Preface xi

Part 1 Calculations of Water Quality Assessment and Control

Chapter 1.1. Basic Science and Fundamentals

1.3

1. Conversion Factors 1.3
2. Prefixes for SI Units 1.7
3. Mathematics 1.8
4. Basic Chemistry and Physics 1.34
5. Statistics 1.56
- References 1.78

Chapter 1.2. Streams and Rivers

1.79

1. General 1.80
2. Point Source Dilution 1.80
3. Discharge Measurement 1.81
4. Time of Travel 1.81
5. Dissolved Oxygen and Water Temperature 1.83
6. Biochemical Oxygen Demand Analysis 1.86
7. Streeter-Phelps Oxygen Sag Formula 1.89
8. BOD Models and K_1 Computation 1.90
9. Determination of Reaeration Rate Constant K_2 1.113
10. Sediment Oxygen Demand 1.119
11. Organic Sludge Deposits 1.122
12. Photosynthesis and Respiration 1.123
13. Natural Self-Purification in Streams 1.124
14. SOD 1.145
15. Apportionment of Stream Users 1.145
16. Velz Reaeration Curve (A Pragmatic Approach) 1.151
17. Stream DO Model (A Pragmatic Approach) 1.156
18. Biological Factors 1.169
- References 1.179

Chapter 1.3. Lakes and Reservoirs

1.183

1. Lakes and Impoundment Impairments 1.183
2. Lake Morphometry 1.184
3. Water Quality Models 1.187
4. Evaporation 1.187
5. The Clean Lakes Program 1.192
- References 1.220

1. Definition 1.223
2. Hydrogeologic Parameters 1.227
3. Steady Flows in Aquifers 1.237
4. Anisotropic Aquifers 1.238
5. Unsteady (Nonequilibrium) Flows 1.239
6. Groundwater Contamination 1.250
7. Setback Zones 1.254
- References 1.260

Chapter 1.5. Fundamental and Treatment Plant Hydraulics

1. Definitions and Fluid Properties 1.263
2. Water Flow in Pipes 1.271
3. Pumps 1.295
4. Water Flow in Open Channels 1.301
5. Flow Measurements 1.318
- References 1.331

Chapter 1.6. Public Water Supply

1. Sources and Quantity of Water 1.334
2. Population Estimates 1.336
3. Water Requirements 1.339
4. Regulation for Water Quality 1.344
5. Water Treatment Processes 1.346
6. Aeration and Air Stripping 1.346
7. Solubility Equilibrium 1.368
8. Coagulation 1.370
9. Flocculation 1.377
10. Sedimentation 1.381
11. Filtration 1.387
12. Water Softening 1.395
13. Ion Exchange 1.401
14. Iron and Manganese Removal 1.416
15. Activated Carbon Adsorption 1.420
16. Membrane Processes 1.423
17. Residual from Water Plant 1.428
18. Disinfection 1.432
19. Water Fluoridation 1.452
- References 1.458

Chapter 1.7. Wastewater Engineering

1. What is Wastewater? 1.464
2. Characteristics of Wastewater 1.464
3. Sewer Systems 1.471
4. Quantity of Wastewater 1.473
5. Urban Stormwater Management 1.477
6. Design of Storm Drainage Systems 1.478
7. Precipitation and Run Off 1.478
8. Stormwater Quality 1.482
9. Sewer Hydraulics 1.487
10. Sewer Appurtenances 1.488
11. Pumping Stations 1.493
12. Sewer Construction 1.496
13. Wastewater Treatment Systems 1.498

14.	Screening Devices	1.502
15.	Comminutors	1.506
16.	Grit Chamber	1.506
17.	Flow Equalization	1.508
18.	Sedimentation	1.511
19.	Primary Sedimentation Tanks	1.523
20.	Biological (Secondary) Treatment Systems	1.531
21.	Activated-Sludge Process	1.534
22.	Trickling Filter	1.595
23.	Rotating Biological Contactors	1.609
24.	Dual Biological Treatment	1.621
25.	Stabilization Ponds	1.621
26.	Secondary Clarifier	1.628
27.	Effluent Disinfection	1.634
28.	Advanced Wastewater Treatment	1.642
29.	Sludge (Residuals) Treatment and Disposal	1.679
	References	1.732

Appendix A. Illinois Environmental Protection Agency's Macroinvertebrate Tolerance List	1.737
--	--------------

Appendix B. Well Function for Confined Aquifers	1.743
--	--------------

Appendix C. Solubility Product Constants for Solution at or near Room Temperature	1.749
--	--------------

Appendix D. Freundlich Adsorption Isotherm Constants for Toxic Organic Compounds	1.753
---	--------------

Part 2 Solid Waste Calculations

Chapter 2.1. Thermodynamics used in Environmental Engineering	2.3
--	------------

1.	Introduction	2.4
2.	Thermodynamic Terms and Calculations	2.4
	References	2.137

Chapter 2.2. Basic Combustion and Incineration	2.147
---	--------------

1.	Introduction	2.148
2.	Basic Combustion Principles	2.148
3.	Basic Mass and Energy Balance Calculation	2.199
4.	Basic Incinerator Design	2.220
5.	System Calculations	2.239
6.	Evaluation of Permit Application Data	2.294
	References	2.315

1. Introduction 2.317
 2. Combustion Process Calculations 2.317
 3. Waste Combustion Systems 2.333
 4. Control of Emissions from Combustion 2.351
 5. Controlled and Uncontrolled Emission Factors 2.373
 6. Conversions and Corrections 2.378
- References 2.384

Chapter 2.4. Calculations for Permitting and Compliance**2.387**

1. Introduction 2.387
 2. Calculations of Emissions from the Stack 2.388
 3. Regulatory Emission Standards and Guidelines 2.394
 4. Calculations to Confirm Compliance with Standards 2.400
 5. Environmental Impact of Stack Emissions 2.414
 6. Environmental Risk Assessment 2.430
- References 2.437

Chapter 2.5. Calculational Procedures for Ash Stabilization and Solidification**2.439**

Section 2.5.1: Calculational Procedures for Ash Stabilization 2.441

1. Overview of Processing and Stabilizing Fly Ash 2.441
 2. Calculations of Processing and Stabilizing Fly Ash 2.445
- References 2.449

Appendix A. Material Safety Data Sheet 2.450

Appendix B. Material Safety Data Sheet. Fly Ash 2.453

Appendix C. Material Safety Data Sheet. Mixtures 2.455

Appendix D. Material Safety Data Sheet. CFBC Ash 2.458

Appendix E. Medical Waste Incinerator. Bottom Ash 2.461

Appendix F. Medical Waste Incinerator. Fly Ash 2.462

Section 2.5.2: Catalytic Extraction Processing: Calculating Procedures for Assessing Low Grade Material Processing Potential 2.463

3. Overview of Fundamental Catalytic Extraction Processing 2.463
 4. Engineering Calculations of Catalytic Extraction Processing 2.471
- References 2.488

Chapter 2.6. Incineration Technologies and Facility Requirements**2.491**

1. Introduction 1.491
 2. Incineration Technology 1.492
 3. Incineration Technology Summary 1.537
 4. Resource Recovery System 1.537
 5. Facility Design Feature 1.550
 6. Summary of Incineration System 1.570
- References 1.572

Part 3 Air Pollution Control Calculations

Chapter 3.1. Air Emission Control**3.3**

1. Introduction 3.3
2. Air Pollution Definition 3.4
3. Pollution Emission Calculation 3.9

- 4. Gaseous Emission Control Techniques 3.23
- 5. Management of Incineration Residue 3.125
- 6. Accessory Equipment for Air Pollution Control 3.127
- 7. Monitoring Equipment 3.139
- 8. Recording Keeping 3.140
- References 3.140

Chapter 3.2. Particulate Emission Control

3.143

- 1. Introduction 3.143
- 2. Basics of Particulate Emission Control 3.143
- 3. Factors Affecting the Selection of Particulate Control Equipment 3.166
- 4. Particulate Emission Control Equipment 3.168
- 5. Particulate Concentration Calculation 3.216
- 6. Particulate Emission Control Cost 3.218
- References 3.221

Chapter 3.3. Wet and Dry Scrubbers for Emission Control

3.223

- 1. Introduction 3.223
- 2. Wet Absorption for Particulate Emission Control 3.225
- 3. Wet Absorption for Gaseous Emission Control 3.241
- 4. Wet Scrubbers for Particulate and Gaseous Emission Control 3.242
- 5. Dry Absorption for Gaseous Emission Control 3.286
- 6. Accessory Equipment for Scrubber 3.292
- References 3.297

Index follows Chapter 3.3
