

 WILEY

The Chemistry of Pollution

Suranaree University of Technology

91051000622049

Günter Fellenberg

CONTENTS

Preface	ix
1 What is Pollution?	1
1.1 The Natural Changeability of the Environment	1
1.2 Comparison of Anthropogenic and Natural Environmental Changes	3
1.3 Assessment of Environmental Pollution Factors	4
2 Changes in the Atmosphere	5
2.1 Dusts and Aerosols	5
2.1.1 Definitions	5
2.1.2 Origin and Length of Stay in the Atmosphere	6
2.1.3 Behaviour in the Atmosphere	8
2.1.3.1 Influence on Radiation Balance and Heat Balance of the Atmosphere	8
2.1.3.2 Chemical Reactions in the Troposphere and in the Stratosphere	9
2.1.3.3 Significance for Corrosion Processes on Metals and Stones	11
2.1.3.4 Impairment of the Health of Human Beings	11
2.1.3.4.1 Obstruction of Vitamin D Formation	11
2.1.3.4.2 Silicosis and Asbestosis	13
2.1.3.4.3 Effects of Metallic Dusts	13
2.1.3.4.4 Dusts and Allergy Development	15
2.1.3.5 Dusts and the Photosynthesis of Plants	15
2.1.4 Technical Dust Removal Procedure	17
2.1.5 Dust Filtration with the Help of Plants	21
2.2 Gases	22
2.2.1 Emission, Transmission, Immission	22
2.2.2 Threshold Concentrations for Exhaust/Fuel Gases	26
2.2.3 Carbon Monoxide	28
2.2.3.1 Origins	28
2.2.3.2 Toxicity	29
2.2.3.3 Combination and Detoxification of Carbon Monoxide in Nature	30

2.2.4	Carbon Dioxide	31
2.2.4.1	Chemical and Biochemical Balance of Carbon Dioxide in the Atmosphere	31
2.2.4.2	The Behaviour of Carbon Dioxide in the Atmosphere	32
2.2.5	Sulphur Dioxide	35
2.2.5.1	Natural and Anthropogenic Sources	36
2.2.5.2	The Behaviour of Sulphur Dioxide in the Atmosphere	36
2.2.5.3	Reactions in the Atmosphere and Formation of Reduction-causing Smog	37
2.2.5.4	Deterioration of Metals, Masonry and Glass	38
2.2.5.5	Physiological Effect on Humans and Animals	41
2.2.5.6	Physiological Effects on Plants	42
2.2.6	Nitric Oxides	43
2.2.6.1	Natural and Anthropogenic Sources	43
2.2.6.2	Oxidation and Chemical Reactions During Transmission	45
2.2.6.3	Photochemical Formation of Oxidizing Smog	46
2.2.6.4	Daily and Annual Patterns of Photochemically Formed Ozone	47
2.2.6.5	Effect of Nitrogen Oxides and Ozone on Humans	49
2.2.6.6	Biochemical Effects on Plants	50
2.2.7	The Problem of Dying Forests	53
2.2.8	Technical Procedures for Emission Reduction	55
2.2.9	CFCs, Nitrous Oxide and Stratospheric Ozone	62
2.2.9.1	Origin of CFCs and Nitrous Oxide	63
2.2.9.2	Photochemical Reactions in the Stratosphere and the Hole in the Antarctic Ozone Layer	63
3	Impairment of Ground Water and Surface Water	67
3.1	Assessment Criteria for Water Pollution	68
3.2	Organic Residues	71
3.2.1	Microbially Degradable Materials and Eutrophication of Water	72
3.2.2	Formation of Urea and Ammonia in Water	73
3.2.3	Non-degradable and Poorly Degradable Materials	73
3.2.4	The Significance of Detergents	79
3.3	Inorganic Residues	80
3.3.1	Ions from Deicing Salts and Fertilizers	80
3.3.2	Heavy Metals	82
3.3.3	Acid Damage and the Death of Fish	89

3.4	Purification Procedures	90
3.4.1	Biological Purification of Waste Water	90
3.4.2	Special Processes in the Purification of Waste Water	95
3.4.3	Purification Processes in the Preparation of Drinking Water	97
4	Ground and Soil Pollution	101
4.1	Structure and Composition of Soil	101
4.2	Hardening of Soil	102
4.3	Changes to the Soil through Specific Types of Land Use	103
4.4	Anthropogenic Pollutant Damage	104
4.4.1	Acidic Damage and its Chemical Consequences for the Soil	104
4.4.2	Deposition of Heavy Metals and their Availability for Plants	106
4.4.3	Deposit of Pesticides and their Behaviour	107
4.4.4	Pollutant Deposition with Sewage Sludge	109
4.4.5	The Significance of Deicing Salts for the Soil Structure	110
4.5	Soils as a Part of Landscapes and Living Habitats	110
5	Generally Widespread Materials (Ubiquists)	113
6	Foodstuffs and Confections	129
6.1	Pollution in Food Production	129
6.2	Preparation of Food and Confections	132
6.3	Food Preservatives and Packaging	134
6.4	Mycotoxins, Phytoplankton Toxins and Bacterial Toxins	136
6.5	Naturally Occurring Toxins in Vegetable Foodstuffs	143
7	Basic Consumer Goods	149
7.1	Pesticides	149
7.1.1	Chemical Classification	149
7.1.2	Samples of Abiotic and Biotic Degradation	150
7.1.3	Toxicity	152
7.1.4	Determining Threshold Concentrations	154
7.2	Cleaning Agents and Detergents	156
7.3	Dry Cleaning, Solvents, Paints and Varnishes	157
7.4	Cosmetics and Toilet Articles	158
8	Radioactivity	161
8.1	What is Radioactivity?	161
8.2	Physical and Biological Half-lives of Radionuclides	163
8.3	Radiation-induced Reactions in Tissue	164
8.4	The Problem of Assessing Threshold Values	168

8.5	Sources of Artificial Radioactivity in the Environment	169
8.6	Nuclear Weapons and the Nuclear Winter	172
9	Outlook	175
	Glossary	177
	Literature	181
	Index	183
