

Biogeography

An ecological and evolutionary approach

SIXTH EDITION

C. BARRY COX & PETER D. MOORE

Contents

Acknowledgements, ix

1 Introduction to biogeography, 1

References, 9

2 Biodiversity, 10

How many species are there?, 10

Gradients of diversity, 14

Biodiversity hotspots, 24

Diversity in time, 26

Marine biodiversity, 31

Summary, 32

Further reading, 32

References, 32

3 Patterns of distribution, 34

Limits of distribution, 34

Overcoming the barriers, 36

A successful family: the daisies (Asteraceae), 38

Patterns of dragonflies, 41

Magnolias: evolutionary relicts, 44

Climatic relicts, 45

Endemic organisms, 49

Physical limitations, 51

Environmental gradients, 52

Interaction of factors, 56

Species interaction, 59

Reducing competition, 63

Predators and prey, 67

Summary, 70

Further reading, 70

References, 70

4 Communities and ecosystems, 72

The community, 72

The ecosystem, 75

Ecosystems and biodiversity, 77

Biotic assemblages on a global scale, 80

Patterns of climate, 84

Climate diagrams, 88

Modelling biomes and climate, 88
Biomes in a changing world, 92
Summary, 93
Further reading, 93
References, 93

5 The source of novelty, 95

Natural selection, 95
Darwin's theory and Darwin's finches, 96
The controlling force within the organism, 100
From populations to species, 101
Barriers to interbreeding, 103
Polyploids, 104
Clines and 'rules', 105
Competition for life, 106
Controversies and evolutionary theory, 107
Evolution and the human race(s), 109
Summary, 110
Further reading, 110
References, 110

6 Patterns in the past, 112

Plate tectonics, 113
The evidence for past geographies, 115
Changing patterns of continents, 118
Early land life on the moving continents, 119
One world—for a while, 120
The early spread of mammals, 124
The great Cretaceous extinction event, 125
The rise of the flowering plants, 127
Late Cretaceous and Cenozoic climate changes, 128
Late Cretaceous and Cenozoic floral changes, 131
Summary, 133
Further reading, 134
References, 134

7 Patterns of life today, 136

Mammals: the final patterns, 137
The distribution of flowering plants today, 140
Mammalian vs. flowering plant geography: comparisons and contrasts, 142
Floral patterns in the Southern Hemisphere, 144
The Old World tropics: Africa, India and South-East Asia, 144
Madagascar, 148
The Cape flora, 148
Australia, 149
Wallacea, 151
New Zealand, 152
South America, 152

- The Northern Hemisphere: Holarctic mammals and Boreal plants, 155
- Summary, 158
- Further reading, 159
- References, 159

8 Interpreting the past, 161

- Phylogenetic biogeography, 162
- Cladistic biogeography, 163
- Panbiogeography, 164
- Phyletic tracks and patterns, 167
- Endemicity and history, 169
- Pleistocene problems, 170
- Centres of dispersal, 172
- Fossils and historical biogeography, 172
- Palaeobiogeography, 173
- Summary, 173
- Further reading, 174
- References, 174

9 Ice and change, 175

- Climatic wiggles, 176
- Interglacials and interstadials, 177
- Biological changes in the Pleistocene, 182
- The last glacial, 183
- Causes of glaciation, 192
- Summary, 195
- Further reading, 195
- References, 195

10 The making of today, 197

- The current interglacial: a false start, 197
- Forests on the move, 200
- The emergence of humans, 203
- Modern humans and the megafaunal extinctions, 206
- Domestication and agriculture, 207
- The dry lands, 214
- Changing sea levels, 215
- Time of warmth, 217
- Climatic deterioration, 218
- The environmental impact of early human cultures, 220
- Recorded history, 221
- Summary, 221
- Further reading, 222
- References, 222

11 Projecting into the future, 224

- The changing climate, 224
- Nitrogen and sulphur overload, 227

- Biogeographical consequences of global change, 229
- Changing communities and biomes, 234
- Summary, 236
- Further reading, 236
- References, 236

12 Drawing lines in the water, 238

- Introduction, 238
- Zones in the ocean and upon the sea floor, 239
- The basic biogeography of the seas, 241
- The open-sea realm, 241
 - The history of the ocean basins, 241*
 - The dynamics of the ocean basins, 243*
 - The biogeography of hydrothermal vent faunas, 251*
- The shallow-sea realm, 251
 - Faunal breaks within the shelf faunas, 252*
 - Trans-oceanic links and barriers between shelf faunas, 253*
 - Latitudinal patterns in the shelf faunas, 254*
 - Coral reefs, 255*
- Summary, 259
- Further reading, 259
- References, 260

13 Life (and death) on islands, 262

- Types of island, 262
- Getting there: problems of access, 263
- Dying there: problems of survival, 266
- Integrating the data: The Theory of Island Biogeography, 267
- Second thoughts about the theory, 269
- The Theory of Island Biogeography and the design of nature reserves, 271
- Starting afresh: the story of Rakata, 273
- Evolving there: opportunities for adaptive radiation, 279
- The Hawaiian Islands, 280
- Summary, 288
- Further reading, 288
- References, 288

Index, 291
