Contents

1 Overview and Descriptive Statistics 1

Introduction 1
1.1 Populations, Samples, and Processes 3
1.2 Pictorial and Tabular Methods in Descriptive Statistics 11
1.3 Measures of Location 28
1.4 Measures of Variability 36
Supplementary Exercises 48
Bibliography 51

2 Probability 52

Introduction 52
2.1 Sample Spaces and Events 53
2.2 Axioms, Interpretations, and Properties of Probability 58
2.3 Counting Techniques 67
2.4 Conditional Probability 75
2.5 Independence 86
Supplementary Exercises 92
Bibliography 95

3 Discrete Random Variables and Probability Distributions 96

Introduction 96
3.1 Random Variables 96
3.2 Probability Distributions for Discrete Random Variables 100
3.3 Expected Values of Discrete Random Variables 110
3.4 The Binomial Probability Distribution 119
3.5 Hypergeometric and Negative Binomial Distributions 127
3.6 The Poisson Probability Distribution 134
Supplementary Exercises 139
Bibliography 142

4 Continuous Random Variables and Probability Distributions 143

Introduction 143
4.1 Continuous Random Variables and Probability Density Functions 143
4.2 Cumulative Distribution Functions and Expected Values 149
4.3 The Normal Distribution 158
4.4 The Gamma Distribution and Its Relatives 171
4.5 Other Continuous Distributions 178
4.6 Probability Plots 185
Supplementary Exercises 196
Bibliography 200

5 Joint Probability Distributions and Random Samples 201

Introduction 201
5.1 Jointly Distributed Random Variables 202
5.2 Expected Values, Covariance, and Correlation 215
5.3 Statistics and Their Distributions 221
5.4 The Distribution of the Sample Mean 233
5.5 The Distribution of a Linear Combination 239
Supplementary Exercises 245
Bibliography 248

6 Point Estimation 249

Introduction 249
6.1 Some General Concepts of Point Estimation 250
6.2 Methods of Point Estimation 265
Supplementary Exercises 274
Bibliography 275

7 Statistical Intervals Based on a Single Sample 277

Introduction 277
7.1 Basic Properties of Confidence Intervals 278
7.2 Large-Sample Confidence Intervals for a Population Mean and Proportion 287
7.3 Intervals Based on a Normal Population Distribution 295
7.4 Confidence Intervals for the Variance and Standard Deviation of a Normal Population 304
Supplementary Exercises 307
Bibliography 309

8 Tests of Hypotheses Based on a Single Sample 310

Introduction 310
8.1 Hypotheses and Test Procedures 311

8.2 Tests About a Population Mean 321
8.3 Tests Concerning a Population Proportion 334
8.4 *P*-Values 339
8.5 Some Comments on Selecting a Test Procedure 347
Supplementary Exercises 350
Bibliography 353

9 Inferences Based on Two Samples 354

Introduction 354
9.1 *z* Tests and Confidence Intervals for a Difference Between Two Population Means 355
9.2 The Two-Sample *t* Test and Confidence Interval 366
9.3 Analysis of Paired Data 374
9.4 Inferences Concerning a Difference Between Population Proportions 384
9.5 Inferences Concerning Two Population Variances 392
Supplementary Exercises 396
Bibliography 401

10 The Analysis of Variance 402

Introduction 402
10.1 Single-Factor ANOVA 403
10.2 Multiple Comparisons in ANOVA 414
10.3 More on Single-Factor ANOVA 420
Supplementary Exercises 430
Bibliography 432

11 Multifactor Analysis of Variance 433

Introduction 433
11.1 Two-Factor ANOVA with $K_{ij} = 1$ 434
11.2 Two-Factor ANOVA with $K_{ij} > 1$ 448
11.3 Three-Factor ANOVA 457
11.4 2^p Factorial Experiments 468
Supplementary Exercises 483
Bibliography 486

12 Simple Linear Regression and Correlation 488

Introduction 488
12.1 The Simple Linear Regression Model 489
12.2 Estimating Model Parameters 497
12.3 Inferences About the Slope Parameter β_1 512
12.4 Inferences Concerning $\mu_{Y \cdot x^*}$ and the Prediction of Future *Y* Values 520
12.5 Correlation 528
Supplementary Exercises 538
Bibliography 542

13 Nonlinear and Multiple Regression 543

Introduction 543
13.1 Aptness of the Model and Model Checking 544
13.2 Regression with Transformed Variables 552
13.3 Polynomial Regression 562
13.4 Multiple Regression Analysis 573
13.5 Other Issues in Multiple Regression 597
Supplementary Exercises 610
Bibliography 615

14 The Analysis of Categorical Data 616

Introduction 616
14.1 Goodness-of-Fit Tests When Category Probabilities Are Completely Specified 617
14.2 Goodness of Fit for Composite Hypotheses 625
14.3 Two-Way Contingency Tables 638
Supplementary Exercises 646
Bibliography 648

15 Distribution-Free Procedures 649

Introduction 649
15.1 The Wilcoxon Signed-Rank Test 650
15.2 The Wilcoxon Rank-Sum Test 659
15.3 Distribution-Free Confidence Intervals 666
15.4 Distribution-Free ANOVA 671
Supplementary Exercises 675
Bibliography 677

16 Quality Control Methods 678

Introduction 678
16.1 General Comments on Control Charts 679
16.2 Control Charts for Process Location 681
16.3 Control Charts for Process Variation 690
16.4 Control Charts for Attributes 695
16.5 CUSUM Procedures 700
16.6 Acceptance Sampling 709
Supplementary Exercises 715
Bibliography 716

Appendix Tables 717

A.1 Cumulative Binomial Probabilities 718
A.2 Cumulative Poisson Probabilities 720
A.3 Standard Normal Curve Areas 722
A.4 The Incomplete Gamma Function 724

A.5 Critical Values for t Distributions 725
A.6 Tolerance Critical Values for Normal Population Distributions 726
A.7 Critical Values for Chi-Squared Distributions 727
A.8 t Curve Tail Areas 728
A.9 Critical Values for F Distributions 730
A.10 Critical Values for Studentized Range Distributions 736
A.11 Chi-Squared Curve Tail Areas 737
A.12 Critical Values for the Ryan–Joiner Test of Normality 739
A.13 Critical Values for the Wilcoxon Signed-Rank Test 740
A.14 Critical Values for the Wilcoxon Rank-Sum Test 741
A.15 Critical Values for the Wilcoxon Signed-Rank Interval 742
A.16 Critical Values for the Wilcoxon Rank-Sum Interval 743
A.17 β Curves for t Tests 744

Answers to Odd-Numbered Exercises 745
