

Lecture Notes in Computer Science

1883

Bill Triggs Andrew Zisserman
Richard Szeliski (Eds.)

Vision Algorithms: Theory and Practice

International Workshop on Vision Algorithms
Corfu, Greece, September 1999
Proceedings

Springer

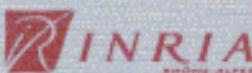

Table of Contents

Correspondence and Tracking

An Experimental Comparison of Stereo Algorithms	1
<i>R. Szeliski (Microsoft Research, Redmond, WA), R. Zabih (Cornell University, Ithaca, NY)</i>	
A General Method for Feature Matching and Model Extraction	20
<i>C.F. Olson (Jet Propulsion Laboratory, Pasadena, CA)</i>	
Characterizing the Performance of Multiple-Image Point-Correspondence Algorithms Using Self-Consistency	37
<i>Y.G. Leclerc, Q.-T. Luong (SRI International, Menlo Park, CA), P. Fua (EPFL, Lausanne, Switzerland)</i>	
A Sampling Algorithm for Tracking Multiple Objects	53
<i>H. Tao, H.S. Sawhney, R. Kumar (Sarnoff Corporation, Princeton, NJ)</i>	
Real-Time Tracking of Complex Structures for Visual Servoing	69
<i>T. Drummond, R. Cipolla (University of Cambridge, UK)</i>	

Geometry and Reconstruction

Direct Recovery of Planar-Parallax from Multiple Frames	85
<i>M. Irani (Weizmann Institute, Rehovot, Israel), P. Anandan (Microsoft Research, Redmond, WA), M. Cohen (Weizmann Institute)</i>	
Generalized Voxel Coloring	100
<i>W.B. Culbertson, T. Malzbender (Hewlett-Packard Laboratories, Palo Alto), G. Slabaugh (Georgia Institute of Technology)</i>	
Projective Reconstruction from N Views Having One View in Common	116
<i>M. Urban, T. Pajdla, V. Hlaváč (Czech Technical University, Prague)</i>	

Point- and Line-Based Parameterized Image Varieties for Image-Based Rendering	132
<i>Y. Genc (Siemens Corporate Research, Princeton), Jean Ponce (University of Illinois)</i>	

Recovery of Circular Motion from Profiles of Surfaces	149
<i>P.R.S. Mendonça, K.-Y.K. Wong, R. Cipolla (University of Cambridge, UK)</i>	

Optimal Reconstruction

Optimization Criteria, Sensitivity and Robustness of Motion and Structure Estimation	166
<i>J. Košecká (George Mason University, Fairfax, VA), Y. Ma, S. Sastry (University of California at Berkeley)</i>	

Gauge Independence in Optimization Algorithms for 3D Vision	183
P.F. McLauchlan (<i>University of Surrey, Guildford, UK</i>)	
Uncertainty Modeling for Optimal Structure from Motion	200
D.D. Morris (<i>Carnegie Mellon University</i>), K. Kanatani (<i>Gunma University, Japan</i>), T. Kanade (<i>Carnegie Mellon University</i>)	
Error Characterization of the Factorization Approach to Shape and Motion Recovery	218
Z. Sun (<i>University of Rochester</i>), V. Ramesh (<i>Siemens Corporate Research</i>), A.M. Tekalp (<i>University of Rochester</i>)	
Bootstrapping Errors-in-Variables Models	236
B. Matei, P. Meer (<i>Rutgers University, Piscataway, NJ</i>)	
Invited Talks	
Annotation of Video by Alignment to Reference Imagery	253
K.J. Hanna, H.S. Sawhney, R. Kumar, Y. Guo, S. Samarasekara (<i>Sarnoff Corporation, Princeton</i>)	
Computer-Vision for the Post-production World: Facts and Challenges through the REALViZ Experience	265
L. Robert (<i>REALViZ S.A., Sophia Antipolis, France</i>)	
Special Sessions	
About Direct Methods	267
M. Irani (<i>Weizmann Institute, Rehovot, Israel</i>), P. Anandan (<i>Microsoft Research, Redmond, WA</i>)	
Feature Based Methods for Structure and Motion Estimation	278
P.H.S. Torr (<i>Microsoft Research, Cambridge, UK</i>), A. Zisserman (<i>University of Oxford, UK</i>)	
Discussion for Direct versus Features Session	295
Bundle Adjustment — A Modern Synthesis	298
B. Triggs (<i>INRIA Rhône-Alpes, Montbonnot, France</i>), P.F. McLauchlan (<i>University of Surrey, Guildford, UK</i>), R.I. Hartley (<i>General Electric CRD, Schenectady, NY</i>), A.W. Fitzgibbon (<i>University of Oxford, Oxford, UK</i>)	
Discussion for Session on Bundle Adjustment	373
Summary of the Panel Session	376
P. Anandan (<i>Microsoft Research, Redmond, WA</i>), O. Faugeras (<i>INRIA Sophia-Antipolis, France</i>), R. Hartley (<i>General Electric CRD, Schenectady, NY</i>), J. Malik (<i>University of California, Berkeley</i>), J. Mundy (<i>General Electric CRD, Schenectady, NY</i>)	
Author Index	383
