## SECTION 1 Engineering Thermodynamics

---

|      |  |                           |       |
|------|--|---------------------------|-------|
| 1.1  | Fundamentals   | <i>Michael J. Moran</i>   | 1-2   |
| 1.2  | Control Volume Applications                          | <i>Michael J. Moran</i>   | 1-14  |
| 1.3  | Property Relations and Data                          | <i>Michael J. Moran</i>   | 1-22  |
| 1.4  | Combustion   | <i>Michael J. Moran</i>   | 1-58  |
| 1.5  | Exergy Analysis                                      | <i>Michael J. Moran</i>   | 1-69  |
| 1.6  | Vapor and Gas Power Cycles                           | <i>Michael J. Moran</i>   | 1-78  |
| 1.7  | Guidelines for Improving Thermodynamic Effectiveness | <i>Michael J. Moran</i>   | 1-87  |
| 1.8  | Ergoeconomics  | <i>George Tsatsaronis</i> | 1-88  |
| 1.9  | Design Optimization                                  | <i>George Tsatsaronis</i> | 1-95  |
| 1.10 | Economic Analysis of Thermal Systems                 | <i>George Tsatsaronis</i> | 1-102 |

## SECTION 2 Fluid Mechanics

---

|     |   |  |       |
|-----|---|--|-------|
| 2.1 | Fluid Statics   | <i>Stanley A. Berger</i>                             | 2-2   |
| 2.2 | Equations of Motion and Potential Flow                | <i>Stanley A. Berger</i>                             | 2-11  |
| 2.3 | Similitude: Dimensional Analysis and Data Correlation | <i>Stuart W. Churchill</i>                           | 2-28  |
| 2.4 | Hydraulics of Pipe Systems                            | <i>J. Paul Tullis</i>                                | 2-44  |
| 2.5 | Open Channel Flow                                     | <i>Frank M. White</i>                                | 2-61  |
| 2.6 | External Incompressible Flows                         | <i>Alan T. McDonald</i>                              | 2-69  |
| 2.7 | Compressible Flow                                     | <i>Ajay Kumar</i>                                    | 2-80  |
| 2.8 | Multiphase Flow                                       | <i>John C. Chen</i>                                  | 2-97  |
| 2.9 | Non-Newtonian Flows                                   | <i>Thomas F. Irvine, Jr. and Massimo Capobianchi</i> | 2-113 |

## SECTION 3 Heat and Mass Transfer

---

|       |  |  |      |
|-------|--|--|------|
| 3.1   | Conduction Heat Transfer                         | <i>Robert F. Boehm</i>                               | 3-1  |
| 3.2   | Convection Heat Transfer                         |  | 3-15 |
| 3.2.1 | Natural Convection                               | <i>George D. Raithby and K.G. Terry Hollands</i>     | 3-15 |
| 3.2.2 | Forced Convection — External Flows               | <i>N.V. Suryanarayana</i>                            | 3-26 |
| 3.2.3 | Forced Convection — Internal Flows               | <i>N.V. Suryanarayana</i>                            | 3-47 |
| 3.2.4 | Convection Heat Transfer in Non-Newtonian Fluids | <i>Thomas F. Irvine, Jr. and Massimo Capobianchi</i> | 3-56 |
| 3.3   | Radiation  | <i>Michael F. Modest</i>                             | 3-65 |

|       |  |       |
|-------|--|-------|
| 3.4   | Phase-Change.....                                  | 3-91  |
| 3.4.1 | Boiling and Condensation <i>Van P. Carey</i> ..... | 3-91  |
| 3.4.2 | Particle Gas Convection <i>John. C. Chen</i> ..... | 3-107 |
| 3.4.3 | Melting and Freezing <i>Noam Lior</i> .....        | 3-113 |
| 3.5   | Mass Transfer <i>Anthony F. Mills</i> .....        | 3-127 |

## SECTION 4 Applications

|      |   |       |
|------|---|-------|
| 4.1  | Water Desalination <i>Noam Lior</i> .....   | 4-3   |
| 4.2  | Environmental Heat Transfer <i>Henry Shaw</i> .....   | 4-20  |
| 4.3  | Heat Exchangers <i>Ramesh K. Shah and Kenneth J. Bell</i> .....   | 4-50  |
| 4.4  | Bioheat Transfer <i>Kenneth R. Diller, Jonathan W. Valvano, and John A. Pearce</i> .....                                      | 4-114 |
| 4.5  | Thermal Insulation <i>David W. Yarbrough and Jeff Nowobilski</i> .....  | 4-188 |
| 4.6  | Energy Audit for Buildings <i>Moncef Krarti</i> .....   | 4-200 |
| 4.7  | Compressors <i>Raymond Cohen, Eckhard Groll, William H. Harden, Kenneth E. Hickman, Dilip K. Mistry, and Earl Muir</i> .....  | 4-216 |
| 4.8  | Pumps and Fans- <i>Robert F. Boehm</i> .....  | 4-245 |
| 4.9  | Cooling Towers <i>Anthony F. Mills</i> .....  | 4-253 |
| 4.10 | Heat Transfer in Manufacturing <i>Donald W. Radford and Timothy W. Tong</i> .....   | 4-264 |
| 4.11 | Pinch Point Analysis <i>Kirtan K. Trivedi</i> .....   | 4-287 |
| 4.12 | Cryogenic Systems <i>Randall F. Barron</i> .....  | 4-317 |
| 4.13 | Air-Conditioning Systems <i>Donald L. Fenton</i> .....  | 4-336 |
| 4.14 | Optimization of Thermal Systems <i>Yogesh Jaluria</i> .....   | 4-371 |
| 4.15 | Heat Transfer Enhancement <i>Arthur E. Bergles</i> .....  | 4-408 |
| 4.16 | Heat Pipes <i>Larry W. Swanson</i> .....  | 4-419 |
| 4.17 | Liquid Atomization and Spraying <i>Rolf D. Reitz</i> .....  | 4-431 |
| 4.18 | Thermal Processing in Food Preservation Technologies <i>Ibrahim Dincer</i> .....  | 4-440 |
| 4.19 | Thermal Conduction in Electronic Microstructures <i>Kenneth E. Goodson</i> .....  | 4-458 |
| 4.20 | Cooling in Electronic Applications <i>Pradeep Lall</i> .....  | 4-505 |
| 4.21 | Direct Contact Heat Transfer <i>Harold R. Jacobs</i> .....  | 4-544 |
| 4.22 | Temperature and Heat Transfer Measurements <i>Robert J. Moffat</i> .....  | 4-568 |
| 4.23 | Flow Measurement <i>Jungho Kim, Sherif A. Sherif, and Alan T. McDonald</i> .....  | 4-592 |
| 4.24 | Applications of Artificial Neural Networks and Genetic Algorithms in Thermal Engineering <i>Mihir Sen and K.T. Yang</i> ..... | 4-620 |

## SECTION 5 Numerical Analysis and Computational Tools

|     |   |      |
|-----|---|------|
| 5.1 | Computer-Aided Engineering (CAE) <i>Frank Hagin</i> ..... | 5-1  |
| 5.2 | Finite Difference Method <i>Frank Hagin</i> .....         | 5-2  |
| 5.3 | Finite Element Method <i>Frank Hagin</i> .....            | 5-14 |
| 5.4 | Boundary Element Method <i>Frank Hagin</i> .....          | 5-37 |
| 5.5 | Software and Databases <i>Frank Hagin</i> .....           | 5-46 |
