

FISHES

*An Introduction to
Ichthyology*

Fourth Edition

Suranaree University of Technology

31051000596615

Peter B. Moyle • Joseph J. Cech, Jr.

CONTENTS

PREFACE xi

PART I: INTRODUCTION 1

- 1 INTRODUCTION 1
 - Modern Fishes 1
 - History of Ichthyology 5
 - Fish Classification 8
 - Introductory Lessons 9

PART II: STRUCTURE AND FORM 11

- 2 FORM AND MOVEMENT 11
 - External Anatomy 11
 - Body Shape 11
 - Scales 15
 - Fins 17
 - Other Structures 19
 - Skeletal System 20
 - Muscular System 23
 - Locomotion 25
 - Energetics of Swimming 29
 - Lessons from Form and Movement 33

- 3 RESPIRATION 35
 - Gills 36
 - Air-Breathing Fishes 41
 - Fish Oxygen Requirements 43
 - Lessons from Respiration 46

- 4 BLOOD AND ITS CIRCULATION 47
 - Blood 47
 - Erythrocytes 48
 - Leukocytes 50

000000

Circulation	60
Lessons from Blood and Circulation	68

5	BUOYANCY AND THERMAL REGULATION	69
	Buoyancy	69
	Thermal Regulation	72
	Lessons from Buoyancy and Thermal Regulation	77

6	HYDROMINERAL BALANCE	79
	Osmoregulation	79
	Ionic Regulation	82
	Stress Responses and Effects	89
	Freezing Resistance	92
	Acid-Base Balance	93
	Lessons from Hydromineral Balance	96

7	FEEDING, NUTRITION, DIGESTION, AND EXCRETION	97
	Feeding	97
	Nutrition	102
	Digestion and Absorption	105
	Excretion	108
	Lessons from Feeding, Nutrition, Digestion, and Excretion	109

8	GROWTH	111
	Factors Affecting Growth	111
	Growth Regulation	116
	Growth Rate Measurements and Models	118
	Lessons from Growth	122

9	REPRODUCTION	123
	Reproductive Anatomy	123
	Breeding Behavior	125
	Developmental Adaptations	130
	Physiological Adaptations	132
	Energetic Adaptations	134
	Alternative Reproductive Strategies	141
	Sex Change in Fish	143
	Lessons from Fish Reproduction	144

10	SENSORY PERCEPTION	145
	Chemoreception	145
	Acoustico-Lateralis System	148
	Electroreception	154

Vision/ Photoreception	156
Lessons from Sensory Perception	160

11	BEHAVIOR AND COMMUNICATION	161
	Migratory Behavior	161
	Shoaling	166
	Feeding Behavior	169
	Aggressive Behavior	171
	Resting Behavior	172
	Communication	172
	Lessons from Fish Behavior and Communication	180

PART III: THE FISHES 181

12	SYSTEMATICS, GENETICS, AND SPECIATION	181
	Taxonomic Methods	182
	Genetic Variability	185
	Speciation	186
	Hybridization	188
	Nomenclature	189
	Lessons from Fish Systematics, Genetics, and Speciation	192

13	EVOLUTION	193
	Ostracoderms	194
	Placodermi	196
	Chondrichthyes	197
	Acanthodii	200
	Osteichthyes	201
	Sarcopterygii	202
	Actinopterygii	204
	Structural Changes in Actinopterygians	206
	Evolutionary Trends Within the Teleosts	209
	Lessons from Fish Evolution	211

14	HAGFISHES AND LAMPREYS	212
	Hagfishes	212
	Lampreys	214
	Lessons from Hagfishes and Lampreys	218

15	SHARKS, RAYS, AND CHIMAERAS	219
	Adaptations	220
	Reproduction	223

Diversity	226
Lessons from the Chondrichthyes	232

16 RELICT BONY FISHES 233

Sarcopterygii	234
Dipnomorpha	234
Actinistia: The Coelacanth	235
Actinopterygii	236
Polypteriformes	236
Acipenseriformes	237
Lepisosteiformes	239
Amiiformes	240
Lessons from Relict Bony Fishes	240

17 TELEOST OFFSHOOTS: BONYTONGUES, HERRINGS, AND EELS 241

Teleostei	241
Osteoglossomorpha	242
Elopomorpha	245
Clupeomorpha	250
Lessons from Teleost Offshoots	252

18 MINNOWS, CHARACINS, AND CATFISHES 253

Gonorynchiformes	254
Otophysi	256
Cypriniformes	257
Characiformes	260
Siluriformes	261
Gymnotiformes	265
Lessons from the Otophysi	266

19 SMELT, SALMON, AND PIKE 267

Argentiformes	268
Salmoniformes	268
Osmeroidei	268
Salmonoidei	271
Esociformes	274
Lessons from Smelt, Salmon, and Pike	275

20 ANGLERFISH, BARRACUDINAS, CODS, AND DRAGONFISH 276

Stenopterygii	277
Cyclosquamata	279
Scopelomorpha	281

Paracanthopterygii	282
Lessons from Odds and Cods	289

21 SILVERSIDES, FLYING FISH, AND KILLIFISH 290

Atheriniformes	291
Beloniformes	292
Cyprinodontiformes	293
Lessons from the Atherinomorpha	297

22 OPAHS, SQUIRRELFISH, DORIES, PIPEFISH, AND SCULPINS 299

Percomorpha	300
Lampridiformes	301
Stephanobercyiformes and Bercyiformes	302
Zeiformes	304
Gasterosteiformes	304
Synbranchiformes	306
Dactylopteriformes	308
Scorpaeniformes	308
Lessons from Percomorphs: I	311

23 PERCIFORMES: SNOOKS TO SNAKEHEADS 313

Percoidei	315
Labroidei	320
Zoarcoidei	323
Notothenioidei	323
Trachinoidei	323
Blennioidei	325
Gobiesocoidae	326
Callionymoidae	327
Gobioidei	327
Kurtoidei	328
Acanthuroidei	329
Mugiloidei	329
Scombroidei	329
Stromateoidei	331
Anabantoidei	332
Channoidei	332
Lessons from the Percomorpha: II	333

24 FLOUNDERS, PUFFERS, AND MOLAS 335

Pleuronectiformes	335
Tetraodontiformes	338
Lessons from Flatfish and Puffers	339

PART IV: ZOOGEOGRAPHY 341

- 25 ZOOGEOGRAPHY OF FRESHWATER FISHES 341**
- Zoogeographic Types 341
 - Zoogeographic Regions 343
 - African Region 344
 - Neotropical Region 345
 - Oriental Region 347
 - Palaearctic Region 348
 - Nearctic Region 349
 - Australian Region 355
 - Plate Tectonics and the Distribution of Freshwater Fishes 356
 - Pleistocene Glaciation 359
 - Lessons from Freshwater Zoogeography 359
- 26 ZOOGEOGRAPHY OF MARINE FISHES 361**
- Continental Shelves 361
 - Pelagic Regions 371
 - Deepsea Regions 374
 - Antitropical Distribution Patterns 375
 - Lessons from Marine Zoogeography 376

PART V: ECOLOGY 377

- 27 INTRODUCTION TO ECOLOGY 377**
- Filters 377
 - Predation 380
 - Competition 381
 - Symbiosis 384
 - Parasites and Pathogens 385
 - Intraspecific Interactions 387
 - Lessons from Fish Ecology 388
- 28 TEMPERATE STREAMS 389**
- Factors that Affect Distribution 389
 - Zonation 397
 - Fish Assemblages 400
 - Lessons from Stream Fishes 400
- 29 TEMPERATE LAKES AND RESERVOIRS 401**
- Physical Factors 401

Chemical Factors	404
Temporal Factors	406
Biological Factors	408
Zoogeographic Factors	411
Fish Zones	412
Lessons from Lake Fishes	416

30 TROPICAL FRESHWATER LAKES AND STREAMS 417

Physical Factors	417
Chemical Factors	420
Biological Factors	421
Fish Communities	423
Speciation in African Cichlids	430
Lessons from Tropical Fishes	432

31 ESTUARIES 433

Characteristics of Estuaries	433
Estuarine Fishes	434
Factors That Affect Distribution	435
Food Webs	439
Fish Communities	440
Lessons from Estuarine Fishes	441

32 COASTAL HABITATS 442

Rocky Intertidal Areas	442
Exposed Beaches	445
Mudflats	446
Salt Marshes	446
Mangrove Swamps	449
Seagrass Flats	449
Kelp Beds	451
Near-Shore Rocky Bottoms	453
Near-Shore Soft Bottoms	454
Hypersaline Lagoons and Salt Ponds	459
Lessons from Coastal Fishes	460

33 TROPICAL REEFS 461

The Reef Environment	461
Types of Reef Fishes	463
Life Cycles	467
Species Interactions	468
Activity Patterns	470
Community Structure	471
Lessons from Tropical Reef Fishes	473

34	EPIPELAGIC ZONE 475
	Adaptations for Pelagic Life 475
	Ecological Types 476
	Factors That Affect Distribution and Abundance 476
	Migrations and Movements 480
	Pacific Sardine 481
	Lessons from Epipelagic Fishes 484
35	DEEPSEA HABITATS 485
	Adaptations 486
	Reproductive Strategies 488
	Factors That Affect Distribution 490
	Ecology 492
	Lessons from Deepsea Fishes 495
36	POLAR REGIONS 496
	Arctic Fishes 496
	Antarctic Fishes 497
	Adaptations 499
	Factors that Affect Distribution 500
	Fish Communities 500
	Lessons from Polar Fishes 502
37	CONSERVATION 504
	Status of Fish Faunas 504
	Causes of Change 507
	Conservation Biology 517
	Values and Fish Conservation 517
	How Well are We Doing? Examples From the Real World 523
	Conclusions 531
	The Final Lesson 532

BIBLIOGRAPHY 533
