

# SHELF-LIFE EVALUATION OF FOODS

SECOND EDITION

Dominic Man • Adrian Jones

AN ASPEN PUBLICATION

# Contents

<b>Contributors</b> .....	<b>xiii</b>
<b>Preface to Second Edition</b> .....	<b>xv</b>
<b>PART I—THE PRINCIPLES</b> .....	<b>1</b>
<b>Chapter 1 Scientific Principles of Shelf-Life Evaluation</b> .....	<b>3</b>
R.P. Singh	
<b>1.1 Introduction</b> .....	<b>3</b>
<b>1.2 Major modes of food deterioration</b> .....	<b>3</b>
1.2.1 Physical changes .....	3
1.2.2 Chemical changes .....	4
1.2.3 Microbiological changes .....	4
<b>1.3 Evaluation of food quality</b> .....	<b>6</b>
1.3.1 Reaction kinetics .....	7
1.3.2 Determination of kinetic parameters .....	12
1.3.3 Shelf-life plots .....	14
<b>1.4 Use of sensors to monitor shelf life of foods</b> .....	<b>15</b>
1.4.1 Critical temperature indicators .....	17
1.4.2 Partial history indicators .....	17
1.4.3 Full history indicators .....	17
<b>1.5 Conclusions</b> .....	<b>20</b>
<b>References</b> .....	<b>20</b>
<b>Chapter 2 The Methodology of Shelf-Life Determination</b> .....	<b>23</b>
M.J. Ellis and C.M.D. Man	
<b>2.1 Integration of shelf-life procedures into a total quality system</b> .....	<b>23</b>
<b>2.2 Food legislation and shelf life</b> .....	<b>25</b>
<b>2.3 Forms of quality deterioration during storage</b> .....	<b>26</b>
<b>2.4 Procedures for direct determination and monitoring of shelf life</b> .....	<b>28</b>
<b>2.5 Methodology for accelerated estimation of shelf life</b> .....	<b>31</b>
<b>2.6 The importance of shelf life to quality and distribution</b> .....	<b>32</b>

	<b>2.7 Conclusions</b> .....	32
	<b>References</b> .....	33
<b>Chapter 3</b>	<b>The Principles and Practice of Shelf-Life Prediction for Microorganisms</b> .....	<b>34</b>
	S.J. Walker	
	<b>3.1 Introduction</b> .....	34
	<b>3.2 Development of predictive models</b> .....	35
	3.2.1 Microorganism selection and inoculation .....	35
	3.2.2 Experimental design .....	35
	3.2.3 Data collection .....	35
	3.2.4 Modeling .....	35
	3.2.5 Model validation .....	35
	3.2.6 Obtaining predictions .....	36
	<b>3.3 Uses of models</b> .....	37
	3.3.1 New product development .....	37
	3.3.2 Process design .....	37
	3.3.3 HACCP .....	38
	3.3.4 Risk assessment .....	39
	3.3.5 Time-temperature profiles .....	39
	3.3.6 Training and education .....	39
	<b>3.4 Limitations of models</b> .....	39
	<b>3.5 The future</b> .....	40
	<b>References</b> .....	41
<b>Chapter 4</b>	<b>Packaging and Food Quality</b> .....	<b>42</b>
	U. Stöllman, F. Johansson, and A. Leufvén	
	<b>4.1 Introduction</b> .....	42
	<b>4.2 Plastics packaging materials for food</b> .....	43
	4.2.1 Polyolefins .....	43
	4.2.2 Polyvinyl chloride (PVC) .....	43
	4.2.3 Polyvinylidene chloride (PVdC) .....	44
	4.2.4 Ethylene vinyl alcohol (EVOH) .....	44
	4.2.5 Polystyrene (PS) .....	44
	4.2.6 Polyamides (nylons) .....	44
	4.2.7 Polyesters .....	44
	4.2.8 Polycarbonates (PC) .....	44
	4.2.9 Lamination and coextrusion .....	44
	<b>4.3 Some packaging systems and recent developments</b> .....	45
	4.3.1 Trends in food packaging .....	45
	4.3.2 Silica-coated films .....	46
	4.3.3 Active packaging technologies .....	46
	4.3.4 Modified atmosphere packaging (MAP) .....	48
	4.3.5 Aseptic/ultra-high temperature (UHT) packaging .....	49
	4.3.6 Sous vide (vacuum cooking/packaging) technology .....	49
	4.3.7 Edible films .....	49

4.4	<b>The influence of “scalping” on food</b> .....	50
4.4.1	The limonene controversy .....	50
4.4.2	The influence of pulp content on scalping .....	51
4.4.3	Comparison of instrumental and sensory analysis .....	51
4.4.4	Influence of scalping on barrier and mechanical properties .....	52
4.4.5	Methods of suppressing scalping .....	52
4.5	<b>Flavor transfer problems in refillable PET bottles</b> .....	52
4.6	<b>Conclusions</b> .....	53
	<b>References</b> .....	54
<b>Chapter 5</b>	<b>The Hazard Analysis Critical Control Point (HACCP) System</b> .....	<b>57</b>
	P.J. Smedley	
5.1	<b>Introduction</b> .....	57
5.2	<b>Background</b> .....	57
5.3	<b>Chronology</b> .....	57
5.4	<b>HACCP principles</b> .....	60
5.4.1	Preliminary stages in an HACCP study .....	60
5.4.2	HACCP principles .....	61
5.5	<b>HACCP and legislation</b> .....	67
5.6	<b>HACCP and shelf life</b> .....	70
	<b>References</b> .....	71
<b>Chapter 6</b>	<b>Preservation Technology and Shelf Life</b> .....	<b>73</b>
	R.J. Winger	
6.1	<b>Introduction</b> .....	73
6.2	<b>The three Ps—product, processing, and packaging</b> .....	73
6.3	<b>Two additional Ps: people and price</b> .....	74
6.3.1	People .....	74
6.3.2	Price .....	75
6.4	<b>Product</b> .....	75
6.5	<b>Process</b> .....	75
6.5.1	Drying .....	76
6.5.2	Thermal preservation (heat processing) .....	76
6.5.3	Refrigeration .....	78
6.5.4	Radiation .....	78
6.5.5	High hydrostatic pressures .....	78
6.5.6	Separation processes .....	79
6.5.7	Ultrasound, pulsed electric fields, and pulsed magnetic fields .....	79
6.6	<b>Packaging</b> .....	80
6.7	<b>Combined PPP effects</b> .....	81
6.8	<b>A typical food problem</b> .....	82
6.9	<b>Emerging opportunities</b> .....	84
6.10	<b>Conclusions</b> .....	84
	<b>References</b> .....	85

<b>PART II—THE PRACTICE</b> .....	<b>87</b>
<b>Chapter 7 Chilled Yogurt and Other Dairy Desserts</b> .....	<b>89</b>
M. Lewis and R.H. Dale	
<b>7.1 Introduction</b> .....	89
<b>7.2 Products, product groups, and characteristics</b> .....	90
7.2.1 Product groups .....	90
7.2.2 Product characteristics .....	90
<b>7.3 Factors affecting shelf life</b> .....	92
7.3.1 Raw materials .....	92
7.3.2 Processing .....	94
7.3.3 Filling and packaging .....	99
7.3.4 Storage and distribution .....	101
7.3.5 Consumer storage .....	101
<b>7.4 Evaluation methods</b> .....	102
7.4.1 Shelf-life determination—yogurt .....	102
<b>7.5 Current developments and the future</b> .....	105
<b>Bibliography</b> .....	109
<b>Chapter 8 Fresh and Lightly Preserved Seafood</b> .....	<b>110</b>
P. Dalgaard	
<b>8.1 Introduction</b> .....	110
<b>8.2 Microbiology and the specific spoilage organism (SSO) concept</b> .....	111
<b>8.3 Determination of shelf life</b> .....	114
8.3.1 Sensory methods .....	114
8.3.2 Instrumental methods .....	117
<b>8.4 Shelf-life prediction</b> .....	125
8.4.1 Kinetic models for growth of SSO .....	126
8.4.2 Empirical models for relative rates of spoilage .....	126
8.4.3 Linear models for indices of spoilage .....	129
8.4.4 Application software and time-temperature integration .....	130
<b>8.5 Extension of shelf life</b> .....	132
<b>8.6 Concluding remarks</b> .....	133
<b>References</b> .....	133
<b>Chapter 9 Ambient Packaged Cakes</b> .....	<b>140</b>
H.P. Jones	
<b>9.1 Introduction</b> .....	140
<b>9.2 Product classification</b> .....	140
<b>9.3 Equilibrium relative humidity and mold-free shelf life</b> .....	141
<b>9.4 Product characteristics</b> .....	142
9.4.1 Sponge cakes .....	142
9.4.2 Fruit cakes .....	143
9.4.3 Plain cakes .....	144
9.4.4 Chocolate coated cakes .....	144
9.4.5 Fruit pies .....	144

	9.4.6	Pastries .....	144
	9.4.7	Product characteristics—a summary .....	145
<b>9.5</b>		<b>Factors affecting shelf life</b> .....	145
	9.5.1	Microbiological spoilage .....	145
	9.5.2	Crumb staling .....	145
	9.5.3	Rancidity .....	146
	9.5.4	Crystalization of sugars .....	146
	9.5.5	Syneresis of jams and jellies .....	146
	9.5.6	Color fade, change, and transfer .....	146
	9.5.7	Off-flavors and odors other than rancidity .....	146
	9.5.8	Chocolate bloom .....	146
	9.5.9	Structural weakness .....	147
	9.5.10	Moisture migration .....	147
<b>9.6</b>		<b>ERH CALC</b> .....	147
<b>9.7</b>		<b>The determination of product shelf life</b> .....	148
	9.7.1	Product data .....	148
	9.7.2	External factors .....	149
<b>9.8</b>		<b>Shelf-life determination</b> .....	150
	9.8.1	Product development activities .....	152
	9.8.2	An example—a white chocolate mini-sponge roll .....	152
<b>9.9</b>		<b>Current developments</b> .....	153
	9.9.1	Shelf-life extension .....	153
	9.9.2	Shorter lead time to market .....	153
		<b>References</b> .....	155
<b>Chapter 10</b>		<b>Potato Chips and Savory Snacks</b> .....	<b>157</b>
		C.M.D. Man	
	<b>10.1</b>	<b>Introduction</b> .....	157
	<b>10.2</b>	<b>The product group</b> .....	157
	<b>10.3</b>	<b>Factors affecting the shelf life of potato chips and savory snacks</b> .....	158
	10.3.1	The oil .....	158
	10.3.2	Seasoning .....	158
	10.3.3	The process .....	159
	10.3.4	Packaging materials .....	159
	10.3.5	Environmental factors .....	162
	10.3.6	Legal standards .....	163
	<b>10.4</b>	<b>Shelf-life determination</b> .....	163
		<b>References</b> .....	166
		<b>Appendix 10—A—Flavor loss calculations</b> .....	168
<b>Chapter 11</b>		<b>Chocolate Confectionery</b> .....	<b>169</b>
		A.V. Martin	
	<b>11.1</b>	<b>Introduction</b> .....	169
	<b>11.2</b>	<b>Composition of chocolate</b> .....	169
	11.2.1	Cocoa liquor .....	169
	11.2.2	Fats .....	170
	11.2.3	Sugar .....	170

<b>11.3</b>	<b><i>Manufacture of chocolate</i></b> .....	170
11.3.1	Mixing .....	170
11.3.2	Refining .....	170
11.3.3	Conching .....	170
11.3.4	Tempering .....	171
11.3.5	Uses of chocolate .....	171
<b>11.4</b>	<b><i>Types of chocolate confectionery</i></b> .....	171
11.4.1	Molded blocks .....	171
11.4.2	Filled blocks .....	171
11.4.3	Count lines .....	172
11.4.4	Assortments .....	172
11.4.5	Straight lines .....	172
11.4.6	White chocolate .....	172
<b>11.5</b>	<b><i>Attributes of milk chocolate</i></b> .....	172
11.5.1	Texture .....	172
11.5.2	Flavor .....	173
<b>11.6</b>	<b><i>Causes of deterioration in quality</i></b> .....	173
11.6.1	Product factors .....	173
11.6.2	Environmental factors .....	174
<b>11.7</b>	<b><i>Control of shelf life by packaging</i></b> .....	175
11.7.1	Heat .....	175
11.7.2	Moisture .....	175
11.7.3	Oxygen .....	175
11.7.4	Taint/loss of flavor .....	176
11.7.5	Light .....	176
<b>11.8</b>	<b><i>Determination of shelf life</i></b> .....	176
11.8.1	Shelf life of new products .....	177
11.8.2	Types of test .....	178
11.8.3	Results of keeping test—scoring system .....	178
<b>11.9</b>	<b><i>Packaging materials—taint testing</i></b> .....	179
11.9.1	Robinson test .....	180
11.9.2	Gas liquid chromatography (GLC) .....	180
11.9.3	Aroma index .....	181
11.9.4	General .....	181
	<b><i>Bibliography</i></b> .....	181
<b>Chapter 12</b>	<b>Ready-to-Eat Breakfast Cereals</b> .....	<b>182</b>
	J.A.K. Howarth	
<b>12.1</b>	<b><i>Introduction</i></b> .....	<b>182</b>
<b>12.2</b>	<b><i>The products</i></b> .....	<b>183</b>
12.2.1	Uncoated cereals .....	183
12.2.2	Coated products .....	183
12.2.3	Products with added components .....	183
12.2.4	Muesli products .....	183
12.2.5	New products .....	183

<b>12.3</b>	<b><i>Factors affecting shelf life</i></b> .....	183
12.3.1	Raw materials .....	184
12.3.2	Processing .....	184
12.3.3	Packaging materials .....	184
12.3.4	Climate and storage conditions .....	184
<b>12.4</b>	<b><i>Determination of shelf life</i></b> .....	185
12.4.1	Initial determination of shelf life .....	185
12.4.2	Shelf-life testing .....	186
12.4.3	Example 1—flaked/puffed product .....	188
12.4.4	Example 2—cereal with added components .....	191
12.4.5	Example 3—coated products, e.g., extruded, coated cereal .....	193
12.4.6	Monitoring activities .....	194
<b>12.5</b>	<b><i>Conclusions</i></b> .....	194
	<b><i>Bibliography</i></b> .....	196
<b>Chapter 13</b>	<b>The Storage of Thermally Processed Foods in Containers</b>	
	Other Than Cans .....	197
	M.R. Goddard	
<b>13.1</b>	<b><i>Introduction and background</i></b> .....	197
<b>13.2</b>	<b><i>Product groups and their characteristics</i></b> .....	198
<b>13.3</b>	<b><i>Specific factors affecting shelf life</i></b> .....	198
13.3.1	Enzymic activity .....	198
13.3.2	Chemical changes .....	198
13.3.3	Physical breakdown .....	200
13.3.4	Other factors influencing shelf life .....	201
<b>13.4</b>	<b><i>Determination of shelf life</i></b> .....	202
13.4.1	Storage protocol .....	203
13.4.2	Sensory analysis .....	204
<b>13.5</b>	<b><i>An example—pasta shapes in savory tomato sauce</i></b> .....	205
13.5.1	Protocol .....	205
13.5.2	QDA/liking testing .....	206
13.5.3	Interpretation of results .....	208
	<b><i>References</i></b> .....	209
<b>Chapter 14</b>	<b>Ambient-Stable Sauces and Pickles</b> .....	211
	A.A. Jones	
<b>14.1</b>	<b><i>Introduction</i></b> .....	211
<b>14.2</b>	<b><i>The products</i></b> .....	212
14.2.1	Sauces .....	212
14.2.2	Pickles and other related products .....	213
<b>14.3</b>	<b><i>Factors affecting shelf life</i></b> .....	214
14.3.1	Raw materials .....	214
14.3.2	Composition and formulation .....	214
14.3.3	Availability of oxygen .....	216

	14.3.4	Processing .....	216
	14.3.5	Packaging .....	217
	14.3.6	Consumer use .....	218
<b>14.4</b>		<b>Challenge testing and the use of mathematical models</b> .....	218
	14.4.1	Challenge testing .....	218
	14.4.2	Mathematical models .....	219
<b>14.5</b>		<b>Shelf-life evaluation</b> .....	221
	14.5.1	Shelf-life determination .....	221
	14.5.2	A worked example .....	222
<b>14.6</b>		<b>Current developments</b> .....	223
	14.6.1	Alternative ingredients and packaging .....	223
	14.6.2	New techniques in shelf-life determinations .....	225
<b>14.7</b>		<b>Conclusion</b> .....	225
		<b>References</b> .....	226
<b>Chapter 15</b>		<b>Frozen Foods</b> .....	<b>227</b>
		H. Symons	
<b>15.1</b>		<b>How many industries?</b> .....	227
	15.1.1	Speed of freezing .....	227
	15.1.2	Ice cream/quick frozen foods/frozen foods .....	228
<b>15.2</b>		<b>Stability of frozen foods</b> .....	228
	15.2.1	Microorganisms .....	228
	15.2.2	Ice mobility .....	229
	15.2.3	Physico-chemical reactions .....	229
	15.2.4	Time-temperature tolerance (TTT) .....	230
	15.2.5	Product quality, processing, and packaging (PPP) factors .....	230
	15.2.6	Glassy state .....	230
	15.2.7	Know your product .....	231
	15.2.8	Objective tests .....	231
	15.2.9	Accelerated testing .....	233
	15.2.10	Just noticeable difference .....	234
	15.2.11	$Q_{10}(q_{10})$ .....	234
<b>15.3</b>		<b>Product characteristics</b> .....	235
	15.3.1	Fruits and vegetables .....	235
	15.3.2	Seafood .....	235
	15.3.3	Meat .....	236
	15.3.4	Bakery products .....	237
	15.3.5	Prepared products .....	238
<b>15.4</b>		<b>The cold chain</b> .....	238
	15.4.1	Temperature monitoring .....	239
	15.4.2	Time-temperature indicators .....	239
	15.4.3	Control of time in storage .....	240
		<b>References</b> .....	240

<b>Chapter 16</b>	<b>Minimally Processed, Ready-to-Eat, and Ambient-Stable Meat Products .....</b>	<b>242</b>
	L. Leistner	
<b>16.1</b>	<b>Introduction .....</b>	<b>242</b>
<b>16.2</b>	<b>Hurdle technology foods .....</b>	<b>242</b>
	16.2.1 Hurdle effect .....	243
	16.2.2 Hurdle technology .....	244
	16.2.3 Basic aspects .....	244
	16.2.4 Total quality .....	246
<b>16.3</b>	<b>Fermented meat products .....</b>	<b>247</b>
	16.3.1 Raw sausages .....	247
	16.3.2 Mini-salami .....	250
	16.3.3 Raw hams .....	250
<b>16.4</b>	<b>Heat-processed meat products .....</b>	<b>251</b>
	16.4.1 F-SSP .....	251
	16.4.2 $a_w$ -SSP .....	253
	16.4.3 pH-SSP .....	253
	16.4.4 Combi-SSP .....	254
<b>16.5</b>	<b>Product design and shelf-life evaluation of minimally processed meat products .....</b>	<b>255</b>
	16.5.1 Army study—a practical example .....	255
	16.5.2 User guide to food design .....	256
<b>16.6</b>	<b>Current trends in hurdle technology foods .....</b>	<b>259</b>
	16.6.1 Topical applications in industrialized countries .....	259
	16.6.2 Topical applications in developing countries .....	260
<b>16.7</b>	<b>Conclusions .....</b>	<b>261</b>
	<b>References .....</b>	<b>262</b>
<b>Index .....</b>		<b>264</b>
