# Introduction *to* Neuroscience

Gary G. Matthews

*b*

Blackwell Science

## **Unit I: Organization of the Nervous System**

1

### **1. The Vertebrate Nervous System**

3

1. The Peripheral Nervous System
2. The Central Nervous System

3

5

### **2. Development of the Vertebrate Nervous System**

12

1. Neural Induction in the Early Embryo
2. Early Development of the Nervous System
3. Neuronal Proliferation and Migration

12

14

17

## **Unit II: Electrical Properties of Nerve Cells**

23

### **3. Origin of Electrical Membrane Potential**

25

1. Ionic Equilibrium
2. Steady-State Membrane Potential

25

28

### **4. The Action Potential**

35

1. Characteristics of the Action Potential
2. Voltage-Dependent Ion Channels

35

38

### **5. Synaptic Transmission**

40

1. Presynaptic Events in Synaptic Transmission
2. Postsynaptic Events in Synaptic Transmission

44

47

## **Unit III: Sensory Systems**

55

### **6. General Characteristics of Sensory Systems**

57

1. Sensory Receptor Neurons
2. Processing Sensory Information

57

60

### **7. The Somatic Senses**

66

1. Somatosensory Receptor Neurons
2. Spinal Cord and Brain Stem Pathways for Somatosensory Information

66

69

69

3. Thalamocortical Processing of Somatosensory Information	73
8. The Visual System	81
1. Phototransduction	81
2. Synaptic Organization of the Retina	85
3. Higher Visual Processing	87
9. The Auditory System	95
1. Hair Cells and the Cochlea	95
2. The Auditory System of the Brain	99
10. Chemical Senses	105
1. The Olfactory System	105
2. The Gustatory System	108
<b>EXAM: First Midterm</b>	115
<b>Unit IV: Motor Control Systems</b>	119
11. Neural Control of Muscle Contraction	121
1. Excitation-Contraction Coupling	121
2. Neural Control of Muscle Contraction	125
12. Spinal Cord Motor Mechanisms	132
1. Reflexes Controlling Muscle Length, Muscle Tension, and Limb Position	132
2. Spinal Circuits Controlling Locomotion	135
13. Brain Motor Mechanisms	144
1. Cortical and Brain Stem Motor Systems	144
2. Basal Ganglia, Thalamus, and Cerebellum	148
14. The Autonomic Nervous System	154
1. Sympathetic and Parasympathetic Divisions of the Autonomic Nervous System	154
2. Brain Systems Controlling the Autonomic Nervous System	156
15. Translating Sensory Information into Motor Signals	163
1. Vestibulo-ocular Reflex	163
2. Brain Systems Controlling Voluntary Eye Movements	167

<b>Unit V: Higher Neural Functions</b>	<b>173</b>
16. The Limbic System: Homeostasis, Motivation, and Emotion	175
1. Anatomy of the Limbic System	175
2. Functional Roles of the Hypothalamus	178
17. Language and Cognition	184
1. Language	184
2. Other Cognitive Functions	187
18. Learning and Memory	193
1. Long-Term Potentiation in the Hippocampus	193
2. Modification of Synaptic Strength in Reflex Circuits	196
<b>Unit VI: Molecular Neuroscience</b>	<b>203</b>
19. Molecular Aspects of Neural Development	205
1. Cell Adhesion Molecules and Neurite Outgrowth	205
2. Neurotrophic Factors and Synapse Formation	208
20. Genetic and Molecular Biological Approaches to the Nervous System	215
1. Genetic and Transgenic Approaches	215
2. Functional Expression of Genes and Mutagenesis	218
<b>EXAM: Second Midterm</b>	<b>223</b>
<b>FINAL EXAM</b>	<b>227</b>
