 Oxygen Producers Pollute the Planet 10

Summary 11

Further Readings 12

Web Connections 12

Chapter 2

Evolution and Natural Selection: The Heart of Ecology 13

- 2.1 Change, Evolution, and Chance 13
- 2.2 The Theory of Natural Selection 16
- 2.3 Fitness and Genetic Immortality 20
- 2.4 Drifting Continents and Evolution 21
- 2.5 Biodiversity and the Bush of Life 24
- 2.6 What Causes Speciation? 27
- 2.7 Why Does a Species Go Extinct? 28

Summary 29

Further Readings 29

Web Connections 29

Chapter 3

The Ecological Efficiency of Living Things 30

- 3.1 Photosynthesis: Converting Sunlight to Carbohydrate 30

- 3.2 The Fate of Carbohydrate 33
- 3.3 The Ecological Efficiency of Plants 34
- 3.4 The Ecological Efficiency of Animals 35
- 3.5 Energy Flow Through a Food Chain 36
- 3.6 The Costs of Control: Endothermy and Ectothermy 38

Summary 39

Further Readings 39

Web Connections 39

Chapter 4

Climate 40

- 4.1 The Solar Connection 40
- 4.2 Priming the Climate Engine 42
- 4.3 Frontal Systems 45
- 4.4 Oceanic Influences 47
- 4.5 Cycles of Climate Change 49

Summary 53

Further Readings 53

Web Connections 53

Chapter 5

Biomes: The Great Vegetation Types 54

- 5.1 Tundra 54
- 5.2 Boreal Forest 58
- 5.3 Temperate Forest 59
- 5.4 Prairies and Grasslands 60
- 5.5 Chaparral 61
- 5.6 Desert 62
- 5.7 Tropical Forests 65
- 5.8 Tropical Mountains 67
- 5.9 Oceans 67
- 5.10 Estuaries 68

Summary 69

Further Readings 70

Web Connections 70

Chapter 6 Ecosystems, Nutrient Cycles, and Soil 71

- 6.1 How Large Is an Ecosystem? 71
- 6.2 Getting to the Root of Productivity 73
- 6.3 Soil: Our Ultimate Resource 80
- 6.4 Soil Maps 83
- 6.5 Soil Erosion 85
- 6.6 The Importance of Fire 86
- 6.7 Ecosystem Functions and Values 87

Summary 88

Further Readings 88

Web Connections 88

Chapter 7 Aquatic Ecosystems 89

- 7.1 Marine Systems 89
- 7.2 Groundwater 96
- 7.3 Surface Freshwater 97
- 7.4 What Happened to the Lakes Where Dinosaurs Wallowed? 99
- 7.5 The Variability of Natural Lakes and Rivers 100
- 7.6 Seasonal Changes in a Lake 102

Summary 105

Further Readings 106

Web Connections 106

Chapter 8 Why Wetlands Aren't Worthless 107

- 8.1 What Is a Wetland? 107
- 8.2 Water and Wetland Chemistry 110
- 8.3 Wetlands as Hydrologic Regulators 112
- 8.4 Adaptations to Living in a Swamp 113
- 8.5 Wetlands and Wildlife 115
- 8.6 Indicators of Ecosystem Quality 116
- 8.7 Altering Wetland Functions and Values 118
- 8.8 The Restoration of the Florida Everglades 120
- 8.9 Wetlands and the Law 122
- 8.10 Creating Wetlands 124

Ecology in Action: Wetland Delineation 123

Summary 126

Further Readings 126

Web Connections 126

POPULATION AND COMMUNITY ECOLOGY

Chapter 9 Populations and Resources: A Balancing Act 128

- 9.1 Assessing Trends in Populations 128
- 9.2 The Drive to Compete 132
- 9.3 Populations and Natural Processes 135
- 9.4 Ecological Niche; or, How to be Your Favorite Organism 136

Summary 142

Further Readings 142

Web Connections 142

Chapter 10 Who Needs Sex Anyway? 143

- 10.1 Ways to Produce Clones 143
- 10.2 The Ecological Costs of Sex 144
- 10.3 Many Babies or Big Bodies: An Energetic Trade-Off 147
- 10.4 Selection for an Optimal Number of Young 150
- 10.5 Territoriality 152
- 10.6 Polygyny and Female Choice 154

Summary 156

Further Readings 157

Web Connections 157

Chapter 11 Making Connections: Fisheries 158

- 11.1 Fishing Isn't What it Used to Be 158
- 11.2 Fish, Fisheries, and Productivity 159
- 11.3 A Simple Model of Fisheries 162
- 11.4 Further Ecological Thoughts on Fisheries 165
- 11.5 Prey Switching and Fishing 169
- 11.6 Local Solutions to Fishery Problems 171
- 11.7 Are Fish Farms the Answer? 172

- 11.8 National and International Protection 173

Summary 175

Further Readings 175

Web Connections 175

Chapter 12 Predators, Parasites, and More 176

- 12.1 The Evolutionary Success of Cowards 176
- 12.2 Pyramids of Power 176
- 12.3 Optimal Foraging Theory 178
- 12.4 Do Hunters Control Prey Populations? 180
- 12.5 Predators and Prey Behavior 182
- 12.6 Predators Can Increase Species Diversity 183
- 12.7 The Defensive Weapons of Plants 184
- 12.8 Other Species Interactions 184
- 12.9 Mimicry 187
- 12.10 Predation and Management 188

Summary 188

Further Readings 189

Web Connections 189

Chapter 13 Communities Through Time: Changing Populations and Landscapes 190

- 13.1 The Coming and Going of Ice Ages 190
- 13.2 Are Communities Stable Through Time? 195
- 13.3 The Pollen History of Northeastern North American Forests 195
- 13.4 Plant Migrations in the Southwestern United States 199
- 13.5 A Mammal Community of the Past 199
- 13.6 Instability in the Tropics 201
- 13.7 So, Are Communities Stable Through Time? 202
- 13.8 Another Note on Extinction: The Blitzkrieg Hypothesis 202
- 13.9 Continuing Changes in Our Forests 204

Summary 206

Further Readings 207

Web Connections 207

Chapter 14 Ecological Succession: Rebuilding Ecosystems 208

- 14.1 Clements and the Superorganism 208
- 14.2 Ashes to Forest 210
- 14.3 Succession and Ecosystem Functions 213
- 14.4 From Field to Forest 215
- 14.5 Succession and Coral Reefs 219
- 14.6 Disturbance That Maintains Diversity 220
- 14.7 Succession and Habitat Management 221
- 14.8 The Old-Growth Controversy 221
- 14.9 Equilibrium or Nonequilibrium in Our Modern Ecosystems 224

Summary 225

Further Readings 225

Web Connections 225

Chapter 15 The How and Why of Tropical Biodiversity 226

- 15.1 Where Are the Tropics? 226
- 15.2 How Many Species Live in the Tropics? 227
- 15.3 Why Are There So Many Species in the Tropics? 228
- 15.4 The Diversity of Tropical Habitats 230
- 15.5 Structure and Niche Diversity in a Tropical Rain Forest 231
- 15.6 Niche Richness and Diversity 235
- 15.7 Are Extinction Rates Lower in the Tropics? 236
- 15.8 Pest Pressure 236
- 15.9 Speciation Mechanisms in the Tropics 237

Summary 239

Further Readings 240

Web Connections 240

Chapter 16 Peopling Earth 241

- 16.1 Humans: A Late Arrival 241

- 16.2 From Hunter-Gatherer to Urban Dweller 243
- 16.3 Agriculture: The Springboard of Population Growth 244
- 16.4 An Exponentially Growing Population 244
- 16.5 Population Demographics 246
- 16.6 The Emergence of the MDCs 247
- 16.7 The Demographic Transition 249
- 16.8 Limiting the Expansion of the Human Population 250
- 16.9 Reforming the Role of Women 254
- 16.10 Human Population Growth and Consumerism 255
- Summary* 256
- Further Readings* 256
- Web Connections* 256

ECOLOGICAL IMPACTS OF CHANGING LAND USE

Chapter 17 Feeding the World 258

- 17.1 Human Nutritional Requirements 258
- 17.2 Agriculture versus Population Growth: A Deadly Race 260
- 17.3 Exporting the Green Revolution 264
- 17.4 Social Problems and the Second Green Revolution 265
- 17.5 Desertification 266
- 17.6 Sustainable Agriculture 269
- Summary* 271
- Further Readings* 271
- Web Connections* 271

Chapter 18 Pollution: The Other Face of Fertilizers and Pesticides 272

- 18.1 What Is Pollution? 272
- 18.2 Pollution That Increases Growth 273
- 18.3 Biological Effects of Pollutants 277
- 18.4 Why Do We Pollute? 280

- 18.5 Pesticides: Pollutants That We Need 281
- 18.6 Pesticide Alternatives 284
- 18.7 Integrated Pest Management 286
- Ecology in Action: Biological Control of Rabbits* 286
- Summary* 288
- Further Readings* 289
- Web Connections* 289

Chapter 19 Aspects of Tropical Development 290

- 19.1 Remote Sensing and Tropical Forests 290
- 19.2 Misleading Estimates of Forest Destruction 291
- 19.3 What Are the Factors Driving Deforestation? 292
- 19.4 Promoting the Conservation of Tropical Rain Forests 298
- 19.5 Sustainable Agriculture in the Forests 305
- 19.6 Before We Blame It All on LDCs 305
- 19.7 Overview 306
- Ecology in Action: Can Extractive Industries Save the Rain Forest?* 302
- Summary* 306
- Further Readings* 307
- Web Connections* 307

Chapter 20 Habitat Fragmentation and Extinction 308

- 20.1 The Relationship Between Habitat Area and Species Diversity 308
- 20.2 Lessons from Islands 309
- 20.3 Edge Effects and Habitat Fragmentation 312
- 20.4 Songbirds and Forest Fragmentation 313
- 20.5 Metapopulations: Another Way to Think About Fragmented Populations 315
- 20.6 The Threat Posed by Exotic Species 317
- 20.7 Extinction or Crying Wolf? 323
- Ecology in Action: Studying the Effects of Fragmenting a Rain Forest* 316

Summary 325

Further Readings 325

Web Connections 325

Chapter 21 Working to Save Biodiversity 326

- 21.1 What Is So Good About Biodiversity? 326
- 21.2 Why Have Nature Reserves? 327
- 21.3 The Population Needed for Survival 328
- 21.4 The Area Needed for Survival 330
- 21.5 The Management of Reserves 335
- 21.6 Restoration Ecology: The Next Thrust of Conservation 338
- 21.7 Crawling from the Brink of Extinction 340

Ecology in Action: Rebuilding a Prairie 339

Summary 344

Further Readings 345

Web Connections 345

Chapter 22 Atmosphere, Air Pollution, and Ozone 346

- 22.1 The Composition of the Atmosphere 346
- 22.2 Layers in the Atmosphere 348
- 22.3 Air Pollution 349
- 22.4 Our Love-Hate Relationship with Ozone 349
- 22.5 Tropospheric Ozone: The Hate Relationship 350
- 22.6 Stratospheric Ozone: The Love Relationship 353
- 22.7 Protecting the Ozone Layer 357

Summary 358

Further Readings 359

Web Connections 359

Chapter 23 Climate Change and Global Warming 360

- 23.1 The Greenhouse Effect 360
- 23.2 Carbon Dioxide Concentration Through Time 361

23.3 Climatic Triggers 363

23.4 Human Actions and Climate Change 366

23.5 Computer Simulations of a Warmer World 371

23.6 The Potential Effects of a 2.5°C Warming 371

23.7 Carbon Sequestration: A New Way to Think About a Tree 375

23.8 Global Warming: A Risk to Be Ignored? 376

Ecology in Action: Ecologists Monitor Boreal Fires and Climate Change 376

Summary 378

Further Readings 379

Web Connections 379

Chapter 24 How Does Acid Deposition Affect Ecosystems? 380

24.1 Acidity: Definition and Sources 380

24.2 The Effect of Acid Deposition on Terrestrial Systems 382

24.3 The Effect of Acid Deposition on Aquatic Systems 385

24.4 Acid Transport and Buffered Systems 387

24.5 Solutions to the Acid Deposition Problem 389

Summary 392

Further Readings 393

Web Connections 393

ECOLOGY AND SOCIETY

Chapter 25 The Use and Supply of Energy 396

25.1 Power Plants Do Not Make Energy 396

25.2 A Brief History of Energy Use in the United States 397

25.3 Nuclear Power: Fallacy of a Dream Foretold 398

25.4 Our Future Stocks of Energy 401

- 25.5 Energy and Pollution 402
- 25.6 "Alternative" Energy Sources 403
- 25.7 Meeting Future Energy Demand 405
- 25.8 Energy Conservation
and Efficiency 407
- 25.9 Energy and Development 408
 - Summary* 409
 - Further Readings* 409
 - Web Connections* 409

Chapter 26 Disease 410

- 26.1 Battling Malaria: Nearly a Success
Story 411
- 26.2 Drug Resistance and Diseases That
Haunt Us 413
- 26.3 Evolutionary Thoughts About
Virulence 414
- 26.4 The Ecological Perspective 417
- 26.5 Human Immunodeficiency Virus 421
 - Ecology in Action: Ecologists Search for
a Pattern in Hantavirus Outbreaks** 422
 - Summary* 426
 - Further Readings* 426
 - Web Connections* 426

Chapter 27 Environmental Economics 427

- 27.1 Traditional Economics and Market
Values 428
- 27.2 Benefit-cost Analysis: A Two-edged
Sword 433
- 27.3 How Much Are We Prepared to Pay
to Prevent Pollution? 435
- 27.4 The Environmental Industry:
Economic Drag or Stimulus? 436
- 27.5 A Digression on the Meaning
of Sustainability 438
- 27.6 How Do We Evaluate
Development? 439

- 27.7 Global Budgets and Local Accounts 441
 - Summary* 442
 - Further Readings* 443
 - Web Connections* 443

Chapter 28 Environmental Legislation and Policy 444

- 28.1 Common Law and the
Environment 444
- 28.2 Protection Under Statutory Law 446
- 28.3 A Pocket History of Environmental
Legislation 447
- 28.4 Focus on Five Pieces
of Legislation 447
- 28.5 Property Rights versus Environmental
Legislation 455
 - Ecology in Action: Ecologists and
Environmental Impact Surveys** 450
 - Summary* 456
 - Further Readings* 456
 - Web Connections* 456

Chapter 29 Peering into the Future 457

- 29.1 Is the End Nigh? 457
- 29.2 The Lesson of Easter Island 458
- 29.3 Human Initiative Saves the Day? 461
- 29.4 The Rise of Genetic Manipulation 461
- 29.5 Another Clone? There's More Where
This Came From 464
- 29.6 Future Choices 466
 - Summary* 467
 - Further Readings* 467
 - Web Connections* 467
- Glossary* 468
- References* 482
- Photo Credits* 488
- Index* 489
