Modern Analytical Methodologies in Fat- and Water-Soluble Vitamins

VOLUME 154 IN CHEMICAL ANALYSIS:
A Series of Monographs on Analytical Chemistry
and Its Applications

J.D. Winefordner, Series Editor

Sussex University of Technology

31051000613006

CONTENTS

CONTRIBUTORS	xv
PREFACE	xvii
CUMULATIVE LISTING OF VOLUMES IN SERIES	xix
PART 1 FAT-SOLUBLE VITAMINS	
CHAPTER 1 VITAMIN A	3
<i>Thomas Arnhold, Heinz Nau, and Ralph Ruehl</i>	
1.1. Introduction	3
1.2. Sample Collection, Handling, and Storage	7
1.3. Sample Preparation	8
1.3.1. General Principles	8
1.3.2. Precipitation, Dilution, and Solvent Extraction	9
1.3.3. Saponification	11
1.3.4. Enzymatic Reactions	12
1.3.5. Solid-Phase Extraction	13
1.3.6. Sample Preparation Coupled On-Line to HPLC	13
1.4. Reference Standards	15
1.5. High-Performance Liquid Chromatography	16
1.5.1. General Considerations	16
1.5.2. Determination of Total Vitamin A	19
1.5.3. Separation of Geometric Isomers	20
1.5.4. Separation of Retinoid Classes According to Their Polarity	26
1.5.5. Vitamin A, Vitamin E, and Carotenoids	31
1.6. Other Liquid Chromatographic Methods	34
1.6.1. Microbore-LC	34
1.6.2. HPLC of Retinol Bound to RBP	35

1.7. Gas Chromatography	35
1.8. Capillary Electrophoresis	36
1.9. Bioassays	39
References	39

CHAPTER 2 VITAMIN D 51

Michael F. Holick

2.1. Origins of Vitamin D ₂ and Vitamin D ₃	51
2.2. Metabolism and Biologic Functions of Vitamin D	54
2.3. Measurement of Vitamin D Bioactivity	55
2.4. Modern Methods for Determining the Vitamin D Content in Blood	55
2.5. Strategies for Determining Circulating Concentrations of 25-Hydroxyvitamin D	56
2.6. Strategies for Determining Circulating Concentrations of 1,25-Dihydroxyvitamin D	66
2.7. Measurement of 24,25-Dihydroxyvitamin D and 25,26-Dihydroxyvitamin D	73
2.8. Clinical Utility for Assays for Vitamin D and Its Metabolites	74
2.8.1. Vitamin D	74
2.8.2. 25-Hydroxyvitamin D	74
2.8.3. 1,25-Dihydroxyvitamin D	75
2.8.4. Other Metabolites	76
2.9. Conclusion	76
References	77

CHAPTER 3 DETERMINATION OF TOCOPHEROLS AND TOCOTRIENOLS IN FOODS AND TISSUES 81

Vieno I. Piironen

3.1. Introduction	81
3.2. Vitamin E Compounds in Foods and Tissues	82
3.2.1. Structure and Nomenclature	82
3.2.2. Significance of Different Tocopherols and Tocotrienols in Foods and Tissues	84
3.3. High-Performance Liquid Chromatography	85
3.3.1. Sample Preparation	85

3.3.2. HPLC Separation	91
3.3.3. Detection	107
3.3.4. Quantification	111
3.4. Gas Chromatography	112
3.5. Supercritical Fluid Extraction and Chromatography	112
3.6. Determination of Stereoisomers	113
3.7. Future Development	114
References	115
CHAPTER 4 VITAMIN K	129
<i>Sarah L. Booth, Kenneth W. Davidson, James A. Sadowski, and Gregory G. Dolnikowski</i>	
4.1. Introduction	129
4.2. Determination of Phylloquinone by HPLC	133
4.2.1. Analytical Conditions	133
4.2.2. Extraction Methods for Biological Tissues	136
4.2.3. Extraction Methods for Foods and Beverages	139
4.2.4. Internal Standards	141
4.2.5. Analytical Variation	142
4.2.6. Factors Affecting Phylloquinone Concentrations	144
4.3. Determination of Phylloquinone Metabolites and Hydrogenation Products	146
4.3.1. Gas Chromatography–Mass Spectrometry	146
4.3.2. Simultaneous Determination of Phylloquinone and 2',3'-Dihydrophylloquinone	149
4.3.3. Simultaneous Determination of Phylloquinone and Phylloquinone 2,3-Epoxide	151
4.4. Determination of Menaquinones by HPLC	153
4.5. Other Indicators of Vitamin K Nutritional Status	155

4.5.1. Overview	155
4.5.2. Urinary γ -Carboxyglutamic Acid	156
4.5.3. PIVKA-II	157
4.5.4. Serum Osteocalcin	157
4.6. Summary	158
References	160

CHAPTER 5 SIMULTANEOUS DETERMINATION OF FAT-SOLUBLE VITAMINS IN FOOD, FEED, AND SERUM **171**

Ronald R. Eitenmiller and W. O. Landen, Jr.

5.1. Introduction	171
5.2. Simultaneous Analysis of Fat-Soluble Vitamins in Food and Feed	172
5.2.1. Margarine and Oils	172
5.2.2. Milk, Infant Formula, and Cheese	184
5.2.3. Cereals	191
5.2.4. Miscellaneous Foods	191
5.3. An Integrated Approach to Fat-Soluble Vitamin Analysis of Foods	193
5.4. Simultaneous Analysis of Fat-Soluble Vitamins in Serum or Plasma	195
5.4.1. Retinol and α -Tocopherol	205
5.4.2. Vitamin K ₁ and α -Tocopherol	206
5.4.3. Simultaneous Analysis of Multiple Fat-Soluble Vitamins in Serum or Plasma	207
5.5. Concluding Comments	215
References	215

PART 2 WATER-SOLUBLE VITAMINS

CHAPTER 6 THIAMIN **225**

Ronald R. Eitenmiller and W. O. Landen, Jr.

6.1. Introduction	225
6.2. Properties	226

6.2.1. Chemistry	226
6.2.2. Stability	227
6.3. Methodology	229
6.3.1. Microbiological Methods for Thiamin Analysis	230
6.3.2. Chemical Methods for Thiamin Analysis	232
6.3.3. HPLC Methods for Analysis of Thiamin and Thiamin Phosphate Esters	234
6.4. Conclusion	246
References	246

CHAPTER 7 RIBOFLAVIN 253

Ronald R. Eitenmiller and W. O. Landen, Jr.

7.1. Introduction	253
7.2. Properties	254
7.2.1. Chemistry	254
7.2.2. Stability	257
7.3. Methodology	258
7.3.1. Microbiological Methods for Riboflavin Analysis	258
7.3.2. Chemical Methods for Riboflavin Analysis	259
7.3.3. HPLC Methods	262
7.4. Concluding Comments	278
References	283

CHAPTER 8 VITAMIN B₆ 291

Stephen P. Coburn

8.1. Introduction	291
8.2. Processing of Standards and Samples	291
8.3. Fluorometric Methods	294
8.4. Enzymatic Methods	295
8.5. Gas Chromatography/Mass Spectrometry	295
8.6. High-Performance Liquid Chromatography	296
8.7. Electrophoresis	299
8.8. Microbiological Assay	299
8.9. Immunoassay	301

8.10. 4-Pyridoxic Acid	301
8.11. Other Metabolites	301
8.12. Assessment of Vitamin B ₆ Status	302
8.13. Conclusions	304
References	305
CHAPTER 9 VITAMIN B₁₂	313
<i>Edward V. Quadros</i>	
9.1. Introduction	313
9.1.1. Principle	313
9.2. Cobalamin Binding Proteins	315
9.3. Materials	316
9.3.1. Reagents	316
9.3.2. Preparation of Reagents	316
9.4. Preparation of Binding Proteins	317
9.4.1. HC as the Binding Protein	317
9.4.2. TC as the Binding Protein	318
9.4.3. IF as the Binding Protein	318
9.4.4. Antibody to Cbl as the Binding Protein	318
9.5. Standardization of Binding Proteins	319
9.6. Extraction of Cbl from Serum or Plasma	320
9.7. Extraction of Cbl from Cells or Tissues	320
9.8. Assay Protocol	321
9.9. General Comments on Assay Protocol	322
9.10. Interpretation of Results	323
References	325
CHAPTER 10 NIACIN	329
<i>Shunitz Tanaka</i>	
10.1. Introduction	329
10.2. General Methods	331
10.2.1. Sample Preparation	331
10.2.2. Chemical Methods	332
10.2.3. Microbiological Methods	332
10.3. High-Performance Liquid Chromatography	332

10.4. Capillary Electrophoresis	338
10.5. Improvement of Chemical and Biological Methods	341
10.5.1. Chemical Assay	341
10.5.2. Microbiological Assay	342
10.6. Electrochemical Detection	343
10.6.1. Niacin	343
10.6.2. NADH and NADPH	344
References	346

CHAPTER 11 PANTOTHENATE **351**

Won O. Song, Carl T. Wittwer, and Bonita W. Wyse

11.1. Biological Importance	351
11.2. Derivatives and Salts of Pantothenic Acid	359
11.3. Analytical Methods for Pantothenic Acid	365
11.3.1. Bioassays	366
11.3.2. Immunoassays	372
11.3.3. Chemical and Other Assays	377
11.4. Analytical Methods for Measuring CoA and Intermediates	378
11.4.1. Measurement of CoA	378
11.4.2. Measurement of CoA Intermediates	382
References	383

CHAPTER 12 BIOTIN **389**

Janos Zemleni and Donald M. Mock

12.1. Introduction	389
12.2. Microbiological Assays	392
12.3. Avidin-Binding Assays	393
12.4. Microbial Versus Avidin-Binding Assays	395
12.5. Chromatographic Procedures	396
12.5.1. High-Performance Liquid Chromatography	396
12.5.2. Ion-Exchange Chromatography	396
12.5.3. Thin-Layer Chromatography and Paper Chromatography	396
12.6. Radioisotopes of Biotin	397

12.7. Analysis of Biotin-Dependent Carboxylases	397
12.7.1. Acetyl-CoA Carboxylase	399
12.7.2. Pyruvate Carboxylase, Propionyl-CoA Carboxylase, and β -Methylcrotonoyl-CoA Carboxylase	399
12.8. Biotin Metabolites in Biological Fluids	399
12.9. Biotin Metabolites in Food	400
References	402

CHAPTER 13 VITAMIN C **411**

Steven C. Rumsey and Mark Levine

13.1. Introduction	411
13.2. Stability, Sensitivity, and Substance Interference	415
13.3. Colorimetric/Spectrometric Assays	417
13.3.1. Assays Based on Ascorbic Acid as a Reducing Agent	417
13.3.2. Dinitrophenylhydrazine Derivatization by Dehydroascorbic Acid and 2,3-Diketogulonic Acid	418
13.3.3. Spectrophotometric Assay of Dehydroascorbic Acid	418
13.4. Fluorometric Assays	419
13.5. Gas-Liquid Chromatography	420
13.6. Enzymatic Assays	421
13.7. Capillary Zone Electrophoresis	422
13.8. High-Performance Liquid Chromatography	422
13.8.1. HPLC with Ultraviolet Detection	423
13.8.2. HPLC with Fluorescence Detection	424
13.8.3. HPLC with Electrochemical Detection	425
13.8.4. HPLC with Amperometric Detection	425
13.8.5. HPLC with Coulometric Detection	427
13.8.6. HPLC Analysis of Dehydroascorbic Acid	428
13.9. Assays of Semidehydroascorbic Acid	430

CONTENTS

xiii

13.10. Flow Injection Assay	430
13.11. In Vivo Assays	431
13.12. Assay Comparisons	432
13.13. Summary and Conclusions	433
References	434
