2.1	Introduction	16
2.2	UV-visible transmission, absorption and reflection	17
2.2.1	Instrumentation—optics	20
2.2.2	Instrumentation—sources	21
2.2.3	Instrumentation—detectors	22
2.2.4	Instrumentation—window and containment materials	22
2.2.5	Instrumentation—fibre optics	22
2.2.6	Instrumentation—testing and calibration	23
2.2.7	Reflectance measurements	24
2.2.8	Applications	24
2.3	Fluorescence	33
2.3.1	Fluorescence instrumentation	35
2.3.2	Strengths and weaknesses of fluorescence methods	38
2.3.3	Applications	39
2.4	Chemiluminescence	43
2.4.1	Gas phase chemiluminescence	44
2.4.2	Liquid phase chemiluminescence	45
2.4.3	Chemiluminescence instrumentation	47
2.4.4	Strengths and weaknesses of chemiluminescence methods	47
2.4.5	Applications	48
2.5	Conclusions	50
