Hall

# Contents

Preface to the second edition	xv
Preface to the first edition	xvii
Acknowledgements	xix
Introduction	xxiii
<b>Part One THE NATURAL ENVIRONMENT</b>	
<b>The physical environment</b>	<b>1</b>
<b>Chapter 1 The nature and organisation of matter</b>	<b>3</b>
Chapter objectives	3
Introduction	3
1.1 Atoms and elements	4
1.2 Ions and ionic compounds	5
1.3 Molecules and covalent compounds	7
1.4 Valency and the Periodic Table of the elements	13
1.5 Oxidation states	13
1.6 Compounds, mixtures, chemical species and chemical reactions	16
1.7 The atomic nucleus and nuclear reactions	20
1.8 Summary	24
1.9 Problems	25
1.10 Further reading	26
<b>Chapter 2 Energy flow, equilibrium and change</b>	<b>27</b>
Chapter objectives	27
Introduction	27
2.1 The laws of energy flow	28

2.2	Dynamic equilibrium and spontaneous change	36
2.3	Chemical kinetics	41
2.4	Summary	44
2.5	Problems	45
2.6	Further reading	46
<b>Chapter 3</b>	<b>The Earth's surface</b>	<b>47</b>
	Chapter objectives	47
	Introduction	47
3.1	The crust	47
3.2	Soils	55
3.3	The hydrosphere	67
3.4	Summary	73
3.5	Problems	74
3.6	Further reading	75
<b>Chapter 4</b>	<b>The atmosphere</b>	<b>77</b>
	Chapter objectives	77
	Introduction	77
4.1	The structure and composition of the atmosphere	77
4.2	Weather and climate	83
4.3	Summary	101
4.4	Problems	103
4.5	Further reading	104
<b>Chapter 5</b>	<b>Bioelement cycling</b>	<b>105</b>
	Chapter objectives	105
	Introduction	105
5.1	The oxygen cycles	106
5.2	The carbon cycle	110
5.3	The nitrogen cycle	112
5.4	The phosphorus cycle	116
5.5	The sulfur cycle	118
5.6	Sodium, potassium, calcium and magnesium cycles	121
5.7	Summary	123

5.8	Problems	124
5.9	Further reading	125
	<b>The biological environment</b>	<b>127</b>
<b>Chapter 6</b>	<b>The cellular basis of life</b>	<b>129</b>
	Chapter objectives	129
	Introduction	129
6.1	Prokaryotes and eukaryotes	130
6.2	A comparison between the ultrastructure of eukaryotic plant and animal cells	131
6.3	Mitochondria and the process of cell respiration	131
6.4	Chloroplasts and the process of photosynthesis	134
6.5	The structure of DNA and RNA	137
6.6	Protein synthesis	138
6.7	Chromosomes and cell division	140
6.8	The study of genetics (heredity)	142
6.9	Recombinant DNA technology	145
6.10	Summary	148
6.11	Problems	148
6.12	Further reading	149
<b>Chapter 7</b>	<b>Population dynamics</b>	<b>151</b>
	Chapter objectives	151
	Introduction	151
7.1	Population growth	152
7.2	Population regulation	156
7.3	Human population dynamics	163
7.4	Summary	168
7.5	Problems	168
7.6	Further reading	169
<b>Chapter 8</b>	<b>Biological communities</b>	<b>171</b>
	Chapter objectives	171
	Introduction	171
8.1	Interactions between species	172
8.2	Natural selection	176

8.3	Species richness	179
8.4	Ecological succession	182
8.5	Summary	185
8.6	Problems	186
8.7	Further reading	186
<b>Chapter 9</b>	<b>Ecosystems and biomes</b>	<b>187</b>
	Chapter objectives	187
	Introduction	187
9.1	Food chains and food webs	188
9.2	Primary production	190
9.3	Energy flow in ecosystems	195
9.4	Secondary productivity	200
9.5	Decomposition	200
9.6	Ecosystem stability	202
9.7	Terrestrial and aquatic biomes	204
9.8	Summary	214
9.9	Problems	214
9.10	Further reading	215
<b>Part Two</b>	<b>HUMAN IMPACT ON THE NATURAL ENVIRONMENT</b>	
	<b>Natural resources</b>	<b>217</b>
<b>Chapter 10</b>	<b>Biological resources</b>	<b>219</b>
	Chapter objectives	219
	Introduction	219
10.1	The nature of biological resources	220
10.2	The importance of biological resources	220
10.3	Direct damage to biological resources	222
10.4	Introduced species	226
10.5	Habitat degradation, loss and fragmentation	230
10.6	The conservation of biological resources	234
10.7	Summary	238
10.8	Problems	239
10.9	Further reading	239
	Case study 1 Genetically modified (GM) crops	240

<b>Chapter 11</b>	<b>Land utilisation: a focus on agriculture and forestry</b>	243
	Chapter objectives	243
	Introduction	243
11.1	Past patterns of land use	244
11.2	Urban and industrial development	244
11.3	Agriculture	244
11.4	Forestry	250
11.5	The impact of agriculture on the environment	252
11.6	Summary	256
11.7	Problems	258
11.8	Further reading	258
	Case study 2 BSE and the British beef crisis	259
<b>Chapter 12</b>	<b>The major extractive industries</b>	263
	Chapter objectives	263
	Introduction	263
12.1	Metals	264
12.2	Building materials	267
12.3	Peat	270
12.4	Fossil fuels	271
12.5	Water	274
12.6	Summary	276
12.7	Problems	279
12.8	Further reading	279
	Case study 3 Arsenic in drinking water in West Bengal and Bangladesh	280
<b>Chapter 13</b>	<b>Energy production</b>	283
	Chapter objectives	283
	Introduction	283
13.1	Energy production and consumption	284
13.2	Sources of energy	286
13.3	Renewable energy	297
13.4	Energy conservation	302
13.5	Summary	302

13.6	Problems	303
13.7	Further reading	303
Case study 4 Chernobyl		304
<b>Pollution and waste management</b>		<b>307</b>
<b>Chapter 14</b>	<b>Water pollution</b>	<b>309</b>
	Chapter objectives	309
	Introduction	309
14.1	Organic oxygen-demanding wastes	311
14.2	Plant nutrients and eutrophication	312
14.3	Acidification	315
14.4	Toxic metals	316
14.5	Organochlorines	318
14.6	Oil	319
14.7	Radionuclides	321
14.8	Thermal pollution	323
14.9	Summary	325
14.10	Problems	325
14.11	Further reading	325
Case study 5 Focus on oil pollution: the case of the <i>Exxon Valdez</i>		327
<b>Chapter 15</b>	<b>Atmospheric pollution</b>	<b>331</b>
	Chapter objectives	331
	Introduction	331
15.1	The major atmospheric pollutants	332
15.2	The impact of combinations of atmospheric pollutants	344
15.3	Summary	354
15.4	Problems	355
15.5	Further reading	356
Case study 6 Bhopal		357
<b>Chapter 16</b>	<b>Waste management</b>	<b>359</b>
	Chapter objectives	359
	Introduction	359

16.1	Wastes from fossil fuel combustion	359
16.2	Low-hazard solid wastes	363
16.3	Low-hazard waste waters (sewage)	366
16.4	High-hazard wastes	368
16.5	Waste minimisation, cleaner production and integrated waste management	372
16.6	Summary	372
16.7	Problems	372
16.8	Further reading	374
Case study 7 The disposal of radioactive waste		375

## Appendices

Appendix 1	Brief answers to selected end of chapter problems	379
------------	---	-----

Appendix 2	Units and molar constants	383
------------	---------------------------	-----

## Glossary
