

# THE INSECTS

*An Outline of Entomology*

SECOND EDITION

Suranaree University of Technology

21051000614392

P. J. GULLAN & P. S. CRANSTON

# Contents

List of colour plates, x

Preface to the second edition, xiii

Preface and acknowledgements for first edition, xv

## **1 The importance and diversity of insects, 1**

1.1 What is entomology?, 2

1.2 The importance of insects, 2

1.3 Insect biodiversity, 4

1.3.1 The described taxonomic richness of insects, 4

1.3.2 The estimated taxonomic richness of insects, 4

1.3.3 The location of insect species richness, 5

1.3.4 Some reasons for insect species richness, 6

1.4 Insect biogeography, 8

1.5 Naming and classification of insects, 9

1.6 Insects as food, 11

1.6.1 Insects as human food: entomophagy, 11

1.6.2 Insects as feed for domesticated animals, 14

## **2 External anatomy, 15**

2.1 The cuticle, 16

2.1.1 Colour production, 21

2.2 Segmentation and tagmosis, 22

2.3 The head, 24

2.3.1 Mouthparts, 25

2.3.2 Cephalic sensory structures, 30

2.4 The thorax, 32

2.4.1 Legs, 33

2.4.2 Wings, 36

2.5 The abdomen, 39

2.5.1 Terminalia, 40

## **3 Internal anatomy and physiology, 45**

3.1 Muscles and locomotion, 46

3.1.1 Muscles, 46

3.1.2 Muscle attachments, 48

3.1.3 Crawling, wriggling, swimming and walking, 49

3.1.4 Flight, 50

3.2 The nervous system and co-ordination, 53

3.3 The endocrine system and the function of hormones, 55

3.3.1 Endocrine centres, 55

Neurosecretory cells, 55

Corpora cardiaca, 55

Prothoracic glands, 56

Corpora allata, 56

3.3.2 Hormones, 58

3.4 The circulatory system, 58

3.4.1 Haemolymph, 59

3.4.2 Circulation, 60

3.4.3 Protection and defence by the haemolymph, 61

3.5 The tracheal system and gas exchange, 62

3.5.1 Diffusion and ventilation, 64

3.6 The gut, digestion and nutrition, 66

3.6.1 Structure of the gut, 66

3.6.2 Saliva and food ingestion, 70

3.6.3 Digestion of food, 71

3.6.4 The fat body, 72

3.6.5 Nutrition and microorganisms, 73

3.7 The excretory system and waste disposal, 74

3.7.1 The Malpighian tubules and rectum, 74

3.7.2 Nitrogen excretion, 76

3.8 Reproductive organs, 78

3.8.1 The female system, 78

3.8.2 The male system, 80

**4 Sensory systems and behaviour, 83**

- 4.1 Mechanical stimuli, 84
  - 4.1.1 Tactile mechanoreception, 84
  - 4.1.2 Position mechanoreception (proprioceptors), 84
  - 4.1.3 Sound reception, 85
    - Non-tympanal vibration reception, 86
    - Tympanal reception, 88
  - 4.1.4 Sound production, 91
- 4.2 Thermal stimuli, 93
  - 4.2.1 Thermoreception, 93
  - 4.2.2 Thermoregulation, 93
    - Behavioural thermoregulation (ectothermy), 94
    - Physiological thermoregulation (endothermy), 94
- 4.3 Chemical stimuli, 95
  - 4.3.1 Chemoreception, 95
  - 4.3.2 Semiochemicals: pheromones, 96
    - Sex pheromones, 99
    - Aggregation pheromones, 100
    - Spacing pheromones, 101
    - Trail-marking pheromones, 101
    - Alarm pheromones, 101
  - 4.3.3 Semiochemicals: kairomones, allomones and synomones, 102
    - Kairomones, 102
    - Allomones, 102
    - Synomones, 103
- 4.4 Insect vision, 103
  - 4.4.1 Dermal detection, 103
  - 4.4.2 Stemmata, 104
  - 4.4.3 Ocelli, 104
  - 4.4.4 Compound eyes, 106
  - 4.4.5 Light production, 107
- 4.5 Insect behaviour, 109

**5 Reproduction, 111**

- 5.1 Bringing the sexes together, 112
- 5.2 Courtship, 114
- 5.3 Sexual selection, 114
- 5.4 Copulation, 116
- 5.5 Diversity in genitalic morphology, 121
- 5.6 Sperm storage, fertilization and sex determination, 124
- 5.7 Sperm competition, 125
- 5.8 Oviparity (egg-laying), 126

- 5.9 Ovoviviparity and viviparity, 132
- 5.10 Atypical modes of reproduction, 132
  - 5.10.1 Parthenogenesis, paedogenesis and neoteny, 132
  - 5.10.2 Hermaphroditism, 133
  - 5.10.3 Polyembryony, 133
  - 5.10.4 Sex ratio distortion by endosymbionts, 134
- 5.11 Physiological control of reproduction, 134
  - 5.11.1 Vitellogenesis and its regulation, 136

**6 Insect development and life histories, 139**

- 6.1 Growth, 140
- 6.2 Life-history patterns and phases, 141
  - 6.2.1 Phases in insect ontogeny, 143
    - Embryonic phase, 143
    - Larval or nymphal phase, 148
    - Metamorphosis, 149
    - Imaginal or adult phase, 151
- 6.3 Process and control of moulting, 152
- 6.4 Voltinism, 155
- 6.5 Diapause, 156
- 6.6 Dealing with environmental extremes, 157
  - 6.6.1 Cold, 157
    - Freeze tolerance, 157
    - Freeze avoidance, 158
    - Chill tolerance, 158
    - Chill susceptibility, 158
    - Opportunistic survival, 159
  - 6.6.2 Heat, 159
  - 6.6.3 Aridity, 160
- 6.7 Migration, 161
- 6.8 Polymorphism and polyphenism, 162
  - 6.8.1 Genetic polymorphism, 162
  - 6.8.2 Environmental polymorphism or polyphenism, 163
- 6.9 Age-grading, 164
  - 6.9.1 Age-grading of immature insects, 164
  - 6.9.2 Age-grading of adult insects, 164
- 6.10 Environmental effects on development, 166
  - 6.10.1 Temperature, 166
  - 6.10.2 Photoperiod, 169
  - 6.10.3 Humidity, 169
  - 6.10.4 Mutagens and toxins, 169
  - 6.10.5 Biotic effects, 170
- 6.11 Climatic modelling of insect distributions, 171

## **7 Insect systematics: phylogeny and evolution, 175**

- 7.1 Phylogenetics, 176
  - 7.1.1 Phylogenetic methods, 177
  - 7.1.2 Taxonomy and classification, 178
- 7.2 The antiquity of insects, 178
  - 7.2.1 The insect fossil record, 178
  - 7.2.2 Living insects: the evidence for antiquity, 181
- 7.3 Insect radiations, 182
- 7.4 Evolution of wings, 183
- 7.5 Classification and selected diagnostic features of extant hexapods, 187
  - 7.5.1 Class and order Protura (proturans), 189
  - 7.5.2 Class and order Collembola (springtails), 189
  - 7.5.3 Class and order Diplura (diplurans), 189
  - 7.5.4 Class Insecta (true insects), 189
    - Informal grouping 'Apterygota' (Archaeognatha and Thysanura), 189
    - Infraclass Pterygota, 190

## **8 Ground-dwelling insects, 195**

- 8.1 Insects of litter and soil, 196
  - 8.1.1 Root-feeding insects, 198
- 8.2 Insects and dead trees or decaying wood, 199
- 8.3 Insects and dung, 201
- 8.4 Insect-carrion interactions, 203
- 8.5 Insect-fungal interactions, 204
  - 8.5.1 Fungivorous insects, 204
  - 8.5.2 Fungus farming by leaf-cutter ants, 204
  - 8.5.3 Fungus cultivation by termites, 206
- 8.6 Cavernicolous insects, 207
- 8.7 Environmental monitoring using ground-dwelling hexapods, 207

## **9 Aquatic insects, 215**

- 9.1 Taxonomic distribution and terminology, 216
- 9.2 The evolution of aquatic lifestyles, 216
- 9.3 Aquatic insects and their oxygen supplies, 217
  - 9.3.1 The physical properties of oxygen, 217
  - 9.3.2 Gaseous exchange in aquatic insects, 217
  - 9.3.3 Oxygen uptake with a closed tracheal system, 218
  - 9.3.4 Oxygen uptake with an open spiracular system, 219

- 9.3.5 Behavioural ventilation, 220
- 9.4 The aquatic environment, 221
  - 9.4.1 Lotic adaptations, 221
  - 9.4.2 Lentic adaptations, 223
- 9.5 Environmental monitoring using aquatic insects, 225
- 9.6 Functional feeding groups, 226
- 9.7 Insects of temporary waterbodies, 227
- 9.8 Insects of the marine, intertidal and littoral zones, 228

## **10 Insects and plants, 239**

- 10.1 Coevolutionary interactions between insects and plants, 241
- 10.2 Phytophagy (or herbivory), 241
  - 10.2.1 Leaf chewing, 243
  - 10.2.2 Plant mining and boring, 245
  - 10.2.3 Sap sucking, 248
  - 10.2.4 Gall formation, 250
  - 10.2.5 Seed predation, 254
  - 10.2.6 Insects as biological control agents for weeds, 255
- 10.3 Insects and plant reproductive biology, 257
  - 10.3.1 Pollination, 258
  - 10.3.2 Myrmecochory: seed dispersal by ants, 262
- 10.4 Insects that live mutualistically in specialized plant structures, 263
  - 10.4.1 Ant-plant interactions involving domatia, 263
  - 10.4.2 Phytotelmata: plant-held water containers, 264

## **11 Insect societies, 277**

- 11.1 Subsociality in insects, 278
  - 11.1.1 Aggregation, 278
  - 11.1.2 Parental care as a social behaviour, 278
    - Parental care without nesting, 279
    - Parental care with solitary nesting, 279
    - Parental care with communal nesting, 281
    - Subsocial aphids and thrips, 281
    - Quasisociality and semisociality, 282
- 11.2 Eusociality in insects, 283
  - 11.2.1 The primitively eusocial hymenopterans, 283

- 11.2.2 Specialized eusocial hymenopterans: wasps and bees, 285
    - Colony and castes in eusocial wasps and bees, 285
    - Nest construction in eusocial wasps, 289
    - Nesting in honey bees, 290
  - 11.2.3 Specialized hymenopterans: ants, 292
    - Colony and castes in ants, 292
    - Nesting in ants, 294
  - 11.2.4 Isoptera (termites), 295
    - Colony and castes in termites, 295
    - Nesting in termites, 299
  - 11.3 Inquilines and parasites of social insects, 300
  - 11.4 Evolution of eusociality, 302
    - 11.4.1 The origins of eusociality in Hymenoptera, 302
    - 11.4.2 The origins of eusociality in Isoptera, 304
  - 11.5 Success of eusocial insects, 305
- 12 Insect predation and parasitism, 307**
- 12.1 Prey/host location, 308
    - 12.1.1 Sitting-and-waiting, 309
    - 12.1.2 Active foraging, 311
      - Random, or non-directional foraging, 311
      - Non-random, or directional foraging, 312
    - 12.1.3 Phoresy, 313
  - 12.2 Prey/host acceptance and manipulation, 314
    - 12.2.1 Prey manipulation by predators, 314
    - 12.2.2 Host acceptance and manipulation by parasitoids, 316
    - 12.2.3 Overcoming host immune responses, 316
  - 12.3 Prey/host selection and specificity, 317
    - 12.3.1 Host use by parasitoids, 319
    - 12.3.2 Host manipulation and development of parasitoids, 322
    - 12.3.3 Patterns of host use and specificity in parasites, 323
  - 12.4 Models of abundances of predator/parasitoids and prey/hosts, 325
  - 12.5 The evolutionary success of insect predation and parasitism, 327

## **13 Insect defence, 333**

- 13.1 Defence by hiding, 334
- 13.2 Secondary lines of defence, 336
- 13.3 Mechanical defences, 338
- 13.4 Chemical defences, 339
  - 13.4.1 Classification by function of defensive chemicals, 339
  - 13.4.2 The chemical nature of defensive compounds, 340
  - 13.4.3 Sources of defensive chemicals, 340
  - 13.4.4 Organs of chemical defence, 341
- 13.5 Defence by mimicry, 342
  - 13.5.1 Batesian mimicry, 345
  - 13.5.2 Müllerian mimicry, 345
  - 13.5.3 Mimicry as a continuum, 346
- 13.6 Collective defences in gregarious and social insects, 347

## **14 Medical and veterinary entomology, 353**

- 14.1 Insect nuisance and phobia, 354
- 14.2 Venoms and allergens, 354
  - 14.2.1 Insect venoms, 354
  - 14.2.2 Blister and urtica (itch)-inducing insects, 355
  - 14.2.3 Insect allergenicity, 355
- 14.3 Insects as causes and vectors of disease, 355
- 14.4 Generalized disease cycles, 356
- 14.5 Pathogens, 357
  - 14.5.1 Malaria, 357
    - The disease, 357
    - Life cycle of *Plasmodium*, 358
    - Malaria epidemiology, 360
  - 14.5.2 Arboviruses, 363
  - 14.5.3 Rickettsias and plague, 364
  - 14.5.4 Protists other than malaria, 365
    - Trypanosoma*, 365
    - Leishmania*, 366
  - 14.5.5 Filariases, 366
    - Bancroftian and brugian filariasis, 366
    - Onchocerciasis, 367
- 14.6 Forensic entomology, 367

## **15 Pest management, 373**

- 15.1 Insects as pests, 374
  - 15.1.1 Assessment of pest status, 374
  - 15.1.2 Why insects become pests, 376

- 15.2 The effects of insecticides, 378
  - 15.2.1 Insecticide resistance, 380
- 15.3 Integrated pest management (IPM), 381
- 15.4 Chemical control, 382
  - 15.4.1 Insecticides (chemical poisons), 382
  - 15.4.2 Insect growth regulators, 384
  - 15.4.3 Neuropeptides and insect control, 385
- 15.5 Biological control, 385
  - 15.5.1 Arthropod natural enemies, 389
  - 15.5.2 Microbial control, 391
    - Nematodes, 392
    - Fungi, 393
    - Bacteria, 393
    - Viruses, 395
- 15.6 Host-plant resistance to insects, 396
  - 15.6.1 Genetic engineering of host resistance, 397
- 15.7 Mechanical or physical control, 399
- 15.8 Cultural control, 399
- 15.9 Pheromones and other insect attractants, 400
- 15.10 Genetic manipulation of insect pests, 402

## **16 Methods in entomology: collecting, preservation, curation and identification, 405**

- 16.1 Collection, 406

- 16.1.1 Active collecting, 406
- 16.1.2 Passive collecting, 407
- 16.2 Preservation and curation, 409
  - 16.2.1 Dry preservation, 409
    - Killing and handling prior to dry mounting, 409
    - Pinning, staging, pointing, carding, spreading and setting, 409
  - 16.2.2 Fixing and wet preservation, 413
  - 16.2.3 Microscope slide mounting, 414
  - 16.2.4 Habitats, mounting and preservation of individual orders, 414
  - 16.2.5 Curation, 417
    - Labelling, 417
    - Care of collections, 418
- 16.3 Identification, 418
  - 16.3.1 Identification keys, 419
  - 16.3.2 Unofficial taxonomies, 420

Glossary of entomological and selected technical terms, 423

References, 443

Index, 451

Appendix: A reference guide to orders

*Colour plates fall between pp. 256 and 257.*
