CONTENTS

Introduction 1

The KDE Project 2

Who Is the KDE Project? 3

An International Product 3

KDE Awards 3

KDE Highlights 4

Helping with KDE 4

How This Book Is Organized 5

Special Features of this Book 10

What Do You Think? 11

I Installing KDE

1 Installing KDE Using Packages 15

KDE as a Software

Distribution 16

The KDE Base

Distribution 16

A KDE Distribution 17

Packaging Formats 18

Source Packages 19

Binary Packages 19

Understanding RPM

Packaging 19

Understanding DEB

Packages 21

Understanding LSB 21

KDE May Be Installed by

Default 21

Checking System Prerequisites 22

Is KDE Ported to Your Operating
System? 22

Is KDE Already Installed? 23

Is the X Window System
Operational? 23

Are Qt Libraries Installed? 23

Hardware Requirements 24

System Memory and Swap Space 24

Hard Disk Space 25

Monitor Size 26

Determining Which Packages
You Need 26

Downloading KDE Packages 26

Installing the KDE Packages 30

Checking RPM Packages 30

Installing RPM Packages 33

Relocatable RPM Packages 34

Secrets of Mastering KDE:

Contributing RPMs for KDE
Applications 35

2 Installing KDE from Source Code 37

Why Install from Source Code? 38

Getting Clean Code 38

Gaining an Improved Understanding
of the System 38

Preparing for Software
Development 39

No Suitable Binary Package 39

System Prerequisites 39

Downloading Source Code 40

Downloading from a Linux
Distribution FTP Site 40

Downloading from a KDE
FTP Mirror 41

Downloading Source Code
for the KDE Base Distribution 50

Installing the Source Code 50

Making the Software 51

Installing the Compiled System 55

Installing the Source Code on Non-Linux Systems 55

Troubleshooting 56

3 Exploring the KDE Filesystem 57

Global Options and Data: The /opt Directory 58

Systemwide and Per-User Organization of KDE 59

Looking More Closely at /opt/kde and ~/.kde 60

The /opt/kde Tree 60

The ~/.kde Tree 65

.kderc: Additional User-Specific Settings 68

Placing KDE in a Non-Default Location 71

Defining Some Reasons to Move KDE 72

Distribution-Specific Issues 72

Secrets of Mastering KDE: Creating a Per-User Template 73

4 Configuring X to Use KDE 75

Understanding the X Window System 76

Configuring and Starting X 77

The Configuration File and X Symlink 78

The xinit Program and the .xinitrc Script 79

Testing and Tuning the X Server 81

The startx Program 83

X Resources 84

X Keyboard Maps 85

Testing the X Environment 87

Updating your startx and .xinitrc Files 88

KDE-Provided Startup Scripts 90

Variations Based on Your Linux Distribution 91

Swapping Between KWM and Other Window Managers 92

A Sample Script for Blackbox 92

Per-User Configuration Versus Systemwide

Configuration of KDE 93

Default Configurations 94

Application Link Files 94

Application Resource Files 97

MIME Links 97

User Preferences 97

Using xdm in Runlevel 5 100

Configuring xdm 101

Changing to kdm 106

Configuring the kdm

Desktop 108

Setting the Default Runlevel for kdm 109

Troubleshooting 109

II Using the KDE Desktop

5 Starting to Use KDE 113

Logging In Using KDM 114

Launching KDE Without KDM 115

Automating KDE Startup 115

Events when KDE Begins 115

Understanding KDE

Components 116

Using Multiple Desktops 117

Configuring the Desktop Items 118

Configuring Multiple Desktops 122

Accessing KDE Help 123

Using the Help Window 125

Accessing Help for Applications 125

Launching Applications 125

Using Program Windows in
KDE 126

Configuring Window
Options 128

Using Keyboard Shortcuts 130

Secrets of Mastering KDE: Using
the Window Management
Configuration File 132

6 Exploring More KDE Features 135

Working with Applications 136
Switching Applications Using the
Taskbar 136
Moving Applications Between
Desktops 139

Using the File Manager 140
Setting Up a Shortcut to Your Home
Directory 141
Using Different Views
of Files 142
Buttons and Shortcuts 145
Starting Applications from the File
Window 147
Explaining the HTML
View 148
Using the Tree View 150

Working with Files 150
Copying Files 150
Moving Files 151
Linking Files 152

Using Other Drag-and-Drop
Operations 152

Using Bookmarks, History, and Cache
Settings 153
Per-User Bookmarks and
History 153
Using Cache Settings 154
Updating Your Bookmarks 155

Troubleshooting 156

7 Configuring Basic Desktop Options 157

Configuring the Panel
Options 158

Colors and Screensavers 162
Configuring Screensavers 162
Finding Additional Screensaver
Modules 163
Color Schemes 164

Setting Up Windows and the Default
Desktop 165
Choosing OS Models (Mac, BE,
Windows) 165
Adding Items to Your Desktop 167

Choosing Fonts 169
How X Fonts Work 170
Finding New X Fonts 171
Accessing X Fonts in KDE 172
Some Guidelines on Selecting
Fonts 173

Configuring System Sounds 174
Checking Linux Sound Configuration
175
Locating Additional Sounds 175

Secrets of Mastering KDE: Working with
Configuration Files 176

8 Configuring International Settings 177

Choosing Language Settings 178
Language Options and Completion
Level 178
Making Your Language
Settings Apply 179

Understanding How Language Settings
Function 180
Exploring a Configuration File 182
The i18n Functions in Programs 184

Adding to Language Capabilities 184

Selecting International Keyboard
Settings with KiKbd 187

Using Alternate Keyboards 192

Available Keyboards 192

Selecting a Keyboard 192

Hot List Switching 192

Secrets of Mastering KDE: Participating
in KDE Translations 193

9 Configuring the Graphical Login Screen 195

Introducing kdm and Runlevel 5 196

Switching to Runlevel 5 196

Switching to Virtual Consoles 197

Configuring kdm 198

Configuring Background

Colors and Wallpaper 199

Fonts and Greetings 201

Configuring Per-User

Options 205

Shutting Down the System from
kdm 207

Security Issues 209

Root Versus Other Users Shutting
Down 209

Using kdm Sessions 210

Troubleshooting 210

10 Making Other Applications Work with KDE 211

Concept of KDE Link Files 212

Types of KDE Link Files 213

Device Links 213

MIME Links 214

Application Links 215

URL Links 215

Creating a KDE Link
for a Device 215

Creating a MIME Type
KDE Link 218

Creating a KDE Link for a Graphical
Application 222

Desktop Application Links 226

Alternative Uses for

Application Links 228

Creating a KDE Link for a
Character-Based Application 229

Using Panel Docking Options 230

Creating URL Links 231

Troubleshooting 232

11 Setting Up Better File Access 233

Understanding File Typing
in kfm 234

The Magic File 234

Working with Additional

MIME Types 235

Configuring the File Manager
Appearance 235

Permanent Preferences for kfm 242

Using the Startup Folder 242

Using Links in the Startup Folder
243

Adding Items to the Desktop 243

When to Use Desktop Icons 243

Using Links on the Desktop 244

Relationship of Desktop Icons to
Actual Files 246

Troubleshooting 246

12 Configuring Device Access Using KDE Link Files 247

Concepts of Filesystem Access in Linux
248

The Root Filesystem and Mount
Points 248

The fstab File 249

The Automounter Daemon and KDE
Equivalents 253

- Creating a Device Link 253
 - Setting the Mount Point 254
 - Setting the Filesystem Type 255
 - Entering the Device Name 255
 - Selecting Device Icons 256
 - Reviewing the Link File 256
 - Testing the Device Access 257

Using the KDE Configuration Wizard 258

Troubleshooting 259

13 Configuring the KDE Menus 261

Understanding System and Personal Menus 262

The \$KDEDIR/share/app1nk Directory 265

The ~/.kde/share/app1nk Directory 266

Copying Files to Menu Directories 266

Using the Menu Editor 267

Starting the Editor as Root 267

Starting the Editor as a Regular User 268

Configuring Menu Items 268

Editing Menu Item Properties 270

Customizing Per-User Menus as a System Administrator 272

Secrets of Mastering KDE: Creating Personal Menus for Users 273

14 Using KDE Themes 275

Defining a KDE Theme 276

Describing the Contents of a KDE Theme 276

Locating and Downloading Themes 277

Using the KDE Theme Manager 279

Creating a New Theme 282

Creating Theme Graphics 282

Assembling a Theme Package 284

Troubleshooting 288

III System Administration Using KDE

15 KDE System Administration Tools 291

Understanding Linux System Administration 292

Locating Files on Your System 294

COAS Administration 295

LinuxConf Administration 296

Configuring Your Keyboard and Mouse Settings 297

Starting KDE Utilities from a Command Line 299

Troubleshooting 301

16 Viewing System Status in the Control Center 303

Tracking Processor and Memory Usage 304

Viewing Hardware Information 306

Viewing Samba Status 314

Checking Other Status Information 315

Troubleshooting 316

17 Managing Users and Groups with KUser 317

Understanding Users and Groups on UNIX and Linux Systems 318

The /etc/skel Directory 321

Using Groups 322

Using KUser to Manage User and Group Accounts 324

Adding and Editing User Accounts 325

Setting User Password Options 327

- Setting a User's Groups 328
- Saving User Data 328
- Adding Groups 329
- Setting KUser Preferences 330

Troubleshooting 330

18 Managing Printing and Packages 333

Understanding Printing on UNIX and Linux Systems 334

Printing from Applications 336

Using the KDE Print Management Tools 337

Configuring Klpq 339

Setting Up Hewlett-Packard Printers 340

Understanding Software Packages 341

Using Kpackage to Manage Software Packages 342

Viewing Package Information 343

Removing Packages 346

Installing Additional Packages 347

Setting Other Kpackage Options 350

Troubleshooting 351

19 Managing Processes and Power 353

Understanding Processes 354

Reviewing a Few Command-Line Tools 354

The Proc Filesystem Data 359

Using the Ktop Utility 362

Using the Kpm Utility 365

Monitoring Memory 368

Using Other KDE Monitoring Utilities 369

Troubleshooting 370

20 Managing System Startup 371

Understanding System Initialization 372

Reviewing Your Service Scripts 373

Using the ksysv Script Configuration Tool 374

Checking Other System Initialization Scripts 376

Using Kcrontab for Scheduling Tasks 377

Secrets of Mastering KDE: Using the at Command 381

21 Managing Filesystems 383

Reviewing KDE Filesystem Tools 384

Using Kfstab for Filesystem Mounting 384

Using KDiskFree to Manage Disk Space 387

Using Kfsstatus to Monitor Device Information 389

Using Kwin to Mount Windows Filesystems Using Samba 390

Using KDisk to Manage Filesystem Information 391

Using KleanDisk for Old File Maintenance 392

Secrets of Mastering KDE: Working with Filesystems 394

IV Network Administration Using KDE

22 Setting Up Client Networking 397

Introducing Client Networking Tools 398

Creating a PPP Account 398

- Establishing a PPP Connection with KPPP 399
 - Creating a KPPP Account 400
 - Setting Up KPPP Options 405
- Using Samba Client Tools in KDE 410
 - Configuring the Samba Suite 410
 - Using Other Samba Utilities 412
- Using the KNU Network Utilities Package 413
 - Using Traceroute and Host Resolution Features in KNU 415
 - Using the Finger Tab in KNU 418
- Using KDE's Finger, Talk, and IRC Clients 419
 - Using IRC Chat Within KDE 420
- Using KLDAP for LDAP Tree Browsing 424
- Secrets of Mastering KDE: Using Other Client Tools 425
- 23 Setting Up a Samba Server in KDE 427**
 - Understanding Samba 428
 - The SMBD Daemon 428
 - The NMBD Daemon 429
 - The SMBCLIENT Utility 430
 - The TESTPRNS Utility 430
 - The SMBSTATUS Utility 431
 - The NMBLOOKUP Utility 431
 - The Make_SMBCODEPAGE Utility 432
 - The SMBPASSWD Utility 432
 - The Samba Configuration Files 434
 - Using Ksamba For Samba Configuration 443
 - Setting Global Configuration Information 444
 - Setting Share Configuration Options 446
 - Using kNetmon for Samba Maintenance 449
 - Secrets of Mastering KDE: Rotating Samba Logs 451
- 24 Accessing the Internet from KDE 453**
 - Emailing Viewing Utilities (Kmail) 454
 - Reading Newsgroup Postings 459
 - Using the kfm Browser 462
 - Advantages of kfm 464
 - Disadvantages of kfm 464
 - Troubleshooting 465
- 25 Managing Network Connections 467**
 - Understanding Ethernet Networking 468
 - Star and Bus Topologies 469
 - Reviewing Linux Networking Services 471
 - Testing Network Connections 472
 - Using the KDE Network Monitoring Tools 474
 - Monitoring Network Load 475
 - Making Shell Connections with Ktelnet 476
 - Using Ksniffer to Check Network Packet Information 476
 - Using Kcmbind to Set Up a DNS Server 477
 - Secrets of Mastering KDE: Configuring Networking in Linux 479
- V Working with Other KDE Applications**
- 26 Using KDE Accessories 483**
 - Using the KDE Calculator 484
 - Performing Calculations with kCalc 485

Configuring kCalc 487

Using the Knotes Program 489

Starting and Exiting Knotes 491

Using the Knotes Pop-up Menus 491

Configuring Knotes 494

Using the Personal Time Tracker 496

Troubleshooting 498

27 KDE Graphics Utilities 499

Viewing Graphics Files with Image Viewer 500

Creating Graphics Files with Kpaint 505

Working with Bitmap Images 505

Using Kpaint Drawing Tools 509

Creating Illustrations in KDE 511

Capturing Screens with KSnapshot 511

Using Other KDE Graphics Tools 513

Using Kiconedit 513

Using the Fractal Tool 515

Troubleshooting 517

28 Using the KDE Text Editors 519

Using Kedit 520

Working with Kedit 522

Configuring Kedit 525

Using Kwrite 526

Using Bookmarks in Kwrite 527

Using Kwrite Options 528

Troubleshooting 535

29 Using KDE Multimedia Tools 537

Enabling Sound in Linux 538

The KDE CD Player 540

Configuring the CD Player 541

Using the CD Player on the Panel 543

Using the CD Database Features 544

Using the aKtion! Video Clip Player 547

Using the Right-Click Options 550

Setting aKtion! Options 552

Using Kmpg to Play Audio Clips 556

Configuring Kmpg 558

Other KDE Multimedia Support 561

Troubleshooting 561

30 Playing KDE Games 563

Comparing KDE Games and Other Games 564

Strategy Games on KDE 564

Abalone 564

KBlackBox 566

Konquest 567

Mahjongg 569

Sokoban 570

Minesweeper 572

Arcade Games on KDE 573

Asteroids 573

Pac-Man 574

KSirtet 575

Snake Race 576

Card Games on KDE 577

Other Diversions 578

Troubleshooting 579

31 Installing Additional KDE Applications 581

Finding KDE Applications 582

Installing Source Code Distributions 583

Verifying Your Tools 583

Downloading and Installing a Source
Code Distribution 584

Installing RPM Distributions with RPM
586

Installing Packages with kpackage 586

Installing Current Development Trees
589

Snapshots 589

CVS 589

Installing KDE Snapshots 590

Troubleshooting 592

32 Using KOrganizer 595

Introducing KOffice and KOrganizer
596

Launching KOrganizer 596

Understanding KOrganizer Views
597

Using To-Do Lists in KOrganizer 599
Creating and Editing To-Do list Items
600

Purging Your To-Do List 603

Appointments and Events 604

Categorizing Appointments 606

Extracting Appointment Information
607

Simple Events 608

Recurring Events 608

Exceptions to Recurring

Events/Appointments 610

Searching for Appointments 612

Deleting Appointments 613

Editing Appointments 613

Setting KOrganizer Options 614

Personal Settings 614

Time and Date Options 614

Font Configuration 615

Color Configuration 616

View Configuration 616

Print Configuration 616

Secrets of Mastering KDE:

Tying Your PalmPilot to

KOrganizer 617

33 Using Other KOffice Applications 619

Using KOffice 620

Downloading and Installing KOffice 621

Using the KWord Word Processor 623

Basic Operations 623

Using Kword Tables and Charts 625

Checking Spelling in KWord 626

Setting Up Custom Kword Formatting
Options 627

Printing Documents 628

Using Other Kword Features 628

Using the Kspread Spreadsheet 629

Entering Numbers and Navigating
630

Using Basic Formulas in Kspread 631

Understanding the KOffice Function
Library 632

Using Ranges and Names 633

Using Advanced Kspread Features
634

Using Other KOffice Applications 635

Working with the Drawing Program
635

Managing Vector Drawings 638

Using Special Drawing Tools 639

Interfacing with Databases Using Katabase
641

Creating Presentations Using Kpresenter
642

Using KChart 644

Using Kimage 644

Troubleshooting 645

VI Developing KDE Applications

34 Starting to Develop for KDE 649

Introduction 650

Member Interaction 650

Organization 652

Key Participants 653

International Nature of the Project
653

Availability 657

Terms of Use and Distribution 657

Getting KDE 657

Current Projects 659
