

# UNSUPERVISED ADAPTIVE FILTERING

VOLUME I

BLIND SOURCE SEPARATION

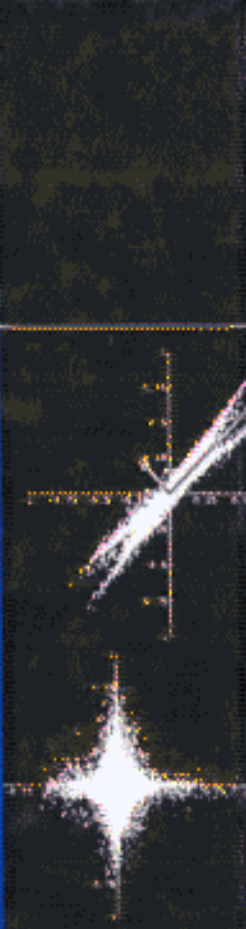

Edited by  
**Simon Haykin**

Suranaree University of Technology

31051000600675

A Volume in the Wiley Series on  
Adaptive and Learning Systems for Signal Processing,  
Communications, and Control  
Simon Haykin, Series Editor

# CONTENTS

---

<b>Contributors</b>	xi
<b>Preface</b>	xv
<b>1 Introduction</b>	1
<i>Simon Haykin</i>	
1.1 Why Adaptive Filtering? / 1	
1.2 Supervised and Unsupervised Forms of Adaptive Filtering / 2	
1.3 Two Important Unsupervised Signal-Processing Tasks / 2	
1.4 Three Fundamental Approaches to Unsupervised Adaptive Filtering / 5	
1.5 Organization of Volume I / 9	
References / 11	
<b>2 Natural-Gradient Adaptation</b>	13
<i>Scott C. Douglas and Shun-ichi Amari</i>	
2.1 Introduction / 13	
2.2 Standard-Gradient Adaptation / 17	
2.3 Natural-Gradient Adaptation / 25	
2.4 Simulation Examples / 38	
2.5 Conclusions / 57	
Appendix / 57	
References / 58	

### 3 **Blind Signal Separation and Extraction: Neural and Information-Theoretic Approaches**

*Shun-ichi Amari, Andrzej Cichocki, and Howard H. Yang*

- 3.1 Introduction and Problem Formulation / 64
- 3.2 Preprocessing: Whitening, PCA, and Preliminary Noise Reduction / 71
- 3.3 Fundamentals of Adaptive Learning Algorithms for BSS / 80
- 3.4 Blind Extraction of Source Signals / 87
- 3.5 Natural-Gradient Learning Algorithm for Blind Estimation of the Mixing Matrix: Undercomplete Base in ICA / 96
- 3.6 Generalized Distribution Models for ICA: Practical Implementation of the Algorithms / 98
- 3.7 Bias Removal for BSS Adaptive Algorithms / 103
- 3.8 Recurrent Neural Network Approach for Noise Cancellation / 104
- 3.9 Extension of BSS Learning Algorithms for Multichannel Deconvolution / 108
- 3.10 Conclusions and Discussion / 117

Appendix 3.1: Kullback-Leibler Divergence (Relative Entropy) as a Measure of Stochastic Independence / 119

Appendix 3.2: Derivation of Basic Learning Rule (3.49) and Stability Conditions for BSS / 121

Appendix 3.3: Derivation of Learning Rule (3.63) and Stability Conditions for BSS / 124

Appendix 3.4: Universal Adaptive Learning Algorithm / 127

Appendix 3.5: General Analysis of Extraction and Deflation Criteria / 129

References / 130

### 4 **Entropic Contrasts for Source Separation: Geometry and Stability**

*Jean-François Cardoso*

- 4.1 Introduction / 139
- 4.2 Contrast Functions for Source Separation / 144

- 4.3 Some Information Geometry of Random Vectors / 150
- 4.4 Information Geometry of Contrast Functions / 156
- 4.5 Using the Group Structure: Equivariance and Relative Gradient / 173
- 4.6 Asymptotic Stability / 181
- Acknowledgments / 188
- References / 188
- 5 Blind Source Separation: Models, Concepts, Algorithms and Performance** 191
- Pierre Comon and Pascal Chevalier*
- 5.1 Source-Separation Problems / 192
- 5.2 Statistical Tools / 202
- 5.3 Ultimate Separators / 210
- 5.4 A Class of Off-Line Numerical Algorithms / 215
- 5.5 Blind Source-Separator Performance / 222
- 5.6 Conclusions and Prospective Applications / 225
- References / 227
- 6 Information Theory, Independent-Component Analysis, and Applications** 237
- Anthony J. Bell*
- 6.1 Introduction / 238
- 6.2 Theory of ICA / 239
- 6.3 Applications of ICA / 249
- 6.4 Discussion and Conclusion / 258
- References / 260
- 7 Information-Theoretic Learning** 265
- Jose C. Principe, Dongxin Xu, and John W. Fisher III*
- 7.1 Introduction / 265
- 7.2 Generalized Definitions of Entropy / 267

7.3	Information-Theoretic Learning: Unsupervised Learning with Integrated Square Error / 273	
7.4	Information-Theoretic Learning: Unsupervised Learning with Renyi's Quadratic Entropy / 290	
7.5	Information-Theoretic Criteria: Unsupervised Learning with Quadratic Mutual Information / 295	
7.6	Information-Theoretic Learning: Supervised Learning with Quadratic Mutual Information / 308	
7.7	Conclusions / 313	
	References / 317	
<b>8</b>	<b>Blind Separation of Delayed and Convolved Sources</b>	<b>321</b>
	<i>Kari Torkkola</i>	
8.1	Introduction / 321	
8.2	Instantaneous-Mixture Problem / 323	
8.3	Toward More Realistic Assumptions / 330	
8.4	Delayed and Convolved Mixtures: Information Maximization in the Time Domain / 334	
8.5	Nonminimum-Phase Mixing Conditions / 347	
8.6	Other Approaches: Taxonomy by Parametrization / 351	
8.7	Other Approaches: Taxonomy by Separation Criteria / 355	
8.8	Application Areas of BSS for Convolutional Mixtures / 358	
8.9	Blind Deconvolution in Audio Applications / 362	
8.10	Discussion and Conclusions / 363	
	References / 366	
<b>9</b>	<b>Blind Deconvolution of Multipath Mixtures</b>	<b>377</b>
	<i>Russell H. Lambert and Chrysostomos L. Nikias</i>	
9.1	Introduction / 378	
9.2	Single-Channel/Multichannel Cost Functions and Adaptation Methods / 380	
9.3	Finite Impulse Response (FIR) Matrix Algebra / 396	
9.4	Simulations / 414	

**9.5 Feedback Methods for Separation and Equalization / 427**

**9.6 Conclusions / 433**

**References / 434**
