

# Systems Analysis for Librarians and Information Professionals

Second Edition

*Larry N. Osborne*  
*Margaret Nakamura*

# Contents

---

|  |           |
|--|-----------|
| Preface to the First Edition .....                                   | xiii      |
| Preface to the Second Edition.....                                   | xvii      |
| <b>Chapter 1—Understanding Systems Analysis .....</b>                | <b>1</b>  |
| The Purpose of Systems Analysis.....                                 | 1         |
| What Is a System?.....   | 2         |
| What Is Analysis? .....  | 5         |
| Reasons for Analyzing a System .....                                 | 7         |
| Qualifications of the Systems Analyst .....                          | 9         |
| Librarians As Systems Analysts .....                                 | 10        |
| Problems in Systems Analysis.....                                    | 11        |
| System Life Cycle.....   | 12        |
| Relationship Between Systems Analysis and Computers .....            | 13        |
| Case Study—Fort Memorial Library.....                                | 15        |
| Discussion Questions .....   | 15        |
| References.....  | 16        |
| <b>Chapter 2—The Historical Development of Systems Analysis.....</b> | <b>17</b> |
| Introduction.....  | 17        |
| Pioneers in Systems Analysis .....                                   | 17        |
| Steps in Modern Systems Analysis.....                                | 22        |
| Caveat.....  | 24        |
| Case Study—Fort Memorial Library .....                               | 24        |
| Discussion Questions .....   | 25        |
| References.....  | 26        |
| <b>Chapter 3—The Human Element .....</b>                             | <b>29</b> |
| Introduction.....  | 29        |
| Organizational Commitment .....                                      | 29        |
| Management Level.....  | 29        |
| Lower Administrative Levels.....                                     | 31        |

|  |           |
|--|-----------|
| <b>Chapter 3—The Human Element (cont.)</b>                         |           |
| Ethics of Systems Analysis.....                                    | 33        |
| Case Study—Fort Memorial Library .....                             | 35        |
| Discussion Questions .....   | 36        |
| References.....  | 36        |
| <b>Chapter 4—Identifying and Defining Problems.....</b>            | <b>37</b> |
| Introduction.....  | 37        |
| Identifying Problems .....   | 38        |
| Sources of Problems .....  | 40        |
| Taxonomy of Problems.....  | 42        |
| Case Study—Fort Memorial Library .....                             | 45        |
| Discussion Questions .....   | 46        |
| References.....  | 46        |
| <b>Chapter 5—Collecting Data.....</b>                              | <b>47</b> |
| Introduction.....  | 47        |
| Conducting Interviews.....   | 47        |
| Types of Interviews.....   | 50        |
| Criteria for Evaluating Interview Questions .....                  | 52        |
| Preparing for an Interview .....                                   | 53        |
| Administering Questionnaires .....                                 | 55        |
| Designing Questionnaires .....                                     | 56        |
| Action Logs .....  | 60        |
| Conducting Observations.....                                       | 61        |
| Using Existing Documentation.....                                  | 63        |
| Evaluation of the Usefulness of the Data Collection.....           | 63        |
| Practice in Selecting Data Collection Methods .....                | 63        |
| Case Study—Fort Memorial Library .....                             | 64        |
| Discussion Questions .....   | 64        |
| References.....  | 65        |
| <b>Chapter 6—Analyzing and Displaying Data in Flowcharts .....</b> | <b>67</b> |
| Standardization of Communication .....                             | 67        |
| Recording Data in Flowcharts .....                                 | 68        |
| Creating a Flowchart.....  | 71        |
| Flowchart Symbols .....  | 73        |
| Flowchart Conventions .....  | 73        |

|   |            |
|---|------------|
| Types of Flowcharts .....                           | 80         |
| Illustrative Examples.....                          | 82         |
| Practice in Drawing Flowcharts.....                 | 87         |
| Analysis of Data .....                              | 87         |
| Case Study—Fort Memorial Library .....              | 88         |
| Discussion Questions .....                          | 88         |
| References.....                                     | 89         |
| <b>Chapter 7—Designing Data Flow Diagrams .....</b> | <b>91</b>  |
| Introduction.....                                   | 91         |
| Data Flow Diagram Conventions .....                 | 92         |
| Uses of Symbols.....                                | 94         |
| Levels of Data Flow Diagrams .....                  | 95         |
| Designing a Data Flow Diagram .....                 | 97         |
| Typical Problems .....                              | 100        |
| Criteria for Evaluating a Data Flow Diagram .....   | 101        |
| Practice in Drawing DFDs.....                       | 103        |
| Data Dictionaries .....                             | 104        |
| Sample Data Dictionary Templates .....              | 104        |
| Case Study—Fort Memorial Library .....              | 109        |
| Discussion Questions .....                          | 110        |
| References.....                                     | 110        |
| <b>Chapter 8—Using Other Array Methods.....</b>     | <b>111</b> |
| Introduction.....                                   | 111        |
| Structured English .....                            | 111        |
| Decision Tables .....                               | 117        |
| Decision Trees .....                                | 119        |
| Practice in Constructing Decision Tables .....      | 122        |
| Selecting a Technique.....                          | 123        |
| Other Tools .....                                   | 124        |
| Nassi-Schneiderman Charts .....                     | 124        |
| Warnier-Orr Diagrams .....                          | 125        |
| Structure Charts.....                               | 128        |
| Entity Relationship Diagrams .....                  | 129        |
| Case Study—Fort Memorial Library .....              | 131        |
| Discussion Questions .....                          | 131        |
| References.....                                     | 132        |

|  |     |
|--|-----|
| <b>Chapter 9—Object-Oriented Techniques</b> .....  | 133 |
| The Object Orientation “Revolution” .....          | 133 |
| The Object-Oriented Paradigm .....                 | 134 |
| Object-Oriented Analysis and Design .....          | 136 |
| Steps in the Object-Oriented Analysis Method ..... | 136 |
| Prototyping .....                                  | 138 |
| Diagramming Tools .....                            | 139 |
| Unified Modeling Language .....                    | 140 |
| The Utility of the OOP .....                       | 141 |
| Case Study—Fort Memorial Library .....             | 143 |
| Discussion Questions .....                         | 144 |
| References .....                                   | 144 |
| <b>Chapter 10—Designing the System</b> .....       | 147 |
| Introduction .....                                 | 147 |
| Creation of Functional Specifications .....        | 147 |
| Determination of Alternatives .....                | 149 |
| Conceptual Design .....                            | 151 |
| Inputs .....                                       | 151 |
| Outputs .....                                      | 152 |
| Processes .....                                    | 153 |
| Files .....  | 153 |
| System Integration .....                           | 155 |
| Physical Aspects and Resources .....               | 156 |
| Case Study—Fort Memorial Library .....             | 156 |
| Discussion Questions .....                         | 157 |
| References .....                                   | 157 |
| <b>Chapter 11—Presenting the System</b> .....      | 159 |
| Introduction .....                                 | 159 |
| Principles of Formal Communication .....           | 160 |
| The Oral Presentation .....                        | 161 |
| Public Speaking .....                              | 163 |
| Written Reports .....                              | 164 |
| Documentation .....                                | 168 |
| Propaganda .....                                   | 169 |
| Summary .....                                      | 169 |
| Case Study—Fort Memorial Library .....             | 170 |
| Discussion Questions .....                         | 170 |

|  |         |
|--|---------|
| <b>Chapter 12—Selecting the System</b> .....   | 173     |
| Introduction.....                              | 173     |
| Existing Versus Custom Designed Systems .....  | 173     |
| Package Systems Versus Component Systems ..... | 174     |
| Pursuit of Perfection.....                     | 174     |
| System Selection.....                          | 174     |
| Determining Costs and Benefits .....           | 175     |
| Costs of Selection.....                        | 176     |
| Costs of Money .....                           | 177     |
| Nonquantifiable Costs and Benefits.....        | 178     |
| Designing Specifications .....                 | 179     |
| Requests for Proposals.....                    | 181     |
| Contracts .....                                | 184     |
| Exercise in Evaluation and Selection .....     | 184     |
| Case Study—Fort Memorial Library.....          | 185     |
| Discussion Questions .....                     | 186     |
| References.....                                | 186     |
| <br><b>Chapter 13—Managing a Project</b> ..... | <br>187 |
| Introduction.....                              | 187     |
| Performance Specifications .....               | 188     |
| Time.....                                      | 189     |
| Budget.....                                    | 190     |
| Overruns .....                                 | 191     |
| Steps in Project Management .....              | 192     |
| Statement of Work .....                        | 192     |
| The Implementation Plan .....                  | 192     |
| The Implementation Process .....               | 193     |
| Completion of the Project .....                | 195     |
| Tools for Project Control .....                | 196     |
| Drawing CPM Charts .....                       | 199     |
| Estimating Time for Activities .....           | 202     |
| Other Benefits of Network Diagrams .....       | 204     |
| Exercise in Project Management .....           | 207     |
| Case Study—Fort Memorial Library.....          | 208     |
| Discussion Questions .....                     | 209     |
| References.....                                | 209     |

|   |     |
|---|-----|
| <b>Chapter 14—Proving the System</b> .....            | 211 |
| Introduction.....                                     | 211 |
| Pre-Release Tests .....                               | 212 |
| Ad Hoc Testing .....                                  | 212 |
| Functional Testing.....                               | 213 |
| Structure Testing .....                               | 213 |
| Other Techniques .....                                | 214 |
| Implementation Tests.....                             | 214 |
| Reliability.....                                      | 214 |
| Functionality .....                                   | 215 |
| Capacity.....   | 216 |
| Incorporation of Tests.....                           | 217 |
| Case Study—Fort Memorial Library.....                 | 218 |
| Discussion Questions .....                            | 219 |
| <br>  |     |
| <b>Chapter 15—Strategies for Implementation</b> ..... | 221 |
| Introduction.....                                     | 221 |
| Site Preparation.....                                 | 221 |
| Physical Layout.....                                  | 222 |
| Power.....  | 222 |
| Communications .....                                  | 223 |
| Lighting.....   | 223 |
| Climate Control.....                                  | 223 |
| Noise Control .....                                   | 224 |
| Security .....  | 224 |
| Disaster Planning .....                               | 226 |
| Bringing Up a New System .....                        | 227 |
| First-Time Automation Efforts .....                   | 228 |
| Subsequent System Implementations.....                | 228 |
| Retrospective Conversion .....                        | 228 |
| Bibliographic Records.....                            | 229 |
| Authority Records .....                               | 230 |
| Holdings Records .....                                | 230 |
| Migration Conversion.....                             | 231 |
| System Maintenance .....                              | 231 |
| Vendor Relations .....                                | 232 |
| Conclusion .....                                      | 233 |
| Case Study—Fort Memorial Library.....                 | 234 |
| Discussion Questions .....                            | 235 |
