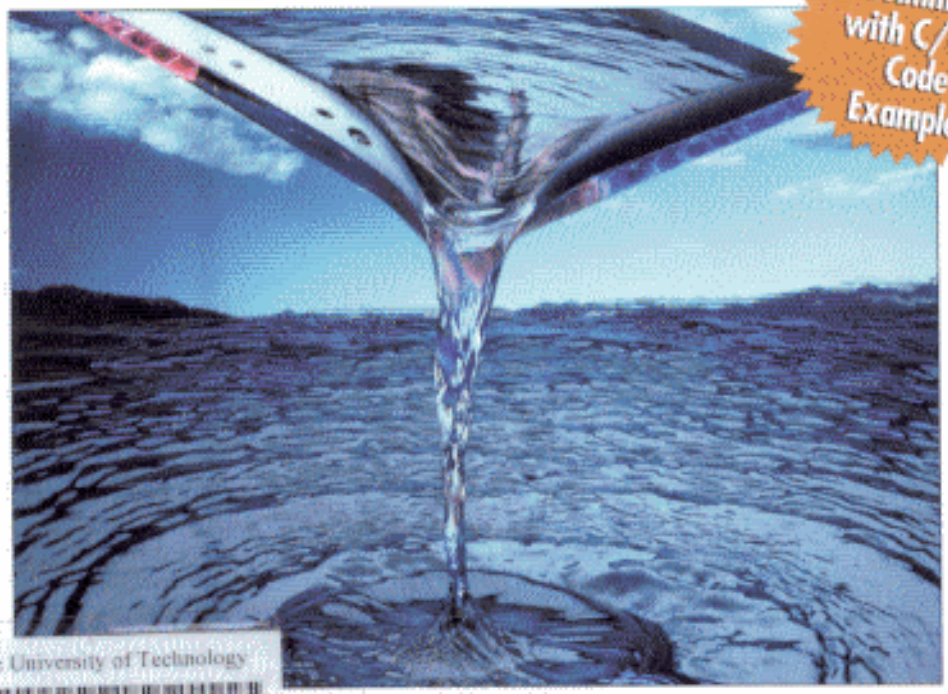
WINDOWS® 2000

DEVELOPER'S GUIDE



Suranaree University of Technology
31051000607990

Bestselling author of The Cold Fusion 4.0 Web Application Construction Kit

Paul Fonte, and

Greg Brewer

M&T BOOKS

- Build world-class multithreaded applications for both Windows 2000 Server and Professional
- Master the APIs and learn cutting-edge programming techniques
- Capitalize on COM+, the Active Directory, and other new features

Contents

Preface ix

Acknowledgment xv

Part 1 The Basics of Windows 2000

Chapter 1 An Overview of Windows 2000 3
What is Windows? 3
What is Windows 2000? 5
What's New in Windows 2000? 6
Why Write for Windows 2000? 8
Basic Concepts for Writing Windows Code 8
How to Use the Microsoft Developer Network 10

Chapter 2 Basic Operating System Programming 13
Architecture of Windows 2000 13
The Windows executive 14
Windows protected subsystems 16
The Basics of Applications 17
Application types 17
Application construction 21
Process objects 23
Process life cycle 28
Threads of Execution 39
Basic multithreading 39
Thread objects 43
Fibers 54

Chapter 3 Using Kernel Objects 59
General Use of Kernel Objects 59
What is a kernel object? 59
Basic properties of kernel objects 62
Available kernel objects 63
Kernel object handles 65
Kernel object naming 72
Kernel Object Security 76
Security object types 77
Viewing and adjusting kernel object security information 85
Typical uses of security tools 88
Waiting for the Signaled State 96
Why wait for the signaled state? 96

Single object waits . . . 99
Advanced single object waits . . . 102
Multiple object waits . . . 109
Waiting and APCs . . . 114
Chapter 4 Commonly Used Kernel Objects . . . 115
Objects Supplied by the Windows 2000 Kernel . . . 115
Core Application Services . . . 116
Timers . . . 116
File finds . . . 130
Change notifications . . . 133
Jobs . . . 138
Thread Synchronization . . . 142
Interlocked functions . . . 142
Critical sections . . . 146
Events . . . 151
Mutexes . . . 155
Semaphores . . . 160
Inter-Thread Communication . . . 163
Files . . . 164
File mappings . . . 170

Part II User Interaction

Chapter 5 The GDI API . . . 179
GDI API Overview . . . 179
Device Contexts . . . 180
Device context drawing objects and modes . . . 180
Acquiring a device context . . . 184
Drawing on a device context . . . 185
Handling Screen Updates in Your Application . . . 187
Displaying Text on the Screen . . . 187
Displaying Bitmaps on the Screen . . . 190
Regions and Paths . . . 195
Creating regions . . . 195
Creating paths . . . 201
Clipping Regions . . . 205
Enhanced Metafiles . . . 209
Summary . . . 215
Chapter 6 Using the Common Controls . . . 217
The Common Control Library . . . 217
General Use of the Common Control Library . . . 218
General facilities . . . 219
The CommonControls sample application . . . 222
The Common Controls . . . 223

Animation control 224
ComboBoxEx control 227
Date and Time Picker controls 230
Month Calendar control 236
Drag List Box control 240
List View control 245
Header control 251
Tree View control 256
Hot Key control 261
IP Address control 264
Trackbar control 267
Progress Bar control *271*
Pager control 276
Rebar control 277
Toolbar control 277
Status Bar control 285
Tooltip control 286
Up-Down control 289
Tab control 292
Property Sheet control 296

Chapter 7 **Using the Common Dialogs 313**
The Common Dialog Library 313
The Common Dialogs 316
Color dialog box 317
Font dialog box 320
Find and Replace Text dialog boxes 325
Open File and File Save As dialog boxes 330
Page Setup dialog box 337
Print dialog box 345
Print Property Sheet dialog box 349

Chapter 8 ***Working with Windows 357***
The Windows in Windows 357
Types of windows 357
Window Classes 358
How to Create and Manipulate Windows 362
Window procedures *368*
Dialog boxes 371
Message-only windows 373
Layered windows 373
Message Routing 376
Retrieving messages 377
Posting and sending messages 378
Window Activation 379
Multiple Monitor Support 384

Chapter 9 Shell Services . . . 391
What is a Shell? . . . 391
Shell Components . . . 392
Desktop . . . 392
Task bar . . . 396
Shell Functions . . . 398
PIDL functions . . . 398
File object functions . . . 405
Folder object functions . . . 408
System tray APIs . . . 412
Internal functions . . . 418
Various helper APIs . . . 419
Shell Interfaces . . . 422
Core interfaces . . . 422
Namespace functions . . . 426
Lightweight APIs . . . 435
String helpers . . . *436*
Pathing helpers . . . 436
URL helpers . . . 439
Registry helpers . . . 440

Part III Building Applications

Chapter 10 Application Building Services . . . 445
Software Sharing Services . . . 445
Dynamic link libraries . . . 447
COM objects . . . 461
Programming Services . . . 469
Large integers . . . 469
Time support . . . 472
System Services . . . 483
Windows registry . . . 483
System information . . . 493
System lifetime APIs . . . 497
Chapter 11 Service Applications . . . 499
How to Interact with Services . . . 499
Service control manager . . . 500
Managing services . . . 501
Service objects . . . 507
Command line tools . . . 516
The Basics of Service Creation . . . 517
Lifetime of a service . . . 517
Installing and configuring . . . 527
Supporting multiple services . . . 528

Event Logging and Performance 528
Event log 528
Performance monitor 532
Simple Network Management Protocol 534
Security and Administration 535
Account security 536
MMC snap-in 540
Chapter 12 Memory Management 547
Windows Memory Architecture 547
Virtual Memory 552
Virtual memory inspection 552
Virtual memory manipulation 557
Application Heaps 561
Heap life cycle 562
Heap internals 568
Memory Extensions 571
Utility functions 571
File mappings 572
Address windowing extensions 573
Chapter 13 The File System 575
File Input/Output APIs 575
Creating and opening files 577
Reading from and writing to files 581
Creating and using temporary files 582
Searching for files 584
Monitoring changes in a directory 587
Reading from and writing to files asynchronously 593
Windows 2000 File Systems 597
NTFS Features 598
Compressing files and directories 598
Encrypting and decrypting files and directories 602
Specifying disk quotas 607
Volume mount points 608
Using reparse points 610
Distributed link-tracking 611
Supporting sparse files 611
Chapter 14 The Active Directory 613
An Overview of the Active Directory 613
How to Access Active Directory Objects 615
Binding 617
Enumeration 619
Searching 623
Managing Users and Groups 625
Users 626
Groups 629

Chapter 15 Additional System Services 637
Character Mode Consoles 637
Basic characteristics 638
Using console attribute APIs 641
Using console buffers 644
Handling console input and output 649
Power Management System 653
Managing the power state 654
Responding to power state changes 661
Lightweight Interprocess Communications 663
Using mailslots 664
Using pipes 670
Internet Integration 671
Configuring and using the Internet 672
Getting Internet content 678
Cryptography Algorithms and Protocol 686
CryptoAPI basics 687
Encryption 690
Authentication and data integrity 694
Chapter 16 Working with COM+ 697
An Overview of COM+ 697
COM+ applications 698
Interceptors and contexts 699
A simple COM+ application 699
COM+ Services 706
Just-in-Time activation 706
Transactions 707
Queued components 712
COM+ events 716
Object pooling 719
COM+ security 724
COM+ Application Deployment 725

Part IV The Finishing Touches

Chapter 17 Delivering Applications 729
Programming Practices 729
Folders and paths 729
Data storage 738
Support for low-privileged accounts 744
Complying with the Application Specification 749
Specification fundamentals 749
Installation 750
Side-by-side components 753
Look and feel 754

Chapter 18 Development Support . . . 757
Errors and Exceptions . . . 758
Using API error codes . . . 758
Using structured exceptions . . . 761
Notifying the user of an error . . . 770
Process Information . . . 773
Using the ToolHelp32 API . . . 773
Using the PSAPI . . . 782
Framework Tools . . . 785
Using the C++ Runtime Debug library . . . 786
Using the Microsoft Foundation Class Library . . . 801
Using the Active Template Library . . . 804
Performance Monitoring . . . 806
Delivering correct functionality . . . 806
Registering counters . . . 811
Gathering data . . . 815
Exporting data . . . 821
Other Tools . . . 829
Debugger integration . . . 830
Portable executable image helper API . . . 830

Appendix: Using the Examples in This Book . . . 833

Index . . . 837
