Learn to Manage a Project
from Start to Finish

TABLE OF CONTENTS

<i>Introduction</i>	<i>.xxi</i>
---------------------------	-------------

PART I • INTRODUCING MICROSOFT PROJECT 2000

1 Project 2000 Basics	3
What Is a Project?4
Understanding the Project Cycle5
Project Management and Software9
What's New in Project 200010
What's Next13
2 Understanding Projects	15
Analyzing Project Activities17
Identifying Tasks and Times23
Estimating Project Costs25
Developing the Project Schedule25
Determining Performance Standards28
Communicating Project Information29
Managing Project Security30
What's Next31
3 Understanding Project Management Tasks	33
Monitoring Project Progress35
Analyzing Project Variances36
Managing Project Schedules37
Managing Resources38
Managing Costs40
Managing Project Scope40
Project Reporting40
Creating Reports for the Project Team41
Creating Reports for Other Managers41
Creating Reports for Stakeholders41
What's Next42
4 Project 2000 Quickstart	43
Building a Project44
Defining the Project45
Planning Project Activities48
Entering Resource Information54
Estimating Project Costs57

Optimizing the Plan	59
Communicating the Project Plan	64
Tracking and Managing a Project	68
Setting Up Project Communication	69
Managing Project Scope	73
Managing the Project Schedule and Costs	74
Managing Project Resources	76
Closing the Project	79
What's Next	79

PART II • CREATING A PROJECT FROM START TO FINISH

5 Working in Project 2000	83
Exploring the Project 2000 Application Window	84
Opening More than One Project	85
Working with Personalized Menus and Toolbars	85
Changing Views	88
Getting Help in Project 2000	91
The Office Assistant	92
Contents and Index	93
Getting Started	97
What's This?	98
Office on the Web	98
Using Detect and Repair	98
Opening an Existing File	99
Using the File Open Dialog Box	99
Saving Project Files	104
Using the Save As Dialog Box	104
Using the Auto Save Option	105
Printing in Project	106
Using Print Preview	106
Changing Page Setup Options	107
Sending the File to the Printer	108
Closing Project Files	109
What's Next	109
6 Building a New Project	111
Setting Project Information	113
Establishing Start and Finish Dates	114
Setting the Current Date and the Status Date	115
Selecting a Project Calendar	116
Priority	116
Statistics	117
Defining the Project Calendar	117
Setting the Standard Calendar	118
Changing Working Times	120
Creating Additional Calendars	124
Printing Calendars	125

Setting Project Properties	126
Using the Summary Tab	126
Viewing the General, Statistics, and Contents Tabs	127
Customizing the Properties	129
Deleting a Property	130
Modifying a Property	130
What's Next	130
7 Entering Project Tasks	131
Planning Project Tasks	132
Types of Tasks	134
Entering Tasks in Gantt Chart View	134
Entering Tasks	136
Editing Tasks	141
Using the Outlining Features	144
Entering Milestones	148
Entering Recurring Tasks	148
Entering Tasks in Different Views	151
A Quick Look at Spelling	152
Correcting Spelling Errors	152
Checking Words in Other Languages	153
Automatic Fixes for Common Errors	155
What's Next	156
8 Scheduling and Linking Project Tasks	157
Creating a Project Schedule	158
Identifying Predecessor and Successor Tasks	158
Using Different Types of Relationships	159
Establishing Links	162
Linking Tasks by Using Toolbar or Menu Commands	162
Linking Tasks by Using Forms and Tables	163
Linking Tasks Using Drag-and-Drop	171
Modifying Task Relationships	171
Unlinking Tasks	172
Modifying Links with the Task Dependency Dialog Box	172
Using Forms and Tables to Modify Links	172
Using Autolink to Repair Broken Links	174
Creating Links in an Outlined Task List	175
Allowing for Task Delays and Overlaps	177
Entering Lags and Lead Time	178
Splitting Tasks	180
Changing the Duration of a Split Task	182
Removing a Split	182
Constraining Tasks	182
Understanding Constraint Types	183
Applying Constraints	183
Reviewing Constraints	185
Removing Constraints	186

Resolving Constraint Conflicts	186
Setting a Deadline	187
What's Next	188
9 Defining Project Resources and Costs	189
Understanding Resources	190
Estimating Resource Requirements	191
Entering Resource Information in Project	196
Using the Assign Resources Dialog Box	197
Using the Resource Sheet	198
Using the Resource Information Dialog Box	201
Adding Resources Using Resource Pools	218
Adding Resources Automatically	219
Entering Additional Cost Information	219
Entering Fixed Costs	220
Understanding Total Costs	220
Viewing and Printing Resources and Costs	221
What's Next	222
10 Assigning and Scheduling Resources and Costs	223
Working with Duration, Work, and Units	224
Adjusting Assignments	232
Changing Task Settings to Change the Way Project Recalculates	233
Assigning Resources	241
Assigning a Work Resource from the Assign Resources Dialog Box	242
Assigning Resources Using the Task Form	243
Assigning Resources Using the Workgroup Features	244
Assigning Material Resources to Tasks	245
Reviewing Assignments	246
Using the Resource Name Form	246
Using the Resource Form	246
Using the Resource Usage View	248
Contouring Assignments	250
Applying a Predesigned Contour	251
How Task Types and Contours Interact	258
Editing a Contour	261
What's Next	262
11 Preparing Your Project for Publication	263
Identifying Overallocations	264
Locating the Overallocated Segments	265
Viewing Tasks with Overallocations	272
Resource Leveling	273
Using Project's Leveling Feature	273
Leveling Resources On Your Own	279
Preparing for Project Sign-Off	282
Tools to Avoid Scope Creep	283
Capturing Baseline Data to Track Progress	284
What's Next	290

12 Tracking Project Progress	291
Updating Tasks with Actual Data	292
Understanding the Project Update Fields	292
Entering Task Update Data	295
Tracking Timephased Actual Work	300
Reviewing Variances from the Baseline	301
Viewing and Printing Summary Reports	302
Using Earned Value Analysis to Analyze Project Performance	304
Calculating Earned Value Variances	305
Calculating Earned Value Ratios	306
Calculating Cost Estimates	306
Analyzing Variances and Ratios	307
Analyzing the Cost Estimates	308
Applying Earned Value Analysis to Resources and Assignments	309
Keeping the Project on Track	310
What's Next	310

PART III • JUGGLING AND MANAGING PROJECTS

13 Assessing and Managing Risks	313
Assessing Risk	314
Viewing Tasks with Uncertain Duration	315
Viewing Tasks with External Dependencies	315
Viewing Tasks with Long Durations	317
Identifying and Managing Other Risks	319
Identifying Environmental Risks	321
Using PERT to Estimate Duration	323
Developing PERT Estimates	325
Using the PERT Views	328
Changing the PERT Weights	331
Viewing the Critical Path	331
What's Next	334
14 Sharing Resources and Tasks among Multiple Projects	335
Working with Multiple Projects at Once	336
Opening and Viewing Multiple Projects	336
Saving a Workspace	337
Arranging Open Projects	340
Understanding Master and Subprojects	341
Dividing a Project into Smaller Pieces	342
Creating a New Master Project from Open Projects	342
Inserting Projects into an Existing Project File	345
Working with Master and Subprojects	347
Linking Tasks That Cross Projects	355
Reviewing and Updating Project Links between Files	358
Deleting Links between Projects	361
Using Resources from Another Project or Resource Pool	362
Accessing a Resource Pool from Your Project	363

Working with a Resource Pool	364
Closing a Project with a Shared Resource Pool	364
Opening a Project with a Shared Resource Pool	365
Opening and Editing a Resource Pool	366
Creating a Master Project from a Resource Pool and Sharer Files	367
Removing a Shared Resource Pool	368
What's Next	368
15 Communicating Project Information	369
Understanding Project Communication	370
Communicating from Microsoft Project	371
Using Email to Communicate Project Information	371
Accessing Email Addresses	371
Sending and Receiving Workgroup Messages	375
Assigning Tasks to Workgroup Members	376
Sending Task Updates	382
Sending and Receiving Status Reports	383
Initiating Status Reports by Team Members	386
Updating Project Tasks in Outlook	387
Adding and Deleting Tasks	389
Resending All Messages	389
Setting Task Reminders	389
Sending a Schedule Note	389
Using the Workgroup Toolbar	391
Routing a Project File	392
Posting to a Public Folder	394
Customizing Workgroup Messages	395
Adding Fields to Workgroup Messages	395
Adjusting the Timesheet Grid	396
Setting Other Custom Options	396
What's Next	396
16 Team Project Management with Project Central 2000	397
Accessing Project Central	398
Navigating the Project Central Interface	401
Understanding Project Central Permissions	401
Making Project Data Available to Your Team	403
Updating a Project to the Web Server	403
Initiating Workgroup Messages	405
Using the Home Page Features	406
Sending and Receiving Messages	406
Viewing Messages	406
Responding to Messages	407
Using Rules to Automatically Handle Messages	409
Changing Your Project Central Password	414
Working with Tasks	414
Using the Timesheet	415
Using Views	425

Creating and Sending Status Reports	427
Submitting Status Reports	427
Completing a Status Report	430
Viewing Status Reports	431
Distributing Status Reports	432
Sending Updated Project 2000 Data to Project Central	433
Integrating Project Central with Outlook	433
Consolidating Outlook Data into Project Central	433
Adding Outlook Calendar Entries to Project Central	434
Working Offline	436
What's Next	436

PART IV • EVALUATING AND ANALYZING PROJECT DATA

17 Using Views to Evaluate Data	339
Calendar View	440
Choosing Dates to Display	441
Formatting the Calendar	442
Other Task Views	444
Gantt Chart View	444
Network Diagram View	449
Task Usage View	453
Tracking Gantt View	455
Resource Views	456
Resource Graph	457
Resource Sheet	458
Resource Usage	459
More Views	459
Examining Data with Tables	460
Task Tables	460
Resource Tables	461
Creating and Formatting Your Own Tables	462
Formatting Views	464
Creating and Saving Views	465
Using the Organizer with Views	467
Sorting, Filtering, and Grouping in Project 2000	468
Sorting a View	468
Applying a Filter	469
Grouping Resources	475
What's Next	477
18 Using Reports to Analyze Data	479
Printing a View	480
Setting Up the Printed Page	482
Using Reports	486
Overview Reports	487
Current Activities Reports	487
Cost Reports	489

Assignment Reports	490
Workload Reports	491
Other Reports	491
Customizing Reports	492
Changing the Appearance of a Report	492
Changing the Content of a Report	493
Using Graphic Objects in Views and Reports	495
Using the Drawing Tools	498
Using Hyperlinks	503
Creating a New Report	505
What's Next	506
19 Importing and Exporting Project Data	507
Import and Export Basics	508
Understanding File Formats	508
Understanding Predefined Data Maps	511
Using the Import Tools	514
Selecting the File with Importable Data	514
Selecting the Data Source	515
Creating and Modifying Data Maps	516
Importing Data from Databases	523
Importing Data from Specific Applications	527
Importing from Previous Versions of Project	527
Importing Microsoft Excel Workbooks	529
Importing Text Files	538
Importing Data from Databases	542
Exporting Data from Project	551
Using the Export Tools	551
Exporting to Specific Applications	556
Converting, Linking, and Embedding with Project	567
Understanding Converted Objects	568
Understanding Linking and Embedding Objects	568
Understanding Hyperlinks	569
Embedding in Project	570
Linking Data to a Project	573
Moving or Copying an Object within Project	574
Displaying Project 2000 Graphics Areas	576
Inserting Specific Objects in a Project File	576
Copying and Pasting Data and Objects from Project	590
What's Next	592
20 Closing a Project	593
To Close or Not to Close	594
Closing a Project	594
Conducting a Project Review	596
Creating Final Reports	599
Communicating Project Results	607
Preparing for the Next Project	608
What's Next	608

PART V • CUSTOMIZING AND AUTOMATING PROJECT 2000

21 Customizing Project 2000	611
Setting Project Options	.612
Option Setting Types	.612
General Options	.614
Edit Options	.616
Calendar Option	.617
Schedule Options	.618
Calculation Options	.620
Spelling Options	.620
Workgroup Options	.621
Save Options	.621
Customizing Toolbars and Menu Bars	.623
Changing Command Bar Options	.623
Customizing Command Bars	.625
Creating and Using Custom Project Templates	.626
Opening Templates	.627
Using the Sample Templates	.627
Creating a New Template	.628
Modifying Template Files	.629
Making Changes to the Global Template	.629
Working with the Organizer	.629
Copying Items from One Project to Another	.631
Renaming Items with the Organizer	.633
Deleting Items	.633
What's Next	.634
22 Creating Project 2000 Macros	635
Creating a Macro	.636
Getting Ready to Record a Macro	.637
Storing a Macro	.638
Absolute and Relative References	.639
Recording Your Actions	.640
Running Macros from the Macros Dialog Box	.642
Deleting Macros	.644
Opening a Project File That Contains Macros	.644
Security and Digital Signatures	.645
Adding Macros to Command Bars	.647
What's Next	.651
23 Customizing Fields and Forms	653
Introducing Custom Fields and Custom Forms	.654
Custom Task Fields	.654
Custom Resource Fields	.656
Custom Assignment Fields	.658

Where to Use Custom Fields659
Creating Custom Fields660
Deleting Custom Fields666
Creating Custom Forms in Project 2000667
Why Create Custom Forms?668
Opening a Custom Form669
Creating a Custom Form670
Working in the Custom Forms Editor672
Using the Organizer to Manage Custom Forms678
What's Next679
24 Automating Project 2000 with VBA	681
What Is Visual Basic?682
Introducing the Integrated Development Environment683
Understanding Objects and Events684
Understanding Controls and Properties686
Understanding Visual Basic Code688
Making Use of Visual Basic689
Introducing the Visual Basic IDE690
Creating a Procedure in the VBA IDE693
Understanding Parts and Functions of VBA Code698
Keywords698
Collections698
Methods699
Constants699
Variables700
VBA Operators706
Structures Used in VB Code707
Sequential Structures707
Using Conditional Structures708
Looping Structures709
Using Message Boxes and Input Boxes711
Using Input Boxes716
What's Next717
25 Advanced Programming in Project 2000	719
Understanding the Project Object Model720
The Application Object723
The Project Object725
Creating User Forms730
Creating Project Applications742
Managing Project Applications743
Automating Other Applications from Project744
Creating the Charged Cost Budget Application746
Creating the Linked Expense Application750
What's Next763

26	Installing and Administering Microsoft Project Central 2000	765
	Understanding Microsoft Project Central	766
	Web Server Requirements	767
	Workstation Client Requirements	769
	Preparing for Server Installation	769
	Using MSSQL7	769
	Using Oracle	770
	Using MSDE	770
	Installing Microsoft Project Central Server	770
	Starting Microsoft Project Central Server Setup	771
	Installing with No Existing Database	772
	Installing with an Existing Database	772
	Installing Project Central Clients	773
	Installing Internet Explorer 5	774
	Installing Windows Browser	774
	Administering and Customizing Microsoft Project Central Server	775
	Understanding Server Mode	776
	Normal Mode	776
	Single User Mode	776
	Logging On to Microsoft Project Central	777
	Using the Administrative Functions	778
	Creating Users Accounts	778
	Deleting Items from the Database	782
	Customizing Project Central	782
	Nonworking Time Categories	783
	Customizing Gantt Bars and Timescales	784
	Changing the Task Delegation Setting	785
	Setting Security and Account Creation Permissions	786
	Setting Authentication Options	786
	Customizing the Project Central Home Page	787
	Managing Views	789
	Data Sources for Views	789
	Specify Views	790
	Specify Categories	791
	Setting User Permissions for Views	793
	Index	794
