

Process Measurement and Control

Introduction to Sensors, Communication, Adjustment, and Control

Roy E. Fraser

CONTENTS

1 INTRODUCTION TO PROCESS MEASUREMENT AND CONTROL 1

- 1.1 Process Measurement and Control Defined 1
- 1.2 *Investment* 2
- 1.3 Continuous and Discrete Process Control Loops 3
- 1.4 The Process Block of a Control Loop 5
- 1.5 The Measuring Sensor Block of a Control Loop 6
- 1.6 The Controller Block of a Control Loop 7
- 1.7 The Process Adjustment Block of a Control Loop 7
- 1.8 The Signals Circulating Around a Control Loop 8

2 MEASURING SENSORS 11

- 2.1 Calibration 12
 - Steady-State Calibration 12
- 2.2 Process Variables and Selection of Sensors 15
- 2.3 Temperature 17
 - Thermocouples* 17
 - RTDs (Resistance Temperature Detectors) 21
- 2.4 Pressure 23
 - Installation of Pressure Sensors 24
 - Capacitance Diaphragm Pressure Sensors 27
 - Strain Gauge Diaphragm Pressure Sensors 27
 - Vibrating Wire Diaphragm Pressure Sensors 29
 - Quartz Bourdon Helix Pressure Sensors 29
- 2.5 Flow 29
 - Orifice Plate or Venturi 31
 - Vortex Shedding Flowmeter 35
 - Magnetic Flowmeter 36
 - Ultrasonic Flowmeter 37
 - Turbine Flowmeter 38

x | CONTENTS

2.6	Level	38	
	Liquid Pressure Sensors	39	
	Liquid Buoyancy Sensors	41	
	Ultrasonic Sensors	42	
	Container Weight Sensors	42	
	Tape Plus Surface Sensors	42	
2.7	Force and Weight	43	
	Pneumatic and Hydraulic Load Cells	44	
	Electrical Load Cells	44	
2.8	Analysis (Chemical) Variables	44	
	Humidity Analysis	44	
	Electrolytic Conductivity Analysis	48	
	Human Sensors	49	
2.9	Electric Power Industry Variables	49	
	Voltage and Current	50	
	Vars (Volt-Amperes Reactive)	51	
	Phase Angle	51	
	Frequency	51	
2.10	Other Sensors	51	
	Position, Velocity, and Acceleration	51	
2.11	Dynamic Calibration	52	

3 PRESENTATION OF DATA

69

3.1	Pressure Gauge	70
3.2	Multipoint Strip Chart Recorder	70
3.3	Single-Loop Flow Recorder	71
3.4	Computer Acquisition System	71
3.5	Overview Display	72
3.6	Group Display	74
3.7	Point Display	76
3.8	Trend Display	78
3.9	Hourly Average Display	78
3.10	Alarm Summary Display	78
3.11	Presentation Summary	81

4 DATA COMMUNICATIONS

85

4.1	Introduction	85
4.2	Media	87
	Pneumatic	87
	Electric Wires	88

	Radio Waves	88
	Optic Fibers	89
4.3	Analog Format	89
	Electronic	89
	Pneumatic	90
4.4	Digital Format	90
	Parallel	93
	Serial	93
4.5	Environment	95
	Interference	95
	Safety	96
	Junction Boxes	97
	Air Supply	97
	Electric Power Supply	98
	Solar Power	98
4.6	Networks	98
	Telephone System	99
	Radio Networks	99
	Local Area Networks	100
	MAP/TOP	100
	Fieldbus	102

5 PROCESS ADJUSTMENT

107

5.1	Liquid Flow Adjustment	107
	Variable Speed Pump Flow Adjustment	108
	Control Valve Flow Adjustment	109
	Capacity of a Liquid Control Valve	110
	Capacity Correction for Piping Geometry	112
	Control Valve Rangeability	112
	Control Valve Characteristic	113
	Selection of Liquid Flow Adjusting Device	114
5.2	Gas Flow Adjustment	116
	Gas Flow Process	117
	Capacity of a Gas Control Valve	119
	Control Valves, Dampers, and Louvres	121
	Variable Speed Fans	122

6 AUTOMATIC CONTROL

129

6.1	Introduction to the Controller of the Control Loop	129
6.2	Loop Stability	130
	Disturbances	130

xii | CONTENTS

•	Desired Performance of a Control Loop	131
	Effects of Loop Gain on Loop Stability	133
6.3	Proportional Control	135
6.4	Proportional Plus Integral Control	138
6.5	Proportional Plus Integral Plus Derivative Control	138
6.6	Loop Tuning	140
	Open Loop Gain Equals 1.0	140
	Setting Proportional Gain	141
6.7	Ratio Control	141
6.8	Cascade Control	142

Appendix A

ISA Symbols and Templates for Calibration Certificates and Graphs	151
---	-----

Appendix B

Control Valve Bodies, Actuators, Positioners, and Accessories	159
---	-----

Appendix C

Answers to Selected Problems	169
------------------------------	-----

Appendix D

ASCII Symbols and Codes	187
-------------------------	-----

Appendix E

Piping and Fittings	193
---------------------	-----

Appendix F

Thermocouple and RTD Tables	197
-----------------------------	-----

Glossary	203
-----------------	-----

Index	207
--------------	-----
