Geologic Maps

A Practical Guide to the Preparation and Interpretation of Geologic Maps

Edgar W. Spencer

Suranaree University of Technology

Contents

Preface vii

CHAPTER 1 Maps and Images Used in the Study of Earth 1

- Base Maps 1
- Oblique Aerial Photographs 1
- Vertical Aerial Photographs 2
- Orthophotographs 3
- Landsat Satellite Images 3
- Side-Looking Airborne Radar (SLAR) Images 4
- Geologic Maps 6
- Geologic Cross Sections 8
- Geologic Block Diagrams 8
- Structure Contour Maps 9
- Tectonic Maps 9
- Types of Information You Can Obtain from Maps and Images 9
 - Topographic Maps 10
 - Geologic Maps 10
- Land-Use Maps Derived from Geologic Maps 11
- Professional Uses of Geologic Maps 11
 - Geologists 11
 - Civil and Environmental Engineers and Engineering Geologists 12
 - Planners and Architects 12
 - Soil Scientists 12

CHAPTER 2 Base Maps 13

- Map Projections 13
 - Mercator Projection 14
 - Transverse Mercator Projection 14
 - Polyconic Projection 14
 - Lambert Conformal Conic Projection 16
- Topographic Maps 16
 - Location 17
 - Location by Means of the Public Land Survey 17
 - Ground Distance and Map Distance 18
 - Map Scales 18
 - Exercise 2-1. Map Scales 20
 - True and Magnetic North—Declination 20
 - Bearings and Azimuths 22
 - Preparing a Topographic Profile 22
 - Selecting Graph Paper to Show Vertical Exaggeration 24
 - Exercise 2-2. Bearings 24
 - Exercise 2-3. Draw Topographic Profiles 24

CHAPTER 3 Preparation of Geologic Maps 25

- Preliminary Preparations 25
 - Define the Map Area 25
 - Collect and Review Existing Information 25
 - Select a Base Map 26
- Making a Reconnaissance Survey of the Area 26
 - Obtain Permission to Enter Private Property 26

Collecting and Recording Observations	26
Decide Where to Collect Data	26
Record Observations	28
Determine Your Location	28
Exercise 3-1. A Pace-and-Compass Survey	29
Describing the Outcrop	30
Stratigraphic Units Used on Geologic Maps of Bedrock	30
Making Measurements with Compasses	32
Pointers on Making Measurements	34
Common Problems in Measuring Strike and Dip	35
Compiling Field Observations on the Base Map	35
Interpreting the Data	38
Field Checking Your Interpretation	39
Preparing the Final Map	39
Final Map Checklist	39

CHAPTER 4 Identification and Description of Sedimentary Rocks 41

Field Description of Sedimentary Rocks	41
Stratification	41
Composition	41
Texture	42
Color	42
Sedimentary Rock Types	42
Environments of Deposition	43
Primary Features in Sedimentary Rocks	44
Textural Variations in Sedimentary Rocks	44
Primary Features Found on Bedding Surfaces	46

CHAPTER 5 Use of Aerial Photographs in Mapping 49

Vertical Aerial Photography	49
Vertical Photographs	49
Stereographic Photography	49
Exercise 5-1. Interpretation of Aerial Photographs—Coconino County, Arizona	51
Identifying Surficial and Bedrock Materials on Aerial Photographs	52
Exercise 5-2. Interpretation of Aerial Photographs—Owl Creek, Wyoming	54
Exercise 5-3. Interpretation of Aerial Photographs—Lookout Ridge, Alaska	55

CHAPTER 6 Interpretation of Surficial Geologic Maps 57

Uses of Surficial Geologic Maps	57
Types of Unconsolidated Materials Shown on Geologic Maps	58
Exercise 6-1. Surficial Deposits	58
Exercise 6-2. Surficial Deposits—Ouray Quadrangle, Colorado	59
Exercise 6-3. Surficial Deposits—Davis Mesa Quadrangle, Colorado	59
Exercise 6-4. Surficial Deposits—Montvale Quadrangle, Virginia	59

CHAPTER 7 Introduction to Geologic Maps of Bedrock 62

Primary Shape of Sedimentary Rock Bodies	63
Exercise 7-1. Kilauea Crater, Hawaii	65
Structure Contour Maps	68
Exercise 7-2. Structure Contours on the Flanks of the Black Hills, Wyoming, Montana, and South Dakota	69

- Exercise 7-3. Structure Contour Map of the Denver Basin, Colorado 71
Exercise 7-4. Isopach Map of the Lower Ordovician 71

CHAPTER 8 Geologic Maps of Homoclinal Beds 73

- Patterns of Homoclinal Beds on Geologic Maps 73
V-Shaped Contact Patterns on Geologic Maps 73
Determining the Strike and Dip of a Plane from Three Points of Known Elevation 76
 Exercise 8-1. Three-Point Problem 77
Tracing Plane Contacts through the Topography 79
 Exercise 8-2. Tracing Contacts through the Topography 81
Layer Thickness and Width on Maps 81
 Exercise 8-3. Layer Thickness and Width 83
Constructing Cross Sections of Homoclinal Beds 84
 Exercise 8-4. Homoclines—Grand Canyon, Arizona 87
 Exercise 8-5. Homoclines—Davis Mesa Quadrangle, Colorado 88
 Exercise 8-6. Homoclines—Ouray Quadrangle, Colorado 89
 Exercise 8-7. Cross Sections of Homoclinal Beds 89

CHAPTER 9 Unconformities 91

- Unconformity Patterns on Geologic Maps 91
 Exercise 9-1. Unconformities—Pittsfield East Quadrangle, Massachusetts 92
 Exercise 9-2. Unconformities—Ouray Quadrangle, Colorado 94
 Exercise 9-3. Unconformities—Brownwood and Llano, Texas 94
 Exercise 9-4. Unconformities—Mule Mountain Quadrangle, Arizona 94
 Exercise 9-5. Unconformities—Bull Lake West Quadrangle, Wyoming 94
 Exercise 9-6. Unconformities—Atkinson Creek Quadrangle, Colorado 96
 Exercise 9-7. Unconformities—Grand Canyon, Arizona 96
 Exercise 9-8. Unconformities—Arkansas State Geologic Map 97

CHAPTER 10 Folds on Geologic Maps 98

- Fold Geometry 98
Fold Patterns on Geologic Maps 98
 Hints on Reading Maps of Folded Strata 100
Constructing Cross Sections of Folded Rocks 102
 Freehand Cross Sections 102
 Balanced Cross Sections 102
Tracing Folds through the Topography 103
 Exercise 10-1. Tracing Folds through the Topography 105
Structure Contour Maps of Folded Strata 105
 Exercise 10-2. Folds—Northern and Western Flanks of the Black Hills, Wyoming 105
 Exercise 10-3. Structure on the Arkansas State Geologic Map 106
 Exercise 10-4. Folds—Pittsfield Quadrangle, Massachusetts 109
 Exercise 10-5. Folds—Williamsport Quadrangle, Pennsylvania 109
 Exercise 10-6. Folds—Salem Quadrangle, Kentucky 111
 Exercise 10-7. Folds—Maverick Springs Anticline 113

CHAPTER 11 Faults on Geologic Maps 114

- Fault Nomenclature 114
 Exercise 11-1. Displacement and Separation 117
Cross-Section Construction in Faulted Areas 117
High-Angle Faults 117
 Patterns of High-Angle Faults on Geologic Maps 118

Exercise 11-2. Faults—Mule Mountain Quadrangle, Arizona	120
Exercise 11-3. Faults—Brownwood and Llano, Texas	120
Exercise 11-4. Faults—Grand Canyon, Arizona	123
Exercise 11-5. Faults—Atkinson Creek Quadrangle, Colorado	123
Exercise 11-6. Faults—Pine Mountain Quadrangle, Colorado	124
Exercise 11-7. Faults—Salem Quadrangle, Kentucky	124
Exercise 11-8. Faults—Kilauea Crater, Hawaii	125
Patterns along Strike-slip Faults	125
Low-Angle Faults	125
Exercise 11-9. Faults—Smoky Mountains, Tennessee and North Carolina	128
Exercise 11-10. Faults—Duffield Quadrangle, Virginia	131
Exercise 11-11. Faults—Calgary, British Columbia and Alberta, Canada	132
Exercise 11-12. Faults—Paradise Peak Quadrangle, Nevada	133

CHAPTER 12 Igneous and Metamorphic Rocks 134

Appearance of Plutons on Geologic Maps 134

Nomenclature and Classification of Intrusions 134

Concordant Plutons 135

Discordant Plutons 135

Exercise 12-1. Plutons—Danford Quadrangle, Maine 138

Exercise 12-2. Igneous Rocks—Paradise Peak Quadrangle, Nevada 140

Exercise 12-3. Igneous Rocks—Arkansas State Geologic Map 141

Exercise 12-4. Igneous Rocks—Brownwood and Llano, Texas 141

Exercise 12-5. Igneous Rocks—Jemez Mountains, New Mexico 141

Exercise 12-6. Igneous Rocks—Kilauea Crater, Hawaii 142

Exercise 12-7. Igneous Rocks—Ouray Quadrangle, Colorado 142

Exercise 12-8. Metamorphic Rocks—Greenville Quadrangle, Maine 143
