# Contents

---

## 1

---

### Sets, Subsets, Induction, and Recursion 1

- 1.1 The Pascal Triangle (Application: A Counting Problem) 1
- 1.2 Induction (Application: The Tower of Hanoi) 10
- 1.3 Sets, Subsets, and Binary Strings (Application: The Knapsack Problem) 18
- 1.4 Set Operations (Application: An Error-Correcting Code) 28
- 1.5 Recursions (Application: Shift Registers) 38
- 1.6 Chapter Summary and Supplementary Exercises 48

## 2

---

### Integers, Remainders, and the Golden Ratio 51

- 2.1 The Integers (Application: When Is  $\text{Div}(n)$  a Tree?) 51
- 2.2 Lamé's Theorem (Application: Egyptian Fractions) 62
- 2.3 The Integers Mod  $n$  (Application: Public Key Encryption) 70
- 2.4 Chapter Summary and Supplementary Exercises 83

# 3

## Functions, Relations, and Counting 85

- 3.1 Functions and Relations (Application: The Prüfer Correspondence) 85
- 3.2 Counting Rules (Application: Boolean Functions) 96
- 3.3 Three Counting Techniques (Application: Tenth Powers) 106
- 3.4 Chapter Summary and Supplementary Exercises 115

# 4

## Graphs 117

- 4.1 Graphs (Application: The Icosahedron and Dodecahedron) 117
- 4.2 Graph Theory (Application: One-Way Streets) 132
- 4.3 Trees (Application: Structural Induction) 143
- 4.4 Chapter Summary and Supplementary Exercises 156

# 5

## Proof Techniques and Logic 159

- 5.1 Proof Techniques (Application: The Liar Problem) 159
- 5.2 Logic (Application: Logic and the Genetic Code) 169
- 5.3 The Propositional Calculus (Application: Syllogisms) 178
- 5.4 Chapter Summary and Supplementary Exercises 189

# 6

## Boolean Algebras, Boolean Functions, and Logic 191

- 6.1 Boolean Algebras and Functions (Application: Normal Forms in the Propositional Calculus) 191
- 6.2 Boolean Functions and Circuits (Application: Regions in Logic Diagrams) 202
- 6.3 The Predicate Calculus (Application: Proving Program Correctness) 216
- 6.4 Chapter Summary and Supplementary Exercises 223

## 7

### Graphs and Relations

225

- 7.1 Graph Coloring and Matching (Application: Register Allocation) 225
- 7.2 Posets and Lattices (Application: The Kirkman Schoolgirl Problem) 238
- 7.3 Chapter Summary and Supplementary Exercises 250

## 8

### Algorithms

253

- 8.1 Sorting, Searching, and Listing (Application: The Man, Dog, Goat, and Cabbage Problem) 253
- 8.2 Graph Algorithms (Application: Network Flows) 263
- 8.3 The Complexity of an Algorithm (Application: Kruskal's Algorithm and Prim's Algorithm) 271
- 8.4 Chapter Summary and Supplementary Exercises 280

## 9

### Combinatorics

283

- 9.1 Recursions and Their Solution (Application: AVL trees) 283
- 9.2 Probabilities (Application: Network Reliability) 299
- 9.3 Groups and Counting (Application: Rooted Trees) 311
- 9.4 Chapter Summary and Supplementary Exercises 323

## 10

### Models of Computation

327

- 10.1 Languages and Grammars (Application: The Chomsky Hierarchy) 327
- 10.2 Finite State Machines and Turing Machines (Application: DNA Computing) 335
- 10.3 Gödel and Turing (Application: The Vanishing) 348
