

**NETWORK
PROFESSIONAL'S
LIBRARY**

OSBORNE

"George Spalding has proven to be an invaluable resource for us at Microsoft.... We have leveraged his wealth of knowledge and in-depth expertise for large Microsoft Windows 2000 presentations. Now you can leverage his vast knowledge by acquiring this excellent book."

—Tom Moen, Product Manager, Microsoft Corporation

WINDOWS 2000 Administration

Prepare to install and deploy Windows 2000

Manage the Enterprise using the Windows 2000
Active Directory

Master centralized management and deployment
through Intellimirror

Secure your network with Kerberos, NTLMv2, and
X.509 certificates

Suranaree University of Technology

31051000600560

GEORGE SPALDING MCSE, MCT, CNE, CNI

Internationally recognized instructor on
Windows NT and 2000 with over 20 years
of network industry experience.

Introduction	xix
▼ 1 Windows 2000 Overview	1
Just How Important Is Windows 2000 to the Microsoft Corporation?	2
Windows 2000 Product Categories	2
Windows 2000 Professional ✓	2
Windows 2000 Server ✓	3
Windows 2000 Advanced Server	4
Windows 2000 Datacenter Server	4
Domains, Trusts, and the Active Directory	5
Active Directory	5
File Systems and Storage Management	13
Distributed File System (Dfs)	13
File Replication Service (FRS)	13
CD-ROM File System (CDFS)	14
Universal Disk File System (UDFS)	14
FAT16 (File Allocation Table, 16-bit)	14
FAT32 (File Allocation Table, 32-bit)	15
NTFS v4 (NT File System, version 4)	15
NTFS v5 (NT File System, version 5)	15
New Storage Interfaces	19
✓ Network Services	19
Domain Name Server (DNS)	20
WINS (Windows Internet Name Service)	20
Computer Browsing	20

Dynamic Host Configuration Protocol (DHCP)	20
Remote Installation Services (RIS)	21
Terminal Services (TS)	22
Cluster Service	23
Load Balancing Service	24
Remote Access	25
Routing and Remote Access Service (RRAS)	25
Extensible Authentication Protocol (EAP)	25
Remote Authentication Dial-In User Service (RADIUS)	26
Internet Protocol Security (IPSec)	26
Point-to-Point Tunneling Protocol (PPTP)	26
Layer Two Tunneling Protocol (L2TP)	26
Bandwidth Allocation Protocol (BAP)	27
Remote Access Policies	27
Management	27
Microsoft Management Console (MMC)	28
Intellimirror	28
Group Policies	28
Windows Script Host (WSH)	29
Win2K Groups	30
System Preparation Tool (Sysprep)	30
Setup Manager	31
Windows Installer Service	31
Security	32
Kerberos v5	32
NTLM Authentication	32
NTLMv2	32
Encrypting File System (EFS)	33
X.509 Certificates and Certificate Server	33
Smart Card Support	33
Access Control List (ACL) Permissions	34
Secondary Logon Service	34
Migration Tools	35
Domain Migrator (DM)	35
Active Directory Connector (ADC)	35
Systems Management Server (SMS 2.0)	35
Microsoft Directory Synchronization Services	35
Third-Party Migration Tools	36
General Features	37
Language Independence	37
Service Pack Slip-Streaming	37
Fewer Reboots	38
Advanced Printing Support	38
Network Connections Wizard	38
Personalized Menus	38
Task Scheduler	38
Windows Driver Model (WDM)	39

Plug and Play (PNP) Support	39
Power Options	39
Summary	40
▼ 2 Implementing Clients on a Windows 2000 Network	41
Windows 2000 Professional	42
Hardware Requirements	42
Installing Windows 2000 Professional	43
Upgrading Clients in Windows 2000	51
Sticking with Windows 95 and 98 Clients	51
Upgrading from Windows 95 or 98 to Windows 2000 Professional ..	52
Upgrading from Windows NT 4.0	61
Unattended Installations	62
Using Setup Manager to Create an Answer File	63
The System Preparation Tool (sysprep.exe)	70
Remote Installation Services (RIS)	76
Summary	90
▼ 3 Installing Windows 2000 Server	91
Hardware Requirements	92
Upgrading Major Services in Place	92
Windows 2000 Server Installation Procedures	95
Installing from a CD or Network	95
Configuring Your Server	110
Scripted Installations	113
Sample Script	113
Upgrading from an NT 4.0 Server to a Windows 2000 Server	116
The Upgrade Screens	116
Unattended Upgrade	118
The First Reboot After Upgrade	121
Summary	123
▼ 4 Microsoft Management Console	125
Microsoft Management Console (MMC) Structure	126
Understanding the Snap-In Concept	126
Menu Options	129
Organizing Snap-Ins	131
Favorites Tab	131
The Available Snap-In Modules	134
Console Options	141
Author Mode	142
User Mode	142
Administrative Tools	143
Keyboard Shortcuts	146
Taskpads and Tasks	147
Summary	148

	Active Directory Design	263
	Active Directory FAQs (Frequently Asked Questions)	268
	Summary	273
▼ 9	Implementing the Active Directory	275
	Preparing to Install the Active Directory	276
	The First Domain Controller in the Forest	276
	The First DC in a Site	277
	The First DC in a Domain	278
	Hardware Considerations	278
	Domain Name Service (DNS)	281

Upgrading an NT 4.0 Domain	282
Taking Precautions	282
Upgrading Existing NT Services	284
Impact of <i>dcpromo</i> on NT 4.0 User, Group, and Computer Accounts	286
GUIDs, SIDs, Tokens, and ACLs	287
Installing the Active Directory	290
The First Domain Controller Promotion (<i>dcpromo</i>)	291
Promoting a Replica DC	301
Creating a Child Domain	308
Creating a New Domain Tree	311
After the Active Directory Promotion	314
Effects of <i>dcpromo</i> on all Domain Controllers	314
Mixed vs. Native Mode	316
Mixed Mode	317
Native Mode	318
Summary	321
▼ 10 Managing and Configuring the Active Directory	323
Managing the AD Container Objects	324
Domains	324
Organizational Units (OUs)	326
Moving AD Container Objects	328
The Default Containers	329
Builtin	330
Computers	330
ForeignSecurityPrincipals	331
Users	331
Domain Controllers OU	331
Lost and Found	331
System	332
Configuring AD Replication	334
Sites	336
NT 4.0 Replication vs. AD Replication	338
Replication and the KCC	338
Connection Objects	342
Intersite Replication	350
FSMO Roles and Placement	356
Operations Masters	356
Eliminating Single Points of Failure	359
Maximizing Domain Performance	360
Editing the Schema	361
Schema Manager	361
Schema Locks	362
Summary	364
▼ 11 Managing the Common Active Directory Objects	365
The SAM vs. the Active Directory	366

Managing AD Users	367
Creating AD Users	367
Modifying an Object's Properties	375
Modifying AD Users	375
Deleting AD Users	380
Managing AD Groups	381
AD Group Type, Scope, and Strategy	382
Creating AD Groups	384
Modifying AD Groups	388
Deleting AD Groups	390
Managing Shared Folders and Printers	390
Publishing Shared Folders in the Active Directory	391
Publishing Shared Printers in the Active Directory	392
Locating AD Objects	395
Locating Users with the Global Catalog	395
Locating Printers with the Global Catalog	399
Locating any AD Object with Advanced Find	400
Delegating Control	405
Summary	407
▼ 12 Managing Clients in the Active Directory	409
Managing AD Computer Accounts	410
Creating Computer Accounts/Joining AD Domains	410
Modifying Computer Accounts	413
Deleting Computer Accounts	414
Moving Computer Accounts	415
Client Interaction	415
Managing Legacy Clients	417
DOS and Windows 3.x	417
Windows 95 and 98	418
Windows NT 4.0	419
Using Group Policies to Manage the Workstation Environment	419
Group Policy Inheritance	420
Administering Group Policy Objects	430
Creating Group Policy Objects	431
Group Policy Editor	433
Client Connections over Slow Links	445
Slow Link Detection	445
Summary	447
▼ 13 Windows 2000 Authentication and Identification	449
Security Essentials	450
Evaluation	451
Security Standards	451
New Security Features for Windows 2000	453
Top Security Recommendations	454
Authentication	455
LAN Manager (LM)	455

NTLM Authentication Protocol	456
NTLMv2 Authentication Protocol	459
Public Key Infrastructure (PKI)	460
Kerberos	464
Securing Remote Access	468
Pre-Windows 2000 Compatible Access	469
Remote Access Authentication Methods	469
Callback	472
Caller ID	473
Remote Access Policies	474
