WILEY-VCH

Microstructures, Mechanical Properties and Processes

EUROMAT – Volume 3

Edited by Y. Bréchet

FEMS

DGM

Contents

I. Computer Simulation of Microstructures

Coupling of a Crystal Plasticity Finite Element Model with a Probabilistic Cellular Automaton for Simulating Primary Static Recrystallization in Aluminum
R. C. Becker, Lawrence Livermore National Laboratory, CA (USA);
D. Raabe, Max-Planck-Institut für Eisenforschung, Düsseldorf (D) 3

Mean Field Kinetic Modelling of Microstructures Driven by Nucleation and Growth Kinetics
D. Crespo, E. Pineda, T. Pradell, Universitat Politècnica de Catalunya, Barcelona (E) 9

Coarsening of Fractal Grain Boundaries
P. Streitenberger, Otto-von-Guericke-Universität, Magdeburg (D);
D. Fan, V. Tikare, Sandia National Laboratories, Albuquerque, NM (USA) 15

From Discrete to Continuum Dislocation Dynamics
B. Bakó, P. Balogh, I. Groma, Eötvös University, Budapest (H) 22

Application of the Phase Field Method to the Solidification of Hot-Dipped Galvanized Coatings
S. Henry, M. Rappaz, A. Semoroz, École Polytechnique Fédérale de Lausanne (CH) 28

A Free Boundary Model For Rosette Formation During Semi-Solid Processing
A. M. Mullis, University of Leeds (UK) 34

Large Microstructure Simulations in Binary and Ternary Alloys: Application to Fe-C and Fe-C-Mn
B. Böttger, U. Grafe, J. Tiaden, ACCESS e.V., Aachen (D) 40

Monte Carlo simulation of the L12 order-disorder phase transformation under cascade irradiation
C. Abromeit, U. Czubayko, Hahn-Meitner-Institut Berlin GmbH, (D);
S. Matsumura, Kyushu University (J) 47

DEM Simulation of Particle Packing Behavior in Colloidal Forming Processes
P. Greil, Ch.-W. Hong, T. Iwai, University of Erlangen-Nuernberg (D) 53

Random Sets for Modelling of Microstructures : Some Examples
J.M. Chaix, J.M. Missiaen, INPG, Grenoble (F) 58

Influence of Alloying Elements and Their Interactions on Martensite Start Temperature
P. J. Van der Wolk, S. Van der Zwaag, J. Wang, TU Delft und NIMR (NL) 64

Improvement of Quality and Productivity for Rolled and Extruded Aluminium Products (REAP) through Microstructure and Texture Modelling
B. Bengtsson, H.E. Ekstrøm, Granges Technology, Finspång (S);
T. Furu, S. Johnsen, H.E. Vatne, Hydro Aluminium, R&D Materials Technology, Sunndalsøra (N);
L. Poizat, R. Shahani, Pechiney Centre de Recherches de Voreppe (F) 70

Modelling of Temperature Effects in Plastic Deformation
E. Van Der Giessen, Delft University of Technology (NL);
J. Th. M. De Hosson, E. D. Metselaar, A. Roos, University of Groningen (NL) 78

Vacancy Defect on a Si(100) Surface: Computer Simulation
S.V. Kolomoets, A.S. Yanovsky, Zaporozhye State University (UA) 85

Monitoring Precipitation Kinetics in an Al-Mn-Mg-Cu Alloy Using Thermoelectric Power and Electrical Resistivity Measurements
B. Davenport, S. Vooijs, S. van der Zwaag, Netherlands Institute for Metals Research, Delft, The Netherlands Delft University of Technology, Delft (NL) 90

The Effect of Grain Geometry on the Kinetics of Recrystallisation Processes
S.P. Chen, S.B. Davenport, D.N. Hanlon, S. van der Zwaag, Y. van Leeuwen, Delft University of Technology (NL) 96

Modeling of Dendrite Structure and Microsegregation in Single Crystal Solidification of Superalloys
S. G. Fries, U. Grafe, F. Hediger, D. Ma, ACCESS e.V., Aachen (D) 102

Computer Simulation of Brownian Translational Motion of the Particles in Magnetic Fluids
C. Cotae, University "Gh. Asachi" Iassy (RO);
C. Dan Buioca, V. Iusan, University of Petrosani (RO) 109

A New Microscopic Model for the BCC-9R Transformation During Cu Precipitation in Ferritic Steels
Y. Le Bouar, SRMP, CEA-Saclay (F) 114

II. Computer Simulation of Mechanical Properties

Modeling of Microstructure Evolution and Mechanical Properties in Age-hardening Aluminum Alloys
Y. Bréchet, A. Deschamps, D. Solas, Domaine Universitaire de Grenoble, St Martin d'Hères (F) 121

Dynamic Modelling of PLC Instabilities Occurring in Depth Sensing Microhardness Tests
G. Bérces, J. Lendvai, Eötvös University, Budapest (H) 133

Simulation of Mechanical Properties of ULCB_Mn Steel Sheets having a Composite Microstructure
L. Jeziorski, C. Kolan, A. K. Lis, Technical University of Czestochowa (PL) 140

Microstructural Aspects of Endurance Limit of the Nodular Cast Iron
B. Kubicki, Royal Melbourne Institute of Technology, Bundoora (AUS) ;
D. Prayitno, Trisakti University , Jakarta (RI) 147

Damage Kinetics and Fracture toughness of Nodular cast iron
C. Berdin, C. Prioul, Ecole Centrale Paris (F) 154

Macroscopic and Mesoscopic Models for Fracture in Sheet Metal Forming
H. Dell, H. Gese, MATFEM Partnerschaft Dr. Gese & Oberhofer, München (D) 160

Mechanical Behaviour of DC Cast AA3104 and AA5182 under Semi-solid Conditions
B. Magnin, Centre de Recherche de Voreppe (F);
L. Katgerman, W.H. Kool, W.M. van Haaften, Delft University of Technology (NL) 166

Constitutive Modeling of the Flow Behavior of Semi-Solid Aluminum Alloys
L. Bäurle, G. Gullo, A. Wahlen, ETH Zurich (CH) 172

Determination of Thermal-Mechanical Properties of Aluminium Base PM Material for Computer Simulation of Manufacturing Process
S. T. Mandziej, Advanced Material Analysis, Enschede ;
G. Krallics, G. Ziaja, Technical University of Budapest (H) 178

Fracture Mechanics Simulation of Shot Peening Effects on the Damage Tolerance Against Fatigue Failures
T. Fett, Forschungszentrum Karlsruhe (D);
G. König, MTU München (D) 184

A Theoretical Study of the Effects of Alloying Elements on the Cleavage Strength and Formability of TiAl
D. Li, R. Yang, Institute of Metal Research, CAS, Shenyang (VRC);
Z. X. Guo, University of London (UK);
Y. Song, University of London (UK), Institute of Metal Research, CAS, Shenyang (VRC) 190

Development of an Advanced Rheological Tool for polymer melt processing
R.J. Koopmans, Dow Benelux NV, Terneuzen (NL) 196

Simulation of the Stability of Microcracks in Macroscopic Structures
M. Große Gehling, H. Vehoff, Universität des Saarlandes, Saarbrücken (D) 202

On Applicability of Life Prediction Models during Low Cycle Fatigue of Steels
M. B. Maros, G. Nagy, University of Miskolc (H) 209

Is there any Connection between the Characteristics of the LCF and FCG?
J. Lukács, G. Nagy, University of Miskolc (H) 215

On the Analytical Modelling of Mechanical Properties, for Some Hybrid Particulate Aluminium Matrix Composites
M. Mares, Technical University "Gh. Asachi" Iasi, (RO) 220

Drop Weight NDTT Test Results for Steel Grades with Yield Stresses 355 to 1000 MPa
R. Celin, J. Vojvodic, B. Kosec, University of Ljubljana (SLO) 226

Effective Stress Intensity Factor for the Straight Crack Front with 3D-Ledges
J. Horníková, J. Pokluda, P. Šandera, Brno University of Technology (CZ) 232

A Model-based Approach for Determination of Product-Properties on Carbon-Black Loaded Polyethylenes
Y. Pan, L. Shen, X.-S. Yl, Zhejiang University, Hangzhou (VRC) 236

Simulation of Vibrations of a Shape Memory Alloy Wire: Temperature Induced Phase Transitions and Active Vibration Control
C. Kober, University of Technology, Munich (D) 243

Effect of the Chemical Composition on the Work Hardening and Dynamic Recovery of Some Metallic Alloys
J.M. Cabrera, J.M. Prado, ETSEIB - Universidad Politécnica de Catalunya, Barcelona (E) 250

Application of the EBSD Technique to the Study of Dynamic Recrystallisation
L. Gavard, F. Montheillet, Ecole Nationale Supérieure des Mines de Saint-Etienne (F);
J. M. Cabrera, M. El Wahabi, J. M. Prado, Universidad Politécnica de Catalunya, Barcelona (E) 256

Hot Flow Description of ARMCO Iron
J. M. Cabrera, J. M. Prado, K. Tafzi, Universidad Politécnica de Catalunya, Barcelona (E) 262

Mechanical Properties / Microstructure Relationships in Aerospace Aluminum Alloys
Y. Bréchet, A. Deschamps, D. Dumont, C. Sigli, LTPCM/ENSEEG, Grenoble, Pechiney Centre de Recherches de Voreppe (F) 269

III. Modelling of Processes

Optimization of an industrial ductile iron casting design and pattern layout using comprehensive casting process simulation tools
R. Aagaard, E. Hepp, W. Schäfer, MAGMA Gießereitechnologie GmbH, Aachen (D) 279

Computational Modeling of Investment Casting
F. Hediger, M. Schallmo, M. Stemmler, ACCESS e.V., Aachen (D) 286

Analysis of Macrosegregation, Hot Tears and Heat Treatment in Steel Castings Using Simulation Tools
S. Andersen, M.C. Schneider, MAGMA Gießereitechnologie GmbH, Aachen (D) 293

Estimation of Boundary Conditions Using Inverse Stationary Methods
M. Gremaud, CALCOM SA PSE-EPFL, Lausanne (CH);
J.-M. Drezet, Laboratoire de Métallurgie Physique, Lausanne (CH);
G.-U. Grün, VAW Aluminum AG, Bonn (D) 299

Numerical Simulation - a Comprehensive Quality Control Tool for Steel and Iron Foundries
E. Flender, M.C. Schneider, J.C. Sturm,
MAGMA Gießereitechnologie GmbH, Aachen (D) 305

Microstructure Simulation of Thermally Sprayed Particles
H. Frank, J. Wilden, Chemnitz University of Technology (D) 311

Simulation of the Core Shooting Process
A. Ludwig, L. Meiser, M. Pelzer, P. R. Sahm, Gießerei-Institut, RWTH Aachen (D) 318

CHEMSHEET - an Efficient Worksheet Tool for Thermodynamic Process Simulation
K. Hack, S. Petersen, GTT Technologies, Herzogenrath (D);
P. Koukkari, K. Penttilä, VTT Chemical Technology (FIN) 323

Modeling of Solidification Process to Cast EDM Electrodes from Rapid Prototyping
A. J. S. Mateus, Instituto Politécnico de Leiria (P);
J. M.G.C. Ferreira, Universidade Técnica de Lisboa (P) 331

Computational Optimization of Parts Produced from Ceramic Powders
O. Rosenfelder, P. Stingl, CeramTec AG, Lauf (D);
T. Kraft, H. Riedel, Fraunhofer-Institute for Materials Mechanics, Freiburg (D) 337

An Example of Numerical Simulation of the Powder Injection Moulding Process
V. V. Bilovol, J. Duszczyk, L. Kowalski, Delft University of Technology, Delft (NL) 343

Models for Numeric Simulation of Extrusion Stamping Processes for Metallic Powders Sintered Preforms
G. A. Panoiu, SINTEROM Manufacturing Enterprise, Cluj-Napoca (RO);
C. S. Dumitru, M. E. Mangra, University of Craiova (RO) 350

Modelling of Reverse Problem in Heat Transfer
F. Ciolacu, A. S. Rosca, University of Craiova (RO) 356

The Influence of the Plume Zone Structural and Dimensional Parameters Regarding the Steel's Micro-alloying Efficiency by Powder Injection
D. Daisa, METAV S.A. Bucharest (RO);
I. Butnariu, V. Geanta, R. Stefanoiu, Politehnica - University ov Bucharest (RO) 362

Computer Simulation of the Solidification in Large Ingot with Respect to Directional Segregation
I. Butnariu, C. Catana, V. Geanta, C. Necsulescu, V. Rucai, R. Stefanoiu, "POLITEHNICA" University of Bucharest (RO);
S. Lefter, Prefectura Bacau (RO) 368

A Quantitative Roughness Analysis of Tension Damage Cavities in a Rapidly Quenched Aluminium Alloy
A. Morel, F. Paun, O.N.E.R.A. (DMMP) Châtillon Cedex (F);
E. Bouchaud, SRSIM, CEA-SACLAY Gif-sur-Yvette Cedex (F) 373

Monitoring and Control of the Smelt-Condition of Materials with High Melting Temperature
Dr. Meyer, Beckmann-Institut, Lichtenstein (D);
Dr. Fleischer, GPA Dr. Fleischer & Partner GbR, Lichtenstein (D);
Prof. Debuigne, Institut National des Sciences Appliquées, Rennes (F);
Ing. Agú, Manfredi Company, S. Secondo di Pinerolo (I);
Dr. Zeidler, Dipl.-Ing. Zimmermann, NRU Präzisionstechnologie GmbH, Neukirchen (D);
Dipl.-Phys.. Mucha, Prof. Wielage, Technische Universität Chemnitz (D);
Prof. Güldner, Dipl.-Ing. Hanisch, Technische Universität Dresden (D);
Ing. Saxby, Tritech Precision Products Ltd., Wrexham (GB) 379

Environmental and Economic Plant Optimization
R. Ackermann, G. Fleischer, S. Hermanns, N. Ibald, S. Roth,
Technical University, Berlin (D) 385

A Planning Tool for the 3D Simulation of Temperature Fields, Stresses and Deformations in Massive Concrete Structures
J. Hattel, DTU, Kopenhagen (DK);
S. Wierichs, S. Andersen, MAGMA Inc., Arlington Heights (USA) 392

Mathematical Modelling of Fractional Solidification
A. Garcia, M. C. F. Ierardi, J. A. Spim Jr, Materials Engineering Department/State University of Campinas (BR) 398

A Model for the Analysis of the Failures of the Mechanical Structural Parts
S. Domsa, D. Salomie, Technical University of Cluj-Napoca (RO) 404
