CABI Publishing

# Contents

Contributors	xi
Preface	xvii
Acknowledgements	xix
Foreword	xxi
<b>Part I</b>	
<b>Food Fats and Health</b>	<b>1</b>
<b>1</b> Dietary Fat and Disease: What Do We Know and Where Do We Stand? <i>D. Kritchevsky</i>	<b>3</b>
<b>2</b> Food Cholesterol and its Plasma Lipid and Lipoprotein Response: Is Food Cholesterol Still a Problem or Overstated? <i>W.H. Howell</i>	<b>15</b>
<b>3</b> Antiarrhythmic Effects of <i>n</i> -3 Polyunsaturated Fatty Acids <i>A. Leaf, J.X. Kang and Y.-F. Xiao</i>	<b>25</b>
<b>4</b> Lipid Mediators in a Paradigm Shift: Balance Between $\omega$ -6 and $\omega$ -3 <i>W.E.M. Lands</i>	<b>35</b>

<b>Part II</b>	<b>Egg Consumption</b>	53
5	Eggs, Dietary Cholesterol and Heart Disease Risk: an International Perspective <i>D.J. McNamara</i>	55
6	Egg Products Around the World: Today and Tomorrow <i>G. Zeidler</i>	65
7	Giving Eggs a Bad Rap: What Physicians Should Know and Tell Their Patients About Cholesterol <i>M.V. Kaminski, Jr</i>	93
8	Producer's Perspective on Egg Consumption: How Does the Market React? <i>A. Kennedy</i>	113
<b>Part III</b>	<b>Egg Lipids and Nutrition</b>	119
9	Eggs as a Functional Food Alternative to Fish and Supplements for the Consumption of DHA <i>M.E. Van Elsuyk, S.D. Hatch, G.G. Stella, P.K. Mayo and K.S. Kubena</i>	121
10	Designer Egg Concept: Perfecting Egg Through Diet Enrichment with $\omega$ -3 PUFA and Cholesterol Stability <i>J.S. Sim</i>	135
11	Not All $\omega$ -3-Enriched Eggs are the Same <i>D.J. Farrell</i>	151
12	Tocopherols, Retinol and Carotenes in Eggs and Hatched Chick Tissues as Influenced by Dietary Palm Oil <i>G. Chertan, K.R. Kang and J.S. Sim</i>	163
13	Docosahexaenoic Acid-Enriched Foods: Production of Eggs and Health Benefits <i>L.A. Horrocks and Y.K. Yeo</i>	173
14	Biological Activities of Conjugated Linoleic Acids and Designer Eggs <i>B.A. Watkins, A.A. Devitt, L. Yu and M.A. Latour</i>	181
15	Safe Use of Microalgae (DHA GOLD™) in Laying Hen Feed for the Production of DHA-Enriched Eggs <i>J.R. Abril, W.R. Barclay and P.G. Abril</i>	197

<b>Part IV</b>	<b>Ovo-Technologies</b>	203
16	Molecular Modification of Egg Proteins for Functional Improvement <i>S. Nakai</i>	205
17	Bioavailability and Commercial Use of Eggshell Calcium, Membrane Proteins and Yolk Lecithin Products <i>N. Suguro, S. Horiike, Y. Masuda, M. Kunou and T. Kokubu</i>	219
18	Biological Characteristics of Egg Components, Specifically Sialyloligosaccharides in Egg Yolk <i>L.R. Juneja</i>	233
19	Eggs as a Functional Food: Technology Update <i>C.M. Hasler</i>	243
20	Mechanical and Oxygen Barrier Properties of Transglutaminase Cross-linked Egg White Protein Films <i>L.T. Lim, Y. Mine, K. Montoya and M.A. Tung</i>	253
21	Lysozyme Polymer Formation and Functionality of Residuals after Lysozyme Extraction <i>J. Kijowski, G. Lesnierowski and A. Fabisz-Kijowska</i>	269
<b>Part V</b>	<b>IgY Technologies</b>	287
22	Control of Intestinal Diseases in Pigs by Feeding Specific Chicken Egg Antibodies <i>R.R. Marquardt</i>	289
23	Preparation of Enteric-Coated Gelatin Capsules of IgY with Cellulose Acetate Phthalate <i>E.M. Akita and S. Nakai</i>	301
24	Preparation of Antigen-Specific IgY for Food Application <i>H.H. Sunwoo, X. Li, E.N. Lee, Y.K. Kim and J.S. Sim</i>	311
25	Applications of Egg Immunoglobulins in Immunoaffinity Chromatography <i>E.C.Y. Li-Chan</i>	323
26	Prevention of <i>Yersinia ruckeri</i> Infection in Rainbow Trout with Hen's Egg Yolk Immunoglobulin <i>Y. Mine, S.B. Lee and R.M.W. Stevenson</i>	341
27	Using Egg Antibodies to Treat Diseases <i>M. Coleman</i>	351

<b>28</b>	Prevention of Chronic <i>Pseudomonas aeruginosa</i> Colonization by Gargling with Specific Antibodies: a Preliminary Report <i>D. Garlander, H. Kollberg, P.E. Wejaker and A. Larsson</i>	371
<b>Part VI</b>	<b>Food Safety</b>	375
<b>29</b>	Re-evaluation of Liquid Egg Pasteurization Technology: Newly Emerging and Industrial Applications, Theory and Practice <i>G.W. Froning, D.L. Peters and S.S. Sumner</i>	377
<b>30</b>	Food Pasteurization Using High-intensity Pulsed Electric Fields: Promising New Technology for Non-thermal Pasteurization for Eggs <i>L. Ma, F.J. Chang, M.M. Góngora-Nieto, G.V. Barbosa-Cánovas and B.G. Swanson</i>	389
<b>31</b>	Processing and Cooling Shell Eggs to Enhance Safety and Quality <i>P.A. Curtis</i>	401
<b>32</b>	Effects of Cryogenic Cooling of Shell Eggs on Interior Quality and Microbiological Integrity <i>D.R. Jones, J.B. Tharrington, P.A. Curtis, K.E. Anderson and F.T. Jones</i>	411
<b>33</b>	Behaviour of <i>Salmonella enteritidis</i> in Industrial Egg White: Egg Naturally Contains Factors Inhibitory to <i>Salmonella</i> Growth <i>F. Baron, S. Fauvel and M. Gautier</i>	417
<b>34</b>	<i>Salmonella enteritidis</i> in Eggs and Egg Products: Assessing and Understanding the Risks and Responses <i>R.K. Gast</i>	431
<b>35</b>	Egg and Serum Cholesterol as Influenced by Mannan Oligosaccharide and Aflatoxin <i>V.G. Stanley and A.E. Sefton</i>	441
<b>Part VII</b>	<b>Shell Eggs</b>	445
<b>36</b>	Eggshell Proteins and Shell Strength: Molecular Biology of Eggshell Matrix Proteins and Industry Applications <i>M.T. Hincke, M. St Maurice, Y. Nys, J. Gautron, M. Panbeleux, C.P.W. Tsang, M.M. Bain, S.E. Solomon and M.D. McKee</i>	447
<b>37</b>	Econometric Feeding and Management of Commercial Leghorns: Optimizing Profits Using New Technology <i>D.A. Roland, Sr, M.M. Bryant, J.X. Zhang, D.A. Roland, Jr and J. Self</i>	463

<b>38</b>	Effect of Feeding Organic Selenium in Diets of Laying Hens on Egg Selenium Content <i>A.H. Cantor, M.L. Straw, M.J. Ford, A.J. Pescatore and M.K. Dunlap</i>	473
<b>39</b>	Influence of Eggshell 49 on Shell Quality of Hens <del>49</del> According to Shell Quality <i>R.D. Miles and C.W. Comer</i>	477
	Index	481
