

Materials for Transportation Technology

EUROMAT – Volume 1

Edited by P.-J. Winkler

FEMS

DCM

Contents

I. Automotive

Iridium Alloy for Spark Plug Electrodes

B. Kempf, Degussa-Hüls AG, Hanau-Wolfgang (D);

M. Graff, Universität Darmstadt (D);

J. Breme, Universität des Saarlandes (D)3

Fatigue Boundaries Increase in a Mechanical Component

M. Marcantoni, E. Quadrini, University of Ancona (I)9

Intermetallic TiAl(Cr,Mo,Si) Alloys for Lightweight Engine Parts— Structure and Properties

G. Frommeyer, S. Knippscheer, Max-Planck-Institut für Eisenforschung GmbH,

Düsseldorf (D)12

Carbon – a Key Material in Future Motive Power Engineering

D. Kehr, J. Metz, R. Wolf, Schunk Kohlenstofftechnik GmbH (D)19

Characteristics of Cast and Welded Aluminium Nodes

J. Ødegård, M. Polanco, H. Sund, F. Syvertsen, SINTEF Materials Technology,

Trondheim (N).....24

Processing and Corrosion Control of a Magnesium Body Structure Element

G. Laudien, H. Schreckenberger, Volkswagen AG, Wolfsburg (D).....30

Near-net-shape Magnesium-Structural Components for Automotive Applications

R. Heller, A. Mertz, R. Vomhof, K. Weiß35

3-Dimensional Shaped Aluminium Foam Sandwiches

J. Baumeister, Fraunhofer-Institut Bremen (D);

H. Gers, Honsel AG, Meschede (D);

F. Baumgärtner, Schunk Sintermetalltechnik, Gießen (D);

W. Seeliger, Wilhelm Karmann GmbH, Osnabrück (D).....40

Eutectic Microstructural Evolution of a Thixoformed AZ91 after Solution Heat Treatment

V. Ezersky, M. Talianker, Ben-Gurion University of the Negev, Beer-Sheva (IL);

F. Bardi, M. Cabibbo, E. Evangelista, S. Spigarelli, University of Ancona (I).....46

Influence of Roller Burnishing on Surface Properties of Mg-Alloys: Roughness, Hardness, Residual Stresses, Corrosion

V. Kaese, M. Niemeyer, Tai Phan-tan, J. Röttger, H.K. Tönshoff, J. Winkler, University of

Hannover (D)52

Near Net Shape Cast Sheet for Automotive Applications

L. Katgerman, W.H. Kool, E.N. Straatsma, Delft University of Technology (NL)58

Development of a Highly Ductile Die Casting Alloy of the Type AlMg ₃ <i>R. Klos, H. Koch, Aluminium Rheinfelden GmbH (D)</i>	64
Innovative Casting Process of Lighter Steel Components For The Transport Industry (Brite/Euram III "ICARO" project) <i>M. Corazzola, A. Fuganti, Centro Ricerche Fiat (I)</i>	71
Mathematical Modeling of Residual Stresses in Weld Simulated Specimen of Aluminum Alloy AA 6082 <i>R. Aune, Ø. Gundersen, Z. Zhang, SINTEF Materials Technology, Trondheim (N)</i>	78
Pyrolysis-GC/MS in Damage Analysis of Polymers <i>P. Schwarzer, T. Tolksdorf, Volkswagen AG, Wolfsburg (D)</i>	84
Ultralight and Wear Resistant Ceramic Brakes <i>T. Henke, W. Krenkel, R. Renz, German Aerospace Center (DLR), Stuttgart (D)</i>	89
Porous Metal Fiber Components - POMFICO <i>O. Delverdier, ATECA (F); H. Baur, M. Hartweg, K. Lempenauer, DaimlerChrysler AG, Ulm (D); O. Andersen, G. Stephani, Fraunhofer Institut (IFAM), Dresden (D)</i>	95
Extension of the Life Time of Thin Foils Made of Fe-Cr-Al Alloys <i>M. Juez-Lorenzo, V. Kolarik, Fraunhofer-Institut (ICT), Pfaffingtal (D); J. Klöwer, A. Kolb-Telieps, Krupp VDM, Werdohl (D)</i>	103
TiAl Automotive Valves - Fabrication and Properties <i>V. Güther, A. Otto, 5 GfE Metalle und Materialien GmbH, Nürnberg (D); H. Baur, R. Joos, DaimlerChrysler AG, Ulm (D); O. Berg, M. Lohmann, Mahle Motorventile GmbH, Bad Homburg (D); G. Frommeyer, S. Knippscheer, Max-Planck-Institut, Düsseldorf (D); N. Eberhardt, H. Kestler, Plansee AG, Reutte/Tirol (A)</i>	110
Experimental Evaluation of Residual Stresses in the Aluminium Alloy AA 6082 by Use of the Satoh Test <i>R. Aune, Ø. Gundersen, SINTEF Materials Technology, Trondheim (N)</i>	116
Semi-Solid-Metal Casting 1 Thixocasting: „Determination of the Flow Characteristics of Semi-Solid Aluminium Alloys <i>M. Fehlbier, O. Klaassen, P.R. Salun, Gießerei-Institut, RWTH Aachen (D)</i>	124
Short Fatigue Crack Problem in a Steel <i>C. Kaynak, Middle East Technical University, Ankara (TR)</i>	129
Processing of Natural Fibres with Hybrid-Technology <i>L. Frormann, G. Ziegmann, Institut für Polymerwerkstoffe und Kunststofftechnik, Clausthal-Zellerfeld (D)</i>	135

II. Aerospace

Laser Welding of 6xxx series Aluminum Alloys

G.N. Haidenmenopoulos, A. D. Zervaki, University of Thessaly, Volos (GR) 143

Characterisation of Mechanical Properties and Corrosion Performance of Friction Stir Welded AA6013 Sheet

G. Biallas, R. Braun, C. Dalle Donne, G. Staniek, DLR - Deutsches Zentrum für Luft- und Raumfahrt, Köln (D) 150

Thermal Decomposition of Quasi-crystalline Phases and Mechanical Properties after Hot Extrusion of Rapidly Solidified Al-6.5Fe-1.5V

*M. Lieblich, CENIM-CSIC, Madrid, (E);
R. Dashwood, R. Tongsri, Imperial College, London (UK);
M. De Sanctis, A. Solina, R. Valentini, University of Pisa (I) 156*

3D Textile Reinforcements for High-Performance Rotors

G. Archodoulakis, C. Herzberg, W. Hufenbach, L. Kroll, A. Langkamp, H. Rödel, Technische Universität Dresden (D) 163

Design and Manufacture of 3D-Braided Textiles as a Reinforcement for Composites

*H. Langer, DaimlerChrysler, Ottobrunn, Munich (D);
A.K. Pickett, Engineering Systems International GmbH, Eschborn (D);
M. Schneider, B. Wulforst, Institut für Textiltechnik der RWTH Aachen (D) 169*

Advanced Materials for RTM-Processing – Characterization and Application of Non Crimp Fabrics (NCF)

C. Kissinger, P. Mitschang, M. Neitzel, Institut für Verbundwerkstoffe GmbH, Kaiserslautern (D) 176

Advances in Aerospace Materials and Structures

C. J. Peel, Defence Evaluation and Research Agency, Farnborough Hants (UK) 183

Non-Destructive Imaging Techniques for Damage Evaluation of Smart Materials

T. Benziger, A. Hilbig, F. Michel, G. Mook, J. Pohl, University of Magdeburg (D) 198

Microstructure and Mechanical Properties of Screw Press Forged Ti-17 Alloy

W. Horvath, M. Ortmayr, E. A. Werner, Technische Universität München (D) 204

Microstructure and Mechanical Properties of Thermomechanically Processed Ti-25V-15Cr-xAl alloys

*D. Rugg, W. Voice, Rolls-Royce Plc, Derby (UK);
P. A. Blenkinsop, Y. G. Li, M. H. Loretto, The University of Birmingham, Edgbaston (UK) 211*

The Relationship between Thermomechanical Treatment and the Mechanical Properties of Ti-17

*W. Horvath, Bühler Schmiedetechnik GmbH & Co KG, Kapfenberg (A);
M. Ortmayr, E. A. Werner, TU-München (D) 218*

A New Tantalum Strengthened Alloy for Flying Gasturbines <i>U. Brill, Krupp VDM GmbH, Altena (D)</i>	225
Microstructure and Mechanical Properties of Power Beam Weld Superalloys during Cyclic Deformation <i>A. Fischer, T. Spirowski, S. Weiß, Universität GH Essen (D)</i>	231
Determination of the Microstructural Response of Titanium Alloys to Fabrication Processing for the Novel Design of Future Aeroengine Components <i>P. A. Blenkinsop, P. Bowen, A. R. Coleman, The University of Birmingham, Edgbaston (UK)</i>	237
Test Methods and Vibration Monitoring of Samples and Blades of Aircraft Engines with Cracks <i>T. Khristenko, A. Roytman, Zaporozhye State University (UA)</i>	243
Physical Aging of Titanium/FM-5 Polyimide Adhesive Structural Laminates: Nanoindentation Measurement of the Interface Properties <i>J. D. Holbery, Centre Suisse d'Electronique et de Microtechnique SA, Neuchâtel (CH); R. M. Fisher, University of Washington, Seattle (USA)</i>	249
Platinum Base Alloys for High Temperature Space Applications <i>A. Behrends, B. Fischer, D. Freund, R. Völkl, University of Applied Science Jena (D); D. Lupton, J. Merker, W. C. Heraeus GmbH & Co KG, Hanau (D)</i>	257
Repair of (Gamma)TiAl Alloys by Diffusion-Brazing Technique <i>C. Colin, Y. Bienvenu, S. Tarral, Centre des Matériaux ENSMP Evry (F); J.F. Clément, J.P. Ferté, J.P. Henrion, SNECMA Evry (D)</i>	261
SI-SIC LigaFill® Foams and Related Net-like Structures - New Lightweight and Low-cost Materials for Spaceborne Applications <i>J. Adler, G. Standke, Fraunhofer Institute, IKTS, Dresden (D)</i>	270
Study of the Hot- and Warm Workability of the 2618 Aluminium Alloy <i>F. Bardi, M. Cabibbo, P. Cavaliere, E. Evangelista, S. Spigarelli, INFN/University of Ancona (I)</i>	277
Modeling of Cyclic Stress-Strain Behavior and Life Prediction of Near- α Titanium Alloy IMI 834 under Thermomechanical Fatigue Conditions <i>H.J. Maier, Universität Paderborn (D); H.-J. Christ, R.G. Teteruk, Universität Siegen (D)</i>	283
High Temperature Al-0.3Li-1Mg Alloys Reinforced With Ultra Fine TiO ₂ Additions <i>T. Gerique, CENIM-CSIC (E); A. Shakesheff, DERA (UK); M. De Sanctis, L. Lazzeri, A. Solina, R. Valentini, University of Pisa (D)</i>	291

Kinetics and Thermodynamics of Hydrogen Absorption in b-Titanium Alloys <i>H.-J. Christ, M. Decker, K. Prüßner, Universität Siegen (D)</i>	298
---	-----

III. Rail and Ships

Deformation and Lifetime Behaviour of Cyclic Loaded Rail and Wheel Steels <i>B. Denne, K.-H. Lang, D. Löh, Universität Karlsruhe (D)</i>	305
---	-----

Thermal Fatigue of a Railway Wheel <i>B. Al Taweel, S. Pommier, B.B. Viet, SNCF, Centre de Levallois, Levallois-Perret (F); F. Demilly, Valdunes (F)</i>	312
---	-----

RIMLoC-Process for Particle Reinforced Al-Metal-Matrix-Composites for Wear Resistant Light-Weight-Components <i>M. Dette, Gerhard-Mercator-Universität-GH Duisburg (D); O. Brandt, D. Brungs, A. Keßler, Honsel AG, Meschede (D); L. Schlenk, Knorr-Bremse Systeme für Schienenfahrzeuge GmbH, München (D)</i>	317
--	-----

Microstructure and Properties of an Ordered and a Disordered Ship Propeller Bronze <i>J. Eberlein, R. Kaps, Mecklenburger Metallguss Waren (D); G. Benkiser, G. Winkel, Universität Rostock (D)</i>	323
--	-----

Elastic Bonding in Vehicle Construction <i>S. Koch, Sika AG, Zürich (CH)</i>	329
---	-----

Sandwich Design for Ships and Railway Wagons <i>K.-A. Olsson, Royal Institute of Technology, Stockholm (S)</i>	335
---	-----

Low Cost Primary Composite Structures <i>A. S. Herrmann, M. Kleineberg, C. H. Sigle, German Aerospace Centre, Braunschweig (D)</i>	343
---	-----

Employment of Rapid Heat Treatment of Rolled Steel Products for Shipbuilding Application <i>O.M. Ivasishin, D.I. Nikonenko, R.V. Teliovich, Ye.I. Yakushechkin, Institute for Metal Physics, NASU, Kiev (RUS)</i>	352
--	-----

Investigation of the Formation of White Etching Layers and Residual Stresses in Railway Rails <i>A. Pyzalla, W. Reimers, E. Wild, Hahn-Meitner-Institut, Berlin (D)</i>	358
---	-----
