

 WILEY

Measuring *in vivo* Oxidative Damage

A Practical Approach

Sarawak University of Technology

31051000612053

Edited by
J. Lunec and H. R. Griffiths

Contents

List of Contributors	xiii
Preface	xv
Part I Chromatographic Procedures	1
1 Lipid Peroxidation Determination by HPLC	3
<i>Ruth J. Bevan</i>	
Introduction	3
HPLC determination of lipid hydroperoxides	4
Protocol 1: Determination of lipid hydroperoxides by HPLC with chemiluminescence detection	4
Protocol 2: Measurement of lipid hydroperoxides using an HPLC-based thiobarbituric acid assay	9
Conclusions	12
References	13
2 Measurement of Oxidized Bases in DNA and Biological Fluids by Gas Chromatography Coupled to Mass Spectrometry	15
<i>Thierry Douki, Jean-Luc Ravanat and Jean Cadet</i>	
Introduction	15
Reagents	16
DNA extraction from liver or cell cultures	17
Homogenization of the liver	17
Extraction of the nucleic acids	17
DNA isolation	18
DNA hydrolysis	19
Formic acid treatment for the analysis of 5-OHCyt, 5-OHUra, 5-HMUra, 5-ForUra, 8-oxoGua and 8-oxoAde	19
HF/pyridine-mediated release of FapyGua from DNA	19
Prepurification	20
5-OHCyt, 5-OHUra, 5-HMUra, 5-ForUra and FapyGua	21
8-OxoAde	21

8-OxoGua	21
Isolation of modified bases and nucleosides from urine	23
GCMS Analysis	23
Silylation	23
GCMS analyses	24
Calibration curve	24
Interpretation of the results	25
References	25
3 The Measurement of Protein Oxidation by HPLC	27
<i>Helen R. Griffiths, Ruth Bevan and Joe Lunec</i>	
Introduction	27
Markers of protein oxidation in intact proteins	28
Induction of novel fluorescence	28
Carbonyl measurement	30
Oxidized amino acid analysis	33
Isolation of oxidized proteins from mixed protein samples	34
Protein hydrolysis	35
Tryptophan oxidation	37
Tyrosine oxidation	39
Nitrotyrosine formation	42
Valine hydroperoxide analysis	43
Conclusion	46
Acknowledgements	47
References	47
Part II Measurement of 8-Oxo Deoxyguanosine	51
4 Measurement of 8-Oxo-2'-deoxyguanosine in Cellular DNA by High Performance Liquid Chromatography-Electrochemical Detection	53
<i>Mark D. Evans</i>	
Introduction	53
DNA extraction	54
Quantitation of DNA	55
Calculations	55
DNA digestion and analysis of 8oxodG	56
Reagents	56
HPLC standards	57
Calibration standards	58

Procedure	59
HPLC-EC	60
Calculations	60
Acknowledgements	61
References	61
5 Immunochemical Detection of 8-Oxodeoxyguanosine in DNA	63
<i>Marcus Cooke and Karl Herbert</i>	
Introduction	63
Immunochemical detection of 8-oxodG in DNA	64
Assay principle	64
ELISA dynamic range and limit of detection	64
General problems in the measurement of 8-oxodeoxyguanosine	64
Assay procedure	65
Enzymatic hydrolysis of DNA	65
Quantitation of deoxyguanosine in DNA digests	65
ELISA analysis of 8-oxodG in DNA	66
Analysis of results	67
Comparison with an established HPLC technique	67
Limitations of the assay	67
References	68
6 Urinary Measurement of 8-OxodG (8-Oxo-2'-deoxyguanosine)	69
<i>Henrik E. Poulsen, Steffen Loft and Allan Weimann</i>	
Introduction	69
Methods of analysis	70
HPLC-EC analysis	71
Apparatus and system set-up	71
Preparation of urine samples	74
Alternative HPLC-EC procedures	75
Quality control	75
Final calculation	75
LCMS-MS analysis of 8-oxodG in urine	76
Introduction	76
Instrumentation set-up	77
Experience	78
Interpretation of urinary measurements	79
Conclusion	80
Acknowledgements	80

References	80
Part III Cellular-based Methods	81
7 Measurement of Oxidative DNA Damage Using the Comet Assay	83
<i>Andrew R. Collins</i>	
Introduction	83
Reagents and materials	84
Equipment	85
Procedure	85
Slide preparation	85
First agarose layer	85
Preparation of cells	86
Embedding cells in agarose	86
Lysis	87
Enzyme treatment (endonuclease III, formamidopyrimidine glycosylase)	87
Alkaline treatment	87
Electrophoresis	87
Neutralization	87
Staining	88
Quantitation	88
Storage and re-examination	90
Notes	90
Lymphocytes: bulk preparation and storage	90
Enzymes	91
Treatment with H ₂ O ₂	92
Measuring antioxidant resistance	93
Monitoring recovery from oxidative damage <i>in vitro</i>	93
References	93
8 Measuring Oxidative DNA Damage by Alkaline Elution	95
<i>Michael Pflaum and Bernd Epe</i>	
Introduction	95
Principle of the assay	96
Scope and limitations	97
Reagents	97
Instruments	98
Repair endonucleases	99
Problems and pitfalls	100

Procedure	101
Calculation of elution rates (for each filter)	102
Calculation of single-stand breaks (SSB) and enconuclease-sensitive sites (ESS)	103
Detection range	103
References	104
Part IV Molecular-based Assays	105
9 A ³²P-Postlabelling Protocol to Measure Oxidative DNA Damage	107
<i>George D.D. Jones and Michael Weinfeld</i>	
Introduction	107
Methods	111
Materials	111
Preparation of polyacrylamide gels	112
Postlabelling assay	115
HPLC analysis of radioactive bands and nearest-neighbour analysis	117
Marker compounds	119
Discussion	119
Notes on the protocol (troubleshooting)	119
Quantitative aspects of the assay	120
General comments on the assay (advantages and disadvantages)	122
Acknowledgements	123
References	123
10 Mapping Reactive Oxygen-Induced DNA Damage at Nucleotide Resolution	125
<i>Henry Rodriguez and Steven A. Akman</i>	
Oxidative DNA damage	125
Nucleotide resolution mapping of ROS-induced DNA damage by the ligation-mediated polymerase chain reaction	125
Primer extension	127
Ligation	128
PCR amplification	128
Enhancement of LMPCR damage detection sensitivity by genomic gene enrichment	133
<i>Bam</i> H I digestion of total genomic DNA	135

Loading the DNA sample and running the continuous elution electrophoresis apparatus	135
Fraction viewing by standard agarose electrophoresis	136
Fraction screening for gene of interest by dot-blot analysis	136
Cleavage of enriched samples at ROS-induced modified bases	137
Cleavage of non-enriched samples at ROS-induced modified bases	138
LMPCR analysis	138
The future of DNA damage analysis	140
References	141
Part V Antioxidant Activity	143
11 Measurements of Plasma Antioxidant Activity	145
<i>Simon R.J. Maxwell</i>	
Introduction	145
Principles of measuring 'total' antioxidant activity	145
Total antioxidant assays	148
Influences upon plasma 'total' antioxidant activity	149
Interpretation of 'total' antioxidant assays	150
The TRAP assay	152
Reagents	152
Calibration standards	153
Apparatus	154
Procedure	154
Calculations	154
Reference range	155
Interference	155
Comments	155
The enhanced chemiluminescent (ECL) assay	156
Reagents	157
Calibration standard	159
Apparatus	159
Procedure	159
Calculations	160
Reference range	160
Interference	161
Comments	161
The ABTS assay	161
