CHAPTER 1 AN INTRODUCTION TO LIVING THINGS 1

The Cellular Basis of Life 2

Organization of Cells 3

Biomolecules 6

Lipids 7

Proteins 9

Nucleic Acids 11

Carbohydrates 11

Chemical Forces Important to Biomolecules 11

Ionic Bonds 12

Covalent Bonds 13

Hydrogen Bonds 14

Hydrophobic Forces 16

The Key to Life 16

Oxidation-Reduction Reactions 17

Activation Energy 18

Catalysis 19

Enzymes 20

Catabolic and Anabolic Reactions 20

ISSUES: Risk and New Technology 21

Summary 22

Review Questions 22

CHAPTER 2. MOLECULAR BIOLOGY: THE FLOW OF INFORMATION WITHIN CELLS 23

The Structure of DNA 24

Building Blocks 24

	<i>The Double-stranded Structure</i>	25
	<i>The Helix</i>	29
	<i>Review of Structure and Function</i>	30
	<i>The Flow of Biological Information</i>	30
	<i>The Language of DNA</i>	31
	<i>Transcription</i>	32
	<i>Translation</i>	37
	<i>Replication of DNA</i>	42
	<i>Differences Between Prokaryotic and Eukaryotic Cells</i>	42
ISSUES:	Who Owns Our Genes?	44
	Summary	45
	Review Questions	45
CHAPTER 3	CHROMOSOMES, CELL DIVISION, AND SEXUAL REPRODUCTION	47
	<i>The Packaging and Structure of Chromosomes</i>	48
	<i>Cell Division</i>	52
	<i>Eukaryotic Cell Cycle</i>	52
	<i>Mitosis</i>	53
	<i>Cytokinesis</i>	57
	<i>Mitosis in Context</i>	57
	<i>Sexual Reproduction</i>	58
	<i>The Benefits of Genetic Variety</i>	60
ISSUES:	Genetic Differences Between Sexes	64
ESSAY:	Genes, Behavior, and Prejudice	66
	Summary	67
	Review Questions	67
CHAPTER 4	MENDELIAN GENETICS	68
	<i>The Law of Equal Segregation</i>	69
	<i>Inheritance of Traits</i>	69
	<i>Significance of Statistical Ratios</i>	72
	<i>Diagramming Inheritance</i>	74
	<i>Developing a Model</i>	76
	<i>The Law of Independent Assortment</i>	77
	<i>Observing Multiple Traits</i>	77
	<i>Developing a Model</i>	77
ESSAY:	Science Is More than Facts	79
	<i>Extensions of Mendelian Genetics</i>	80
	<i>Incomplete Dominance</i>	80
	<i>Genetic Linkage</i>	82
ISSUES:	Generalizations and Exceptions	84
	Summary	84
	Review Questions	85

CHAPTER 5	MUTATIONS AND GENETIC DISEASE	86
	Gene-level Mutations	87
	<i>Environmental Mutagens</i>	87
	<i>Mutations and the Flow of Information</i>	89
	Chromosome-level Mutations	92
	<i>Deletions</i>	92
	<i>Translocations</i>	92
	<i>Aneuploidy</i>	93
ESSAY:	Can Knowledge of Genetic Makeup Create Stigmas?	95
	Genetic Diseases	95
	<i>Autosomal Recessive Disorders</i>	96
	<i>Autosomal Dominant Disorders</i>	98
	<i>X-linked Diseases</i>	101
	Genetic Predispositions	103
	Summary	103
	Review Questions	104
CHAPTER 6	COMPLEXITIES OF GENETICS: POLYGENES, BEHAVIORAL TRAITS, AND EUGENICS	105
	Polygenic Traits	105
	Variability and the Environment	108
	<i>Familial and Heritable Traits</i>	108
	<i>Measuring Heritability: Twin Studies</i>	109
	<i>Behavioral Traits</i>	110
ESSAY:	Genetic Determinism	111
	Eugenics—A Social Movement Based on the Inheritance of Complex Traits	112
	<i>The Origin of "Degeneracy"</i>	114
	<i>Intelligence Testing and Eugenics</i>	116
	<i>Political Effects of Eugenics</i>	121
	<i>Eugenics in Nazi Germany</i>	122
	<i>The Decline of Eugenics</i>	123
ISSUES:	The Balance of Social and Scientific Beliefs	123
	<i>A Final Question</i>	123
	Summary	124
	Review Questions	124
CHAPTER 7	BIOLOGICAL CONTROL	125
	Regulation of Metabolism	125
	Control of Gene Expression	128
	Cellular Communication	130
	<i>Specificity of Molecular Interactions</i>	130
	<i>Signal Transduction</i>	132
	Disease: The Loss of Biological Control	134

	Biotechnology's Concern: Useful Changes in Control	135
ISSUES:	Ethics in Biotechnology	135
	Summary	136
	Review Questions	136
CHAPTER 8	GENETIC ENGINEERING: TOOLS AND TECHNIQUES	138
	Diabetes and the Role of Insulin	138
ISSUES:	Treat the Symptoms or Prevent the Disease?	140
	General Considerations	141
	<i>Biological Reactions Inside and Outside the Cell</i>	141
	<i>Growing Bacteria in the Laboratory</i>	142
	<i>Detecting What Happens to Individual Molecules</i>	144
	The Cloning and Expression of Genes	144
	<i>Obtaining the Insulin Gene</i>	144
	<i>Inserting Genes into Bacterial Cells</i>	146
ISSUES:	Why Do Restriction Enzymes Exist in Nature?	148
	Selecting Cells with the Desired Gene	151
ISSUES:	Antibiotic-Resistant Bacteria—Evolution in Action	152
	<i>Inducing the Expression of Insulin in Bacterial Cells</i>	158
	Purifying the Product	162
ISSUES:	Safety in Genetic Engineering	164
	Cloning Considerations	166
	<i>Choosing a Cloning Vector</i>	166
	<i>Choosing a Host</i>	168
	Summary	168
	Review Questions	169
CHAPTER 9	MORE GENETIC ENGINEERING: ANALYSIS OF DNA AND APPLICATIONS	170
	Analysis of DNA Molecules	171
	<i>Gel Electrophoresis</i>	171
	<i>DNA Sequencing</i>	176
	<i>Hybridization</i>	178
	<i>Polymerase Chain Reaction</i>	184
	<i>RFLP Analysis</i>	186
	Applications of Recombinant DNA: Products and Processes	188
	<i>Basic Research</i>	188
	<i>The Human Genome Project</i>	189
ISSUES:	The Value of the Human Genome Project	190
	<i>Medical Applications</i>	190
	<i>Forensics</i>	193
	<i>Environmental Applications</i>	195
	<i>Agricultural Uses of Recombinant DNA</i>	196
	<i>Plants and Bacteria</i>	198

	<i>Insecticides and Herbicides</i>	201
ISSUES:	Genetic Engineering and Evolution	202
ESSAY:	Concerns About the Use of Recombinant DNA	203
	Summary	205
	Review Questions	206

CHAPTER 10	GENETIC DISEASE AND GENE THERAPY	207
	Genes That Cause Disease	207
	<i>Inheritance of Disease</i>	208
	<i>Finding and Cloning a Human Disease-causing Gene</i>	209
	Genetic Diagnosis	212
	<i>Specificity of Diagnosis</i>	213
	<i>Prenatal Diagnosis</i>	215
	<i>Embryonic Diagnosis</i>	217
	<i>Diagnosis of Adults</i>	218
ISSUES:	To Know or Not to Know?	219
	Genetic Screening	220
	<i>Tay-Sachs Screening</i>	221
	<i>Sickle-cell Anemia Screening</i>	222
ESSAY:	When Should a Screening Program Be Instituted?	223
	<i>Genetic Counseling</i>	224
	Treatment of Genetic Disease	224
	<i>Traditional Treatments</i>	224
	<i>Gene Therapy</i>	224
	Social Implications of Treating Genetic Disease	230
	<i>Regulation and Approval of Gene Therapy Trials</i>	230
	<i>Germ Line Gene Therapy</i>	231
ESSAY:	A Response to Koshland	232
	Summary	233
	Review Questions	233

CHAPTER 11	IMMUNOLOGY	235
	First Line of Defense	236
	Nonspecific Defenses	236
	<i>Cells That Kill Invading Microorganisms</i>	236
	<i>Antimicrobial Proteins</i>	239
	<i>The Inflammatory Response</i>	240
	<i>The Fever Response</i>	240
	The Immune System	241
	<i>The Immune Response</i>	241
	<i>The Diversity of the Immune System</i>	247
	<i>Self-recognition by the Immune System</i>	249
	<i>Vaccines</i>	254
	The State of Some Infectious Diseases	256
ESSAY:	Vaccines for the Third World	257

	<i>Smallpox</i>	258
	<i>Measles</i>	259
	<i>Polio</i>	260
	<i>Tetanus</i>	261
	<i>Malaria</i>	261
	Summary	265
	Review Questions	265
CHAPTER 12	MONOCLONAL ANTIBODY TECHNOLOGY	267
	Producing Antibodies	267
	<i>Polyclonal Antibodies</i>	268
	<i>Monoclonal Antibodies</i>	270
	Applications of Monoclonal Antibodies	273
	<i>Medical Diagnosis—ELISA Tests</i>	273
	<i>Treatment of Disease and "Magic Bullets"</i>	276
ESSAY:	Treating Symptoms	278
	<i>Passive Immunization</i>	279
	<i>Detection, Isolation, and Purification of Biomolecules</i>	279
	Summary	281
	Review Questions	281
CHAPTER 13	AIDS AND HIV	283
	The HIV Virus	284
	<i>HIV Replication Cycle</i>	287
	<i>Why Does HIV Infection Result in AIDS?</i>	290
	HIV and the Immune System	291
	<i>Initial Response to HIV Infection</i>	291
	<i>How HIV Evades the Immune System</i>	291
	Diagnosing HIV Infection	293
	<i>Testing for the Presence of Antibodies Against HIV</i>	293
	<i>Testing for the Presence of HIV Genes: PCR Test</i>	295
	Treating HIV Infection	297
	<i>Efforts to Boost the Immune System</i>	297
	<i>Preventing the Spread of HIV Throughout the Body</i>	297
ISSUES:	Vaccines Against HIV	304
ESSAY:	The Economics of Illness	304
	<i>Animal Models of HIV Infection</i>	305
	<i>Testing New Therapeutic Agents</i>	306
ESSAY:	Should Promising Drugs Be Approved for Use Before Testing Is Complete?	308
ESSAY:	How Safe Should Therapeutic Agents Be?	309
	The Role of Biotechnology in HIV and AIDS Research	310
	Summary	311
	Review Questions	311

CHAPTER 14 CANCER 313

- What Is Cancer? 313
- Common Traits of Tumor Cells 315
- Benign and Malignant Tumors* 318
- Tumors and the Immune System* 318
- Cancer as a Genetic Disease 320
- Cancer and Viruses* 320
- Proto-oncogenes and Tumor Induction* 322
- Transformation: What Does It Take?* 322
- Diagnosis and Treatment of Cancer 325
- Diagnosis* 325
- Traditional Treatments and Therapies* 326
- New Approaches to Cancer Therapy* 328
- ISSUES: The War Against Cancer 332**
- Summary 333
- Review Questions 334

CHAPTER 15 THE BUSINESS OF BIOTECHNOLOGY IN THE UNITED STATES 336

- The Choice of Product or Service 337
- Ideas and Research* 337
- Typical Sequence of Events* 338
- Risk and Reward* 341
- Patents and the Protection of Ideas 343
- Patenting Life* 343
- Other Patents* 346
- Biotechnology in the United States: A Status Report 348
- Biotechnology in Health Care* 349
- Biotechnology in Agriculture* 350
- Biotechnology and the Environment* 351
- Summary 351
- Review Questions 352

CHAPTER 16 BIOTECHNOLOGY IN THE DEVELOPING WORLD 353

- Blueprints for Success 354
- The Promises and Potential of Biotechnology 355
- Agriculture* 355
- Food Products* 357
- Livestock Breeding and Animal Health* 359
- Medicine and Public Health* 363
- Energy* 364
- Bioconversion and Recycling of Materials* 364
- Application: Ethanol Production in Brazil and the United States 365

Application: Malaysia and Palm Oil	367
Summary	370
Review Questions	370

CHAPTER 17 NOW WHAT? 372

The Technical Aspects of Biotechnology	372
<i>Summary of Risks</i>	373
<i>Potential Breakthroughs?</i>	373
Genetic Information: Potential Uses and Abuses	375
<i>Inheritance</i>	375
<i>Causality</i>	376
<i>Genetic Determinism</i>	376
<i>Testing and Prediction</i>	377
<i>Scientific Reductionism</i>	379
<i>Ownership and Responsibility</i>	380
Sociology of Science	381
Biotechnology: Risks and Ethics	382
Summary	385
Review Questions	385

GLOSSARY 387
