

Woodhead Publishing in Food Science and Technology

Handbook of hydrocolloids

Edited by G O Phillips and P A Williams

WOODHEAD PUBLISHING LIMITED

Contents

Preface	xiii
List of contributors	xv
1 Introduction to food hydrocolloids	1
<i>P. A. Williams and G. O. Phillips, North East Wales Institute, Wrexham</i>	
1.1 Introduction	1
1.2 Regulatory aspects	4
1.3 Thickening characteristics	7
1.4 Viscoelasticity and gelation	12
1.5 Synergistic combinations	15
1.6 Hydrocolloid fibres	16
1.7 Future prospects	18
1.8 Bibliography	19
2 Agar	21
<i>R. Armisen and F. Galatas, Hispanagar S A, Madrid</i>	
2.1 Introduction	21
2.2 Agar manufacture	23
2.3 Chemical structure of agar	26
2.4 Gellification of agar	28
2.5 Applications of agar	33
2.6 New developments	38
2.7 References and further reading	39

3 Starch	41
<i>P. Murphy, National Starch and Chemical, Manchester</i>	
3.1 Introduction	41
3.2 Manufacture	41
3.3 Structure	42
3.4 Modifications	46
3.5 Technical data	50
3.6 Uses and applications	54
3.7 Regulatory status: European label declarations	64
3.8 Bibliography	65
4 Gelatin	67
<i>D. A. Ledward, University of Reading</i>	
4.1 Introduction	67
4.2 Structure	70
4.3 Technical data	76
4.4 Uses	79
4.5 New gelatin derivatives	84
4.6 Regulations	85
4.7 Further reading	86
5 Carrageenan	87
<i>A. Imeson, FMC Corporation (UK) Ltd</i>	
5.1 Introduction	87
5.2 Manufacture	87
5.3 Structure	89
5.4 Physical properties	91
5.5 Food applications	95
5.6 Regulatory status	101
5.7 References and further reading	101
6 Xanthan gum	103
<i>G. Sworn, Monsanto (Kelco Biopolymers, Tadworth)</i>	
6.1 Introduction	103
6.2 Manufacture	103
6.3 Structure	103
6.4 Technical data	105
6.5 Uses and applications	112
6.6 Regulatory status	115
6.7 References	115

7 Gellan gum	117
<i>G. Sworn, Monsanto (Kelco Biopolymers, Tadworth)</i>	
7.1 Introduction	117
7.2 Manufacture	117
7.3 Structure	117
7.4 Technical data	118
7.5 Uses and applications	124
7.6 Regulatory status	134
7.7 References	134
8 Galactomannans	137
<i>W. C. Wielinga, Mashall AG (Rhodia Food, Kreuzlingen)</i>	
8.1 Introduction	137
8.2 Manufacture	140
8.3 Structure	144
8.4 Technical data	146
8.5 Uses and applications	153
8.6 Regulatory status	153
8.7 References	153
9 Gum-arabic	155
<i>P. A. Williams and G. O. Phillips, North East Wales Institute, Wrexham</i>	
9.1 Introduction	155
9.2 Supply and market trends	155
9.3 Manufacture	157
9.4 Regulatory aspects	158
9.5 Structure	161
9.6 Properties	164
9.7 Applications	166
9.8 Bibliography	168
10 Pectins	169
<i>C. D. May, Consultant</i>	
10.1 Introduction	169
10.2 Manufacture	169
10.3 The chemical nature of pectin	171
10.4 Commercial pectin: properties, modification and function	172
10.5 Nutritional and safety aspects	175
10.6 Uses and applications	176
10.7 Legal status	188
10.8 References	188

11 Milk proteins	189
<i>M. P. Ennis and D. M. Mulvihill, University College, Cork</i>	
11.1 Introduction	189
11.2 The milk protein system	189
11.3 Manufacture of milk protein products	193
11.4 Functional properties of milk protein products	202
11.5 Food uses of milk protein products	205
11.6 Future developments	213
11.7 Sources of further information	214
11.8 References	215
12 Cellulosics	219
<i>J. C. F. Murray, Hercules Limited, Reigate</i>	
12.1 Introduction	219
12.2 Manufacture	219
12.3 Structure	220
12.4 Properties	220
12.5 Applications	222
12.6 Regulatory status	229
13 Tragacanth and karaya	231
<i>W. Weiping, Arthur Branwell and Co. Limited, Epping</i>	
13.1 Gum tragacanth	231
13.2 Gum karaya	238
13.3 References	245
14 Xyloglucan	247
<i>K. Nishinari (Osaka City University), K. Yamatoya and M. Shirakawa (Dainippon Pharmaceutical Co. Limited)</i>	
14.1 Introduction	247
14.2 Origin and manufacture	247
14.3 Structure	250
14.4 Technical data	253
14.5 Uses and applications	259
14.6 Regulatory status	261
14.7 Modification of tamarind seed xyloglucan	262
14.8 References	266
15 Curdlan	269
<i>K. Nishinari and H. Zhang, Osaka City University</i>	
15.1 Introduction	269
15.2 Production	270
15.3 Chemical structure	270
15.4 Native curdlan	271

15.5	Functional properties	271
15.6	Applications	283
15.7	Regulatory status	285
15.8	References	285
16	Cereal β-glucans	287
	<i>K. Morgan, Industrial Research Limited, New Zealand</i>	
16.1	Introduction	287
16.2	Manufacture	288
16.3	Structure	291
16.4	Technical data	297
16.5	Uses and applications	301
16.6	Regulatory status	305
16.7	References	305
17	Soluble soybean polysaccharide	309
	<i>H. Maeda, Fuji Oil Co. Limited, Osaka</i>	
17.1	Introduction	309
17.2	Manufacture	309
17.3	Structure	310
17.4	Basic material properties and characteristics	312
17.5	Functions and applications of SSPS	314
17.6	Regulatory status	319
17.7	References	319
18	Bacterial cellulose	321
	<i>T. Omoto, Y. Uno and I. Asai, San-Ei Gen FFI Inc., Japan</i>	
18.1	Introduction	321
18.2	Manufacture	321
18.3	Structure	322
18.4	Technical data	324
18.5	Uses and applications	326
18.6	Regulatory status	330
19	Microcrystalline cellulose: an overview	331
	<i>H. Iijima and K. Takeo, Asahi Chemical Industry Co. Limited</i>	
19.1	Introduction	331
19.2	Manufacture	331
19.3	Structure	333
19.4	Technical data	335
19.5	Application of colloidal type microcrystalline cellulose to food systems	341
19.6	Regulatory status	345
19.7	References	346

20 Gums for coatings and adhesives	347
<i>A. Nussinovitch, The Hebrew University of Jerusalem</i>	
20.1 Introduction	347
20.2 Today's edible protective films	347
20.3 Parameters to be considered before, during and after food coating	351
20.4 Hydrocolloid non-food coatings	352
20.5 Film-application techniques and stages	353
20.6 Methods for testing coatings	353
20.7 Adhesives: non-food uses and applications	354
20.8 Adhesives: food uses and applications	355
20.9 Bioadhesives: uses and applications	356
20.10 Hydrocolloid adhesion tests	357
20.11 Hydrocolloids as wet glues	357
20.12 Coatings and adhesion: future prospects	361
20.13 References	362
21 Chitosan	367
<i>M. Terbojevich (University of Padua) and R.A.A. Muzzarelli (University of Ancona)</i>	
21.1 Introduction	367
21.2 Chitosan chemistry	368
21.3 Properties of chitosans and derivatives	370
21.4 Conclusions	375
21.5 References	376
22 Alginates	379
<i>K. I. Draget, Norwegian University of Science and Technology</i>	
22.1 Introduction	379
22.2 Manufacture	380
22.3 Chemical and physical properties	381
22.4 Limitations	384
22.5 Properties and applications of alginate in the liquid phase	387
22.6 Gels and gelling technologies	387
22.7 Regulatory status	393
22.8 References	393
23 Frutafit[®]-inulin	397
<i>Sensus Operations CV, The Netherlands</i>	
23.1 Introduction	397
23.2 Frutafit [®] -inulin and hydrocolloids	397
23.3 Frutafit [®] -inulin	398
23.4 Interactions of Frutafit [®] -inulin	398
23.5 Frutafit [®] -inulin as a gelling agent	399
23.6 Parameters affecting gel characteristics	399

23.7	Applications	401
23.8	Hydrocolloids	403
24	CRC emulsifying biopolymer: a new emulsifier for the soft-drinks industry	405
	<i>A. Lane (Food Science Australia) and E. Chai (University of Melbourne)</i>	
24.1	Introduction	405
24.2	The CRC process	406
24.3	Product specifications for CRC Biopolymer	406
24.4	Functional properties and efficacy of CRC Biopolymer	408
24.5	Emulsion stability	409
24.6	Composition of CRC Biopolymer	410
24.7	Patent status of CRC Biopolymer	411
24.8	Contact details	411
25	Konjac mannan	413
	<i>S. Takigami, Gunma University</i>	
25.1	Introduction	413
25.2	Manufacture	415
25.3	Structure	418
25.4	Technical data	419
25.5	Uses and applications	422
25.6	Regulatory status	423
25.7	References	423
26	Philippine Natural Grade or semi-refined carrageenan	425
	<i>H. J. Bixler and K. D. Johndro, Ingredients Solutions Inc., Searsport</i>	
26.1	History of product development	425
26.2	Processing of PNG	426
26.3	Chemical analysis of PNG	428
26.4	The regulatory status of PNG as a food ingredient	430
26.5	Applications of PNG in foods	432
26.6	Concluding remarks	440
26.7	References	442
	Index	443
