COMPUTATIONAL METHODS IN SURFACE AND COLLOID SCIENCE

edited by
Małgorzata Borówko

Contents

Preface *iii*

Contributors *vii*

1. Structure and Phase Behavior of Confined Soft Condensed Matter 1
Martin Schoen
2. Quantum Effects in Adsorption at Surfaces 77
Peter Nielaba
3. Integral Equations in the Theory of Simple Fluids 135
Douglas Henderson, Stefan Sokołowski, and Malgorzata Borówko
4. Nonuniform Associating Fluids 167
Malgorzata Borówko, Stefan Sokołowski, and Orest Pizio
5. Computer Simulations and Theory of Adsorption on Energetically and Geometrically Heterogeneous Surfaces 245
Andrzej Patrykiew and Malgorzata Borówko
6. Adsorption in Random Porous Media 293
Orest Pizio
7. Water and Solutions at Interfaces: Computer Simulations on the Molecular Level 347
Eckhard Spohr

8.	Surface Chemical Reactions <i>Ezequiel Vicente Albano</i>	387
9.	Theoretical Approaches to the Kinetics of Adsorption, Desorption, and Reactions at Surfaces <i>H. J. Kreuzer and Stephen H. Payne</i>	439
10.	Computer Simulations of Dense Polymers <i>Kurt Kremer and Florian Müller-Plathe</i>	481
11.	Computer Simulations of Living Polymers and Giant Micelles <i>Andrey Milchev</i>	509
12.	Conformational and Dynamic Properties of Polymer Chains Adsorbed on Hard Surfaces <i>Andrey Milchev</i>	555
13.	Systems Involving Surfactants <i>Friederike Schmid</i>	631
14.	Ordering in Microemulsions <i>Robert Holyst, Alina Ciach, and Wojciech T. Góźdź</i>	685
15.	Simulations of Systems with Colloidal Particles <i>Matthias Schmidt</i>	745
16.	Fluids in Contact with Semi-permeable Membranes <i>Sohail Murad and Jack G. Powles</i>	775
17.	Double Layer Theory: A New Point of View <i>Janusz Stafiej and Jean Badiali</i>	799
18.	Crystal Growth and Solidification <i>Heiner Müller-Krumbhaar and Yukio Saito</i>	851
	<i>Index</i>	933
