Preface		X			
PART I	FOUNDATIONS: LINEAR METHODS				
1 Ma	trix Algebra	3			
1.1	Matrices: Definition and General Representation 4 The Algebra of Matrices 4 1.2.1 Matrix Operations: Addition and Subtraction 4 1.2.2 Matrix Definitions: Equality and the Null Matrix 5 1.2.3 Matrix Operations: Multiplication 5 1.2.4 Matrix Definitions: The Identity Matrix 7 1.2.5 Matrix Operations: Transposition 8 1.2.6 Matrix Operations: Partitioning 9 1.2.7 Additional Definitions and Operations 9				
1.3	Linear Equation Systems: A Preview 11 1.3.1 Matrix Operations: Division 14 1.3.2 The Geometry of Simple Equation Systems: Solution Possibilities	26			
	The Geometry of Vectors 29 1.4.1 Linear Combinations of Vectors 29 1.4.2 The Geometry of Multiplication by a Scalar 31 1.4.3 The Geometry of Addition (and Subtraction) 32 1.4.4 Additional Vector Geometry 32	20			
1.5 1.6					

1.6.4

The Sign of a Quadratic Form 48

	1.7 Prob	Summary 49 slems 49			
2	Syst	Systems of Linear Equations			
	2.1	The 2 × 2 Case Again 54			
	2.2				
		2.2.1 Numerical Illustrations 59			
		2.2.2 Summary of 2×2 and 3×3 Solution Possibilities 62			
	2.3				
		2.3.1 Consistent Systems $[\rho(\mathbf{A}) = \rho(\mathbf{A} \mathbf{B})]$ 62			
		2.3.2 Inconsistent Systems $[\rho(A) \neq \rho(A \mid B)]$ 64			
	2.4	1			
		2.4.1 The $m > n$ Case 65			
		2.4.2 The $m < n$ Case 66			
		2.4.3 Nonsquare Inverses and Systems of Linear Equations 66			
	2.5	,			
		2.5.1 Consistent Systems $[\rho(\mathbf{A}) = \rho(\mathbf{A} \mid \mathbf{B})]$ 67			
		2.5.2 Inconsistent Systems $[\rho(A) \neq \rho(A \mid B)]$ 71			
	~ .	2.5.3 Summary: Fewer Equations than Unknowns 71			
	2.6				
		2.6.1 Consistent Systems $[\rho(A) = \rho(A \mid B)]$ 72			
		2.6.2 Inconsistent Systems $[\rho(A) \neq \rho(A \mid B)]$ 74			
	2.7	2.6.3 Summary: More Equations than Unknowns 75			
	2.1	<u> </u>			
		2.7.1 Elementary Matrix Operations and Gaussian Methods 76 2.7.2 Iterative Methods 79			
		2.7.3 Factorization of the Matrix A 81			
		2.7.4 Numerical Illustration 84

3.6.2 Second-Order Conditions 148
3.6.3 Example 149
3.7 Summary 150
Appendix 3.1 Quasiconcave and Quasiconvex Functions 150
3A.1.1 Quasiconcavity and Quasiconvexity of $f(x)$ 151
3A.1.1 Quasiconcavity and Quasiconvexity of $f(x)$ 151 3A.1.2 Quasiconcavity and Quasiconvexity of $f(X)$ 158
3A.1.1 Quasiconcavity and Quasiconvexity of $f(x)$ 151 3A.1.2 Quasiconcavity and Quasiconvexity of $f(X)$ 158 Appendix 3.2 Maclaurin's and Taylor's Series 165
3A.1.1 Quasiconcavity and Quasiconvexity of $f(x)$ 151 3A.1.2 Quasiconcavity and Quasiconvexity of $f(X)$ 158 Appendix 3.2 Maclaurin's and Taylor's Series 165 3A.2.1 Maclaurin's Series 165
3A.1.1 Quasiconcavity and Quasiconvexity of $f(x)$ 151 3A.1.2 Quasiconcavity and Quasiconvexity of $f(X)$ 158 Appendix 3.2 Maclaurin's Series 165 3A.2.1 Maclaurin's Series 165 3A.2.2 Taylor's Series 166
3A.1.1 Quasiconcavity and Quasiconvexity of $f(x)$ 151 3A.1.2 Quasiconcavity and Quasiconvexity of $f(X)$ 158 Appendix 3.2 Maclaurin's and Taylor's Series 165 3A.2.1 Maclaurin's Series 165 3A.2.2 Taylor's Series 166 3A.2.2 Taylor's Theorem 167
3A.1.1 Quasiconcavity and Quasiconvexity of $f(x)$ 151 3A.1.2 Quasiconcavity and Quasiconvexity of $f(X)$ 158 Appendix 3.2 Maclaurin's and Taylor's Series 165 3A.2.1 Maclaurin's Series 165 3A.2.2 Taylor's Series 166 3A.2.2 Taylor's Theorem 167 References 168
3A.1.1 Quasiconcavity and Quasiconvexity of $f(x)$ 151 3A.1.2 Quasiconcavity and Quasiconvexity of $f(X)$ 158 Appendix 3.2 Maclaurin's and Taylor's Series 165 3A.2.1 Maclaurin's Series 165 3A.2.2 Taylor's Series 166 3A.2.2 Taylor's Theorem 167
3A.1.1 Quasiconcavity and Quasiconvexity of $f(x)$ 151 3A.1.2 Quasiconcavity and Quasiconvexity of $f(X)$ 158 Appendix 3.2 Maclaurin's and Taylor's Series 165 3A.2.1 Maclaurin's Series 166 3A.2.2 Taylor's Theorem 167 References 168 Problems 168
3A.1.1 Quasiconcavity and Quasiconvexity of $f(x)$ 151 3A.1.2 Quasiconcavity and Quasiconvexity of $f(X)$ 158 Appendix 3.2 Maclaurin's and Taylor's Series 165 3A.2.1 Maclaurin's Series 165 3A.2.2 Taylor's Series 166 3A.2.2 Taylor's Theorem 167 References 168 Problems 168 Constrained Maximization and Minimization 17
3A.1.1 Quasiconcavity and Quasiconvexity of $f(x)$ 151 3A.1.2 Quasiconcavity and Quasiconvexity of $f(X)$ 158 Appendix 3.2 Maclaurin's and Taylor's Series 165 3A.2.1 Maclaurin's Series 165 3A.2.2 Taylor's Series 166 3A.2.2 Taylor's Theorem 167 References 168 Problems 168 Constrained Maximization and Minimization 4.1 Quadratic Forms with Side Conditions 172
3A.1.1 Quasiconcavity and Quasiconvexity of $f(x)$ 151 3A.1.2 Quasiconcavity and Quasiconvexity of $f(X)$ 158 Appendix 3.2 Maclaurin's and Taylor's Series 165 3A.2.1 Maclaurin's Series 166 3A.2.2 Taylor's Theorem 167 References 168 Problems 168 Constrained Maximization and Minimization 172 4.1 Quadratic Forms with Side Conditions 172 4.2 Maxima and Minima for Functions of Two Dependent Variables 174
3A.1.1 Quasiconcavity and Quasiconvexity of $f(x)$ 151 3A.1.2 Quasiconcavity and Quasiconvexity of $f(X)$ 158 Appendix 3.2 Maclaurin's and Taylor's Series 165 3A.2.1 Maclaurin's Series 166 3A.2.2 Taylor's Theorem 167 References 168 Problems 168 Constrained Maximization and Minimization 172 4.1 Quadratic Forms with Side Conditions 172 4.2 Maxima and Minima for Functions of Two Dependent Variables 174 4.2.1 First-Order Conditions: Differentials 174
3A.1.1 Quasiconcavity and Quasiconvexity of $f(x)$ 151 3A.1.2 Quasiconcavity and Quasiconvexity of $f(X)$ 158 Appendix 3.2 Maclaurin's and Taylor's Series 165 3A.2.1 Maclaurin's Series 166 3A.2.2 Taylor's Theorem 167 References 168 Problems 168 Constrained Maximization and Minimization 172 4.1 Quadratic Forms with Side Conditions 172 4.2 Maxima and Minima for Functions of Two Dependent Variables 174 4.2.1 First-Order Conditions: Differentials 174 4.2.2 First-Order Conditions: Lagrange Multipliers 178
3A.1.1 Quasiconcavity and Quasiconvexity of $f(x)$ 151 3A.1.2 Quasiconcavity and Quasiconvexity of $f(X)$ 158 Appendix 3.2 Maclaurin's and Taylor's Series 165 3A.2.1 Maclaurin's Series 165 3A.2.2 Taylor's Series 166 3A.2.2 Taylor's Theorem 167 References 168 Problems 168 Constrained Maximization and Minimization 4.1 Quadratic Forms with Side Conditions 172 4.2 Maxima and Minima for Functions of Two Dependent Variables 174 4.2.1 First-Order Conditions: Differentials 174 4.2.2 First-Order Conditions: Lagrange Multipliers 178 4.2.3 Second-Order Conditions 179
3A.1.1 Quasiconcavity and Quasiconvexity of $f(x)$ 151 3A.1.2 Quasiconcavity and Quasiconvexity of $f(X)$ 158 Appendix 3.2 Maclaurin's and Taylor's Series 165 3A.2.1 Maclaurin's Series 165 3A.2.2 Taylor's Series 166 3A.2.2 Taylor's Theorem 167 References 168 Problems 168 Constrained Maximization and Minimization 4.1 Quadratic Forms with Side Conditions 172 4.2 Maxima and Minima for Functions of Two Dependent Variables 174 4.2.1 First-Order Conditions: Differentials 174 4.2.2 First-Order Conditions: Lagrange Multipliers 178 4.2.3 Second-Order Conditions 179 4.2.4 Example 181
3A.1.1 Quasiconcavity and Quasiconvexity of $f(x)$ 151 3A.1.2 Quasiconcavity and Quasiconvexity of $f(X)$ 158 Appendix 3.2 Maclaurin's and Taylor's Series 165 3A.2.1 Maclaurin's Series 166 3A.2.2 Taylor's Theorem 167 References 168 Problems 168 Constrained Maximization and Minimization 4.1 Quadratic Forms with Side Conditions 172 4.2 Maxima and Minima for Functions of Two Dependent Variables 174 4.2.1 First-Order Conditions: Differentials 174 4.2.2 First-Order Conditions: Lagrange Multipliers 178 4.2.3 Second-Order Conditions 179 4.2.4 Example 181 4.2.5 Geometry of the First-Order Conditions 183
3A.1.1 Quasiconcavity and Quasiconvexity of $f(x)$ 151 3A.1.2 Quasiconcavity and Quasiconvexity of $f(x)$ 158 Appendix 3.2 Maclaurin's and Taylor's Series 165 3A.2.1 Maclaurin's Series 166 3A.2.2 Taylor's Theorem 167 References 168 Problems 168 Constrained Maximization and Minimization 172 4.1 Quadratic Forms with Side Conditions 172 4.2 Maxima and Minima for Functions of Two Dependent Variables 174 4.2.1 First-Order Conditions: Differentials 174 4.2.2 First-Order Conditions: Lagrange Multipliers 178 4.2.3 Second-Order Conditions 179 4.2.4 Example 181 4.2.5 Geometry of the First-Order Conditions 183 4.2.6 Two Examples with Gradients that Are Null Vectors 187
3A.1.1 Quasiconcavity and Quasiconvexity of $f(x)$ 151 3A.1.2 Quasiconcavity and Quasiconvexity of $f(X)$ 158 Appendix 3.2 Maclaurin's and Taylor's Series 165 3A.2.1 Maclaurin's Series 165 3A.2.2 Taylor's Theorem 167 References 168 Problems 168 Constrained Maximization and Minimization 172 4.1 Quadratic Forms with Side Conditions 172 4.2 Maxima and Minima for Functions of Two Dependent Variables 174 4.2.1 First-Order Conditions: Differentials 174 4.2.2 First-Order Conditions: Lagrange Multipliers 178 4.2.3 Second-Order Conditions 179 4.2.4 Example 181 4.2.5 Geometry of the First-Order Conditions 183 4.2.6 Two Examples with Gradients that Are Null Vectors 187 4.2.7 A Note on the Form of the Lagrangian Function 190
3A.1.1 Quasiconcavity and Quasiconvexity of $f(x)$ 151 3A.1.2 Quasiconcavity and Quasiconvexity of $f(x)$ 158 Appendix 3.2 Maclaurin's and Taylor's Series 165 3A.2.1 Maclaurin's Series 165 3A.2.2 Taylor's Series 166 3A.2.2 Taylor's Theorem 167 References 168 Problems 168 Constrained Maximization and Minimization 4.1 Quadratic Forms with Side Conditions 172 4.2 Maxima and Minima for Functions of Two Dependent Variables 174 4.2.1 First-Order Conditions: Differentials 174 4.2.2 First-Order Conditions: Lagrange Multipliers 178 4.2.3 Second-Order Conditions 179 4.2.4 Example 181 4.2.5 Geometry of the First-Order Conditions 183 4.2.6 Two Examples with Gradients that Are Null Vectors 187 4.2.7 A Note on the Form of the Lagrangian Function 190 4.3 Extension to More Dependent Variables 191
3A.1.1 Quasiconcavity and Quasiconvexity of $f(x)$ 151 3A.1.2 Quasiconcavity and Quasiconvexity of $f(x)$ 158 Appendix 3.2 Maclaurin's and Taylor's Series 165 3A.2.1 Maclaurin's Series 166 3A.2.2 Taylor's Theorem 167 References 168 Problems 168 Constrained Maximization and Minimization 172 4.1 Quadratic Forms with Side Conditions 172 4.2 Maxima and Minima for Functions of Two Dependent Variables 174 4.2.1 First-Order Conditions: Differentials 174 4.2.2 First-Order Conditions: Lagrange Multipliers 178 4.2.3 Second-Order Conditions 179 4.2.4 Example 181 4.2.5 Geometry of the First-Order Conditions 183 4.2.6 Two Examples with Gradients that Are Null Vectors 187 4.2.7 A Note on the Form of the Lagrangian Function 190 4.3 Extension to More Dependent Variables 191 4.3.1 First-Order Conditions 191
3A.1.1 Quasiconcavity and Quasiconvexity of $f(x)$ 151 3A.1.2 Quasiconcavity and Quasiconvexity of $f(x)$ 158 Appendix 3.2 Maclaurin's and Taylor's Series 165 3A.2.1 Maclaurin's Series 165 3A.2.2 Taylor's Series 166 3A.2.2 Taylor's Theorem 167 References 168 Problems 168 Constrained Maximization and Minimization 172 4.1 Quadratic Forms with Side Conditions 172 4.2 Maxima and Minima for Functions of Two Dependent Variables 174 4.2.1 First-Order Conditions: Differentials 174 4.2.2 First-Order Conditions: Lagrange Multipliers 178 4.2.3 Second-Order Conditions 179 4.2.4 Example 181 4.2.5 Geometry of the First-Order Conditions 183 4.2.6 Two Examples with Gradients that Are Null Vectors 187 4.2.7 A Note on the Form of the Lagrangian Function 190 4.3 Extension to More Dependent Variables 191 4.3.1 First-Order Conditions 192
3A.1.1 Quasiconcavity and Quasiconvexity of $f(x)$ 151 3A.1.2 Quasiconcavity and Quasiconvexity of $f(x)$ 158 Appendix 3.2 Maclaurin's and Taylor's Series 165 3A.2.1 Maclaurin's Series 165 3A.2.2 Taylor's Series 166 3A.2.2 Taylor's Theorem 167 References 168 Problems 168 Constrained Maximization and Minimization 172 4.1 Quadratic Forms with Side Conditions 172 4.2 Maxima and Minima for Functions of Two Dependent Variables 174 4.2.1 First-Order Conditions: Differentials 174 4.2.2 First-Order Conditions: Lagrange Multipliers 178 4.2.3 Second-Order Conditions 179 4.2.4 Example 181 4.2.5 Geometry of the First-Order Conditions 183 4.2.6 Two Examples with Gradients that Are Null Vectors 187 4.2.7 A Note on the Form of the Lagrangian Function 190 4.3 Extension to More Dependent Variables 191 4.3.1 First-Order Conditions 192 4.3.3 Example 192
3A.1.1 Quasiconcavity and Quasiconvexity of $f(x)$ 151 3A.1.2 Quasiconcavity and Quasiconvexity of $f(x)$ 158 Appendix 3.2 Maclaurin's and Taylor's Series 165 3A.2.1 Maclaurin's Series 165 3A.2.2 Taylor's Series 166 3A.2.2 Taylor's Theorem 167 References 168 Problems 168 Constrained Maximization and Minimization 172 4.1 Quadratic Forms with Side Conditions 172 4.2 Maxima and Minima for Functions of Two Dependent Variables 174 4.2.1 First-Order Conditions: Differentials 174 4.2.2 First-Order Conditions: Lagrange Multipliers 178 4.2.3 Second-Order Conditions 179 4.2.4 Example 181 4.2.5 Geometry of the First-Order Conditions 183 4.2.6 Two Examples with Gradients that Are Null Vectors 187 4.2.7 A Note on the Form of the Lagrangian Function 190 4.3 Extension to More Dependent Variables 191 4.3.1 First-Order Conditions 192
