

Technological and Medical Implications of Metabolic Control Analysis

Edited by

Athel Cornish-Bowden and
María Luz Cárdenas

NATO Science Series

3. High Technology – Vol. 74

CONTENTS

1. PROVOKING AN ARGUMENT: PROBLEMS WITH CURRENT APPROACHES TO THE ANALYSIS OF BIOCHEMICAL SYSTEMS

1. D. B. Kell & P. Mendes *Snapshots of systems: metabolic control analysis and biotechnology in the post-genomic era* 3
2. J. M. Rohwer, B. G. Olivier & J.-H. S. Hofmeyr *Moiety conservation and flux enhancement* 27
3. L. Acerenza *On the universality of the universal method* 33

2. IMPOSING DISCIPLINE: MANIPULATION OF ORGANISMS FOR TECHNOLOGICAL ENDS

4. J. E. Bailey *Life is complicated* 41
5. J. C. Liao *Regulation and redirection of metabolism: incorporating regulatory information in flux calculation* 49
6. S. Schuster, T. Dandekar, K. Mauch, M. Reuss & D. Fell *Recent developments in metabolic pathway analysis and their potential implications for biotechnology and medicine* 57
7. J. L. Snoep, C. C. van der Weijden, H. W. Andersen, H. V. Westerhoff & P. R. Jensen *Quantifying the importance of regulatory loops in homeostatic control mechanisms: hierarchical control of DNA supercoiling* 67
8. J. M. Rohwer & J.-H. S. Hofmeyr *An integrated approach to the analysis of the control and regulation of cellular systems* 73

3. UNDERSTANDING HEALTH AND DISEASE: WHY ORGANISMS BEHAVE AS THEY DO
