

FLIGHT THEORY AND AERODYNAMICS

A PRACTICAL GUIDE FOR OPERATIONAL SAFETY

Second Edition

Suranaree University of Technology

31051000617312

CHARLES E. DOLE
JAMES E. LEWIS

CONTENTS

Preface

v

1 Introduction

1

- Basic Quantities, 1
- Forces, 2
- Mass, 2
- Scalar and Vector Quantities, 3
- Moments, 5
- Equilibrium Conditions, 6
- Newton's Laws of Motion, 6
- Linear Motion, 7
- Rotational Motion, 8
- Work, 9
- Energy, 9
- Power, 10
- Friction, 10
- Symbols, 11
- Equations, 12
- Problems, 13

2 Atmosphere and Airspeed Measurement

17

- Properties of the Atmosphere, 17
- ICAO Standard Atmosphere, 19
- Continuity Equation, 20
- Bernoulli's Equation, 21
- Airspeed Measurement, 23
- Symbols, 25
- Equations, 27
- Problems, 27

3 Airfoils and Aerodynamic Forces

31

- Airfoils, 31
- Development of Forces on Airfoils, 33
- Aerodynamic Force, 35
- Aerodynamic Pitching Moments, 37
- Aerodynamic Center, 39

vii

Symbols, 40
 Problems, 40

4 Lift

43

Aerodynamic Force Equations, 43
 Lift Equation, 43
 Angle of Attack Indicator, 46
 Airfoil Lift Characteristics, 46
 Boundary Layer Theory, 48
 Reynolds Number, 50
 Adverse Pressure Gradient, 51
 Airflow Separation, 52
 Stall, 53
 High Coefficient of Lift Devices, 53
 Symbols, 57
 Equations, 57
 Problems, 58

5 Drag

61

Drag Equation, 61
 Lift/Drag Ratio, 61
 Induced Drag, 63
 Laminar Flow Airfoils, 69
 Ground Effect, 70
 Parasite Drag, 72
 Total Drag, 73
 Drag Reduction, 76
 Symbols, 77
 Equations, 78
 Problems, 78

6 Jet Aircraft Basic Performance

81

Thrust-Producing Aircraft, 81
 Principles of Propulsion, 83
 Thrust-Available Turbojet Aircraft, 84
 Specific Fuel Consumption, 85
 Fuel Flow, 87
 Thrust-Available–Thrust-Required Curves, 87
 Items of Aircraft Performance, 88
 Symbols, 98
 Equations, 99
 Problems, 100

| | | |
|-----------|---|------------|
| 7 | Jet Aircraft Applied Performance | 103 |
| | Variations in Thrust-Required Curves, 103 | |
| | Variations in Aircraft Performance, 108 | |
| | Equations, 112 | |
| | Problems, 112 | |
| 8 | Propeller Aircraft—Basic Performance | 115 |
| | Power-Required Curves, 115 | |
| | Principles of Propulsion, 116 | |
| | Power Available, 119 | |
| | Items of Aircraft Performance, 122 | |
| | Symbols, 128 | |
| | Equations, 128 | |
| | Problems, 128 | |
| 9 | Propeller Aircraft—Applied Performance | 131 |
| | Variations in the Power-Required Curve, 131 | |
| | Variations in Aircraft Performance, 134 | |
| | Equations, 138 | |
| | Problems, 138 | |
| 10 | Helicopter Flight Theory | 143 |
| | Momentum Theory of Lift, 143 | |
| | Airfoil Selection, 144 | |
| | Forces on Rotor System, 145 | |
| | Thrust Development, 147 | |
| | Hovering Flight, 148 | |
| | Ground Effect, 150 | |
| | Rotor Systems, 151 | |
| | Dissymmetry of Lift in Forward Flight, 153 | |
| | High Forward Speed Problems, 156 | |
| | Helicopter Control, 158 | |
| | Helicopter Power-Required Curves, 160 | |
| | Settling With Power, 161 | |
| | Autorotation, 162 | |
| | Problems, 164 | |
| 11 | Slow-Speed Flight | 167 |
| | Stall Patterns, 167 | |
| | Region of Reversed Command, 170 | |
| | Low-Level Wind Shear, 173 | |
| | Aircraft Performance in Low-Level Wind Shear, 176 | |
| | Effect of Ice and Frost, 179 | |

| | | |
|-----------|--|------------|
| | Wake Turbulence, 180 | |
| | Spins, 182 | |
| | Problems, 187 | |
| 12 | Takeoff Performance | 189 |
| | Linear Motion, 189 | |
| | Factors Affecting Takeoff Performance, 192 | |
| | Definitions That Are Important Relative to Takeoff Planning, 195 | |
| | Aborted Takeoffs, 196 | |
| | Dangers of Overrotation, 198 | |
| | Symbols, 198 | |
| | Equations, 199 | |
| | Problems, 199 | |
| 13 | Landing Performance | 203 |
| | Prelanding Performance, 203 | |
| | Landing Deceleration, Velocity, and Distance, 208 | |
| | Landing Equations, 211 | |
| | Hazards of Hydroplaning, 213 | |
| | Symbols, 216 | |
| | Equations, 216 | |
| | Problems, 216 | |
| 14 | Maneuvering Performance | 219 |
| | General Turning Performance, 219 | |
| | Equations, 232 | |
| | Problems, 234 | |
| 15 | Longitudinal Stability and Control | 237 |
| | Definitions, 237 | |
| | Oscillatory Motion, 238 | |
| | Airplane Reference Axes, 240 | |
| | Static Longitudinal Stability, 242 | |
| | Dynamic Longitudinal Stability, 251 | |
| | Pitching Tendencies in a Stall, 252 | |
| | Longitudinal Control, 255 | |
| | Symbols, 256 | |
| | Equations, 256 | |
| | Problems, 257 | |
| 16 | Directional and Lateral Stability and Control | 259 |
| | Directional Stability and Control, 259 | |
| | Static Directional Stability, 259 | |

| | |
|--|------------|
| Directional Control, 266 | |
| Lateral Stability and Control, 267 | |
| Static Lateral Stability, 268 | |
| Lateral Control, 272 | |
| Dynamic Directional and Lateral Coupled Effects, 272 | |
| Symbols, 275 | |
| Equations, 276 | |
| Problems, 276 | |
| 17 High-Speed Flight | 279 |
| The Speed of Sound, 279 | |
| High Subsonic Flight, 280 | |
| Design Features for High Subsonic Flight, 282 | |
| Transonic Flight, 286 | |
| Supersonic Flight, 289 | |
| Symbols, 299 | |
| Equations, 300 | |
| Problems, 300 | |
| Answers to Problems | 303 |
| References | 307 |
| Index | 309 |
