

Ecological & Environmental Toxicology Series

 WILEY

Statistics in Ecotoxicology

Suranaree University of Technology

31051000609277

Edited by
Tim Sparks

Contents

List of contributors	ix
Foreword	xi
Preface	xiii
1 Basic Concepts	1
<i>Peter Rothery</i>	
2 Exploring the Data	33
<i>Don French and David Lindley</i>	
3 Field Experiments	69
<i>Dick Gadsden and Tim Sparks</i>	
4 The Analysis of Laboratory Toxicity Experiments	99
<i>Reinhard Meister and Paul J. Van den Brink</i>	
5 Analysis of Field Studies: Regression Analysis	119
<i>Eric P. Smith and Christine Anderson-Cook</i>	
6 Multivariate Techniques	149
<i>Andy Scott and Ralph Clarke</i>	
7 Environmental Monitoring: Investigating Associations and Trends	179
<i>Loveday L. Conquest</i>	
8 Organochlorines in Bird of Prey Eggs: a Terrestrial Case Study	211
<i>Tim Sparks, Ian Newton, Lois Dale, and Dan Osborn</i>	
9 Statistical Techniques for the Ecological Risk Assessment of Chemicals in Freshwaters	247
<i>Mark Crane, Albania Grosso and Colin Janssen</i>	

10 Trying to Detect Impacts in Marine Habitats: Comparisons with Suitable Reference Areas	279
<i>A. J. Underwood</i>	
Appendix 1: Great skua dataset	309
Appendix 2: Beetles dataset	310
Appendix 3: Starling dataset	312
Appendix 4: Streamwater chemistry dataset	314
Index	315
