**JERRY GLYNN
THEODORE GRAY**

Table of Contents

Preface	1
■ Part 1: The Basics	
Chapter 1: What do I need to make <i>Mathematica</i> work on my computer?	2
Chapter 2: Can I read the rest of this book without reading this chapter?	3
Chapter 3: Why is <i>Mathematica</i> split into a front end and a kernel?	5
Chapter 4: How do I get the electronic version of this book?	8
Chapter 5: What's the difference between numerical and symbolic calculation?	10
Chapter 6: How do I ask <i>Mathematica</i> for help?	13
Chapter 7: How do I define constants and functions?	15
Chapter 8: How do I share notebooks with those who have different brands of computers?	18
■ Part 2: For Users of Older Versions of <i>Mathematica</i>	
Chapter 9: What was new in V3?	20
Chapter 10: So, what's new in V4?	24
Chapter 11: How do I use my old notebooks in V4?	27
Chapter 12: I really liked <insert your favorite feature> in V2! How do I get it in V4?	30
■ Part 3: Speaking to <i>Mathematica</i>	
Chapter 13: Can I use <i>Mathematica</i> without learning any new notation?	33
Chapter 14: What do characters like ^, (, [, {, *, &, etc., mean in <i>Mathematica</i> ?	35
Chapter 15: What are some widely used forms in <i>Mathematica</i> ?	37
Chapter 16: How do I enter $\int_0^\pi \frac{1}{\sqrt{1-m \sin^2(\Theta)}} d\Theta$ without using the keyboard?	40
Chapter 17: What is the best way to enter $\int_0^\pi \frac{1}{\sqrt{1-m \sin^2(\Theta)}} d\Theta$?	43
Chapter 18: How do I enter $\int_0^\pi \frac{1}{\sqrt{1-m \sin^2(\Theta)}} d\Theta$ as quickly as possible?	46
Chapter 19: What is the correct philosophy of notation?	49

■ Part 4: Lists, Tables, Vectors, and Matrices

Chapter 20: What are lists? What can I do with them?	52
Chapter 21: How do I make a table of values?	57
Chapter 22: How do I manipulate vectors and matrices?	59
Chapter 23: How do I pick out rows, columns, and submatrices?	68

■ Part 5: Numerical Calculations

Chapter 24: What's the difference between 2 and 2.0?	70
Chapter 24.0: How does <i>Mathematica</i> handle roundoff error?	74
Chapter 25: Can <i>Mathematica</i> do industrial-strength numerics?	86

■ Part 6: Algebra

Chapter 26: How do I manipulate polynomials?	90
Chapter 27: How do I solve equations?	93

■ Part 7: Packages

Chapter 28: What is a package? How do I load one?	102
Chapter 29: The package didn't load! Why?	103
Chapter 30: What packages are available?	105

■ Part 8: Two-Dimensional Plotting

Chapter 31: How do I plot a function in two dimensions?	109
Chapter 32: How do I plot a parametric equation in two dimensions?	117
Chapter 33: How do I plot in polar coordinates?	119
Chapter 34: How do I plot implicitly-defined functions?	121
Chapter 35: How do I show the area between curves?	125
Chapter 36: How do I plot complex numbers?	128

■ Part 9: Three-Dimensional Plotting

Chapter 37: How do I plot a function in three dimensions?_____	132
Chapter 38: How do I plot a parametric equation in three dimensions?_____	141
Chapter 39: How do I plot 3-D implicitly-defined functions?_____	146
Chapter 40: How do I plot in cylindrical and spherical coordinates?_____	149

■ Part 10: Other Graphics, and Sounds

Chapter 41: How do I make contour and density plots?_____	153
Chapter 42: How do I plot a list of values?_____	157
Chapter 43: How do I make sounds?_____	163
Chapter 44: How do I make animations?_____	169
Chapter 45: How do I do image manipulation in <i>Mathematica</i> ?_____	176

■ Part 11: Calculus

Chapter 46: How do I integrate and differentiate?_____	210
Chapter 47: How do I find limits?_____	218
Chapter 48: How do I solve differential equations?_____	221

■ Part 12: Text and Document Features in *Mathematica*

Chapter 49: How do I use <i>Mathematica</i> as a word processor?_____	224
Chapter 50: How do I use <i>Mathematica</i> as an outliner?_____	233
Chapter 51: I never learned to spell. Can you help me?_____	237
Chapter 52: How do I use style sheets to see my notebooks in new ways?_____	244
Chapter 53: Why does my notebook look different printed than on screen?_____	248
Chapter 54: What <i>exactly</i> are styles, style sheets, and style environments?_____	251
Chapter 55: How do I use that darn Option Inspector anyway?_____	261

■ Part 13: Programming

Chapter 56: How do I program in <i>Mathematica</i> ?_____	266
Chapter 57: Should anyone <i>ever</i> use a For loop?_____	274
Chapter 58: How do I use <i>Mathematica</i> 's pattern matcher?_____	278
Chapter 59: Is <i>Mathematica</i> Year-2000 compatible?_____	289
Chapter 60: The problem Prof. Eugene Nichols goes around showing people_____	293

■ Part 14: Programming the Front End

Chapter 61: How do I make hyperlinks in and between notebooks? _____	309
Chapter 62: Is <i>Mathematica</i> “scriptable”? _____	314
Chapter 63: What commands can I use to control the <i>Mathematica</i> front end? _____	318
Chapter 64: What options can I use to control the <i>Mathematica</i> front end? _____	352
Chapter 65: How do I use file names in programs? _____	353

■ Part 15: Mathematics and Science Education

Chapter 66: I'd rather not see complex numbers. Can you help me? _____	357
Chapter 67: The Units Calculator _____	360
Chapter 68: Surfaces of Revolution _____	364
Chapter 69: Can <i>Mathematica</i> show me the steps? _____	373
Chapter 70: Will it rot my students' brains if they use <i>Mathematica</i> ? _____	379
Chapter 71: Will it rot my students' brains if they use other educational software? _____	384
Chapter 72: Will my students spend more time learning <i>Mathematica</i> than mathematics? _____	392
Chapter 73: Can <i>Mathematica</i> make math relevant to my students? _____	395

■ Part 16: *Mathematica* and the Internet

Chapter 74: How do I make hyperlinks to the Web? _____	399
Chapter 75: Does this book have a Home Page? _____	400
Chapter 76: What <i>Mathematica</i> resources are available on the World Wide Web? _____	401

■ Part 17: Statistics and Data Analysis

Chapter 77: How do I do statistics? _____	402
Chapter 78: How do I fit a curve to data? _____	408
Chapter 79: How do I import data into <i>Mathematica</i> ? _____	412
Chapter 80: How do I export data from <i>Mathematica</i> ? _____	419

References _____	423
