CONTENTS

Preface

xi

1	Introduction	1
1.1	General Purpose	1
1.2	Disturbances	1
1.2.1	Voltage Dips (SAGS)	2
1.2.2	Brief Interruptions	2
1.2.3	Brief Voltage Increases (SWELLS)	3
1.2.4	Transients	3
1.2.5	Voltage Notches	5
1.3	Unbalance	5
1.4	Distortion	6
1.4.1	Small Sources	8
1.4.2	Large and Random Sources	8
1.4.3	Static Converters	9
1.5	Voltage Fluctuations	11
1.6	Flicker	12
1.6.1	Causes of Flicker	14
1.6.2	Effects of Flicker	15
1.7	Quality Assessment	15
1.7.1	Power Quality State Estimation	16
1.8	References	16
2	Power Quality Indices and Standards	19
2.1	Introduction	19
2.2	Classification of Power Quality Phenomena	20
2.3	Disturbances	24
2.3.1	High-frequency Disturbances: Transients	24
2.3.2	Low-frequency Disturbances: Dips, Interruptions and Swells	28
2.3.3	CBEMA and ITI Curves	30
2.3.4	R.M.S. Variation Indices	33
2.4	Waveform Distortions	34
2.4.1	Harmonics	35
2.4.2	Harmonic Indices	38
2.4.3	Interharmonics	40

2.4.4	Harmonic Phase-angle Measurement	42
2.4.5	Harmonic Symmetrical Components	43
2.4.6	Notching	43
2.5	Voltage Unbalance	44
2.6	Voltage Fluctuation and Flicker	44
2.7	Summary	48
2.8	References	48
3	Power Assessment Under Waveform Distortion	51
3.1	Introduction	51
3.2	Single-phase Definitions	51
3.2.1	Illustrative Examples	54
3.3	Three-phase Definitions	56
3.3.1	Illustrative Examples	58
3.4	Summary	62
3.5	References	62
4	Waveform Processing Techniques	65
4.1	Introduction	65
4.2	Fundamental Frequency Characterisation	65
4.2.1	Curve-fitting Algorithm (CFA)	66
4.2.2	Curve-fitting Implementation	68
4.2.3	Frequency Estimates	71
4.2.4	R.M.S. Error Assessment	71
4.3	Fourier Analysis	72
4.3.1	Fourier Series and Coefficients	72
4.3.2	Simplifications Resulting from Waveform Symmetry	74
4.3.3	Complex Form of the Fourier Series	77
4.3.4	Convolution of Harmonic Phasors	79
4.3.5	The Fourier Transform	81
4.3.6	Sampled Time Functions	83
4.3.7	Discrete Fourier Transform	84
4.3.8	The Nyquist Frequency and Aliasing	86
4.3.9	Fast Fourier Transform	88
4.4	Window Functions	90
4.4.1	The Picket Fence	92
4.4.2	Spectral Leakage Reduction	93
4.4.3	Choice of Window Function	93
4.4.4	Mainlobe Width Reduction	96
4.4.5	Application to Interharmonic Analysis	97
4.5	Efficiency of FFT Algorithms	99
4.5.1	The Radix-2 FFT	99
4.5.2	Mixed-radix FFT	100
4.5.3	Real-valued FFTs	101
4.5.4	Partial FFTs	102
4.6	Alternative Transforms	104

4.6.1	The Wavelet Transform	105
4.6.2	Automation of Disturbance Recognition	109
4.7	Summary	110
4.8	References	110
5	Power Quality Monitoring	113
5.1	Introduction	113
5.2	Transducers	113
5.2.1	Current Transformers	114
5.2.2	Voltage Transformers	115
5.3	Power Quality Instrumentation	118
5.3.1	System Requirements	119
5.3.2	System Structure Designs	125
5.3.3	Synchronisation of Sampling Processes Across Multiple Input Channels	130
5.3.4	Data Transmission	131
5.4	Harmonic Monitoring	132
5.4.1	Sampling for the FFT	133
5.4.2	Anti-aliasing Filtering	136
5.4.3	The FFT Implementation	137
5.4.4	(Quasi) Steady-state Harmonic Measurements	138
5.4.5	Interharmonics Measurement	139
5.4.6	Phase-angle Measurement	139
5.5	Transients Monitoring	140
5.5.1	Wavelet Detection	141
5.6	Event Recording	143
5.7	Flicker Monitoring	144
5.7.1	The IEC Flickermeter	144
5.7.2	Digital, Time-domain-based Flickermeter	146
5.7.3	Digital, f -domain-based Flickermeter	149
5.7.4	Arc-furnace Flicker Measurement	151
5.7.5	Steady-state Flicker Estimation	151
5.8	Assessment of Voltage and Current Unbalance	155
5.9	Examples of Application	156
5.9.1	South Island (NZ) Synchronised Tests	156
5.9.2	Group-connected HV d.c. Converter Test	163
5.10	Summary	167
5.11	References	167
6	Evaluation of Power System Harmonic Distortion	171
6.1	Introduction	171
6.2	Direct Harmonic Analysis	172
6.2.1	Incorporation of Harmonic Voltage Sources	174
6.2.2	Cascading Sections	174
6.3	Experimental Derivation of the Network Harmonic Impedances	176
6.3.1	Use of Existing Sources (On-line Non-invasive Tests)	176

6.3.2	Direct Injection (On-line Invasive Tests)	177
6.3.3	Analysis of Transient Waveforms (On-line Non-invasive Tests)	177
6.4	Representation of Individual Power System Components	179
6.4.1	The Overhead Transmission Line	179
6.4.2	Evaluation of Transmission Line Parameters	189
6.4.3	Underground and Submarine Cables	193
6.4.4	Three-phase Transformer Models	196
6.4.5	Generator Modelling	201
6.4.6	Shunt Elements	201
6.4.7	Series Elements	202
6.4.8	Distribution and Load System Modelling	202
6.5	Implementation of the Harmonic Analysis	208
6.5.1	Harmonic Penetration Overview	208
6.5.2	Computer Implementation	208
6.5.3	Program Structure	209
6.5.4	Data Structure	212
6.5.5	Database Format	214
6.5.6	Development Environment	219
6.6	Post-Processing and Display of Results	219
6.6.1	Post-Processing for Telephone Interference	220
6.6.2	Post-Processing for Test Results Comparisons	225
6.7	Summary	226
6.8	References	227
7	Power Quality State Estimation	229
7.1	Introduction	229
7.2	Harmonic Measurement—State Variable Model	231
7.2.1	Building Up the Measurement Matrix	232
7.2.2	Virtual and Pseudo-Measurements	234
7.3	Observability Analysis	235
7.3.1	Example of Application	238
7.3.2	Partially-Observable HSE	242
7.3.3	Conversion to a Real-valued Problem	242
7.3.4	III-conditioning	245
7.4	Further Capabilities of Harmonic State Estimation	245
7.4.1	Optimal Placement of Measurements	245
7.4.2	Bad-Data Analysis	246
7.4.3	Hierarchical HSE	246
7.4.4	Real-Time HSE	247
7.4.5	Enhanced Implementation	248
7.5	Test System and Results	249
7.5.1	Load and Harmonic Source Identification	258
7.6	Summary	263
7.7	References	264

Appendix I	Signal Processing for Digital Instruments	267
	I.1 Data Sampling	267
	I.2 Signal Quantisation	268
	I.3 Anti-Aliasing FIR Filter Design	269
	I.4 References	271
Appendix II	Continuous Harmonic Analysis in Real Time (CHART)	273
	II.1 Bibliography	276
Appendix III	Least Squares Fitting	277
	III.1 Basic Method	277
	III.2 Weighted Least Squares	278
	III.3 Bibliography	279
Appendix IV	Singular Value Decomposition (SVD)	281
	IV.1 General Considerations	281
	IV.2 SVD Factorisation	282
	IV.3 Numerical Example	282
	IV.4 Bibliography	283
Appendix V	Kalman Filtering	285
	V.1 Bibliography	286
Appendix VI	HSE Demonstration	287
Index		297
