Preface xi

Chapter 1 Space, Place and Technology in an Electronic Age 1
Mark I. Wilson and Kenneth E. Corey

Introduction 1
Emergence of Electronic Space 2
The Roots of Electronic Space 2
Geographies of Electronic Space 3
Overview of the Book 5

I CONCEPTUALIZING ELECTRONIC SPACE 7

Chapter 2 The End of Geography or the Explosion of Place? Conceptualizing Space, Place and Information Technology 9
Stephen Graham

Cyberspace 9
Effect of Spatial Metaphors 10
Use of Spatial Metaphors 10
Aims of This Chapter 11
Substitution and Transcendence – Technological Determinism, Generalized Interactivity and the End of Geography 11
Towards Areal Uniformity, Urban Dissolution, and Generalized Interactivity 12
'Mirror Worlds', the Transmission of Place, and World Transcendence 14
Co-Evolution – the Parallel Social Production of Geographical Space and Electronic Space 16
Articulations Between Place-based and Tele-mediated Relationships 16
Telecommunications and the City 17
The Co-evolution of Old and New Technologies 18
The Interaction of Material Places and Electronic Spaces 19
Telecommunications, 'Spatial Fixes', and the Production of Space 20
The New Telecommunications Networks 20
Social and Spatial Power 21
The Exercise of Power 22
Recombination – Actor Network Theory and Relational Time-Spaces 23
The Diversity of Cyberspace 24
The Role of Telecommunications Systems 24
The Human Element 25
Conclusions – Space, Place and Technologies as Relational Assemblies 26
The City 27
Global Networks 27

Chapter 3 Telecom Tectonics and the Meaning of Electronic Space 29
Mark I. Wilson and Colin A. Arrowsmith

Introduction 29
Electronic Space Vehicles 30

Telecom Tectonics 32
Mapping Electronic Space 33
Implications of Telecom Tectonics 38
Equity 38
Production 39
Conclusions 40
Acknowledgements 40

Chapter 4 Human Rights and Welfare in the Electronic State 41
Stanley D. Brunn

Introduction 41
Some Working Definitions 42
Geography, Rights, and Technology 44
Human Rights and the Spatial Dimension 44
Legal Standards and Definition of Community 45
The Erosion of Boundaries 46
States' Rights and International Rights 48
Human Rights and Welfare in Electronic Democracies 50
Legal, Ethical, and Moral Issues 52
Human Rights in an Electronic World 55
Mapping Electronically Connected and Unconnected Worlds 57
Maps of Information and Communication 57
Social Justice and Welfare Issues 58
Discussion 62

II GLOBAL ELECTRONIC COMMERCE 65

Chapter 5 Telecommunications and Governance in Multinational Enterprises 67
Edward M. Roche and Michael J. Blaine

Introduction 67
Pre-Nineteenth Century – Industrial Structure Formation 69
1860–1960 – Search for Hierarchical Governance 70
1960–1970 – Centralized Data Processing and the Rise of Autonomy in Foreign Subsidiaries 72
1970–1985 – The Search for Integration 73
1985–1993 – Re-engineering and Transition of Structures 78
1993 – Strategic Control and the Limits of Hierarchy 81
Prospects for the Future 83
Conclusion 86

Chapter 6 Telecommunications and 24-Hour Trading in the International Securities Industry 89
John V. Langdale

Introduction 89
Internationalization of the Securities Industry 90
Telecommunications and the Internationalization of the Securities Industry 91
Telecommunications and the Centralization and Decentralization in the International Banking and Finance Industry 93
24-Hour Trading 94
Options for Achieving 24-Hour Trading 95
Linking Locations – 'Following the Sun' 95
Linking Firms 95
Linking Exchanges 96
Extending Operating Hours of Securities Exchanges – Electronic Trading Systems 97
Conclusions 98

Chapter 7 Japanese Information Services in the Late Twentieth Century 101
Barney Warf

Information Services and the Global Economy in the Late Twentieth Century 102
Japanese Versus United States Telecommunications – A Study in Contrasts 103
The Deregulation of Japanese Telecommunications 104
New Information Services in the Japanese Economy 107
Computer Networks 107
Software 108
Cable Television, Multimedia, and Videoconferencing 109
Cellular Telephones 110
The Tokyo Telecommunications Infrastructure 111
Conclusion 112

III URBAN, REGIONAL AND NATIONAL DEVELOPMENT 115

Chapter 8 Cyberstructure and Social Forces – The Japanese Experience 117
Tessa Morris-Suzuki and Peter J. Rimmer

Introduction 117
Early 1980s Vision 117
Mid-1990s Reality 122
Problems Predicting Social Uses of New Technology 127
Internet Japan .jp 127
Computer Games and Personal Computer Networks 129
Corporate Response and Political Implications 131
Cultural and Cost Barriers 132
Conclusions 134

Chapter 9 Electronic Space – Creating Cyber Communities in Southeast Asia 135
Kenneth E. Corey

Introduction 135
Part One – Creating Cyber Communities 136
Malaysia 136
Kuala Lumpur and the City Center Project 137
The Intelligent Cities 137
Technology Park Malaysia 138
Kuala Lumpur International Airport 139
Multimedia Super Corridor 139
Multimedia Flagship Applications 140
Multimedia Development Corporation 141
Johor State 142
Connecting the Corridor 143
Learning from Malaysia's IT and Development Projects 143
Singapore 145
Internal Spatial Organization and IT Infrastructure 145
Technology Corridors 146
Southwestern Technology Corridor 146
Northeastern Technology Corridor 147
Housing and Recreation 147
Regional Center Anchors 147
Cable Television 148
Learning from the Singapore Intelligent City 148
The New National Computer Board 149
Singapore ONE – One Network for Everyone 150
Singapore Inc. 152

Part Two – Controlling the Internet in Southeast Asia 153
Singapore 153
Malaysia 157
Hong Kong, China, and Vietnam 159
Globalization of Internet Regulation 160
Conclusion 161

Chapter 10 Neighbours – Australian and Indonesian Telecommunications Connections 165
Peter J. Rimmer

Introduction 165
The Asia–Pacific Region 166
International Telecommunications 166
Sector Restructuring 169
First Round Reforms 170
Second Round Reforms 171
Privatization in Indonesia 173
Pro-competition and Deregulation in Australia 174
Performance 176
Networks and Services 176
Personal Mobile Telephone Services in Australia and Indonesia 177
Price 182
International Competitiveness 183
Industry Development 184
Private Participation in Indonesia – The KSO Contracts 185
Futures 189
Australia's Communications Futures Project 191
Conclusions 194
Epilogue 195
Australian Privatization 195
Indonesia in Crisis 197
Acknowledgements 198

Chapter 11 The Economic Development of Peripheral Rural Areas in the Information Age 199
Ranald Richardson and Andrew Gillespie

Introduction 199
Incorporating Rural Areas into the Information Society 201
An 'Endogenous' Model 201
An Alternative to the Endogenous Model 203
Overcoming Constraints on Enterprises Through ICTs? 204
Using the Internet 205
Electronic Homeworking and Rural Areas 206
The Freelance Teleworker 207
Employed Teleworkers 208
Community Based Telecenters and Telecottages 209
The 'Telecottage' 209
The Limited Impact of Telecottages 210
Back Offices and Call Centers 212
Secretarial Services 213
Call Centers 213
Conclusions 215

Chapter 12 Telematics, Geography, and Economic Development – Can Local Initiatives Provide a Strategic Response? 219
David Gibbs, Keith Tanner and Steve Walker

Introduction 219
Overview of European Policies for the Information Society 221
Overview of Technology and Market Trends 223

Developing Local Telematics Initiatives – a Case Study of Northwest England 225
Manchester Case Study 226
Burnley Case Study 229
Lancashire College Consortium Case Study 230
Discussion 232
Conclusions 234
