

Implementing SAP™ R/3:

THE GUIDE FOR BUSINESS AND
TECHNOLOGY MANAGERS

Master the Concepts

The role of ERP systems, information as a resource, the SAP solution, and faster less expensive implementations with the ASAP methodology.

Build the Blueprint

This book enables business and technical managers to build a blueprint for successfully implementing SAP in their organizations.

Sriharree University of Technology

Contents

Introduction 1

PART I Setting the Stage 5

1 The Millennium Enterprise 7

SAP the Company and its Product R/3	8
The Concept of Enterprise Resources Planning Systems.....	9
What Is ERP?	13
ERP Transforms an Enterprise into an Information-driven Enterprise	15
ERP Perceives an Enterprise as a Global Enterprise	16
ERP Reflects and Mimics the Integrated Nature of an Enterprise	16
ERP Fundamentally Models a Process-Oriented Enterprise.....	17
ERP Enables the Real-Time Enterprise	17
ERP Elevates IT Strategy as a Part of the Business Strategy	18
ERP Advance on the Earlier Approaches to Manufacturing Performance Improvement	19
ERP Represent the Departmental Store Model of Implementing Computerized Systems	20
ERP Is a Mass-User Oriented Application Environment	20
Management by Collaboration (MBC).....	20
The Information-Driven Enterprise.....	23
The Process-Oriented Enterprise.....	23
The Value-Add Driven Enterprise	24
Enterprise Change Management	25
The Learning Organization	25
The Virtual Organization.....	26
Why Use ERP?	27
Knowledge as the New Capital.....	28
Information as the New Resource	29
ERPs as Keepers of Organizational Knowledge Assets	30
The Collaborative Enterprise, or Competing by Organizational Design.....	31
Summary.....	32

2 ERP Evaluation 33

The Anatomy of an ERP System	34
Application Repository System.....	34
Graphical User Interface (GUI) Management System	35
Menu Management System.....	35

Help Management System.....	35
Database Management System	35
Fourth-Generation Language Development Environment	35
Query Management System	35
Report Management System	36
Application Administration and Management System	36
Software Distribution Management System	36
Configuration Management System	36
Change Management System	36
Version Management System	37
Security and Authorization Management System.....	37
Audit Management System	37
Disaster Recovery Management System.....	37
Archival Management System.....	37
Communications Management System.....	37
Application Programming Interface (API) System.....	37
Online Documentation System	38
Print Documentation System.....	38
Online Tutorial, Training, and Demonstration Management System.....	38
Office Automation System	38
Groupware and Workflow System	38
Data Warehouse and Data Analysis System	39
Implementation Project Management System.....	39
ERP Acquisition Decision Process.....	39
General Considerations of ERP Evaluation	39
Checklists for ERP Evaluation	40
Checklists for ERP Functional Requirements.....	59
Significant Issues to be Considered While Evaluating ERP	63
ERP Product Functionality and Features	63
Vendor Credibility	64
ERP Architecture and Technology	65
ERP Implementation and Use	67
Investments and Budgets.....	68
The ERP Infrastructure	69
The ERP Implementation Time.....	69
Summary.....	70

3 ERP Selection 71

SAP for the Small and Medium Enterprises (SME)	72
The ERP Selection Process.....	72
The Selection Team	74
Functional Team	74

Technical Team	74
Technology Team	74
Commercial Team	75
ERP Core Selection Methodology	75
Process Selection	75
Enterprise Process Mapping	75
Script Tests	75
Stress Test	76
ERP Selection Report	76
ERP Systems Comparative Chart	77
Script and Stress Test Reports	80
Recommendations Report	80
Summary	81

4 The SAP Solution 83

SAP the Company	84
History of SAP	85
The Significance of SAP R/3	88
Client/Server Principle	89
Comprehensive Functionality	89
Customizability	91
World-class Practices	92
Application Integration and Real-Time Operations	92
SAP Architecture	93
Graphical User Interface (GUIs)	94
R/3 Repository	95
Comprehensive Application Development Environment	95
Open Architecture	95
R/3 System Controls	97
SAP Services	98
Partnering for Growth	99
Other Significant Aspects of SAP R/3	100
SAP Document	100
Recording by Example (RBE)	100
Variants	101
Drill-down Reporting	101
Recent SAP Strategic Initiatives	101
TeamSAP	101
Accelerated SAP (ASAP) Implementation Methodology	102
SAP Ready-to-Run R/3 (RRR)	102
EnjoySAP	102
MySAP.com	102
Summary	103

5 The SAP Implementation Project Cycle 105

Mission and Objectives of the SAP Project	106
Examples of Cited Reasons for Implementing SAP	107
Project Initiation and Planning	107
Critical Success Factors	108
Direct Involvement of the Top Management.....	108
Clear Project Scope	108
Covering as Many Functions as Possible Within the Scope of the SAP Implementation.....	108
Standardizing Business Process	109
Proper Visibility and Communication on the SAP Project at All Stages	109
Allocation of Appropriate Budget and Resources.....	109
Full-Time Deputation of Key Managers from All Departments....	109
Completing Infrastructural Activities in Time and with High Availability	110
Instituting a Company-Wide Change Management Plan	110
Training of SAP Team Members.....	110
Training of User Members	111
Scheduling and Managing Interface of SAP with Other Systems	111
Transition Plan for Cut-Over to SAP	111
Implementation Strategy.....	112
Big Bang Implementation of SAP Modules	112
Base Modules Implemented First	112
Implementation of SAP Standard Functionality	112
Pilot Site Implementation Followed by Rollouts at Other Sites.....	113
Utilize External Consultants to Primarily Train In-house Functional and Technical Consultants	113
Centralized or Decentralized SAP Configuration	114
User-Driven Functionality	114
SAP Implementation Project Bill of Resources (BOR)	114
Money	115
Materials	115
Manpower	115
Time Period	116
Information	116
Implementation Environment	116
R/3 Reference Model.....	116
R/3 Business Navigator	116
R/3 Analyzer	120

Implementation Guide (IMG)	120
International Demo and Education System (IDES)	121
SAP Implementation Methodologies	121
SAP Procedure Model	122
Accelerated SAP	124
Project Management	124
Project Organization	124
Project Control.....	125
Project Monitoring.....	126
Project Reviews	126
SAP Implementation.....	126
Pre-Implementation	126
Implementation	127
Post-Implementation	128
SAP Support	128
SAP Deployment	128
Why SAP Projects Might Sometimes Be Less than Successful	129
Summary.....	130

6 SAP and Enterprise Reengineering 131

The Background of Business Process Reengineering (BPR).....	132
Value-Added View of Business Processes	133
BPR and AcceleratedSAP (ASAP).....	135
An Enterprise BPR Methodology.....	135
Strategic Planning for Enterprise BPR	137
Identifying the Business Processes in the Company.....	138
Selecting Business Processes for BPR	138
Creating Process Maps	139
Analyzing Processes for Breakthrough Improvements.....	141
Innovative Breakthrough Improvement in Processes	142
Implementing Reengineered Processes	143
Measuring the Performance of Reengineered Processes	143
Changeability of SAP-driven Organizations	144
Real-Time SAP Operations Make Processes Transparent	144
Integrated SAP Operations Eliminate Handoffs	144
SAP and Change Management.....	145
Change Champions—Core Team	145
Change Facilitators—Super-Users	145
Change Agents—End Users	146
Summary.....	146

7 Basis for SAP Administration 149

Operating System Interface	150
Transactions in SAP	150
SAP Logical Units of Work (LUW)	151
The Dispatcher and Work Processes.....	151
Dialog Process	153
Batch Process.....	153
Update Process	153
Enqueue Process	154
Spool Process.....	155
Other Services	155
Computer Center Management System (CCMS).....	155
Control Panel	155
The SAP Instance	156
System Monitoring	157
Workbench Organizer and Transport System.....	158
Other Administration Utilities	160
R/3 System Logs	160
System Trace Utilities	161
ABAP/4 Short Dumps	162
Database Interface.....	162
Communication Interface	162
Presentation Interface	163
SAPGUI.....	163
SAP Session Manager	163
Summary.....	164

8 ABAP for Custom Development 165

ABAP Genesis	166
Object Orientation.....	167
The Object-Oriented Paradigm	167
Inheritance and Encapsulation.....	168
Advantages of Object Orientation.....	169
Object Orientation and SAP	169
ABAP/4 Development Workbench.....	170
ABAP/4 Dictionary	171
Data Browser	174
Object Browser	174
Program Editor	174
Screen Painter	176
Menu Painter	177
Function Library	180

Testing and Performance Analysis	181
Workbench Organizer	182
Programming in ABAP/4	182
Data Types and Operations	183
Data Table Processing	183
SAP Transactions.....	183
Subroutines	184
Functions	184
Reporting.....	184
Logical Databases	184
Selection Screens.....	185
Interactive Reporting	185
Dialog Programming.....	185
Dynpros	186
Flow Logic.....	187
ABAP/4 Query	187
SAPScripts	187
Batch Data Communication and Interfaces	187
Future of ABAP/4 as a General-Purpose Programming Language	188

9 SAP R/3 Application Modules 189

Finance and Controlling (FI-CO)	190
Core Business Processes	191
Initial Configuration and Master Data	191
Special Features.....	192
Interface to Other Functions	194
Sales and Distribution (SD)	194
Core Business Processes	195
Initial Configuration and Master Data	195
Special Features.....	196
Interface to Other Functions	198
Materials Management (MM).....	198
Core Business Processes	198
Initial Configuration and Master Data	199
Special Features.....	200
Interface to Other Functions	202
Production Planning (PP)	202
Core Business Processes	205
Initial Configuration and Master Data	205
Special Features.....	206
Interface to Other Functions	208
Quality Management (QM)	208
Core Business Processes	209
Figure 9.6.....	209

Initial Configuration and Master Data	209
Special Features.....	210
Interface to Other Functions	211
Plant Maintenance (PM).....	211
Core Business Processes	211
Initial Configuration and Master Data	212
Special Features.....	212
Interface to Other Functions	213
Human Resources (HR)	213
Core Business Processes	214
Initial Configuration and Master Data	215
Special Features.....	215
Interface to Other Functions	216
Industry-Specific (IS) Solutions	216
SAP Solution Maps.....	218
Summary.....	224

PART III The Pre-Implementation Stage 225

10 Initiating the SAP Project 227

SAP Executive Sponsor	228
SAP Project Executive Committee.....	228
SAP Project Steering Committee	229
Roles of the Executive and Steering Committee Members	229
Mission and Objectives of the SAP Project	229
Deciding the Scope of the SAP Project	230
Starting the SAP Project.....	230
SAP Project Management Structure.....	230
Chief Project Officer (CPO)	230
Site Project Managers	231
Module Leaders.....	232
Resource Manager.....	232
Training Manager	233
Project Management Policies and Guidelines	233
Project Strategy	233
Project Planning and Monitoring	233
Project Resources Requirements.....	234
Project Training Requirements	234
Risk Management in a SAP Project	235
Selecting the Most Critical Processes	236
Implementing Best-of-Business Processes	236
Centralized Base Reference Configuration	237
Accelerated SAP (ASAP) Methodology.....	238

Change Management in a SAP Project	239
Roles of the SAP Project Team Members	240
SAP Project Team	240
Functional Consultants Team	240
SAP Technical Team	241
SAP Administration Team	241
Summary	242

11 Installing and Administering SAP 243

Preparing the SAP Infrastructure Plan	244
Installing the Hardware and Operating Systems	246
Installing LAN and WAN Solutions	246
SAP Installation	246
SAP System Landscape Planning and Management	247
Two-system Landscape	247
Three-system Landscape	248
Client Administration	248
SAP System Administration	248
Job Administration	249
User Administration	251
User Master Records	251
R/3 Super-users	252
Activity Groups	253
Authorizations for Users	253
Administering Authorizations	255
Profile Generator	256
Print Administration	257
Database Administration	259
Summary	261

PART IV The Implementation Stage 263

12 AcceleratedSAP (ASAP) 265

Why Are SAP Implementations So Complex?	266
Configuration through the Implementation Guide (IMG)	267
Computer-Aided Software Implementation (CASI)	268
SAP as a Populated CASE Environment	268
SAP Implementations and Expert Systems	269
What Is ASAP?	270
ASAP Roadmap	272
ASAP Toolkit	273
ASAP Services, Support, and Training	274

Advantages of ASAP	274
ASAP, BPR, and Change Management	274
ASAP for Application Consultants	275
Preconfigured Industry Systems	275
Implementation Guide (IMG).....	277
Features of Project IMG	278
Using Project IMG for Customizing SAP.....	278
Summary	285

13 Project Preparation 287

Project Planning	288
Prepare Project Charter	288
Define Implementation Strategy	290
Define Project Organization	290
Prepare Project Plan	291
Prepare Training Plan	292
Project Standards and Procedures.....	293
Define Project Management Standards and Procedures	293
Define Implementation Project Standards and Procedures.....	295
Define System Landscape Strategy	297
Project Kick-Off	300
Infrastructure Requirements Planning	300
Define Infrastructure Requirements	300
Benchmark Hardware	300
Procure Initial Hardware	300
Order Remote Connection.....	301
Quality Check Project Preparation Phase.....	301
Signoff Project Preparation Phase	301

14 Business Blueprint 303

Project Management of the Business	
Blueprint Phase	305
Review Project Preparation	305
Conduct Project Team Status Meetings	305
Conduct Steering Committee Meetings	305
Preparing for the Business Blueprint Phase	306
Organizational Change Management	306
Create Business Impact Map.....	306
Complete the Baseline Risk Assessment.....	307
Develop a Sponsorship Strategy	308
Establish the Communications Framework.....	309
Establish the Skills Development Process	309
Implement the Know-how Transfer Process	310
Project Team Training.....	311

Establish Development System Environment.....	311
Create Technical Design	311
Set up Development Environment.....	311
Maintain the System Administration System	312
Initialize the IMG	312
Define the Business Organization Structure.....	314
Business Process Definition	316
Prepare for Business Process Workshops	316
Conduct General Requirements Workshop	317
Conduct Business Process Workshops	317
Conduct Detailed Process Workshops.....	320
Prepare Business Blueprint	320
Review and Approve the Business Blueprint	325
Prepare End-User Training and Documentation Plans	325
Quality Check Business Blueprint Phase	326
Signing off the Business Blueprint Phase	327

15 Realization 329

Project Management Realization Phase	330
Review Business Blueprint	331
Conduct Project Team Status Meetings	331
Conduct Steering Committee Meetings	331
Initial Planning for Production Support and Cutover	332
Conduct Team-Building Activities	332
Preparing for the Realization Phase	333
Sustaining the Organization Change Management Process	333
Periodic Risk Assessments and Workshops	333
Create and Provide Feedback to the Line Managers	334
Conduct Risk Management Meetings with Key Constituencies.....	334
Deliver Key Project Communications.....	334
Manage the Ongoing Project Sponsorship Process.....	334
Manage the Ongoing Skills Development Process	334
Manage the Knowledge-Transfer Team and Process	334
Renewal of the Change Management Team	334
Conduct Project Team Training	335
System Management.....	335
Establish Level Commitments.....	335
Develop System Test Plans	336
Establish System Administration Functions	337
Set Up the Quality Assurance (QA) System Environment	337
Establish the Production System Management.....	338
Set Up the Production Environment	339
Baseline Configuration and Confirmation	339

Revise the Baseline Scope Document	339
Create the Baseline Configuration Plan	340
Create Test Cases	340
Create a Test Plan	340
Allocate Resources	341
Approve the Baseline Configuration Plan Document by the Process Owners	341
Configure the Initial Settings and Organizational Structure	341
Configure and Validate the Baseline	342
Perform Baseline Confirmation	343
Perform the Final Configuration and Confirmation	344
Configure and Validate the Final Scope (Cycle 1 to n)	344
Establish the Final Confirmation (Cycle 1 to n)	345
Perform ABAP/4 Development	345
Develop Forms	346
Develop Reports	346
Develop Conversion Programs	347
Develop Application Interface Programs	348
Develop Enhancements	349
Establish the Authorization Concept	350
Compile the Authorization Concept's Detailed Design	350
Management of the Authorization Environment	351
Validate the Authorization Concept	351
Establish the Archiving Management	352
Conduct the Final Integration Test	352
Define the Scope of Integration Test	352
Prepare the Final Integration Test Plan	353
Transport All Objects to QA and Freeze the System	354
Conduct the Final Integration Tests	354
Approve the Final Integration Test Results and Finalize the System	354
Prepare End-User Documentation and Training Material	354
Define the End-User Documentation Plan	355
Compile the End-User Documentation	355
Prepare the End-User Training Plan	355
Prepare the End-User Training Instructor Material	355
Prepare the End-User Training Material	355
Quality Check Realization Phase	355
Sign Off the Business Blueprint Phase	356

16 Final Preparation 357

Project Management of the Final Preparation Phase	358
Review the Final Preparation Phase	359
Conduct Project Team Status Meetings	359

Conduct Steering Committee Meetings	359
Continue Team-Building Activity	360
Continuing the Organization Change Management Process	360
End-User Training.....	360
Prepare for End-user Training.....	361
Conduct End-user Training	361
Review and Assess Post-training Skills.....	361
System Management.....	361
Establish Production System Administration	361
Conduct System Tests	363
Refine the Cutover and Production Support Plan.....	364
Prepare a Detailed Cutover Plan	364
Prepare the Production Support Plan	365
Long-term Production Support Strategy	366
Cutover to the Production System	366
Final Approval for Going Live	367
Quality Check of the Final Preparation Phase	367
Signoff the Final Preparation Phase	368

17 Go Live and Support 369

Production Support	370
Go Live and Support Review	370
Implement Go Live	371
Provide Production Support	371
Validate Live Business Process Results	371
Project End	371
Project Review.....	372
Project Sign-Off	372
Success Patterns for SAP Implementation Projects	372

PART V The Post-Implementation Stage 375

18 Supporting SAP 377

SAP Deployment	378
Continuous Change.....	379
SAP R/3 Upgrades	380
Customer Competency Centers (CCCs) Program	381
Help Desk	381
Retaining and Retraining SAP Consultants	382
The Retention Horizon	382
Extending the Boundaries of Expertise.....	383
Summary	384

19 Enhancements and Interfaces to SAP 385

SAP Business Workflow	387
SAP Business Workflow Concept	388
SAP Business Workflow Environment	389
SAP Business Information Warehouse	390
Characteristic Features of SAP BW	392
Components of SAP BW	393
SAP Business Framework	397
Business Components	398
Business Objects	398
Business Programming Interfaces (BAPI)	399
Application Link Enabling (ALE)	400
Architecture of ALE	402
Components of ALE	402
Scenarios of ALE	404
Electronic Data Interchange (EDI)	405
EDI Architecture	406
Data Flow in Outbound Processing	406
SAP R/3 System on the Internet	407
Connecting to SAP Through the Internet	408
SAP Internet Transaction Server (ITS)	409
Summary	415

PART VI SAP Implementation and Beyond 417

20 Valuing the Millennium Enterprise 419

Enterprise Stakeholders	420
Aspects of Enterprise Value	421
Value to Customers	422
Value to Shareholders	423
Value to Managers	424
Value to Vendors	425
Value to Employees	426
Enhancement of Measures of Performances by SAP	427
Value-based Management	429
Balance Scorecard (BSC)	430
Financial Perspective	434
Customer Perspective	434
Internal Business Processes Perspective	435
Learning and Growth Perspective	435
SAP Strategic Enterprise Management (SEM)	436
Key Performance Indicators (KPIs)	437

Business Planning and Simulation (BPS).....	438
Business Information Collection (BIC).....	438
Business Consolidation and Sourcing (BCS)	439
Corporate Performance Monitor (CPM)	440
Stakeholder Relationship Management (SRM).....	440
SAP AG's ValueSAP Program	441
Summary	442

21 Beyond the Enterprise 443

The Extended Collaborative Enterprise (ECE).....	444
Supply-chain Management (SCM).....	446
Supply-chain Planning.....	447
Supply-chain Optimization	448
Supply-chain Synchronization.....	448
The Electronic Supply-chain Management (e-SCM) Systems	450
SAP Supply-chain Optimization, Planning, and Execution (SCOPE).....	452
SAP's Advanced Planning and Optimization (APO) System	453
SAP Business-to-Business (B2B) Procurement	456
SAP Logistics Execution System (LES).....	457
Customer Relationship Management (CRM).....	458
Enterprise Application Integration (EAI)	461
Web User Interfaces (WUI)	462
SAP's mySAP.com Internet Environment	463
mySAP.com Marketplace	465
mySAP.com Workplace	465
mySAP.com Business Scenarios	466
mySAP.com Application-Hosting Services.....	467
The Customer-triggered Company	469
The Internet and the Millennium Enterprises.....	470

PART VII Appendixes 475

A Selecting SAP Implementation Partners 477

B SAP Consulting Partners in the U.S. 479

National Logo Partners	480
Implementation Partners	480
Hardware Partners.....	484
Technology Partners	484

C SAP Third-Party Solutions 485
