Contents

1.	Introduction and Overview	1	2.2.4.	Physiology of Plant Nutrition	42
1.1.	General	1	2.2.4.1.	Nutrient Uptake and Long-Distance Transport in Plants	42
1.2.	History of the Crop-Protection Market and its Industry	2	2.2.4.2.	Effect of Nutrition on Growth, Yield, and Quality	45
1.3.	Benefits and Risks of Crop-Protection Products	3	2.2.5.	Nutrient Balance	46
1.4.	Regulatory Aspects.	3	2.2.5.1.	Gains and Losses of Plant Nutrients	46
1.5.	New Trends in Crop Protection	4	2.2.5.2.	Alternative Plant Nutrition	47
1.6.	History of Product Lines	5	2.3.	Standard Fertilizers	48
1.6.1.	Herbicides.	5	2.3.1.	Solid Fertilizers.	48
1.6.2.	Fungicides.	5	2.3.1.1.	Straight Fertilizers	48
1.6.3.	Insecticides, Acaricides, Nematicides.	6	2.3.1.2.	Multinutrient Fertilizers	51
1.6.4.	Molluscicides	8	2.3.1.3.	Lime Fertilizers.	52
1.6.5.	Rodenticides	8	2.3.1.4.	Magnesium Fertilizers	53
1.6.6.	Biological Crop Protection	8	2.3.2.	Liquid Fertilizers	53
1.6.7.	Seed Treatment.	9	2.3.2.1.	Nitrogen Liquids	55
1.6.8.	Fertilizers	9	2.3.2.2.	Multinutrient Liquids	58
2.	Fertilizers	13	2.3.2.3.	Suspensions.	65
2.1.	Introduction.	14	2.4.	Special Fertilizers	67
2.2.	Plant Nutrition and Soil Science	15	2.4.1.	Water-Soluble Nutrient Salts	68
2.2.1.	Plant Nutrients	16	2.4.2.	Foliar Fertilizers	68
2.2.1.1.	Definition and Classification	16	2.4.2.1.	Production	69
2.2.1.2.	Function of Plant Nutrients.	19	2.4.2.2.	Application	69
2.2.2.	Soil Science.	25	2.4.2.3.	Combination with Agricultural Pesticides	71
2.2.2.1.	Soil Classes, Soil Types, and Parent Material.	25	2.4.3.	Micronutrients	71
2.2.2.2.	Nutrient Retention in Soils	28	2.4.3.1.	Micronutrient Forms.	71
2.2.2.3.	Soil pH, Buffer Power, and Liming.	32	2.4.3.2.	Production	73
2.2.2.4.	Soil Water-Plant Relationships	35	2.4.3.3.	Commercial Fertilizers	74
2.2.2.5.	Organic Matter of Soils and Nitrogen Turnover	37	2.4.3.4.	Use.	75
2.2.3.	Nutrient Availability	39	2.4.4.	Slow- and Controlled-Release Fertilizers	75
2.2.3.1.	Factors and Processes	39	2.4.4.1.	Introduction	75
2.2.3.2.	Determination of Available Plant Nutrients in Soils	41	2.4.4.2.	Urea-Aldehyde Slow-Release Fertilizers	77
			2.4.4.3.	Other Organic Chemicals	81
			2.4.4.4.	Inorganic Compounds	83
			2.4.4.5.	Coated and Encapsulated Controlled-Release Fertilizers	83
			2.4.4.6.	Anti-Float Materials	87
			2.4.4.7.	Controlled-Release Fertilizers on Carriers	88

2.4.4.8.	Supergranules	88	2.6.2.	Determination of Nitrogen . . .	134
2.4.4.9.	Legislation	88	2.6.3.	Determination of Phosphate . .	136
2.4.5.	Nitrification and Urease Inhibitors	89	2.6.4.	Determination of Potassium . .	137
2.4.5.1.	Introduction	89	2.6.5.	Analysis of Calcium, Magnesium, and Trace Elements	137
2.4.5.2.	Types of Nitrification and Urease Inhibitors	90	2.7.	Synthetic Soil Conditioners .	138
2.4.5.3.	Pyridines	91	2.7.1.	Foams	138
2.4.5.4.	Dicyandiamide	93	2.7.1.1.	Closed-Cell Expandable Polystyrene Foam	138
2.4.5.5.	Pyrazoles	95	2.7.1.2.	Primarily Open-Cell Urea-Formaldehyde Resin Foams	139
2.4.5.6.	Neem/Neem-Coated Urea . . .	97	2.7.2.	Colloidal Silicates	141
2.4.5.7.	Urease Inhibitors	97	2.7.3.	Polymer Dispersions and Polymer Emulsions.	142
2.4.5.8.	Environmental Aspects	98	2.7.4.	Tensides	143
2.4.5.9.	Legal Requirements	99	2.8.	Storage, Transportation, and Application	144
2.4.6.	Organic Fertilizers (Secondary Raw Material Fertilizers)	99	2.8.1.	General Storage Requirements .	144
2.4.6.1.	Fertilizers Based on Peat or Materials of Similar Stability . .	101	2.8.2.	Application	148
2.4.6.2.	Fertilizers Based on Waste Materials of Animal Origin . . .	102	2.9.	Environmental Aspects of Fertilizer Application	152
2.4.6.3.	Fertilizers Based on Wastes of Plant Origin	103	2.9.1.	Nitrogen	152
2.4.6.4.	Fertilizers Based on Municipal Waste	105	2.9.1.1.	Ground Water	153
2.4.7.	Manure	107	2.9.1.2.	Surface Waters	158
2.4.7.1.	Composition	107	2.9.1.3.	Atmosphere.	159
2.4.7.2.	Manure Nutrient Efficiency . . .	108	2.9.1.4.	Biosphere	163
2.4.7.3.	Environmental Aspects	109	2.9.1.5.	Pedosphere (Soil).	164
2.5.	Fertilizer Granulation	110	2.9.1.6.	Countermeasures	164
2.5.1.	Introduction	110	2.9.2.	Phosphorus	166
2.5.2.	Granulator Feedstocks	113	2.9.2.1.	Eutrophication	166
2.5.3.	Granulation Equipment	119	2.9.2.2.	Heavy Metals Buildup	168
2.5.3.1.	Pug Mill.	120	2.10.	Legal Aspects	169
2.5.3.2.	Drum Granulator	120	2.11.	Economic Aspects	171
2.5.3.3.	Pan Granulator.	124	2.11.1.	Economics of Fertilization. . . .	172
2.5.3.4.	The Granulator-Mixer	125	2.11.1.1.	Input-Output Relationships: The Yield Function.	172
2.5.3.5.	Roll Presses	126	2.11.1.2.	Factors Controlling the Optimal Nitrogen Fertilization Level . . .	174
2.5.4.	Costs of Agglomeration	128	2.11.1.3.	Factors Influencing the Optimal Nitrogen Fertilization Level . . .	175
2.5.5.	Bulk Blending	128	2.11.1.4.	Environmental Aspects of Fertilization	176
2.5.6.	Quality Inspection	129	2.11.2.	World Consumption, Production, and Trade.	177
2.5.7.	Fertilizer Conditioning.	130	2.11.3.	Future Outlook	183
2.5.8.	Environmental Aspects	132			
2.6.	Analysis	132			
2.6.1.	Sampling and Sample Preparation	134			

2.11.3.1.	Food Situation	183	3.11.	Compound Fertilizers by the Nitro Route	233
2.11.3.2.	Development of Fertilizer Consumption	186	3.11.1.	Chemistry	234
3.	Phosphate Fertilizers	189	3.11.2.	Product Specification	235
3.1.	Introduction	189	3.11.3.	Nitrophosphate Process with Calcium Nitrate Crystallization (Hydro)	235
3.2.	Terminology	191	3.11.4.	Nitro Process with Calcium Nitrate Crystallization (BASF)	239
3.3.	Composition of Phosphate Fertilizers	193	3.11.5.	Nitro Process with Ion Exchange (Kemira Superfos)	241
3.4.	Phosphate Rock	195	3.11.6.	Nitro Process with Sulfate Recycle (DSM)	243
3.5.	Economic Aspects	195	3.11.7.	Effluent Control of Nitrophosphate Process	244
3.5.1.	Phosphate Rock	195	3.12.	Other Straight Phosphate Fertilizers	244
3.5.2.	Phosphate Fertilizer Consumption	197	3.12.1.	Phosphate Rock for Direct Application	244
3.5.3.	Phosphate Fertilizer Production	199	3.12.2.	Partially Acidulated Phosphate Rock	245
3.6.	Phosphorus Uptake by Plants	201	3.12.3.	Basic and BOF Slag Fertilizers	246
3.7.	Chemical Equilibria in Fertilizer Production	204	3.12.4.	PK Mixed Fertilizers with Basic Slag	249
3.8.	Superphosphates	211	3.13.	Energy Consumption	249
3.8.1.	Single Superphosphate	211	3.14.	Effluents from Phosphate Fertilizer Production	250
3.8.1.1.	Chemistry	211	3.15.	Heavy Metals in Phosphate Fertilizers	250
3.8.1.2.	Production	213	3.16.	Safety in Storage, Handling, and Transport.	251
3.8.1.3.	Fluorine Recovery	216	4.	Plant Growth Regulators	253
3.8.1.4.	Granulation	217	4.1.	Introduction	253
3.8.2.	Triple Superphosphate	218	4.2.	Classes of Growth Regulators	255
3.8.3.	Double Superphosphate	218	4.2.1.	Auxins and Auxin-Type Compounds	256
3.8.4.	PK Fertilizers	219	4.2.2.	Antiauxins	257
3.9.	Ammonium Phosphates	219	4.2.3.	Gibberellins	258
3.9.1.	Fertilizer Grades and Applications	219	4.2.4.	Gibberellin Antagonists	259
3.9.2.	Production	220	4.2.4.1.	Onium Compounds	259
3.9.2.1.	Ammonium Phosphate Powder.	220	4.2.4.2.	Heterocyclic Nitrogen Compounds	261
3.9.2.2.	Granular Ammonium Phosphates	222	4.2.4.3.	Dioxocyclohexane Carboxylic Acid Derivatives	263
3.9.2.3.	Off-Gas Treatment	225			
3.10.	Compound Fertilizers by the Sulfur Route.	226			
3.10.1.	Granulation of Mixtures of Dry Materials	227			
3.10.2.	Granulation of Dry Materials with Additives Producing Chemical Reactions	228			
3.10.3.	Slurry Granulation	229			
3.10.4.	Melt Granulation	232			

4.2.5.	Cytokinins	265	6.1.	Phytophagous Mites and Their Control	319
4.2.6.	Ethylene-Releasing Compounds	266	6.1.1.	Possible Reasons for the Mite Problem	319
4.2.7.	Other Growth Regulators	267	6.1.2.	Mite Species of Economic Importance	320
4.3.	Defoliant and Desiccants	272	6.1.3.	Possibilities for Mite Control	321
4.4.	Toxicology	273	6.1.4.	Mite Resistance.	322
4.4.1.	Auxins and Auxin-Type Compounds	275	6.2.	Older Acaricides	322
4.4.2.	Antiauxins	276	6.3.	Insecticides with Acaricidal Activity	323
4.4.3.	Gibberellins	276	6.3.1.	Organophosphates and (Oxime)Carbamates	323
4.4.4.	Gibberellin Antagonists	276	6.3.2.	Pyrethroids	337
4.4.5.	Ethylene-Releasing Compounds	280	6.3.3.	Formamidines	339
4.4.6.	Other Growth Regulators	280	6.3.4.	Nitrophenyl Esters	340
4.4.7.	Defoliant and Desiccants	284	6.3.5.	Sulfonic Acid Esters	341
5.	Crop Protection	288	6.3.6.	Halogenated Benzhydrol Derivatives	342
5.1.	Introduction.	288	6.3.7.	Organometallic Compounds.	343
5.2.	Ecological Conditions	288	6.3.8.	Other Compounds	344
5.3.	Economic Conditions	290	6.4.	Toxicology	352
5.4.	World Food Supply	292	6.4.1.	Organophosphates and (Oxime)Carbamates	352
5.5.	Crop Protection in Modern Agriculture	294	6.4.2.	Pyrethroids	367
5.6.	Economic Threshold and Prognosis	298	6.4.3.	Formamidines	370
5.7.	Methods of Crop Protection	301	6.4.4.	Nitrophenyl Esters	371
5.7.1.	Physical and Mechanical Methods	301	6.4.5.	Sulfonic Acid Ester.	372
5.7.2.	Chemical Methods	302	6.4.6.	Halogenated Benzhydrol Derivatives	372
5.7.2.1.	Goals	302	6.4.7.	Organometallic Compounds.	373
5.7.2.2.	Requirements	302	6.4.8.	Other Compounds	375
5.7.2.3.	Effects on Farming	304	7.	Fungicides	383
5.7.3.	Biological Methods.	308	7.1.	Introduction.	383
5.7.4.	Cultivation	310	7.2.	Phytopathogenic Fungi	383
5.7.5.	New Methods	311	7.3.	Types of Fungicide and Mechanism of Action	386
5.7.5.1.	Biotechnology.	311	7.4.	Method of Fungicide Application	387
5.7.5.2.	Research Methods	312	7.4.1.	Seed Treatment.	388
5.7.5.3.	New Indications	313	7.4.2.	Foliage and Fruit Sprays.	388
5.7.5.4.	Integrated Systems.	313	7.4.3.	Soil Treatment	389
5.8.	Safety Aspects.	313	7.4.4.	Trunk Injections	389
5.8.1.	Safety for the User	313	7.4.5.	Postharvest Treatment.	390
5.8.2.	Safety for the Consumer	314			
5.9.	Legal Aspects	316			
6.	Acaricides	319			

7.5. Fungicide Resistance.	390	7.10.3.5. Phosphites	475
7.6. Nonsystemic (Contact)		7.10.3.6. Inhibitors of Sterol Biosynthesis	475
Fungicides	392	7.10.3.7. Miscellaneous.	490
7.6.1. Inorganic Compounds	392	8. Insecticides	495
7.6.2. Organometallic Compounds. . .	393	8.1. Insects as Enemies of Man .	495
7.6.3. Dithiocarbamates	393	8.1.1. Development of Insecticides . .	496
7.6.4. N-Trihalomethylthio Derivatives		8.1.2. Insect Resistance to Insecticides	497
(Phthalimides)	397	8.1.2.1. Cross-Resistance and Multiple	
7.6.5. Dicarboximides	400	Resistance	498
7.6.6. Miscellaneous Organic		8.1.2.2. Persistence of Genes for	
Compounds	402	Insecticide Resistance	499
7.7. Fungicidal Antibiotics	413	8.1.3. Resurgence and Secondary Pests	
7.8. Systemic Fungicides	414		500
7.8.1. Organophosphates	414	8.1.4. Insecticides and Environmental	
7.8.2. Benzimidazoles	416	Quality	501
7.8.3. Carboxanilides	418	8.1.5. Integrated Pest Management .	503
7.8.4. Phenylamides	420	8.2. Inorganic Insecticides	504
7.8.5. Phosphites	423	8.2.1. Arsenicals	504
7.8.6. Inhibitors of Sterol Biosynthesis	424	8.2.2. Fluorides	505
7.8.6.1. Triazoles.	424	8.3. Natural Product Insecticides.	506
7.8.6.2. Imidazoles	434	8.3.1. Nicotinoids	506
7.8.6.3. Pyridines	436	8.3.2. Rotenoids	507
7.8.6.4. Pyrimidines	437	8.3.3. Veratrine Alkaloids	508
7.8.6.5. Piperazines	439	8.3.4. Ryanodine	509
7.8.6.6. Morpholines	439	8.3.5. Pyrethroid Insecticides	509
7.8.6.7. Strobilins	441	8.3.5.1. Synthetic Pyrethroids	510
7.8.7. Miscellaneous.	443	8.3.5.2. Mode of Action	521
7.9. Economic Aspects	448	8.3.5.3. Environmental Toxicology. . .	521
7.10. Toxicology	449	8.3.5.4. Pyrethroid Synergists	522
7.10.1. Nonsystemic (Contact)		8.4. Dinitrophenols	523
Fungicides.	449	8.5. Organochlorine Insecticides .	524
7.10.1.1. Inorganic Compounds	449	8.5.1. DDT and Derivatives	524
7.10.1.2. Organometallic Compounds. . .	450	8.5.1.1. Mode of Action	525
7.10.1.3. Dithiocarbamates	451	8.5.1.2. Environmental Toxicology. . .	526
7.10.1.4. N-Trihalomethylthio Derivatives		8.5.2. Hexachlorocyclohexanes	527
(Phthalimides)	455	8.5.3. Cyclodienes	527
7.10.1.5. Dicarboximides	457	8.5.4. Chlorinated Camphenes	530
7.10.1.6. Miscellaneous Organic		8.6. Organophosphorus	
Compounds	459	Insecticides	530
7.10.2. Fungicidal Antibiotics	468	8.6.1. Phosphoric Acid Anhydrides . .	532
7.10.3. Systemic Fungicides	468	8.6.2. Vinyl Phosphates	532
7.10.3.1. Organophosphates	468	8.6.3. Aliphatic Phosphorothioate	
7.10.3.2. Benzimidazoles	469	Esters	534
7.10.3.3. Carboxanilides	472		
7.10.3.4. Phenylamides	472		

8.6.4.	Phosphorothioate Esters of Phenols	536	8.15.	Attractants	579
8.6.5.	Phosphonothioate Esters of Phenols	541	8.15.1.	Sex Pheromone Attractants . . .	579
8.6.6.	Phosphorothioate Esters of Heterocyclic Enols	541	8.15.2.	Aggregation Pheromones	583
8.6.7.	Phosphorothioate Esters of S-Methyl Heterocycles	544	8.15.3.	Kairomone Attractants	584
8.6.8.	Miscellaneous Organophosphorus Esters	545	8.16.	Insecticide Formulation	587
8.6.9.	Mode of Action and Toxicity . .	546	8.17.	Insecticide Residues in Foods	588

11.5.1. Acute and Subacute Rodenticides	669	12.4.3. Mowing and Cutting.	702
11.5.2. First-Generation Anticoagulants	673	12.4.4. Flooding.	703
11.5.2.1. Hydroxycoumarins	673	12.4.5. Mulching	703
11.5.2.2. Indandiones.	675	12.4.6. Use of Heat	704
11.5.2.3. Anticoagulant Resistance	676	12.5. Biological Control of Weeds .	705
11.5.3. Second-Generation Anticoagulants	676	12.5.1. Herbivore Management	706
11.6. Other Chemical Methods of Rodent Control	680	12.5.2. Classical Biological Control . . .	706
11.7. Toxicology	681	12.5.3. Inundative Biological Control. .	708
11.7.1. Acute and Subacute Rodenticides	682	12.6. Controlling Weeds by Habitat Management.	709
11.7.2. Anticoagulants	683	12.7. Chemical Control of Weeds .	710
11.7.3. Others	686	12.7.1. History and Introduction	710
12. Weed Control	687	12.7.2. Adjuvants	711
12.1. Introduction.	687	12.7.2.1. Surfactants	711
		12.7.2.2. Oils	713
		12.7.2.3. Drift Retardants	713
		12.7.2.4. Other Adjuvants	714

12.7.3.	Herbicide Formulations	714	12.7.9.2.	Sulfonylureas	809
12.7.3.1.	Spray Formulations	715	12.7.9.3.	Chloroacetanilides	820
12.7.3.2.	Formulations Applied Dry	718	12.7.9.4.	1,3,5-Triazines	824
12.7.3.3.	Active Ingredient vs. Acid Equivalent.	719	12.7.9.5.	Ureas	829
12.7.4.	Factors Influencing Foliage- Applied Herbicides.	719	12.7.9.6.	2,6-Dinitroanilines	835
12.7.5.	Factors Influencing Soil-Applied Herbicides.	726	12.7.9.7.	Imidazolinones	839
12.7.5.1.	Microbiological Effects.	726	12.7.9.8.	Alkanoic Acids	841
12.7.5.2.	Adsorption on Soil Colloids	728	12.7.9.9.	Triazoles.	846
12.7.5.3.	Chemical Decomposition	729	12.7.9.10.	Uracils.	847
12.7.5.4.	Leaching	729	12.7.9.11.	Pyridines	848
12.7.5.5.	Volatilization	729	12.7.9.12.	Hydroxybenzonitriles	850
12.7.5.6.	Photodecomposition	729	12.7.9.13.	[Thio] Carbamates	851
12.7.5.7.	Uptake and Translocation from the Soil	730	12.7.9.14.	Organophosphorous Compounds.	857
12.7.6.	Selective Action of Herbicides	731	12.7.9.15.	Cyclohexanedione Oximes.	860
12.7.7.	Examples of Important Herbicides and Herbicide Groups	733	12.7.9.16.	Benzonitriles	862
12.7.7.1.	Foliage-Active Contact Herbicides.	733	12.7.9.17.	Triazinones	863
12.7.7.2.	Foliage-Active Translocated Herbicides.	734	12.7.9.18.	Miscellaneous Herbicides	865
12.7.7.3.	Soil-Active Herbicides	735	12.7.10.	Economic Aspects	870
12.7.8.	Properties of Herbicides	737	12.7.11.	Regulatory Aspects of Pesticide Residues.	870
12.7.8.1.	Diphenyl Ethers	737	12.8.	General Comments.	873
12.7.8.2.	Sulfonylureas	741	13.	Biological Control	875
12.7.8.3.	Chloroacetanilides	751	13.1.	Introduction.	875
12.7.8.4.	1,3,5-Triazines	755	13.2.	Biological Control of Insects.	877
12.7.8.5.	Ureas	760	13.2.1.	Entomophagous Insects	877
12.7.8.6.	2,6-Dinitroanilines	767	13.2.1.1.	Parasitoids	877
12.7.8.7.	Imidazolinone	771	13.2.1.2.	Insect Predators	879
12.7.8.8.	Alkanoic Acids	773	13.2.2.	Other Predators	881
12.7.8.9.	Triazoles.	779	13.2.3.	Entomopathogens	881
