ABOUT THE AUTHORS vii

1

ENGINEERING AND ELECTRONIC WORKSHEETS 1

- 1.1 Introduction to Worksheets 1
- 1.2 Engineering Methods 2
 - 1.2.1 Problem Definition 2
 - 1.2.2 Information Gathering 3
 - 1.2.3 Selection of the Appropriate Theory or Methodology 3
 - 1.2.4 Collection of Simplifying Assumptions 3
 - 1.2.5 Solution and Refinement 3
 - 1.2.6 Testing and Verification 3
- 1.3 Issues in Engineering and Data Analysis 4
 - 1.3.1 Group Problem Solving 4
 - 1.3.2 Document Transfer 4
 - 1.3.3 Standardized Units 4
- 1.4 How to Use this Book 4
 - 1.4.1 Typographic Conventions Used in This Book 5

2

MICROSOFT EXCEL BASICS 7

- 2.1 Understanding the Excel 97 Screen 7
 - 2.1.1 Title Bar 7
 - 2.1.2 Menu Bar 8
 - 2.1.3 Toolbars 9
 - 2.1.4 Formula Bar 10
 - 2.1.5 Workbook Window 11
 - 2.1.6 Sheet Tabs 11
 - 2.1.7 Scrollbars 12
 - 2.1.8 Status Bar 12
- 2.2 Getting Help 12
 - 2.2.1 Choosing from the Table of Contents 13
 - 2.2.2 Searching the Help Index 13
 - 2.2.3 Searching for Keywords in the Help Text 14
 - 2.2.4 Using the Office Assistant 15
 - 2.2.5 Using the What's This Feature 15
 - 2.2.6 Learning from the Tip of the Day 15
 - 2.2.7 Accessing Help from the World Wide Web 15
 - 2.2.8 Accessing Special Help for Lotus 1-2-3 Users 15
- 2.3 Manipulating Windows 15
 - 2.3.1 Minimize Control Button 16
 - 2.3.2 Full Screen Control Button 16
 - 2.3.3 Close Control Button 17
- 2.4 Creating and Saving Worksheets and Workbooks 17
 - 2.4.1 Introduction to Templates 17

2.4.2	Creating and Opening Documents	17
2.4.3	Naming Documents	18
2.4.4	Opening Workbooks with Macros	18
2.4.5	Saving Documents	19
2.5	Editing a Worksheet	20
2.5.1	Moving around a Worksheet	20
2.5.2	Selecting a Region	23
2.5.3	Cutting, Moving, Copying, and Pasting	24
2.5.4	Inserting and Deleting Cells	25
2.5.5	Shortcut Keys	26
2.5.6	Undoing Mistakes	27
2.5.7	Spell Checking	27
2.5.8	The AutoCorrect Feature	27
2.6	Previewing and Printing a Worksheet	28
2.6.1	Previewing a Worksheet	28
2.6.2	Printing a Worksheet	29

3 ENTERING AND FORMATTING DATA 31

3.1	Entering Data	31
3.1.1	Numerical Data	31
3.1.2	Text Data	33
3.1.3	Date and Time Data	33
3.1.4	Fill Handles	34
3.2	Formatting Worksheets	35
3.2.1	Formatting Cells	35
3.2.2	Formatting Columns and Rows	35
3.2.3	Table AutoFormats	36
3.2.4	Conditional Formatting	37
3.2.5	Sorting	37
3.2.6	Formatting Entire Worksheets	39

4 ENGINEERING COMPUTATION 49

4.1	Introduction	49
4.2	Creating and Using Formulas	49
4.2.1	Formula Syntax	50
4.2.2	Selecting Ranges	51
4.2.3	Cell and Range Names	52
4.2.4	Absolute and Relative References	53
4.2.5	Error Messages	57
4.2.6	Debugging Errors Using Cell Selection	58
4.2.7	Debugging Errors Using Tracing	59
4.3	Mathematical Functions	60
4.4	Matrix Operations	61
4.5	Using Macros to Automate Computations	63
4.5.1	Recording a Macro	63
4.5.2	Executing a Macro	65
4.5.3	Editing a Macro	65

5 WORKING WITH CHARTS 73

5.1	Creating Charts	73
5.1.1	Using the Chart Wizard to Create an XY Scatter Chart	73
5.1.2	Creating a Chart Using Shortcut Keys	76
5.1.3	Previewing and Printing Charts	79
5.2	Adding and Editing Chart Data	80
5.2.1	Adding Data Points	80
5.2.2	Multiple Data Series	82

- 5.3 **Formatting Charts** 84
 - 5.3.1 Creating Chart Objects 84
 - 5.3.2 Formatting Chart Objects 84
 - 5.3.3 Changing Chart Types 86
 - 5.3.4 Inserting Text 87
- 5.4 **Charting Features Useful to Engineers** 88
 - 5.4.1 Scaling an Axis 88
 - 5.4.2 Error Bars 88

6 PERFORMING DATA ANALYSIS AND OPTIMIZATION 97

- 6.1 **Using the Analysis ToolPak** 97
- 6.2 **Descriptive Statistics** 99
- 6.3 **Correlation** 102
- 6.4 **Linear Regression** 102
- 6.5 **Trend Analysis** 104
 - 6.5.1 Trend Analysis with Data Series 104
 - 6.5.2 Trend Analysis Functions 105
 - 6.5.3 Trend Analysis for Charts 107
- 6.6 **Pivot Tables for Interactive Analysis** 110
- 6.7 **Using the Goal Seeker for What-If Analysis** 112
- 6.8 **Using Solver for Optimization Problems** 113
 - 6.8.1 Introduction to Microsoft Excel Solver 113
 - 6.8.2 Setting Up an Optimization Problem in Excel 114
 - 6.8.3 Linear Optimization Example 114
 - 6.8.4 Non-Linear Optimization Example 117

7 DATABASE MANAGEMENT WITHIN EXCEL 125

- 7.1 **Introduction** 125
- 7.2 **Creating Databases** 125
 - 7.2.1 Database Terminology 125
 - 7.2.2 Database Creation Tips 126
 - 7.2.3 Entering Data 126
- 7.3 **Sorting, Searching, and Filtering** 128
 - 7.3.1 Sorting a Database 128
 - 7.3.2 Searching and Filtering 128
 - 7.3.3 External Data Retrieval Using Microsoft Query 131

8 COLLABORATING WITH OTHER ENGINEERS 143

- 8.1 **The Collaborative Design Process** 143
 - 8.1.1 Microsoft Excel and Collaboration 143
- 8.2 **Tracking Changes** 144
 - 8.2.1 Incorporating or Rejecting Revisions 145
- 8.3 **Adding Comments to a Document** 146
- 8.4 **Maintaining Shared Workbooks** 147
 - 8.4.1 Keeping a Change History 147
 - 8.4.2 Timed Updates 148
 - 8.4.3 Managing Conflicts 148
 - 8.4.4 Personal Views 149
 - 8.4.5 Merging Workbooks 149
 - 8.4.6 Viewing the History of Changes 149
 - 8.4.7 Restrictions for Shared Workbooks 149
- 8.5 **Password Protection** 150
 - 8.5.1 Open Protection 150
 - 8.5.2 Write Protection 151
 - 8.5.3 Sheet Protection 151
 - 8.5.4 Workbook Protection 152

- 8.6 Importing and Exporting Data from External File Formats 152
 - 8.6.1 Import Using the File Open Option 152
 - 8.6.2 Importing Text Data Using the Text Import Wizard 153
- 8.7 Conducting a Team Meeting 155

9

EXCEL AND THE WORLD WIDE WEB 161

- 9.1 Engineering and the Internet 161
- 9.2 Accessing the World Wide Web from within Excel 162
- 9.3 Web Sites Related to Microsoft Excel 164
- 9.4 Retrieving Data from a Web Page 164
- 9.5 Accessing FTP Sites from within Excel 166
- 9.6 Creating Hyperlinks within a Worksheet 167
- 9.7 Converting a Worksheet to a Web Page 169

APPENDIX A: COMMONLY USED FUNCTIONS 173
