Contents

PART 1 Understanding 3D 1

Theory Behind 3D Modeling 2

- 1.1 Introduction 2
- 1.2 Benefits 3
- 1.3 Modeling Versus Drafting and AutoCAD 3
- 1.4 Model Building Options 5
 - Extrusion: 2-1/2D 5
 - Wireframe: 3D Lines 6
 - Surface Generation 6
 - Solid Modeling 8
- 1.5 Model Display Options 9
- 1.6 Model Viewing 10
- 1.7 Working Planes 11
- 1.8 The Text and Lab Framework 12
 - AutoCAD Version 13
 - 3D Viewpoint Boxes 13
 - File Referencing 13
 - Model Creation and the Use of Color 13
 - Model Space and Paper Space 14

- Plotting 14
- Commands and Menus 14
- 1.9 What's Ahead 15

Applications 17

- 2.1 Introduction 17
- 2.2 Model Illustrations 18
 - From Two Dimensions to Three Dimensions 18
 - Building Complex 18
 - Park and Streetcar Station 18
 - Steel Arch Bridge 20
 - Office Layout 20
 - Turboprop Airplane 20
 - Racing Car 23
 - Memorial Stadium 23
 - Crane Hook 23
 - Hilly Terrain 24
 - Boardroom 24
 - Antenna Tower 25
 - Diver's Helmet 27
 - Heart 27
 - Residential Dwelling 27

Miniature Pneumatic Cylinder	28
Kitchen	29
Rendered House Model	29
2.3 Summary	29

PART 2 Preparing for Construction of 3D Models 31

Display of 3D Models for Construction 32

3.1 Introduction	32
3.2 Viewpoint Manipulation	34
VPOINT Coordinate Input	35
VPOINT Rotation Input	37
VPOINT Compass Input	37
VPOINT Preset Input	38
Preset Views	39
3.3 3D Orbit	39
3.4 The PLAN Command	40
Orientation Control	41
3.5 Multiple Viewports	41
Viewport Control	43
Viewports Dialog Box	43
3.6 Hidden Line Removal	43
3.7 Shade Mode	44
3.8 Saving and Restoring Views	46
<i>Lab 3.A Changing Viewpoints</i>	47
<i>Lab 3.B Using 3D Orbit and Shade Modes</i>	53
<i>Lab 3.C Multiple Viewports</i>	56

Working in 3D Space 65

4.1 Introduction	65
4.2 World Coordinate System	66
4.3 User Coordinate System	66
The UCS Command	67
Saving and Restoring UCS Working Planes	68
The UCS Icon	68
The UCSICON Command	68
4.4 Elevated Working Planes	71
The ELEVATION Command	71
<i>Lab 4.A The UCS Icon</i>	72

<i>Lab 4.B Creating Working Planes Using the 3-Point Method</i>	75
---	----

<i>Lab 4.C Creating Working Planes Using the Axes</i>	80
---	----

PART 3 Construction of 3D Surface Models 85

2-1/2D Extrusion 86

5.1 Introduction	86
5.2 Thickness Concepts	87
5.3 Thickness Behavior	88
5.4 Thickness Property	88
5.5 Thickness Modification	90
5.6 Thickness Effect on Object Snap	90
<i>Lab 5.A Bolt Extrusion</i>	91
<i>Lab 5.B Table Extrusion</i>	92
<i>Lab 5.C Chair Extrusion</i>	95

Wireframe 103

6.1 Introduction	103
6.2 Coordinate Filters	104
6.3 Projection Techniques	105
6.4 2D Polyline Versus 3D Polyline	107
<i>Lab 6.A Angle Block</i>	108
<i>Lab 6.B Inca Structure</i>	113
<i>Lab 6.C Using Projection to Solve a Problem</i>	119

Creation of a Shell 127

7.1 Introduction	127
Surfaces Toolbar	128
7.2 Polylines and Solids Revisited	128
7.3 3D Faces	129
3D Face Definition	130
7.4 3D Faces Invisible Edges	131
7.5 Creating Surfaces with Regions	132

<i>Lab 7.A Creating 3D Faces and Regions</i>	133
<i>Lab 7.B Surfaced Angle Plate</i>	136
<i>Lab 7.C Surfaced Coffeemaker Model</i>	140

Elaborate Surfaces 145

8.1 Introduction	145
Surfaces Toolbar	146
8.2 3D Objects	146
8.3 3D Polygon Meshes	148
3D Mesh	149
Ruled Surfaces	150
Tabulated Surfaces	150
Revolved Surfaces	151
Edge Surfaces	152
Modifying Meshes	153
<i>Lab 8.A Coffeepot Surfaced Model</i>	153
<i>Lab 8.B Surfaced House Model</i>	157
<i>Lab 8.C Surfaced Automobile Hood Model</i>	161

PART 4 Solid Modeling 169

Concepts Behind Solid Modeling 170

9.1 Introduction	170
9.2 Advanced Modeling Extension	171
9.3 Solids and Regions	171
Construction and Display of 3D Solids	172
9.4 Primitive Creation	172
Primitives from 2D Entities	173
9.5 Solids Toolbar	174
<i>Lab 9.A Introduction to Primitive Solids</i>	175
<i>Lab 9.B Creating Primitive Solids Through Extrusion and Revolution</i>	176

Composite Solids: Creation and Modification 181

10.1 Introduction	181
10.2 Relation Commands	181

10.3 Modifying Composites	182
The CHAMFER Command	182
The FILLET Command	183
Slicing a Solid in Two	184
10.4 Solids Editing Toolbar	185
<i>Lab 10.A Relating Solids to One Another</i>	185
<i>Lab 10.B Modifying Solids</i>	188
<i>Lab 10.C Solid Model of Socket Head Cap Screw</i>	190

Solid Display and Inquiry 197

11.1 Introduction	197
11.2 3D Representation	197
The Effect of ISOLINES and FACETRES	199
11.3 2D Representation	198
Creating Sections with SECTION	199
Solid Profiles Using SOLPROF	199
Solid Profiles Using SOLVIEW and SOLDRAW	199
Exploding a Solid	200
Using a DXB Plot File	201
11.4 Extracting Solid Model Information	201
Area Calculations	201
Mass Property Calculations	201
Definitions of Mass Property Terms	201
Indication of Solid Interferences	202
<i>Lab 11.A Displaying a Solid and Extracting the Solid's Information</i>	202

Advanced Solid Editing 205

12.1 Introduction	205
12.2 SOLIDEDIT	205
Selection Options	205
12.3 Face Editing	206
Extrude	206
Move	206
Rotate	206
Offset	207
Taper	207

Delete	207
Copy	207
Color	207
12.4 Edge Editing	208
Copy	208
Color	208
12.5 Body Editing	208
Imprint	208
Separate	208
Shell	208
Clean	209
Check	209
<i>Lab 12.A Advanced Solid Editing</i>	209

PART 5 Enhancing the Use of 3D 221

Three-Dimensional Libraries 222

13.1 Introduction	222
13.2 Creation Considerations	223
13.3 Insertion and Working Planes	223
13.4 Scaling the 3D Symbol	224
13.5 Simple Versus Complex Symbol Models	225
13.6 Xrefs and Blocks	226
Automatic Revisions	227
Xref Do's and Don'ts	227
Attaching and Detaching	228
Updating an Xref	228
Binding and the XBIND Command	228
Path Names	230
Using the Overlay Option	230
13.7 3D Movement Commands Useful for Moving Blocks	230
The ALIGN Command	230
The ROTATE3D Command	231
The MIRROR3D Command	232
<i>Lab 13.A House Symbols</i>	232
<i>Lab 13.B Symbol Insertion</i>	236
<i>Lab 13.C Simple Versus Complex Blocks and Xrefs</i>	239

3D Parametric Design 249

14.1 Introduction	249
14.2 Parametric Symbol Types	249
14.3 Object Snap and Scaling	252
<i>Lab 14.A Parametric Cube and Deck</i>	253
<i>Lab 14.B Parametric Pipe and Piping</i>	259

PART 6 Presentation 269

Display of 3D Models for Presentation 270

15.1 Introduction	270
15.2 Perspective Versus Axonometric Views	271
15.3 Center of Interest and the Station Point	272
15.4 The DVIEW Command	273
The Camera and DVIEW	273
DVIEW's Camera-like Options	273
Selecting an Object	274
Placing the Camera	276
Selecting a Center of Interest	277
Activating the Perspective View	277
Choosing the Proper Lens	279
Simultaneous Moving of the Camera and the Target	279
Getting Rid of Unwanted Objects	280
Locating the Camera and Target Exactly	280
Hiding the Preview	281
Applying the Preview to the Entire Model	281
DVIEW Command Options Summarized	282
15.5 Using the 3D ORBIT Toolbar with DVIEW	282
<i>Lab 15.A Dynamic Viewing with Exterior Perspective</i>	283

**Lab 15.B Dynamic Viewing with Removal
of Obstructing Objects** 285

**Lab 15.C Dynamic Viewing with Interior
View** 288

**Lab 17.A Rendering with
AutoCAD** 326

Lab 17.B Adding Materials 330

Plotting 293

- 16.1 Introduction 293
- 16.2 Wireframe Versus Hidden Line
Removal 294
- 16.3 Axonometric Versus Perspective
Representations 295
 - Scaling a Single-View Plot 295
- 16.4 Paper Space 295
 - Multiviews and Paper Space 295
 - Accessing Paper Space 295
 - PSPACE Versus MSPACE 296
 - PSPACE Versus MSPACE
Identification 296
 - Exiting the Paper Space
Environment 297
 - Initial Paper Space Layout and
Plotting 297
- 16.5 Working Drawings of
Models 299
- Lab 16.A Paper Space Plot** 299
- Lab 16.B Paper Space Layout with
Insert** 304

Rendering 311

- 17.1 Introduction 311
- 17.2 AutoCAD and Rendering 312
 - Render Toolbar 312
 - Rendering Procedures
Outlined 312
- 17.3 Creating the Pictorial View 313
- 17.4 Choosing the Lights 313
 - Shadow Casting 315
 - Placing the Lights 315
- 17.5 Material Properties 317
 - Using Materials 317
 - Modifying Materials 319
 - Material Mapping 320
 - Scenes 321
- 17.6 Rendering Preferences 322
- 17.7 Rendering the Model 323
- 17.8 Landscape Objects 325

PART 7 Application Projects 337

Architectural Project: Residential Dwelling 338

- 18.1 Introduction 338
- 18.2 Project Stages 339
 - Stage 1: Division of the
Model 339
 - Stage 2: Layer Designations 340
 - Stage 3: Initial Settings 341
 - Stage 4: Initial Architectural Plan
Layout 342
 - Stage 5: Initial Complex Surface
Generation 348
 - Stage 6: Symbol Generation 351
 - Stage 7: Insertion of Symbols 355
 - Stage 8: Complex Surface
Generation 357
 - Stage 9: Exterior Features 358
 - Stage 10: Presentation
Display 358

Architectural Project: Commercial Building 365

- 19.1 Introduction 365
- 19.2 Project Stages 366
- 19.3 Initial Stages 367
 - Stage 1: Division of the
Model 367
 - Stage 2: Layer Designations 367
- 19.4 Section A: Commercial Building
Construction 368
 - Stage 3: Initial Settings 368
 - Stage 4: Building Layout 368
 - Stage 5: Surface Generation 377
 - Stage 6: 3D Symbol
Generation 378
 - Stage 7: Insertion of
Symbols 382

19.5 Section B: City Construction and Building Placement	387
Stage 8: City Settings	387
Stage 9: City Blocks Layout	388
Stage 10: Creation of Simple Buildings	389
Stage 11: Placement of Commercial Building	391
Stage 12: Presentation Display	391

Mechanical Project: Solid Modeling 397

20.1 Introduction	397
20.2 Project Stages	398
Stage 1: Division of the Mechanical Model	398
Stage 2: Layer Designations	398
Stage 3: Solid Body Fabrication	399
Stage 4: Slicing the Solid in Two	404
Stage 5: Assembly of the Components	405
Stage 6: Presentation Display	408
Stage 7: Disassembly of the Model	408
Stage 8: Rendering the Model	409

Mechanical Project: Solid Modeling 411

21.1 Introduction	411
21.2 Project Stages	412
Stage 1: Division of the Solid Model	412
Stage 2: Layer Designations	413
Stage 3: Creation of the Extruded Body	413
Stage 4: Rounding of Vertical Edges	414
Stage 5: Addition of Hinge Section	415
Stage 6: Rounding of Horizontal Body Edges	415

Stage 7: Creation and Subtraction of Ear Section	416
Stage 8: Creation and Subtraction of Display Section	417
Stage 9: Creation and Subtraction of Control Section	418
Stage 10: Addition of Antenna Section	418
Stage 11: Rendering the Model	421
Stage 12: StereoLithography	421

Structural Project 423

22.1 Introduction	423
22.2 Project Stages	424
Stage 1: Division of Structural Form	424
Stage 2: Layer Designations	425
Stage 3: Parametric Symbols Creation	426
Stage 4: Custom Symbol Creation	426
Stage 5: Foundation Construction	433
Stage 6: Structural Member Erection	436
Stage 7: Presentation Display	445

Civil Project 449

23.1 Introduction	449
23.2 Project Stages	450
Stage 1: Division of the Terrain Model	450
Stage 2: Layer Designations	450
Stage 3: Development of Topographical Data	450
Stage 4: Creation of the Mesh Script/Data File	452
Stage 5: Creation of the Polygon Mesh Terrain Model	453
Stage 6: Creation of the Profile Script/Data File	454
Stage 7: Creation of the Profile Model	455
Stage 8: Display of Selected Profiles	456
23.3 Rendering	457

PART 8 **Application Programs 459**

Mechanical Desktop

4.0 460

- 24.1 Introduction 460
- 24.2 Mechanical Desktop Design
 - Process 460
 - Parts and Assemblies 460
 - Parametric Design 460
 - Feature-Driven Aspects 461
 - Profiles and Sketches 463
 - Detail Drawings 463
 - Assembly Drawings 463
 - Advanced Features 463
 - AutoCAD Standards 463
- 24.3 Interacting with Mechanical Desktop
 - Desktop 465
 - Toolbars 465
 - Desktop Browser 467
- 24.4 Using the Desktop Browser 468
 - Expanding and Collapsing Hierarchy Levels 468
 - Browser Commands 468
- 24.5 Accessing Commands 469

3D Studio MAX 471

- 25.1 Introduction 471
- 25.2 The Scene 471
 - Object-oriented Design 471
- 25.3 Working Planes and Viewing 472

- Object Space 472
- World Space 473
- Home Grid 473
- Grid Objects 473
- Viewports 473
- 25.4 Modeling and Editing 474
 - Creation Parameters 474
 - Pivot Point 474
 - Bounding Box 474
 - Surface Properties 475
 - Selecting Objects 475
 - Object Modifiers 476
 - Object Transforms 476
 - Object Clones 476
 - Copies versus Instances or References 477
 - Undo: Edit, View 477
- 25.5 Cameras and Lights 477
 - Cameras 477
 - Lights 479
- 25.6 Rendering and Materials 480
 - Materials 482
 - Rendering 483
- 25.7 Animation 484
 - Key Frames 485
 - Tracks 485
 - Animate Button 485
 - Animation Tools 486
 - Hierarchical Linking 487

Index 489
