Contents

| | |
|--|-----------|
| Preface | 1 |
| Part 1 Artificial Neural Networks | 1 |
| Towards Intelligent Mobile Robots | 3 |
| <i>C.A.Czarnecki</i> | |
| Wavelet Transform by Soft Computing | 16 |
| <i>O.Ciftcioglu</i> | |
| Investigating the Performance of MLP Classifiers Where Limited Training Data Are Available for Some Classes | 22 |
| <i>C.R.Parikh, M.J.Pont, Y.Li and N.B.Jones</i> | |
| A Neural Network Model for Projection Pursuit | 28 |
| <i>R.Thawonmas</i> | |
| Comparing the Performance of Three Neural Classifiers for Use in Embedded Applications | 34 |
| <i>Y.Li, M.J.Pont, C.R.Parikh and N.B.Jones</i> | |
| On the Application of Self-Organising Maps to the Exploration of Product Performance Measures | 40 |
| <i>S.J.Wooding</i> | |
| Using a Combination of RBFN, MLP and kNN Classifiers for Engine Misfire Detection | 46 |
| <i>Y.Li, M.J.Pont, C.R.Parikh and N.B.Jones</i> | |

Chaos as a Desirable Stable State of Artificial Neural Networks

N.Crook, C.Dobbyn and T. olde Scheper

52

Part 2 Hybrid Systems

61

A Framework for the Development of Hybrid AI Control Systems

A.R.Graves and C.A.Czarnecki

63

Soft-computing Based Predictive Modelling of Building Management Systems

A.Gegov, G.S.Virk, D.Azzi, B.P.Haynes and K.I.Alkadhimi

69

A Hybrid Evolutionary Approach to Best Basis Discrimination

A.R.Ferreira da Silva

78

Comparing GA and NN Classification Methods

O.Babka, L.S.Io, C.Lei and P.M.Wa

84

Part 3 Evolutionary Computing

91

Partially Randomised Crossover Operators

J.Kubalík and J.Lažanský

93

The Dynamic Setting of Genetic Algorithm Parameters

C.Bowerman and C.-F. Tsai

99

Job Shop Scheduling with Transfer Batches

J.Dvořák, M.Šeda and T. Vlášil

105

Symbolic and Numerical Regression: A Hybrid Technique for Polynomial Approximators

J.W.Davidson, D.Savic and G.A.Walters

111

Computational Optimisation of Cancer Chemotherapies Using Genetic Algorithms

A.Petrovski and J.McCall

117

| | |
|--|-----|
| A Visual Development Environment for Coevolving Agent Behaviour | 123 |
| <i>I.J.Griffiths, Q.H.Mehdi and N.E.Gough</i> | |
| An Overview of an Evolutionary Algorithm Pattern Language | 129 |
| <i>C.P.Wong and M.J.Pont</i> | |
| Improvement of Decoding Schemas of Genetic Programming for Function Identification | 135 |
| <i>L.Sláma and M.Balátě</i> | |
| Memory-Based Heuristic Search and Optimal Structural Design | 141 |
| <i>J.A.Bland</i> | |
| Co-evolutionary Agents for Telecommunication Network Restoration | 146 |
| <i>S.H.Shami and M.C.Sinclair</i> | |
| Mutation Genes in Dynamic Environments | 152 |
| <i>T.Watson and P.Messer</i> | |
| Genetic Operators for Test Pattern Generation in Programmable Logic Arrays | 158 |
| <i>A.Cruz and S.Mukherjee</i> | |
| Controlling Code Growth in Genetic Programming | 166 |
| <i>P.W.H.Smith</i> | |
| The Effect of Clustering and Local Search on Genetic Algorithms | 172 |
| <i>S.Areibi</i> | |
| Visualisation of Non-Ordinal Multi-Dimensional Landscapes | 178 |
| <i>M.Oates, D.Corne and R.Loader</i> | |
| Learning Rule Design by Genetic Programming for a Discrete Stochastic Learning Automata | 186 |
| <i>M.N.Howell</i> | |
| A Task-Driven Genetic Algorithm for Maximizing Task Reliability in Multi-Sensor Systems | 192 |
| <i>O.A.Basir</i> | |

| | |
|--|------------|
| Part 4 Fuzzy Systems | 199 |
| On Bags and Fuzzy Bags | 201 |
| <i>K.Chakrabarty</i> | |
| Fuzzy Decision Fusion for Automatic Scene Analysis in a Command and Control System | 213 |
| <i>W.Mees</i> | |
| Robustness Study of an On-line Application of a Self-Learning Fuzzy Logic Controller | 219 |
| <i>S.H.Gwanmeh, K.O.Jones and D.Williams</i> | |
| Efficient Tracking of Coloured Objects Using Fuzzy-Tuned Scanpaths | 225 |
| <i>M.J.Allen, I.J.Griffiths, I.M.Coulson, Q.H.Mehdi and N.E.Gough</i> | |
| Steelmaking Process Evaluation Using a Fuzzy Expert System | 231 |
| <i>L.Collantes, R.Roy and J.Madill</i> | |
| Fuzzy Decision Aid in Multiple Objective Linear Programming | 238 |
| <i>A.R.P. Borges and C.H.Antunes</i> | |
| Indirect Learning Fuzzy Controllers | 244 |
| <i>A.Lotfi and J.B.Hull</i> | |
| Fuzzy Logic Based Collision Avoidance Algorithm for a Mobile Robot | 250 |
| <i>C.Fayad and P.Webb</i> | |
| Collaborative Decision Making in Construction - Potential Application Area for Fuzzy Systems? | 258 |
| <i>H.M.Yang and C.J.Anumba</i> | |
