

Mixing and Crystallization

Edited by
Bhaskar Sen Gupta and Shafiza Ibrahim

KLUWER ACADEMIC PUBLISHERS

Contents

Foreword	xi
MIXING	
G.D. Rigby, G. Lane, G.M. Evans CFD Modelling of Hydrodynamic Conditions within the Wake of Mixing Impeller Blades	1
M.Liu, C.D. Andreasen, R. La Roche, S. Choudhary Visualisation and quantification of laminar flow mixing in a stirred tank reactor	15
K.C. Lee, N.A. Borret, M. Yianneskis Turbulence structure and isotropy in stirred vessels	29
Z.D. Chen, J.J.J. Chen A study of agitated gas-liquid reactors with concave blade impellers	43
W. Bujalski, D. Hari-Prajitno, K. Takenaka, J. McKemie, A.W. Nienow Studies of aerated mixing with multiple axial flow hydrofoil (APV-B2) impellers	57
M.S. Takriff, W.R. Penney, J.B. Fasano Interstage backmixing of a gas-liquid multistage, mechanically-agita- ted, compartmented column	67
G.M. Evans, W.P. Mao, G.J. Jameson Mass transfer in a plunging liquid jet	75
G.R. Drewer, N. Ahmed, G.J. Jameson An optimum concentration for the suspension of solids in stirred vessels	83
CRYSTALLIZATION	
Y. Yamazaki, H. Yazawa, Y. Hirata Freeze concentration with ice-lining in a crystallizer of agitated vessel	95

H. Schubert, A. Mersmann

How agglomeration Processes affect experimentally determined nucleation rates 105

R.A. Williams, X. Jia, R.M. West, K.J. Roberts

On-line measurement of solids distribution I stirred tanks and crystallizers using electrical computed tomography 113

K. Ogawa, Z. Sha, S. Palosaari

A new expression for dispersedness of multi-phase taking account of consideration of local size distribution 125

Z. Sha, S. Palosaari

Size dependent classification function in imperfectly mixed suspension continuous crystallizer 133

M.L.J. van Leeuwen, D.S.L. Bruinsma, G.M. van Rosmalen,**M.J. Hounslow, M.M. Seckler**

An experimental study to the effects of supersaturation ratio, impeller design and Impeller speed on agglomeration of aluminium trihydroxide 151

R.M. Cooper, G.M. Parkinson, O.M.G. Newman

The precipitation of silica from acidic zinc leach liquors 163

V. Nallet, D. Mangin, J.P. Klein

Precipitation of microcrystals of salicycle acid in a T mixer: experimental study and Modelling 177

N.S. Tavare

Mixing, reaction and precipitation: The Barium Sulphate Precipitation System 191

R. Phillips, S. Rohani, J. Baldyga

Micromixing in a Single Feed Semibatch Precipitation Process 205

A. Futia, H.M. Ang, D. Ilievski

Yield Model of a Batch Gibbsite Precipitator 215

T.S. Li, A.L. Rohl, D. Ilievski

Modelling of a Constant Supersaturation Precipitator 227

A. Mersmann, C. Heyer, H. Schubert How to Influence the Median Crystal Size of Precipitates	243
L.T. Fan, S.T. Chou, W.Y. Chen, M. Bai, J.P. Hsu Modeling Fluctuation in the Growth Rate of a Single Crystal	253
A.M. Neumann, S.K. Bermingham, H.J.M. Kramer, G.M. van Rosmalen Modeling the Attrition Process in a 22 Liter Draft Tube Crystallizer	267
M.L.J. van Leeuwen, D.S.L. Bruinsma, G.M. van Rosmalen Computational Fluid Dynamics Approach to Precipitation Reactions: The Importance Of Subgrid-Scale Fluctuations	281
J.G. Wijers, J.H.A. Schoenmakers, D. Thoenes Scaling-up of Reactive Crystallizers	293
T. Nomura, K. Shimizu, K. Takahashi In-situ Measurement Method of Crystal Concentration in a Seeded Batch Crystallizer	309
K.C. Lim, M.A. Hashim, B. Sen Gupta Monte Carlo Simulation of the Crystal Size Distribution with Attrition Effects in a Mixed Suspension Crystallizer	317
E.T. White A Review of the Crystallization of Sugar	329
